"I suffered up to about the limit of human endurance with piles," writes Miss Lueders, from Cornwall, Ont., "I was employed in a factory here, but for a while had to give up work till I got better of this trouble. I read in the Montreal Herald about Dr. Hamilton's Pills, and after using them for two weeks was cured. I can recommend these pills very highly; there are none better. They at once relieve and prevent a constipated condition of the bowels, and from my experience can be depended upon as a perfect safeguard against piles. Dr. Hamilton's Pills of Mandrake and Butternut, I am sure, would be a benefit to every girl or woman."

Take Dr. Hamilton's Pills and your system will be regenerated, revitalized, and made proof against disease.

Good for men, excellent for women, and most effective for children. All ages and both sexes find Dr. Hamilton's Pills a marvelous medicine. Although active, they do not gripe or cause inconvenience, system, thereby maintaining a high still they cleanse and purify the standard of health. Sold by all dealers, 25c. per box, or five boxes for $1.00, or by mail, from N. C. Polson and Co., Hartford, Conn., U. S. A., and Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $2 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 4, 1907

A STRIKING STRIKE

At a church in Southend, England, the choir has gone on strike for the alleged reason that the rector's sermons are "too long and too strong." The choir repeatedly set forth its grievances on this score, but without avail, and finally the choirmaster and two others resigned. Then the rector discharged the organist and the rest of the choir declared a strike.

Choirs and ministers all over the world will be interested in this test of strength. Perhaps there are few churches in which the choir suits the minister, or the minister suits the choir. And in many churches the situation is one of war, more or less mitigated by conspicuous and formal politeness. It will probably seem to most people who hear of this southend incident that the choir went a little too far when it openly protested against the length and strength of the rector's sermons. We do not read that the rector had openly protested against the length and strength of the musical part of the worship. Perhaps he had not dared to protest against anything the musical department did, and only finally protested by firing the organist because he was desperate. He will have the sympathy of many ministers, even if he doesn't get the sympathy of many musicians.

THE USEFUL PENITENTIARIES

Things are not all rosy in some of the American States any more than they are in Ontario. The editor of the Mankato Western Advocate, Kansas, has been having experience, or thinking, or both, and this is the result: About the only men who learn a trade any more are those who are sent to the penitentiary. The country is being imposed upon more and more every year by men who have not mastered the trade which they claim to understand. As soon as a young man can distinguish the difference between a hand-saw and a jack-plane he is a "carpenter." If he can tell mortar from pancake batter he is a plasterer. If he can pick a paint brush out of a pile where half of the bunch are whisk brooms he hangs up his sign as a painter. If he can screw the lid on a fruit jar so it will not leak he is a plumber. If he can tell the difference between a shooting-stick and a jobstick he is a printer, qualified to travel and receive wages as such.

There is a good deal more truth than poetry in this complaint. Trade schools are being operated in many places, and in time they may mitigate the situation. Until then perhaps the penitentiaries will have to continue to help us out.

MALE DRESS REFORM

IT IS HOPELESSLY HAMPERED BY THE STIFF WHITE SHIRT.

The Way This Garment Interferes With Both Health and Comfort. Some of the Absurdities of the Present Masculine Style of Attire.

The necessity by which men feel coerced of proving to the world that they wear white shirts lies at the basis of all the difficulties of the dress problem.

Until the garment becomes extinct it is hopeless to attempt the reform of men's dress on the lines of health and comfort.

It will of course ultimately disappear, for it is but the mark of a stage in the evolution of dress, just as the vermiform appendix is a useless evolutionary remnant in the body. But the question is whether we ought to await the slow course of evolution or to use our common sense and abandon the ancient garment at once.

Why do we wear white shirts? Ages ago it was only the wealthy who could afford to clothe themselves in linen. The possession of linen underwear was then a mark of social position, and there was an obvious advantage in making public display of it.

We may put down three-fourths of the discomfort of the hot summer to the account of the starched shirt. It prevents the very process devised by nature to keep the body cool—the evaporation of sweat. In so far as it hinders this natural process in summer, the white shirt favors disease. But in winter it is a fruitful cause of illness.

In winter the mere wearing of a white shirt would no doubt leave a man no better and no worse if he were content to wear it for his own satisfaction. But the curious law of evolution comes in and compels him to wear it in such a way as to do himself physical injury.

Wherever evolution is at work it leaves vestiges—literally, *footprints*. Probably it is millions of years since the vermiform appendix became a useless organ, but it still survives. All evolutionary survivals appear to be harmful. The appendix is the seat of appendicitis. In the inner corner of the eye there is the remnant of a once useful third lid, which now only lodges dust and causes irritation.

The lord chancellor's wig was once a comfort in ancient drafty legislative chambers and now merely serves to make a sensible man look ridiculous and give him headaches.

People who drew up laws were long ago paid according to the number of words, but the multiplicity of words now only causes confusion. So the white shirt that was once a badge of wealth and culture, being no longer of value for that purpose, is only a cause of discomfort and disease.

It is necessary to cut a place out of the vest and the coat, just over the most important organs of the body, in order to prove to our neighbors that we wear white shirts. Consequently in the winter time we expose the lungs and the air passages to the cold wind and the cold rain.

From the point of view of health nothing could be more stupid. Bronchitis is one of the most deadly of all diseases in this country. Bronchitis is simply inflammation of the bronchial tubes. This inflammation is excited by a chill, a chilling of that part of the body left exposed in order to show that we wear white shirts.

The white shirt, in fact, might appear in the tables of the registrar general as the cause of so many deaths, perhaps 100,000 a year.

And does it really improve a man's appearance? By virtue of the association of ideas it certainly does. Usually men who do not wear white shirts are not given to cleanliness. The man who wears a white shirt washes his face and hands and brushes his clothes; hence when we see a white front and white cuffs we experience that pleasant sensation produced by general neatness of the person and clothing. But that a few square inches of white clothing over the chest makes a man look better is an absurd conclusion.

The case for the white shirt has not a leg to stand upon. The garment is uncomfortable, unhealthy and unbecoming. And as it has lost the only useful function it ever possessed—that is, its symbolism of exceptional wealth—we ought to discard it altogether. The difficulties of this course are very great no doubt. What we want is an "antiwhite shirt society," which would agree to wear, from some prearranged date, a dress designed wholly with regard for comfort, health and beauty.—T. F. Manning in London Gossip.

Making Love Up a Tree.

Billing and cooing among the Fijians is a curious feature in their social customs. It is decidedly against the rule to do any courting within doors. The gardens or plantations are the spots held sacred to Cupid, and the generally approved trysting place of lovers is high up among the branches of a breadfruit tree. You may often walk around a plantation on a moonlight night and see couples perched forty feet from the ground in the breadfruit trees, one on each side of the trunk, a position which comes fairly within the limits of a Fijian maiden's ideas of modesty.

Lord Rosebery's Definition.

It is to Lord Rosebery that we are indebted for the most modern definition of memory. "What is memory?" said a friend one day to him. "Memory," replied his lordship, "is the feeling that steals over us when we listen to our friends' original stories."—London Bystander.

Friendship is a good deal like your credit. The less used the better it is.—Siloan Springs (Ark.) Herald and Democrat.

Ontario's Text Book Commission

Toronto, February 2.—The Text Book Commission, appointed by the Ontario Government to enquire into the school book question, has about completed its report, which will be presented to the Legislature next week.

—On Saturday we will sell eight colored stereoscope views for only 25 cents. Hundreds to choose from. Times Bookstore.

DRESSING TABLE.

This One, Made From a Packing Box, Is Quite Attractive.

A dressing table made at home from an ordinary packing case is perhaps not a new idea, but one well worth remembering, and certainly here is a very charming result that may be had with the utmost simplicity of labor.

One of the sides of the case forms the top of the dressing table, the opening being in front and covered by drapery to hide the interior. Cloth should be stretched tightly across the top and tacked on around the sides of the box. The drapery around the two sides should also be tacked on.

PACKING BOX DRESSING TABLE.

Across the front two curtains should be arranged to slide on a small rod, or even a piece of wire stretched across the top of the opening.

When the curtains have been placed in position a small flounce should be fastened on with brass beaded tacks. This flounce will hide the row of tacks which fastens the large curtains and gives a finishing touch to the dressing table which is really quite smart.

Some pretty material chosen perhaps to somewhat match the color of the wall decorations would look well, and the whole cost, including case, drapery, nails and everything, should not be very great.

Of course no dressing table is complete without a large mirror, and a secondhand one might be procured and stained to match the color of the material used to drape the case. Casters should not be forgotten and can easily be obtained.—New York American.

The Thin Woman.

First of all the thin woman who wants to gain flesh must stop worrying. She must eat little and often and drink milk between meals and at bedtime. Fruit in quantities must be a part of the daily diet, cereals, starchy and sweet vegetables, Irish and sweet potatoes, peas, corn and beans and salads of all sorts, not to mention bisque and cream soups. Hot water should be taken morning and night and hot, not boiled, milk in the same manner.

Nourishing Soup.

Take about one pound of shin of beef and cut into small pieces. Wash four ounces of pearl barley and put into saucepan with meat, also a small onion cut up very fine, a few potatoes, salt, pepper and a tomato. Pour over all this about three pints of cold water. Let it come to the boil, skimming carefully. It should then simmer for about three hours. Strain, add a little milk and boil up again.

Cleaning Clothes.

The best article to use for cleaning clothes is a piece of woolen cloth. If possible use a strip of the same cloth as the garment to be cleaned. Take a piece four inches wide and eight inches long and roll lengthwise. Fasten at the middle with a stout rubber band. Soak either end with gasoline and rub the article to be cleaned. This very simple device works like magic.

Dress Trimmings.

It does not seem very wise to put much money into perishable dress trimmings or decorations which are likely to go out of fashion before they are worn out. Much more sensible is it to accumulate, little by little, good pieces of lace. Real valenciennes is not prohibitive and lasts a lifetime. Point and duchess are expensive at first, but a little goes a long way and makes the plainest gown elegant.

Woman at Her Best.

A woman's character and powers are finest about forty. A woman has gained everything at forty and lost nothing; she is at the full vigor of her intellectual powers, she has acquired experience and judgment and is not far enough away from youth to have become unsympathetic even to its wildest vagaries.—Bystander.

The Carpet Sweeper.

Exact that your carpet sweeper shall be cleaned thoroughly on every sweeping day and never put away dirty. Unlock it over a newspaper and take out every bit of dust, lint and dirt, then rinse the brush in soapsuds and dry before setting aside.

"Don't settle down to a state of big feet even if yours happen to be large," says a dealer. "Select shoes with low vamps, wear your heels high and broad and don't forget that pointed toes are always good."

Large pillows are not good to sleep on, because the head is too high when it rests on them and this prevents that deep, regular breathing that gives good lungs.

Clean velvet by rubbing with a cloth dipped in powdered magnesia. Shake well occasionally and when entirely gone over brush with a clean brush.

Don't form the habit of running up bills; they only lead to overcharges and accumulative debts.

Jealousy.

"That word 'communist,' my dear," observed the young husband, correcting her, "has the accent on the first syllable."

"How do you know?"

"The dictionary says so."

"I never saw a man as prejudiced in favor of dictionaries as you are!" exclaimed the young wife. "I wish you had married a dictionary!"

Too Much at Stake to Forget.

"When you are absorbed in your business cares downtown today, Herbert, you will forget your little wife entirely."

"No, darling. That steak you cooked for me with your own sweet hands this morning for breakfast will keep you in my memory every minute of the day."

A WOMAN'S CARES.

They Seem to Pursue Her Everywhere Through Life.

"I wish," said the matron, "that some way could be devised to give women vacations. Every summer we hear wails about the poor men who have to stay in the city while their wives flee to seashore and mountain, but really it is the women who never get any vacation. The dictionary defines a vacation as 'intermission of a stated employment.' Now, what intermission of her stated employment does the mother of a family ever get? She may change her environment, but the same old cares and worries are with her still. To a father the material cares of a country cottage may be only an interesting diversion. It is positively exhilarating to him to go walking or swimming or fishing with the children, of whom he sees comparatively little during his working days, but to the mother these things are merely the same old grind. The only way for her to secure an intermission of her stated employment is to get away from her children, and I have yet to learn how that can be accomplished. But it is not only mothers who cannot get any rest. A woman's cares, whether she be married or single, pursue her everywhere. There is no wilderness so wild as to let a woman escape altogether from the cares of the toilet. Neither can she escape unless she flees altogether from society the obligation to be agreeable and entertaining. But who expects a man to be agreeable when he is tired?"—New York Tribune.

DRESS HINTS.

Simplicity of taste in dress is good taste.

In basting the skirt band to the skirt hold the skirt toward you and take care to match the center of the skirt to the center of the belt.

Plush goods and all articles dyed with aniline colors which have faded from exposure to the light will look as bright as new after sponging with chloroform.

A mixture of alcohol, one part, and water, three parts, wonderfully freshens black dresses and suits. They should be sponged all over on the right side, then pressed on the wrong side, while still damp.

It may seem superfluous to mention so simple a matter, yet not all dressmakers or professional seamstresses appreciate the importance of putting patches on with the twill or nap of the goods going the same way in patch and goods patched.

The Right Kind of a Girl.

Let a girl be ever so graceful in the dance, let her be ever so elegant of walk across a drawing room, ever so right in conversation, she must possess some other qualities to convince the great average run of young men that she can be a manager of his home. Frugality, woman instincts of love for home, an eye to the best interests of her husband and the careful training of her children—these are the traits which make the good wife of today and which young men look for in the girls they meet, says Woman's Life. Men may sometimes give the impression that they do not care for common sense in their sweethearts, but there is nothing they so unfailingly demand of their wives.

The Salamander.

Some housewives may not know what the salamander used in cooking is. It is a circular iron plate, to which is attached a long handle. When any article of food is to be browned the salamander is made red hot in the fire and then held over the article. An ordinary fire shovel may be used instead of a salamander, but it is not especially good for the shovel to be heated so intensely.

How Frostbite Comes.

The first effect of cold on the skin is to contract the tiny vessels that connect arteries and veins. Arteries are vessels that take blood from the heart. Veins are those that bring blood back to the heart, and the connecting vessels are called capillaries. While these little vessels are contracting the skin itself becomes tenser. In a few moments or minutes the effects change. The tiny nerves whose stimulation caused contraction of the capillaries are more or less paralyzed, and the vessels dilate so the skin gets red. Soon the veins are dilated, and the skin becomes bluish. Then the nutrient fluid in the skin (the lymph) is coagulated, and the stretched skin ruptures or "chaps." If the cold is more severe its action is deeper, and the blood itself may be coagulated. This is frostbite.

ARTHUR H. SYDERE,
Clerk of the Legislative Assembly.
Toronto, January 2nd, 1907.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

Tenders for Pulpwood Concessions

TENDERS will be received by the undersigned, up to and including the eighth day of March next, for the right to cut the Pulpwood on a certain area, in the District of Nipissing, north of the Townships of Holmes, Hurt, Eby, Otto, Boston, etc., and immediately west of the interprovincial boundary line.

Tenders should state the amount they are prepared to pay as Bonus, in addition to such dues as may be fixed, from time to time, for the right to operate a pulp, or pulp and paper industry on the area referred to. Successful Tenderers will be required to erect mills on the territory, or at some other place approved by the Lieutenant-Governor in Council, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender, a marked cheque, payable to the Treasurer of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out the conditions, etc. The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc., apply to the undersigned

F. COCHRANE,
Minister of Lands, Forests, and Mines.

Toronto, December 29, 1906.

No unauthorized publication of this notice will be paid for.

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you, and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers heal up, the nerves become strong as steel. So that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. You feel yourself a man and know marriage cannot be a failure. We invite all the afflicted to consult us confidentially and free of charge. Don't let quacks and fakirs rob you of your hard-earned dollars. WE WILL CURE YOU OR NO PAY.

NO NAMES USED WITHOUT WRITTEN CONSENT.

THREATENED WITH PARALYSIS.

Peter H. Summers, of Kalamazoo, Mich., relates his experience.

"I was troubled with Nervous Debility for many years. I lay it to indiscretion and excesses in early youth. I became very despondent and didn't care whether I worked or not. I imagined everybody who looked at me guessed my secret. Imaginative nightmares at night weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair loose, memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis. I took all kinds of medicines and tried many first-class physicians, wore an electric belt for three months, went to Mt. Clemens for

BEFORE TREATMENT

baths, but received little benefit. While AFTER TREATMENT at Mt. Clemens I was induced to consult Drs. Kennedy & Kergan, though I had not all faith in doctors. After a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through my nerves. I was cured mentally, physically and sexually. I have sent them many patients and will continue to do so."

CURES GUARANTEED OR NO PAY.

We treat and cure VARICOCELE, STRICTURE, NERVOUS DEBILITY, BLOOD DISEASES, URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES.

CONSULTATION FREE. BOOKS FREE. If unable to call write for a question Blank for Home Treatment.

THE REFUGEES

By A. CONAN DOYLE,

Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1895, BY HARPER & BROTHERS

was to be prepared for the reception that night of the archbishop of Paris that he understood how urgent was the danger.

Mme. de Montespan had spent the evening stretched upon a sofa in the worst possible humor with every one around her. There was the sound of an opening door and of a quick step in her anteroom. Was it the king, or at least his messenger with a note from him?

But, no; it was her brother, with the haggard eyes and drawn face of a man who is weighed down with his own evil tidings. He turned as he entered, fastened the door and then, striding across the room, locked the other one which led to her boudoir.

"We are safe from interruption," he panted. "I have hastened here, for every second may be invaluable. Have you heard anything from the king?"

"Nothing." She had sprung to her feet.

"The hour has come for action, Francoise."

"What is it?"

"The king is about to marry Mme. de Maintenon."

"The gouvernante! The widow Scarron! It is impossible!"

"It is certain that he will marry her."

The woman flung out her hands in a gesture of contempt and laughed loud and bitterly.

"You are easily frightened, brother," said she. "Ah, you do not know your little sister. Perchance if you were not my brother you might rate my powers more highly. One day is all I ask to bring him back."

"But you cannot have it. The marriage is tonight."

"You are mad, Charles."

"I am certain of it." In a few broken sentences he shot out all that he had seen and heard. She listened with a grim face and hands which closed ever tighter and tighter as he proceeded.

"I shall go and see him," she cried, sweeping toward the door.

"No, no, Francoise. Believe me, you will ruin everything if you do. Strict orders have been given to the guard to admit no one to the king."

"Had I only a day, Charles, I am sure that I could bring him back to me. There has been some other influence here—that meddlesome Jesuit or the pompous Bossuet, perhaps. Only one day to counteract their wiles. Charles, it must be stopped; I say it must be stopped! I will give anything, everything, to prevent it!"

"What will you give, my sister?"

She looked at him aghast. "What! You do not wish me to buy you?" she said.

"No, but I wish to buy others."

"Ha! You see a chance, then!"

"One, and one only. But time presses. I want money."

"How much?"

"I cannot have too much—all that you can spare."

With hands which trembled with eagerness she unlocked a secret cupboard in the wall in which she concealed her valuables. A blaze of jewelry met her brother's eyes as he peered over her shoulder. At one side were three drawers, the one over the other. She drew out the lowest one. It was full to the brim with glittering louis d'ors.

"Take what you will!" she said. "And now your plan! Quick!"

He stuffed the money in handfuls into the side pockets of his coat. Coins slipped between his fingers and tinkled and wheeled over the floor, but neither cast a glance at them.

"Your plan?" she repeated.

"We must prevent the archbishop from arriving here. Then the marriage would be postponed until tomorrow night."

"But how prevent it?"

"There are a dozen good rapiers about the court which are to be bought for less than I carry in one pocket. I will gather them together and wait on the road."

"And waylay the archbishop?"

"No; the messengers."

"Oh, excellent! You are a prince of brothers! If no message reach Paris we are saved. Go; go; do not lose a moment."

"It is very well, Francoise, but what are we to do with them when we get them? We may lose our heads over the matter, it seems to me. After all, they are the king's messengers, and we can scarce pass our swords through them."

"No?"

"There would be no forgiveness for that."

"But consider that before the matter is looked into I shall have regained my influence with the king."

"All very fine, my little sister, but how long is your influence to last? A pleasant life for us if at every change of favor we have to fly the country! No, no, Francoise; the most that we can do is to detain the messengers."

"Where can you detain them?"

"I have thought of that. There is the castle of the Marquis de Montespan at Portillac."

"Of my husband—of my most bitter enemy! Oh, Charles, you are not serious."

"On the contrary, I was never more so. The marquis was away in Paris yesterday and has not yet returned. Where is the ring with his arms?"

She hunted among her jewels and picked out a gold ring with a broad engraved face.

"This will be our key. When good Marceau, the steward, sees it, every dungeon in the castle will be at our disposal. It is that or nothing. There is no other place where we can hold them safe."

"But when my husband returns?"

"Ah, he may be a little puzzled as to his captives. And the complaisant Marceau may have an evil quarter of an hour. But that may not be for a week, and by that time, my little sister, I have confidence enough in you to think that you really may have finished the campaign." He took her fondly in his arms, kissed her and then hurried from the room.

For hours after his departure she paced up and down with noiseless steps upon the deep, soft carpet, her hands still clinched, her eyes flaming.

(To be continued)

"This will be our key."

To stop a Cold with "Preventics" is safer than to let it run and cure it afterwards. Taken at the "sneeze stage" Preventics will head off all colds and Grippe, and perhaps save you from Pneumonia or Bronchitis. Preventics are little toothsome candy cold cure tablets selling in 5 cent and 25 cent boxes. If you are chilly, if you begin to sneeze, try Preventics. They will surely check the cold, and please you. Sold by J. D. Tully.

MODERN CIVILIZATION.

Its Complexity, Hurry and Worry Shortening Our Lives.

Not long ago while traveling I chanced to stop at a village on the river Rhine, where I found an astonishing number of old people. There were a dozen over a hundred years of age and many from eighty years old up to the century mark, yet straight and vigorous. One woman nearly a hundred years old was earning her living by picking hops. Her grandchildren were middle aged. It was quite wonderful. But there was no mystery about it. It was merely the effect of a simple life spent largely in the fields, with plain diet, consisting of a few vegetables and fruits, little meat, and native beer and wine for beverages.

Nothing can be more obvious than that the very complexity of our modern civilization is shortening our lives. But of all the evils that afflict us the worst and most destructive are hurry and worry. Hurry drives the body machine beyond its capacity, while worry racks it inwardly. Of the two worry is probably the worse. This might indeed be called the age of worry. Because of the intense nervous strain to which we are subjected we do vastly more worrying than did our forbears. The average man of today is continually surrounded and pursued by phantom troubles, which, though few of them ever materialize into realities, haunt him continually, ruining his peace of mind and injuring his health.

Getting Married.

I don't know myself what getting married feels like, but it cannot be much more exciting than watching other people getting married. Indeed, I always get something like palpitation of the heart just before the priest utters the final fateful words, "I declare you man and wife." Half a second before you were still free. Half a second after you were bound for the term of your natural life. Half a second before you had only to dash the book from the priest's hands and put your hands over his mouth, and, though thus giddily swinging on to the brink of the precipice, you are saved. Half a second after—

All the king's horses and all the king's men
Cannot make you a bachelor again.

It is the knife edge moment betwixt time and eternity.—From Le Gallienne's "His Quest of the Golden Girl."

The Name "Fife."

The origin of the name Fife is not known. One historian tries to show that it comes from the Celtic word veach, a Pict, and means that the district was inhabited by Picts, but that is obviously absurd, as Fife was not specially the home of any of the Pictish nations. The tradition that finds greatest favor is related by a monk, who states that the first known possessor of the district which has since grown into the kingdom of Fife was one Fifus Duffus, a famous chieftain whose date is lost in the mists of antiquity.

The Cobalt Development Company, Limited

Incorporated under the Ontario Mines Company's Act

Proposed Capital $5,000,000. Divided in 5,000,000 Shares $1 each

OFFICERS:

EWAN MACKENZIE : . . President
THOMAS AIKENHEAD, . . Vice-President
FRANK H. POTTS, . . . Secretary

Frank H. Potts, . . Toronto, Ont.

BANKERS—The Crown Bank of Canada.
SOLICITORS—Messrs. Bicknell, Morine, Bain and Strathy.

An investment which will not only yield big dividends, but will increase in market at 20c. per share. $70 will buy 100 shares, $700 1,000 shares, $2,000 10,000 shares.

THE PROPERTY

1. The east half of the north-east quarter of the south half of lot 6 in the 6th concession of Coleman Township.
2. The south-west quarter of the south half of lot 7, in the first concession of Bucke.
3. One 40-acre claim in the Township of Coleman, Anima-Nipissing District, adjoining Claim No. 1401-2.
4. Twenty acres in the Township of Coleman, Anima-Nipissing District, being the north half of the south-east quarter of the north half of lot 19, concession 3.
5. One 40-acre claim in the Anima-Nipissing District, being mining claim No. 1401-2, known as the "South Claim," situated about 1-4 of a mile west of Bay Lake and about one mile north of Anima-Nipissing. Total 100 acres.
6. 4,000 lots in the townsite of North Cobalt, beatifully situated on the west shore of Lake Temiskaming, containing 400 acres, close to the Green-Meehan and Ited Rock properties, and only 100 miles from Toronto, on the Temiskaming and Northern Ontario Railway, and is sure to be the coming summer resort, as there is good fishing, boating, and bathing. The finest scenery, most interesting surroundings, and a very bracing climate.

These lots alone in a year or so will be worth the full capitalization of the company. The mining properties of this company are far better value than a great number of properties now on the market at double the price, without the townsite, which practically acts as a security, which is sure to increase in value every year, and protect every shareholder in full for his investment, with the chance of making very large money out of the development of the mining property.

Our shares will be increasing in value from year to year, and in three years from now should sell on the open market for $10.00 a share from the dividend it will then pay.

Parties wishing to secure an allotment can do so by wire or letter, as there is no doubt every share will be subscribed for before February 1st.

Call or write for prospectus, reports, maps, etc., that will give fullest information.

All drafts, checks, etc., may be made payable to the order of OWEN J. B. YEARSLEY.

The Capital of the Company is One Million Dollars ($1,000,000) in One Million Shares of One Dollar ($1.00) each, stock non-assessable.

OBJECTS OF THE COMPANY.

This Company has been organized by influential men for the purpose of engaging very extensively in the exploration and development of the mineral lands in Northern Ontario and with powers to buy and sell and develop promising mining claims.

The Company has already acquired the following valuable property known as the Currie property, being a location in the Temagami Forest Reserve, known as J. B. 22 on a plan filed by W. J. Blair, P. L. S., in the Bureau of Mines, on the 19th of September, 1906, said parcel consisting of thirty acres.

The location known as J. B. 22 in the Temagami Reserve is a very valuable one and adjoins the well-known Nadeau, Edison and Legree locations, from which ore has been shipped. The formation and ore in this section of the Temagami Reserve is similar to the best producing mines around Cobalt.

Mr. J. F. Whitson, Government Surveyor, who has just returned from Cobalt, says in an interview published in the "Evening Telegram" of December 3rd last: "Excellent reports have been received at Cobalt on the ore in the Temagami Reserve, and it is said that the findings there compare favorably with those around Cobalt."

The Company will prepare to sink a shaft on J. B. 22 and have no hesitation in saying that we will have ore ready for shipment May 1st, 1907.

Mr. Eggert, M.E., in his report on this property, says:

J. B. 22. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite the V. and VI. Concession of Coleman. Lease has been granted.

The claim is a 30 acre one and about 600 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein, following the contract between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim, is stripped all the way across the 30 acres of J. B. 22 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18-inch vein of quartz, richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains, while the first one, as already said, is uncovered for all of 30 chains, making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 60 feet, and it shows 6 inch niccolite, 16 inch smaltite, together with cobaltite. Assays gave 672-1284-602-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes, and is one which needs only a shaft of 50 feet depth to be ready as a producer.

JACOB M. EGGERT, M.E.
New Liskeard, 17th November, 1906.

Do You Wish to Have a Share in the Wealth of Cobalt?
The Opportunity Now Presents Itself to You.

This is an exceptional opportunity to secure stock in a first-class company at half value. So far as we aware no company has been organized in Cobalt district having better prospects.

The shaft on the Nadeau property, within 25 feet of our southern boundary, demonstrates the value of the ore in our jumbo vein. The Edison mine is close proximity is shipping ore, also the Legree and Kay Foster.

SUBSCRIPTION

We offer one hundred thousand shares at 50c. per share (par value $1.00) and believe the stock will sell above par within a few weeks. Subscriptions will be filed in order received and we reserve the right to reduce or return same. All subscriptions should be accompanied with cheque, draft or money order payable to order of the company at Toronto, fund today or it may be too late, as price will soon advance to par.

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 320 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 1 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 1 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 40 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of the district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 21 to 170 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainty shows up fine. This shaft now has 30 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

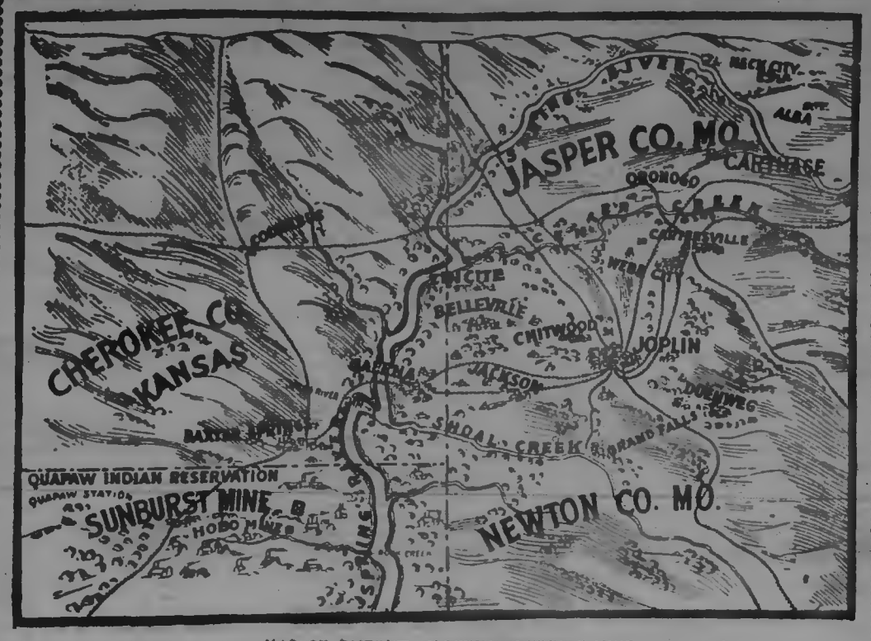
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 50 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ores. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magnolia, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 1½ feet from our property and is in the same ore bed. Shaft No. 2 is only 30 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 3 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.



MAP OF DISTRICT SHOWING SUNBURST MINE.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy *before* the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance *in nine monthly payments*. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By *subscribing*, for instance, $40.00 now and remitting only $5.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $40.00 worth, although your first payment is but $5.00.

You really invest $5.00 and get all the benefit of an investment of $40.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply demand on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to the mine—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the *same thickness*.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on its south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 60 feet in diameter. The shaft of the Hobo Mine was sunk within a foot of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 55 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No 1 shaft, 5 1-2 by 8 feet, is down 82 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 8 1-2 by 90 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 70-foot face of ore.

Shaft No. 3, 5 1-2 by 8 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines.

Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscoda Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	25 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	38 per cent.	Linger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $61.12 per ton for lead and $26.61 for zinc to $42.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 80 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 12 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 387,169.00
A. W. Taylor	160	160,766.00
J. W. Aylor	40	676,571.00
The Burgner Mining Co.	80	198,579.00
Center Creek Mining Co. (production to date)	80	6,000,194.00
Mrs. E. J. Chinn	120	233,799.00
Majestic Consolidated Zinc & Lead Co.	52	244,490.00
Continental Zinc Co. (production to date)	200	1,575,503.00
Consolidated Troup Mining Co.	40	193,619.00
Daughtery-Davy-McMillan Estate	60	456,806.00
The Empire Zinc Co.	41	120,319.00
Fox Heirs	20	130,124.00
Granby Mining & Smelting Co., 1905	...	1,261,610.00
Granby Mining & Smelting Co., 1904	...	1,076,050.00
John G. Guinn	640	42,247.00
Pittsburg-Joplin Lead & Zinc Co.	10	46,000.00
Pittsburg-Missouri Zinc & Lead Co.	120	413,204.00
United Zinc Co.	136	280,276.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRDS-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Comp

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 1 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 320 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 90 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

FOR YOUNG FOLKS

BALANCING FEAT.

How to Hold a Cup of Water on the Point of a Carver.

When you are told that it is possible to balance a cup one-quarter full of water on the point of a carving knife don't express your incredulity without giving one a chance to explain the feat.

Here is the way to do it, but nervous persons need not attempt it. Insert a cork in the handle of a coffee cup tightly, but not so vigorously as to snap the handle off. Stick a four pronged fork in the cork, as shown in

BALANCING THE CUP.

the illustration, two of the prongs on one side of the handle and two on the other.

This arrangement lowers the center of gravity of the apparatus, and you may now place the cup on the point of the knife. Do this carefully to see that the cup is in exact equilibrium.

It is hardly necessary to say that the hand that holds the upright knife must be a steady one or there will be a smashup, but with quiet nerves and careful handling the feat may readily be accomplished.—Chicago News.

THE RABBIT FAMILY.

How Molly Cottontail Teaches Bunny the Ways of Life.

Does it ever occur to you that young animals have bushels of things to learn and that the length of their lives depends to a large extent upon how well they learn their lessons?

For example, we will take the rabbit. Bunny's first lesson will be in what kinds of food to eat, how to know his enemies and how to play tricks and gain useful knowledge.

Molly Cottontail, the mother rabbit, will impress upon her baby that he must lie low and mingle with the dry leaves and underbrush while he is little and helpless, because the Creator in his goodness has provided a coat the color of his natural surroundings for his special protection. She will say in rabbit talk: "Now, Bunny, one thump with my hind feet means freeze (keep quite still), an enemy is approaching; two thumps, slow, means come; two thumps, fast, wonder; three thumps, run for dear life."

Bunny is taught how to wabble his nose to keep his smeller clear, that dewdrops from the bush is the best water to drink and that he should often taste his mother's lips to make sure he is having the same kind of fodder.

Scrambled Eggs in a Hat.

Here is an old trick, but perhaps you younger boys and girls do not know it.

It is the trick of cooking scrambled eggs in a hat.

You ask the company if they would like a dish of scrambled eggs. Then you break four eggs in a hat, drop in a pinch of salt, place the hat for a short time over the flame of a candle and shortly afterward pour into a dish the scrambled eggs, quite hot.

How is it done? Why, the scrambled eggs have in reality been previously prepared, covered and placed in the hat. But when making your proposition to the company you hold the hat too high for them to see the inside of it.

Your eggs—all but one—were really empty ones, from which you had previously sucked the contents. The one solid one you should have accidentally dropped on the table, letting it break, so as to fool your company into supposing that the other four were also solid eggs.

The Enchanted Tray.

Take an iron tray and set it on top of four glasses which have been wiped perfectly dry.

Charge it with electricity by rubbing it vigorously with a sheet of brown paper.

You will presently produce sparks strong enough to leap from the tray to your finger, although you will be in no danger of a shock.

This is called the enchanted tray and is a nice thing to amuse your little friends with.

Contentment.

In summer, when 'tis very warm
And all the folks complaining go,
It's then I like the winter time,
Brave winter with its ice and snow.

And when the blustering blizzards rave
And it is cold as cold can be
The very hottest summer day
Is not one whit too warm for me.

In spring I like the bracing fall,
In autumn love the gentle spring,
So, you see, the whole year round
I'm satisfied with everything.

Discovered by Accident.

The vast collection of the state papers of Thurloe, Cromwell's state secretary, which make about 700 volumes, was discovered by accident. They had been hidden in the false ceiling of a room in Lincoln's inn. By accident, the fastenings having rusted away, the ceiling fell, and this precious collection came to light.

The Flounder.

The flounder is an industrious fish and lays 7,000,000 eggs in a year.

"Rosamond Chief"

GOLD MINING COMPANY

Having just been incorporated with a capital of 1,500,000 shares, par value $1.00 each, there has been deposited in the treasury 500,000 shares to be sold for developing work. Every share fully paid and forever nonassessable. No personal liability to any stockholder.

Our property is located in Kern county, about 85 miles north from Los Angeles, and near the celebrated Hamilton mine, within 4 miles of Rosamond on the Southern Pacific Railroad.

We have a 150-foot ledge with assay values from $5.00 to $10.00 per ton.

We are now selling a small block of treasury stock for the purpose of putting in a plant for working the ore, and we want you with us. As we have a fine mining property, not a prospect, we will only sell a limited amount of this stock at the low price of 5c. per share. Send in your orders at once. For further information and prospectus, address our office.

EXPERT'S REPORT.

Los Angeles, Cal., Dec. 28, '04.

ROSAMOND CHIEF GOLD MINING CO.,

Gentlemen: I have made a special examination of the property of your company, and I find this property a valuable one, consisting of four claims, namely, the Mary Anna, Maggie, Alice, and Little Gem. All four have valuable ledges with average assay value of $20.25 per ton. This average is taken from the surface to a depth of 10 feet. I am satisfied it will do a great deal better with depth and as developing continues.

Yours truly,

S. M. SARMAN.

NAME.....

ADDRESS.....

THE FIRST DIRECTORY.

Quaint Olden Time New York Business and Social Addresses.

In the first directory of New York city, which was issued in 1786, there are some peculiar and quaint entries. For instance, in those days it was not uncommon for medical practitioners to sell drugs, as is shown by the following address, "Samuel Bredhurst, physician and apothecary, 64 Queen (now Pearl) street."

Clergymen of that period were exceedingly precise regarding their titles. Thus, "Abraham Bache, reverend of the Church of England, 29 Smith street," and "Jose Phelan, clergyman of the Church of Rome, 1 Beekman street."

Leon Bogers, tailor, of 5 Broadway, was described as a "breeches maker;" John Bean, 60 Broadway, as "surgeon and tooth puller;" S. Crygier, 69 Cherry street, "punch and porter house;" Jo Delaplaine of 252 Queen street, "Quaker speaker;" D. Hitchcock, 89 Queen street, "house carpenter and undertaker;" John Hogland, 95 Queen street, "fiddler, etc.;" Henry H. Kip, 25 King street, "inspector of pot and pearl ashes;" John Nitchie, 7 Garden street, "starch and hair powder maker;" Samuel B. Webb, 29 Lower Dock street, "gentleman."

In those days, too, there were a great many "gentlewomen" and a few "washwomen." All teachers were then addressed either as "schoolmasters" or "schoolmistresses." The retail dealers on Broadway and Wall and Queen streets called themselves "shopkeepers," the hotel men were "tavern keepers," and the policemen were "watchmen."

THE COLD WATER ORDEAL.

It Was Once an Important Test of Guilt or Innocence.

The cold water ordeal was one of the most important tests of guilt or innocence a few hundred years ago. If the accused floated, he was guilty; if he sank, he was innocent. In the twelfth century some altar vessels were stolen from the cathedral of Laon, and the learned Anselm proposed that a child from each parish and then a child from each household should be put to the test and so on until the guilty one was found. The proposition raised a great outcry, and the people clamored that those who had easiest access to the church be the first to undergo the ordeal.

This looked reasonable enough. So the bishop ordered the six priests of the cathedral to prepare for the test. In the meanwhile Anselm thought to try the experiment himself as a preliminary test. So he was bound and placed in a tub of water. To his great satisfaction as well as discomfort he promptly sank. The day arrived and with it an immense crowd to see the trial. The first priest sank, the second floated, the third sank, the fourth floated, the fifth sank, and then Anselm himself—wonder of wonders—in spite of experiments and protested innocence floated around with the buoyancy of an air bubble. While he was serving his sentence in prison Anselm found time to write a learned treatise on the "Inexpediency of the Water Ordeal and Its Failure In Many Cases."

New Zealand Mocking Birds.

The Poe honey eater is one of the commonest and at the same time handsomest of the New Zealand birds. The neck is ornamented with a frill of curly feathers of a greenish color with white centers, and the throat is adorned with a tuft of white feathers, which has gained for it the popular name of "parson bird," an appellation appropriate not only because of this decoration, but because of the resemblance of its peculiar attitudes when singing to the gesticulations indulged in by exuberant lecturers when wishing to drive home their points. The bird is an excellent mimic and can be taught to repeat short sentences with extraordinary clearness and also to whistle short songs quite as well as a parrot.

Queen Bess' Giant.

Queen Elizabeth had a Flemish porter who was over eight feet high and of great strength, and he was an extremely good natured man. Whenever he met any one who was abnormally tall he used to patronize him in a friendly sort of way, and on one occasion when he met at an inn two soldiers who were over six feet in height he said, "Come under my arms, my little fellows." And, taking them up, he walked down the room with them under his arms as if they had been children, much to their disgust.

Willing to Oblige.

Uncle (to little Bertie, aged five, who is being taken off to bed)—Good night, Bertie. Of course you always remember your aunts and uncles in your prayers? Bertie—Oh, yes, Uncle Felix! Shall I tell you what I say? I say, "God bless Aunty Kitty and make her thin, and God bless Uncle James and make him fat, and God bless Uncle Felix and"—which do you want to be, fat or thin?—Punch.

A Fast Train.

"Is this a fast train?" asked a passenger who was tired of looking at a station at which the train was not supposed to stop.

"Of course it is," was the conductor's reply.

"I thought so. Would you mind my getting out to see what it's fast to?"

Always the Same.

Tailor's Little Boy (walking with his father, sees a street roller)—What's that, papa? Tailor—The street's being newly ironed and pressed.—Figaro.

"Some men can take new furniture and make it look as if it was made a century ago," says a journalist. So can some children.

He Cheapened Pens.

Sir Josiah Mason was, according to his biography, walking in Bull street, Birmingham, in the year 1828 when he saw some steel pens, price 3s. 6d. each. Josiah was a hard up maker of split rings. No sooner had he seen the pens than he went home, made some better than those in the shop, sent them up to London and got a large order by return. At thirty years of age Mason's capital was 30 shillings. At sixty he had given away £400,000.

Hard Luck.

"Why does Baron Hoffman look so dejected lately?"

"Haven't you heard? He married a rich widow not long ago, and now a banker has absconded with all her money."

In Egypt the cat was sacred to the moon, and when a cat died its master shaved off his eyebrows in sign of mourning.

Cooked Foods.

Cooked foods should be eaten moderately warm, not hot. The high temperature injures the mucous lining of the whole digestive apparatus and by increasing the flow of perspiration renders the skin more susceptible to chills and colds. The habit of eating hot food also increases a desire for liquids, and thus one bad habit leads to another.

The Flute.

Conductors of orchestras find that the flute is far more often played out of tune than the violin, the reason being that many of its natural notes are not strictly in tune with the rest of the band.

A Queer Scottish Custom.

In Scotland the custom still prevails of taking down the window blinds when there is a corpse in a house and hanging white sheets across the windows. The custom also prevails in some parts of England, particularly in the northern part, and in many families a special "death sheet" is reserved for the chamber in which the corpse may lie and is often used for many generations.

Our Strongest Stones.

The traprocks of New Jersey and the dolerites of Staten Island are the strongest stones in the United States, their crushing resistance being 24,000 pounds to the cubic inch.

The Caterpillar.

The female of one species of caterpillar tears off the fur from the extremity of her abdomen to make a soft bed for her eggs and to preserve them from the cold. Yet she never sees her young, for after she has accomplished the task of laying the eggs the caterpillar invariably dies.

Eyelashes in Marble.

Only one marble statue of the human figure with eyelashes is known. It is one of the gems of the Vatican, the Sleeping Ariadne, and was found in 1503.

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated)

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

BALANCING FEAT.

How to Hold a Cup of Water on the Point of a Carver.

When you are told that it is possible to balance a cup one-quarter full of water on the point of a carving knife don't express your incredulity without giving one a chance to explain the feat.

Here is the way to do it, but nervous persons need not attempt it. Insert a cork in the handle of a coffee cup tightly, but not so vigorously as to snap the handle off. Stick a four pronged fork in the cork, as shown in

BALANCING THE CUP.

the illustration, two of the prongs on one side of the handle and two on the other.

This arrangement lowers the center of gravity of the apparatus, and you may now place the cup on the point of the knife. Do this carefully to see that the cup is in exact equilibrium.

It is hardly necessary to say that the hand that holds the upright knife must be a steady one or there will be a smashup, but with quiet nerves and careful handling the feat may readily be accomplished.—Chicago News.

THE RABBIT FAMILY.

How Molly Cottontail Teaches Bunny the Ways of Life.

Does it ever occur to you that young animals have bushels of things to learn and that the length of their lives depends to a large extent upon how well they learn their lessons?

For example, we will take the rabbit. Bunny's first lesson will be in what kinds of food to eat, how to know his enemies and how to play tricks and gain useful knowledge.

Molly Cottontail, the mother rabbit, will impress upon the baby that he must lie low and mingle with the dry leaves and underbrush while he is little and helpless, because the Creator in his goodness has provided a coat the color of his natural surroundings for his special protection. She will say in rabbit talk: "Now, Bunny, one thump with my hind feet means freeze (keep quite still), an enemy is approaching; two thumps, slow, means come; two thumps, fast, wonder; three thumps, run for dear life."

Bunny is taught how to wabble his nose to keep his smeller clear, that dewdrops from the bush is the best water to drink and that he should often taste his mother's lips to make sure he is having the same kind of fodder.

Scrambled Eggs in a Hat.

Here is an old trick, but perhaps you younger boys and girls do not know it.

It is the trick of cooking scrambled eggs in a hat.

You ask the company if they would like a dish of scrambled eggs. Then you break four eggs in a hat, drop in a pinch of salt, place the hat for a short time over the flame of a candle and shortly afterward pour into a dish the scrambled eggs, quite hot.

How is it done? Why, the scrambled eggs have in reality been previously prepared, covered and placed in the hat. But when making your proposition to the company you hold the hat too high for them to see the inside of it.

Your eggs—all but one—were really empty ones, from which you had previously sucked the contents. The one solid one you should have accidentally dropped on the table, letting it break, so as to fool your company into supposing that the other four were also solid eggs.

The Enchanted Tray.

Take an iron tray and set it on top of four glasses which have been wiped perfectly dry.

Charge it with electricity by rubbing it vigorously with a sheet of brown paper.

You will presently produce sparks strong enough to leap from the tray to your finger, although you will be in no danger of a shock.

This is called the enchanted tray and is a nice thing to amuse your little friends with.

Contentment.

In summer, when 'tis very warm
And all the folks complaining go,
It's then I like the winter time,
Brave winter with its ice and snow.

And when the blustering blizzards rave
And it is cold as cold can be
The very hottest summer day
Is not one whit too warm for me.

In spring I like the bracing fall,
In autumn love the gentle spring.
So, you see, the whole year round
I'm satisfied with everything.

Discovered by Accident.

The vast collection of the state papers of Thurloe, Cromwell's state secretary, which make about 700 volumes, was discovered by accident. They had been hidden in the false ceiling of a room in Lincoln's inn. By accident, the fastenings having rusted away, the ceiling fell, and this precious collection came to light.

The Flounder.

The flounder is an industrious fish and lays 7,000,000 eggs in a year.

"Rosamond Chief"

GOLD MINING COMPANY

Having just been incorporated with a capital of 1,500,000 shares, par value $1.00 each, there has been deposited in the treasury 500,000 shares to be sold for developing work. Every share fully paid and forever non-assessable. No personal liability to any stockholder.

Our property is located in Kern county, About 85 miles north from Los Angeles, and near the celebrated Hamilton mine, within 4 miles of Rosamond on the Southern Pacific Railroad.

We have a 175-foot ledge with assay values from $5.00 to $40.00 per ton.

We are now selling a small block of treasury stock for the purpose of putting in a plant for working the ore, and we want you with us. As we have a fine mining property, not a prospect, we will only sell a limited amount of this stock at the low price of 5c. per share. Send in your orders at once. For further information and prospectus, address our office.

EXPERTS REPORT.

Los Angeles, Cal., Dec. 28, '98.

ROSAMOND CHIEF GOLD MINING CO.,

Gentlemen: I have made a special examination of the property of your company, and I find this property a valuable one, consisting of four claims, namely, the Mary Anna, Maggie, Alice, and Little Gem. All four have valuable ledges with average assay value of $20.35 per ton. This average is taken from the surface to a depth of 10 feet. I am satisfied it will do a great deal better with depth and as developing continues.

Yours truly,
S. M. SARMAN.

I enclose..... in full payment thereof.

NAME.....

ADDRESS.....

THE FIRST DIRECTORY.

Quaint Olden Time New York Business and Social Addresses.

In the first directory of New York city, which was issued in 1786, there are some peculiar and quaint entries. For instance, in those days it was not uncommon for medical practitioners to sell drugs, as is shown by the following address, "Samuel Brethurst, physician and apothecary, 64 Queen (now Pearl) street."

Clergymen of that period were exceedingly precise regarding their titles. Thus, "Abraham Bache, reverend of the Church of England, 29 Smith street," and "Jose Phelan, clergyman of the Church of Rome, 1 Beekman street."

Leon Rogers, tailor, of 5 Broadway, was described as a "breeches maker;" John Bean, 60 Broadway, as "surgeon and tooth puller;" S. Crygier, 60 Oberry street, "punch and porter house;" Jo Delepiane of 232 Queen street, "Quaker speaker;" [illegible] Hitchcock, 89 Queen street, "house carpenter and undertaker;" John Hogland, 95 Queen street, "soldier, etc.;" Henry H. Kip, 35 King street, "inspector of pot and pearl ashes;" John Nitchie, 7 Garden street, "starch and hair powder maker;" Samuel B. Webb, 29 Lower Dock street, "gentleman."

In those days, too, there were a great many "gentlewomen" and a few "washwomen." All teachers were then addressed either as "schoolmasters" or "schoolmistresses." The retail dealers on Broadway and Wall and Queen streets called themselves "shopkeepers," the hotel men were "tavern keepers," and the policemen were "watchmen."

THE COLD WATER ORDEAL.

It Was Once an Important Test of Guilt or Innocence.

The cold water ordeal was one of the most important tests of guilt or innocence a few hundred years ago. If the accused floated, he was guilty; if he sank, he was innocent. In the twelfth century some altar vessels were stolen from the cathedral of Laon, and the learned Anselm proposed that a child from each parish and then a child from each household should be put to the test and so on until the guilty one was found. The proposition raised a great outcry, and the people clamored that those who had easiest access to the church be the first to undergo the ordeal.

This looked reasonable enough. So the bishop ordered the six priests of the cathedral to prepare for the test. In the meanwhile Anselm thought to try the experiment himself as a preliminary test. So he was bound and placed in a tub of water. To his great satisfaction as well as discomfort he promptly sank. The day arrived and with it an immense crowd to see the trial. The first priest sank, the second floated, the third sank, the fourth floated, the fifth sank, and then Anselm himself—wonder of wonders—in spite of experiments and protested innocence floated around with the buoyancy of an air bubble. While he was serving his sentence in prison Anselm found time to write a learned treatise on the "Inexpediency of the Water Ordeal and Its Failure In Many Cases."

New Zealand Mocking Birds.

The Poe honey eater is one of the commonest and at the same time handsomest of the New Zealand birds. The neck is ornamented with a frill of curly feathers of a greenish color with white centers, and the throat is adorned with a tuft of white feathers, which has gained for it the popular name of "parson bird," an appellation appropriate not only because of this decoration, but because of the resemblance of its peculiar attitudes when singing to the gesticulations indulged in by exuberant lecturers when wishing to drive home their points. The bird is an excellent mimic and can be taught to repeat short sentences with extraordinary clearness and also to whistle short songs quite as well as a parrot.

Queen Bess' Giant.

Queen Elizabeth had a Flemish porter who was over eight feet high and of great strength, and he was an extremely good natured man. Whenever he met any one who was abnormally tall he used to patronize him in a friendly sort of way, and on one occasion when he met at an inn two soldiers who were over six feet in height he said, "Come under my arms, my little fellows." And, taking them up, he walked down the room with them under his arms as if they had been children, much to their disgust.

Willing to Oblige.

Uncle (to little Bertie, aged five, who is being taken off to bed)—Good night, Bertie. Of course you always remember your aunts and uncles in your prayers? Bertie—Oh, yes, Uncle Felix! Shall I tell you what I say? I say, "God bless Aunty Kitty and make her thin, and God bless Uncle James and make him fat, and God bless Uncle Felix and"—which do you want to be, fat or thin?—Punch.

A Fast Train.

"Is this a fast train?" asked a passenger who was tired of looking at a station at which the train was not supposed to stop.

"Of course it is," was the conductor's reply.

"I thought so. Would you mind my getting out to see what it's fast to?"

Always the Same.

Tailor's Little Boy (walking with his father, sees a street roller)—What's that, papa? Tailor—The street's being newly ironed and pressed.—Figaro.

"Some men can take new furniture and make it look as if it was made a century ago," says a journalist. So can some children.

He Cheapened Pens.

Sir Josiah Mason was, according to his biography, walking in Bull street, Birmingham, in the year 1828 when he saw some steel pens, price 3s. 6d. each. Josiah was a hard up maker of split rings. No sooner had he seen the pens than he went home, made some better than those in the shop, sent them up to London and got a large order by return. At thirty years of age Mason's capital was 30 shillings. At sixty he had given away £400,000.

Hard Luck.

"Why does Baron Hoffman look so dejected lately?"

"Haven't you heard? He married a rich widow not long ago, and now a banker has absconded with all her money."

In Egypt the cat was sacred to the moon, and when a cat died its master shaved off his eyebrows in sign of mourning.

Cooked Foods.

Cooked foods should be eaten moderately warm, not hot. The high temperature injures the mucous lining of the whole digestive apparatus and by increasing the flow of perspiration renders the skin more susceptible to chills and colds. The habit of eating hot food also increases a desire for liquids, and thus one bad habit leads to another.

The Flute.

Conductors of orchestras find that the flute is far more often played out of tune than the violin, the reason being that many of its natural notes are not strictly in tune with the rest of the band.

A Queer Scottish Custom.

In Scotland the custom still prevails of taking down the window blinds when there is a corpse in a house and hanging white sheets across the windows. The custom also prevails in some parts of England, particularly in the northern part, and in many families a special "death sheet" is reserved for the chamber in which the corpse may lie and is often used for many generations.

Our Strongest Stones.

The traprocks of New Jersey and the dolerites of Staten Island are the strongest stones in the United States, their crushing resistance being 24,000 pounds to the cubic inch.

The Caterpillar.

The female of one species of caterpillar tears off the fur from the extremity of her abdomen to make a soft bed for her eggs and to preserve them from the cold. Yet she never sees her young, for after she has accomplished the task of laying the eggs the caterpillar invariably dies.

Eyelashes in Marble.

Only one marble statue of the human figure with eyelashes is known. It is one of the gems of the Vatican, the Sleeping Ariadne, and was found in 1503.

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated Ontario)

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30 00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of of every one. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

Humphrey & Company

160 St. James Street, Montreal

PATENTS PROMPTLY SECURED

We solicit the business of Manufacturers, Engineers and others who realize the advisability of having their Patent business transacted by Experts. Preliminary advice free. Charges moderate. Our Inventor's Advisor sent upon request. Marion & Marion, New York Life Bldg., Montreal; and Washington, D.C., U.S.A.

BIG G

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

AWAY WITH WEARINESS

Brace Up--Get Strong--Get Fat. The Cure is Simple.

You're nervous and uneasy.
Appetite is poor.
Sleep is hard to get.
Still worse, you are thin and fagged out.
Work must be done but where is the strength to come from?
Make your blood nutritious and you'll have lots of strength.
Your only hope is Ferrozone, an instant blood-maker, blood-purifier, blood-enricher. It brings keen appetite, digests food and supplies nutrition for building up all the bodily tissues.
Ferrozone makes muscle and nerve-fibre, increases your weight, instils a reserve of energy into the body that defies weariness or exhaustion from any cause.
For men who toil and labor, for the office man, the minister, the teacher—to these will Ferrozone bring a new life of spirit and robust health.
For growing girls, women of all ages—no tonic is more certain. Sold in 50c. boxes by all dealers.

Mrs. Cameron Taken to London

On Saturday evening the last mortal remains of the late Mrs. Cameron, mother of Mrs. T. Freeland, who passed away Friday night, at the residence of her son-in-law, Mr. Freeland, 141 London street, at the advanced age of 90 years, were taken to London for interment. The deceased has been an invalid for years.

Officers of Emily Dairy Co.

The shareholders of East Emily Dairy Co. have elected their officers for the ensuing year as follows:

President—Wm. Deyell.
Vice-Pres.—M. O'Donnell.
Directors—Messrs. J. Switzer, Geo. Franks, and John Geary.
Secretary—J. R. Boutes.
Salesmen—W. Switzer.
Secretary for the patrons—J. Collins.

Mr. F. D. Kerr Won His Case

The Toronto papers of Saturday contain the following interesting legal notice;—Re Buck Estate.—Judgment (oral) on motion for order declaring construction of will argued on Wednesday last. Order declaring that testator meant all his estate to go to his wife for life. The answer to the first question is yes. Costs of all parties out of estate. G. J. Sherry (Norwood) for the executors. W. H. Blake, K.C. for Wellington Buck. F. D. Kerr (Peterborough) for Mrs. Marjorie Buck. M. C. Cameron for infants.

Will See the Company

Mr. Edward Bradburn, of the 14th concession of Manvers, whose buggy was struck by the G. T. R. shunter on the Lindsay street crossing on Thursday, January 24th, was seen by a Lindsay Post reporter. He explained that he was driving in between 8.30 and 9 o'clock to meet his sister, who was coming from Peterborough, and that when he approached the crossing he waited until he got the signal from the flagman to cross. Just then the shunter came along and struck the vehicle. Mr. Bradburn sustained some injuries.

The New Term
—AT THE—
PETERBOROUGH BUSINESS COLLEGE
Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.

You cannot make a better investment.

For particulars, address
W. PRINGLE
Opposite Post Office, Principal.

ADVERTISE IN THE TIMES.

LOCAL INCIDENTS

By The Times Man on the Street

—Mr. J. E. Firth rang at the evening service at St. Andrew's yesterday.

—The betting is now about even on Alderman Bull and P. C. Adams for the sanitary inspectorship.

—Humming birds were conspicuous by their absence yesterday. Whew! but it was cold.

—A demonstration of the value of Quaker flour for making bread was given in the office of Storey & Leary, Water streets Saturday morning.

—The Woman's Art Association Reading Club will meet tonight at 7.30 o'clock, in the studio. All the members of the association are requested to be present.

—At the morning service in the Charlotte street Methodist church yesterday Master Scott Paton, of Lindsay, a boy soprano possessing a remarkable voice, rendered a solo "Lo, I am With You Always."

—The monthly meeting of the Peterborough Ministerial Association will be held this morning at 10 a. m., in the Y.M.C.A., when there will be round table conference on the subject "Principles and Modes of Prayer."

—Judging by the clouded state of Saturday's atmosphere that bear could not have seen his shadow. If he made a mistake and crawled out of his den yesterday he must have scooted back quick and prepared for a further spell of hibernation.

—In connection with Christian Endeavor Rally Day, a rally will be held in St. Andrew's church tonight, when addresses will be given by Rev. D. D. McDonald, of Keene, and Rev. J. R. Webb, of Peterborough. The Keene society will attend and refreshments will be served.

Crossley Carpet Works Will Not Locate Here

Mayor McWilliams Gets Letter Announcing This Unwelcome News.

It now seems that a large factory, confidently expected to locate here, viz., the John Crossley & Sons, carpet works of Halifax, England, will not settle here. It will be remembered that representatives of the firm were here, and reported favorably on Peterborough and its inducements as a site.

However the following letters, which have been received demonstrate that, for the present at least, Peterborough will not get the factory; the letters are as follows;

To the Mayor of Peterborough;

Dear Sir,—We have decided for the present to take no further steps for the starting of a carpet concern in Canada. We wish, however, to place on record our thanks for the trouble you took in giving our representatives all the information required.

Yours respectfully,
JOHN CROSSLEY & SONS, Limited.

Mr. E. C. Patterson, of the C. G. E. Co., who assisted the council in receiving the Crossley representative has received the following;

Dear Sir,—You were good enough when I was in Peterborough to give me your assistance and advice and I therefore think that it is only right that I should inform you at once of the decision we have come to re starting a carpet concern in Canada. We have decided against taking any action at present for reasons too numerous to give here.

I wish, however, to say that my opinion of Peterborough is that it offers today as good, if not better, opportunities than any other place I visited in the Dominion. I trust if I come out again I may have the opportunity of renewing your acquaintance.

Very respectfully,
CHAS. W. CROSSLEY

Miss M. McCarthy's Work Shows

A portrait in oils displayed in a George street store window on Saturday, attracted considerable attention and was the subject of many complimentary remarks. It is the work of Miss Minnie McCarthy, of this city, and shows remarkable ability in her work, which is most creditable. A portrait of Rev. Dr. O'Brien, by Miss McCarthy elicited most favorable comment.

Coates Co. Will Locate Here

The foundationless rumors contained in a Toronto paper to the effect that the Coates Carpet Company would either settle in Toronto Fort William, are, on good authority contradicted. Mr. Dunwoodie, who will manage the Peterborough branch of this company will be here in a few days from Scotland. Senator Geo. A. Cox one of the men most likely to be thoroughly posted in the matter has already purchased the land for the company.

SOCIAL AND PERSONAL

—Mr. H. B. Phillips of Brighton, is in the city.

—Mr. J. H. Diamond, of Campbellford, was in the city on Saturday.

—Mr. Will Gould, of Whitby, is visiting friends in the city.

—Miss Adams, of Kingston, is the guests of Mrs. E. G. Patterson.

—Mrs. T. F. Matthews has returned after a visit in Ottawa.

—Mrs. MacGachen, Mrs. Reginald Capreol's guest, is leaving today for Peterborough.—Toronto News.

—Mr. W. J. Fulton, of the Royal Bank, is spending a day or two in Montreal.

—Miss Annie O'Neil, of Hamilton, is visiting her parents, Mr. and Mrs. P. O'Neil, Dalhousie street.

—Mr. Wm. Toole, of Winnipeg, is in the city renewing old acquaintance. It is twenty-five years since he has visited Peterborough.

—Mrs. (Dr.) Freel, of Markham, who has been visiting with Mrs. J. R. Stratton for the past two weeks, returned home Saturday.

—Mrs. (Judge) Johnston, of Sault Ste. Marie, and Mrs. Freel of Markham, two popular visitors at Strathormond, have returned to their homes.

—Mr. Johnston Paudash, of Hiawatha, who has been in Toronto for a few days on business in connection with the Indians, returned home on Saturday.

—Miss Mabel Morrow, daughter of Mr. Bernard Morrow, county registrar, left Saturday for a two weeks' visit with her sister Mrs. Gus Gough, Toronto.

—We regret to note that Miss Ferguson, sister of Mrs. Mutins Clementi, corner of Simcoe and Stewart streets, is very ill, her condition being critical.

—Rev. E. A. Langfeldt, Rector of St. Luke's church, who has been spending the past few days in Philadelphia, has returned home. Mr. Langfeldt was the guest of his uncle in the Quaker City.

—Miss B. Maloney of Douro, who has been taking a course at the Y. W.C.A., for the past two weeks in dress making, left for home on Saturday, having completed the course, passing a satisfactory examination.

—Mr. S. P. Whitham, Brantford, contractor of Peterborough's coming Normal school, who was registered at the National Hotel, will soon have some 75 men employed in this work. He will be in Peterborough again this week.

POLICE NEWS

Daily Happenings in Court Room and Station.

The assault case against the defendant Dickson of Asphodel has been indefinitely enlarged on account of one of the witnesses not being able to appear next Tuesday. He brother of the youth, supposed to be married is under the doctor's care. When he has recovered sufficiently to attend court the case will be dealt with.

The local police court was crowded on Saturday when a lengthy session was in progress. The first case tried was that of Peter Mooney of Douro, who was charged with having ill-treated a steer he was driving on Water street last Monday. Evidence bearing on the case was given by Mr. Robert Hay, P. C. Newhall, Mr. Robert Howden and others. Magistrate Dumble considered that the animal had not received gentle treatment. He dismissed Mr. Moloney with a warning.

John Johnston, one of the regulars, once more pleaded guilty to the charge of being drunk on the streets. He was fined two dollars.

Edward Herron, was charged with having stolen from William White, a gold watch and the sum of $26 on Thursday last. Mr. F. D. Kerr acted for the prisoner.

White the first witness said that Thursday he came to Peterborough from Norwood, going to the City Hotel. In his possession was a gold watch and chain and about $30. It now emerged by his testimony that White, with the countryman's credulity got in with a gang of strangers in the bar. Here drinks were in order, when Herron, whom he had got in with, in company with witness left to go and visit some lady friends. White bought a bottle of whisky and one of wine. They started out, and turned Charlotte street corner, when they got to the alley. Teddy got "dry" and White handed out the foolish water. Then with ingratitude, "Teddy" threatened to brain him, unless White put up a dollar. White pulled out his roll which Teddy grabbed as well as his watch and ran. On Friday morning White having ascertained Teddy's address went to claim his property. Teddy's mother informed him that Herron had gone to Bridgenorth, with his father. She at once drove out there. White got his watch on her return in the afternoon.

Mrs. Herron testified that her son had returned home on Thursday night about nine o'clock and was far from sober. The rest of her evidence was similar to that of the complainant.

In reviewing the case Mr. Kerr said he considered the affair a mere drunken bout on the part of the two men. White was in that maudlin state so common to the intoxicated when he handed over his watch to Herron to keep for him, so Mr. Kerr considered. They were going out for a time and one was more drunk than the other.

His worship said that there was sufficient evidence for committing Herron for trial, and the case will be heard at the next sessions.

—Eight colored stereoscopic views at Times Bookstore, yours for only twenty-five cents.

What Do They Cure?

The above question is often asked concerning Dr. Pierce's two leading medicines, "Golden Medical Discovery" and "Favorite Prescription."

The answer is that "Golden Medical Discovery" is a most potent alterative or blood-purifier, and tonic or invigorator and acts especially favorably in a curative way upon all the mucous lining surfaces, as of the nasal passages, throat, bronchial tubes, stomach, bowels and bladder, curing a large per cent. of catarrhal cases whether the disease affects the nasal passages, the throat, larynx, bronchia, stomach (as catarrhal dyspepsia), bowels, (as mucous colitis), bladder, uterus or other pelvic organs. Even in the chronic or ulcerative stages of these affections it is often successful in affecting cures.

"Favorite Prescription" is advised for the cure of one class of diseases—those peculiar weaknesses, derangements and irregularities incident to young women. It is a powerful yet gently acting invigorating tonic and nervine. For weak worn-out, over-worked women—no matter what has caused the break-down, "Favorite Prescription" will be found most effective in building up the strength, regulating the womanly functions, subduing pain and bringing about a healthy, vigorous condition of the whole system.

A book of particulars wraps each bottle giving the formulæ of both medicines and quoting what scores of eminent medical authors, whose works are consulted by physicians of all the schools of practice as guides in prescribing, say of each ingredient entering into these medicines.

The words of praise bestowed on the several ingredients entering into Doctor Pierce's medicines by such writers should have more weight than any amount of non-professional testimonials, because such men are writing for the guidance of their medical brethren and know whereof they speak.

Both medicines are non-alcoholic, non-secret, and contain no harmful habit-forming drugs, being composed of glyceric extracts of the roots of native, American medicinal forest plants. They are both sold by dealers in medicine. You can't afford to accept as a substitute for one of these medicines of known composition, any secret nostrum.

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels.

Mr. D. W. Dumble on John Bright

Local Police Magistrate to Lecture at Young Conservative Club.

Mr. D. W. Dumble will lecture in the Young Conservative Club rooms on Feb. 7th on "John Bright," the greatest of English orators. The other items on the program will be numbers by the Mandolin Club, Mr. Frith, tenor, will sing the "Home Land." The usual smoking concert will be held and the general public are invited.

The Lock Company Pays a Bonus

A meeting of the Peterborough Lock Co., was held Saturday afternoon when the managing directors presented a statement of the operations of the company for the past year.

The secretary-treasurer was authorized to pay to the shareholders a check for a bonus of one per cent. upon the stock held by them. This will make the dividend for the past year equivalent to 7 per cent.

The annual meeting of the company will take place at the office of the company on Monday at 2 o'clock.

Mrs. Giroux Dies at Valleyfield Que.

Mrs. Virginie Giroux, mother of George H. Giroux, of this city, passed away on Friday at Valleyfield, Que. Mrs. Giroux was 76 years of age. A family of seven sons and four daughters survive the deceased. Her husband predeceased her three years ago. The funeral was held on Saturday.

Better Mails for Springville

Springville is kicking for better mail accommodation. Their mails at present are shipped via Fraserville, by G.T.R. It is now proposed to have the Springville mail sent per C.P.R. with a stop-off at Kendry. This This changed as proposed, would if adopted, save a long haul by stage. It is now thought that the Peterborough Board of Trade may take the matter up, as the local merchants would thus gain increased trade.

To Explore Greenland Coast

Copenhagen, February 2.—The Duke of Orleans arrived here today to inspect the ship Belgica, on which he intends to penetrate as far as possible along the northeast coast of Greenland. The purpose of this expedition is to join the Danish expedition under Nyllus Grechsen, which left here last June to explore the same coast.

Indigestion

Stomach trouble is but a symptom of, and not in itself a true disease. We think of Dyspepsia, Heartburn, and Indigestion as real diseases, yet they are symptoms only of a certain specific Nerve sickness—nothing else.

It was this fact that first correctly led Dr. Shoop in the creation of that now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Without that original and highly vital principle, no such lasting accomplishments were ever to be had.

For stomach distress, bloating, biliousness, bad breath and sallow complexion, try Dr. Shoop's Restorative—Tablets or Liquid—and see for yourself what it can and will do. We sell and cheerfully recommend

Dr. Shoop's Restorative
J. D. TULLY.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

BEST ADVERTISING MEDIUM IN EASTERN ONTARIO

VOL XXXV. NO. 30 PETERBOROUGH, ONTARIO, TUESDAY, FEBRUARY 5 1907 PRICE TWO CENTS

MR. HARRY MORGAN IS NOW ALDERMAN

Owing to the Resignation of Ald. Geo. Ball to Accept the Position of Sanitary Inspector---Sheriff Hall Permanent Auditor---Messrs. McKee and McGrath Assessors.

Committee of the Whole

The City Council met in Committee of the Whole last night when all the members were present.

The question of appointing a permanent auditor was gone into. His Worship thought it very desirable to appoint a permanent auditor, and one who has good standing and weight in the community.

Ald. Johnston moved, seconded by Ald. Duncan,—That this city appoint one permanent auditor.—Carried.

The committee next took up the question of appointing two assessors, to work the same as last year, or one permanent assessment commissioner.

Ald. Johnston once again took a firm stand in favor of the appointment of a permanent assessor, for reasons previously published.

Ald. Johnston moved, seconded by Ald. Wilson,—That this council appoint a permanent assessment commissioner.—Lost.

Ald. Phelan moved, seconded by Ald. Elliott, in amendment,—That two assessors be appointed, and that they work in the same manner as last year.—Lost.

Ald Stevenson thought the best scheme would be to appoint two assessors, each one to work irrespective of the other, and not together as in previous years.

Ald. Elliott thought two assessors should work together, as two opinions on property are preferable to one.

Ald Stevenson moved, seconded by Ald. Morrow, in amendment to the amendment,—That two assessors be appointed and that the city be divided into two portions, one for each assessor.

Ald. Stevenson's amendment was carried, and two assessors were appointed.

THE SANITARY INSPECTOR.

Ald. Ball having tendered his resignation as alderman, the committee voted in his favor as sanitary inspector.

PERMANENT AUDITOR.

The committee voted in favor of Sheriff Hall as permanent auditor.

ASSESSORS.

The following were applicants foor the office of assessor;—T B. McGrath, Henry Thompson, Dawson Kennedy, Geo. F. Warde, Thos. McKee and John Kincaid.

The committee voted in favor of Messrs. Thos. McKee and T. B. McGrath by an open vote. Mr. McKee to assess wards one and two and Mr. McGrath wards three, four and five. Their salary to be $500 each. These assessors are for this year only.

Regular Session

The council met in regular session at 9.45. There were present, His Worship, Mayor McWilliams, and Aldermen, Johnston, Tovey, Elliott, Leary, Stevenson, Bradburn, Ball, Duncan, Wilson, McIntyre, Morrow and Phelan.

The minutes of the last meeting were confirmed.

COMMUNICATIONS.

Communications were received and dealt with as follows;

From the police commissioners notifying the council that Mr. George Cochrane had been appointed truant officer at a salary of $100 per year.—Finance Committee.

From ratepayers asking for an arc light to be placed on the corner of Lake and Bethune streets, where the G.T.R. crosses—Fuel, Water and Light Committee.

From the Navy League asking the council to support by a resolution to the premier, a motion which Mr. A. C. Macdonald, M.P. for South Toronto, asking for the appointment of a commission to encourage the ship building interests in Canada.—Received.

From Geo. F. Fiorde, applying for the position of permanent assessor.—Received.

From A. Hope applying for the position of sanitary inspector. He has had three years' experience under the superintendent of nuisances for the township of Wolverhampton, Eng.—Received.

From the tax collector as follows;

STATEMENT OF TAX ROLL.

Total amt. on roll...	$125,742.88
Total amt. deposited	117,324.54
Balance	$8,418.14
Amt. collected and deposited during month of Dec ...	1083.74
Total amt. coll. for Jan... ...	5617.34
Balance uncollected	6800.85

T. J. GREEN, Tax Collector.

From ratepayers asking for an electric light on Downie street, between Murray and Brock streets.—Fire, Water and Light Committee.

DEPUTATIONS.

Mr. Flynn applied for permission to remove some trees opposite the American Hotel; also an old lamp post. This was referred to the Board of Works with power to act.

Mr G. Walter Green asked for the privilege of building over nine feet of street on Gilchrist, between McDonnel street and the Grand Trunk track. He did not think this land would ever be used as a street and it would be a valued concession were he privileged to extend his works over it. This was referred to the Board of Works, to whom Mr. Green will submit plans on Wednesday night.

Mr. T. E. Earngey, late secretary of the Muskoka Free Hospital for Consumptives, addressed council with a view to getting financial aid for the National Sanitarium Association under whose control his hospital is maintained. Mr. Earngey asked the council to endow one bed, at a cost of $300. This matter, a motion of Ald. Johnston, seconded by Ald. Leary, was referred to the Committee of the Whole Council.

ALD. BALL RESIGNS.

The resignation of Ald. Ball was accepted. This vacancy will be filled by Mr Harry Morgan, who polled the next number of votes to the aldermen who stood the 12th on the list at the last municipal elections.

HEAD LIGHTS TOO STRONG.

Ald. Johnston submitted the following;—

Gentlemen,—Your Fire, Water and Light Committee beg leave to report and recommend as follows;

1. That the Peterborough Light and Power Company be instructed to place an arc street lamp at the corner of Smith and Fairbairn streets.

2. That the Peterborough Radial Railway Company be requested to reduce the strength of the head lights used on the cars running through Ashburnham and Peterborough to one-half the present strength of them.

This report was adopted as read.

MR. SHEEHY'S CONTRACT.

Ald. Duncan submitted the report of the Board of Works, clause 13 of which recommended that the portion of sewer on Cedar street not completed by Mr. Sheehy according to contract be finished by the city, the cost thereof to be charged to Mr. Sheehy.

Ald. McIntyre moved, seconded by Ald. Elliott,—That this clause be struck out, and Mr Sheehy be allowed an extension of time till June 15th, in which to finish the Cedar street sewer. Also that Mr. Sheehy be allowed his 85 per cent. of contract price on all work completed.—Carried.

INSTITUTE SITE.

A bylaw to authorize the execution of a conveyance of lots three, four, five and six, north-western portion of Central Park, to the Board of Education for a Collegiate Institute site was adopted without discussion.

EXTENSION WATER WORKS.

A bylaw to authorise the issue of debentures for $10,000 to pay for the extension of waterworks in 1906 passed its several readings.

SHERIFF HALL AUDITOR

A bylaw appointing Sheriff Hall, permanent auditor, at a salary of $300 a year, passed its several readings.

TWO ASSESSORS APPOINTED.

A bylaw appointing Messrs. McKee and McGrath assessors for 1907, at a salary of $500 each, passed its several reading.

THE SANITARY INSPECTOR.

A bylaw appointing ex-Ald. Geo. Ball, sanitary inspector, at a salary of $600 a year, with uniform, his duties to commence March 1st next, passed its several readings.

The sanitary inspector's duties will be to look after the city's sanitary condition, and also inspect the Otonabee waters in and above the city and waters tributary thereto.

BLOCKING OF SEWERS.

Ald Johnston suggested that regular provision be made for flushing sewers regularly and asked that this matter be referred to the Board of Works This was acquiesced in.

On motion of Ald. Duncan the men who acted as constables at the last municipal elections will be paid an additional dollar.

CARTERS' SHELTER.

On motion of Ald. McIntyre, seconded by Ald. Johnston, the Property Committee were empowered to take steps toward securing a carters' shelter and stand. Ald. McIntyre has a spot in view for this purpose.

The Property Committee were asked to make a report in detail.

Ald. Stevenson moved, seconded by Ald. Johnston,—That the Property Committee take such steps as will assure the gathering of all information as building, the issuing of building permits, etc.—Carried.

EXTENSION OF FIRE LIMITS

Ald. Bradburn moved, seconded by Ald. Wilson,—That the Property Committee consider the advisability of extending the fire limits.—Carried.

The council adjourned at midnight.

—On Saturday we will sell eight colored stereoscopic views for only 25 cents. Hundreds to choose from. Times Bookstore.

Lady Grenfell Dies of Typhoid

Ottawa, Feb. 4.—Lady Victoria Grenfell, the eldest daughter of Lord Grey, died shortly before midnight last night of typhoid fever. Lady Victoria, who was in her 29th year, had been married since 1901 to Mr. Arthur M. Grenfell, of London, a member of the great banking firm, and a nephew of General Lord Grenfell. Lady Victoria and her husband had been in Mexico, where Mr. Grenfell had large interests. About a month ago she came to Ottawa, and soon after developed typhoid. The disease ran its usual course, the position of the Vice-regal household being rendered the more distressing by the numerous social and diplomatic engagements which had to be met during the time.

Lady Victoria's condition improved till recently, and on Friday and Saturday nights their excellencies attended the performances at the Russell Theatre. On Saturday the treacherous character of typhoid asserted itself, and the patient succumbed.

Her husband and all the members of the vice-regal family were present when the end came.

Her children, two boys and a girl, the oldest being barely five years of age, are in England.

BROKE HIS LEG

A Man Named Shangros Injured on His Wedding Day.

Yesterday a man named Shangros, an employe of the Cavendish Lumber Company, at Lakefield, met with a painful accident. While driving to the house of his intended bride, where the wedding was to take place, the sleigh was accidentally upset, and Mr. Shangoes suffered a fracture of the leg, near the thigh. Notwithstanding this, the wedding took place, after which the unfortunate groom was taken to the station and brought to St. Joseph's Hospital, where the broken bones were set.

English Factory Visited by Fire

Mr. G. I. Preen, manager of the local Brinton Carpet Works, has received word that a disastrous fire visited the works at Kidderminster, Eng. The fire did damage to the extent of $400,000. This however, was pretty well insured, and as the Brinton Carpet Company is among the strongest in the country, a new factory will be erected at once. The new plant will be strictly up-to-date and modern in every respect and they will be in a better position to meet the rapidly growing demands of the business.

The Peterborough works will not be affected in the least.

NOVEL CURE FOR COLDS

Healing Medication That is Breathed Giving Quick Relief.

It seems just as ridiculous to put medicine into the stomach to cure a cold in the head or lungs as does to go out in the rain it we want to keep dry.

The fact that many people right in Peterborough, cough and hawk and snuffle for days and weeks after they treat a cold with the usual stomach dosing, shows how senseless are the ordinary cough and cold cures.

The right way to cure a cold in the head or a cough and irritation in the throat and lungs is by breathing Hyomei's medicated air. Put a few drops of Hyomei in the mouth pocket inhaler that comes with every outfit and breathe this healing air for a few times and immediate relief will be noted. The medication goes right to the spot where the disease germs are located and renders them harmless in the future.

At the same time the soothing and healing effects of Hyomei on the irritated mucous membrane gives quick relief, and the cough or cold is broken up.

A complete Hyomei outfit, consisting of a bottle of Hyomei, the inhaler and a medicine dropper, costs but $1, while extra bottles of Hyomei, if needed, can be obtained for only 50c.

All druggists should be able to supply you with Hyomei, or we will send it by mail on receipt of price, and every package is sold with the distinct understanding that it costs nothing unless it cures. Write us today for a symptom blank, which we will send you free, together with treatise on Catarrh and how to cure it. When you fill in and return to us the symptom blank, our consulting physician will give your case the best care and attention, and write you a letter of advice without charge. Booth's Hyomei Company, Buffalo, N.Y.

HIGH COST OF KEEPING RULERS

King Edward Receives Little Compared With Some Rulers.

THE CZAR OF RUSSIA

Has an Income Probably Reaching $20,000,000 From His Various Estates.

London, February 4.—The extreme care which King Edward has to exercise to live within his income seems ridiculous, yet it requires a colossal sum of money to maintain the ruler of a great nation and his numerous family connections. In King Edward's case his annual income from the state is £470,000, and it is said that it is difficult for him to pay his bills out of that sum. Heavy taxation is said to be the reason why the King cannot obtain more money to maintain his many residences and relatives in royal style, and it transpires that an annual income of at least £1,000,000 would be necessary to keep the King's household.

The income that Britain's King receives seems large, but it is really quiet small compared with the civil lists of other European rulers. In Russia there is no civil list, but in spite of wars and revolutions the Czar is in possession of the enormous revenues which are derived from the crown domains which include more than a million square acres of cultivated lands and improved forests, as well as several of the mines in Siberia, his total income reaching probably $20,000,000 a year.

It is said it is impossible even to approximate the income from all sources of William II., German Emperor and King of Prussia. This ruler receives $3,143,400. As the representative of the reigning house he is in possession of a vast amount of property, great landed estates in various parts of the country, the revenue from which is largely used in defraying the expenses of the court and providing for the members of the Royal Family. The Royal Crown treasure, founded by King Frederick William III., and now consisting of a capital of more than 6,000,000 marks, is at his disposal.

TURKEY AND OTHER COUNTRIES.

The Sultan of Turkey receives from the revenues of the crown domains an amount variously estimated at from $5,000,000 to $10,000,000.

The civil list in Italy is $2,350,000 and out of this an allowance of $76,000 is paid to the children of the late Duke of Aosta, and an equal amount to the Duke of Genoa.

The Emperor of Austria-Hungary is also better provided for than the English king, receiving $1,700,000. Other sums paid to foreign rulers are: Baden $360,000, Bavaria $1,242,726, Belgium $665,000, Denmark $240,000 and $37,800 to the heir-apparent, France $223,000, Greece $480,000, Netherlands $245,000, Portugal $60,000, Roumania $291,432, Saxony $678,400, Spain $1,400,000, and Wurtemberg $467,433.

PRESIDENT OF UNITED STATES.

These expenditures for the maintenance of royal families are colossal when compared with the salary of the President of the United States—$50,000 and about $25,000 for traveling expenses. Some of the money received by foreign rulers may be put to good use in the employment of labor at courts and country residences, but when there is a depression of business and these state allowances are still made, in addition to the appropriation of enormous sums for the maintenance of armies and navies, it is obvious that the people must feel the burden tremendously.

Local Ministers Endorse Mr. Coohrane

Ministerial Association Hold Important Meeting in Y.M.C.A.

The Ministerial Association met in the Y.M.C.A. parlors yesterday morning with the following members present, Revs. Canon Davidson, J. G. Lewis, Dr. Torrance, A. H. Grace, Dr. Crothers, J. R. Webb, H. M. Manning and L. McKinnon.

In the report it was shown that all the meetings were profitable. It was noted however that the attendance was not as large as might have been expected.

On motion of Revs. Dr. Crothers and H. M. Manning, it was resolved that as an association the hearty approval of the action of the Police Commissioners appointing Mr. Geo. Cochrane as truant officer in our city be expressed. They believe further that the pulpit and press can greatly help Mr. Cochrane in his new work.

Revs. Canon Davidson, J. G. Lewis, Dr. Torrance and L. McKinnon were appointed a committee to memorialize the Board of Education re the re-introduction of religious instruction in the city schools.

A conference on prayer, its methods and principles, was participated in by all. Some of the leading thoughts expressed were; Liturgical and extempore prayer are not conflicting but complementary. Communion is an important factor in all true prayer. Reverence and humility are basal and essential in all true approach to God. The danger was noted of reliance on the form when used and the neglect of preparation for extempore prayer.

Rev. Mr. Webb was given a cordial and unanimous welcome as a member of the Association.

The visitors to the Hospital, and Home visitation for the month are Revs. J. G. Lewis, Dr. Crothers, J. R. Webb, L. McKinnon in the successive weeks in the order as the names occur.

On account of the enforced absence of Rev. J. G. Potter, no definite report was given of the municipal service, but satisfaction was generally expressed at the way in which it was carried out and the appreciation evoked.

Took Carbolic Acid By an Oversight

Mrs. Beagley of East Ward Takes Poison in Mistake for Prescribed Medicine.

Yesterday afternoon Mrs. Thos. Beagley of Douro Street, east ward, passed away. The deceased who was highly respected by her friends had been taking medicine for some time, and yesterday as the bottle containing medicine and one containing carbolic acid were together on the dresser, before noticing, Mrs. Beagley had by mistake taken a tablespoonful of carbolic acid, instead of her medicine. Medical aid was summoned, and all efforts possible were put forth to save her life, but in vain. She passed away early during the afternoon.

Mrs. Beagley was seventy-one years of age, and was born in county Kent, England in 1836. She is surveyed by her husband and a family of several daughters.

Arrangements for the funeral have not yet been completed.

If you are Constipated, dull, or bilious, or have a sallow lifeless complexion, try Laz-ets just once to see what they will do for you. Laz-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Laz-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

Local Expedition For Cobalt Region

Party Leaves Peterboro' to Prospect North of Canada's Silver Country.

Yesterday a party of gentlemen, mostly belonging to this city and under the direction of Peterborough's well known mining prospector, Mr. T. H. Crowley, left for the vast mineral field in the north of Cobalt on a prospecting tour.

This party, which, to use a well-known western mining expression, was "staked" (i.e. backed financially) by leading Peterborough capitalists, includes Mr. T. H. Crowley and his son Cecil, Messrs. Jas. McPherson, Brooks, Keller, Robt. Tamblin and his son, and others.

The party left in a thoroughly equipped condition both as to determination to avail themselves of the riches of that great country under Mr. Crowley's guidance and with all requisites for such a trip.

The Times ventures to predict that before their return Mr. Crowley will have added to his already heavy crown of mining laurels, and that the local capitalists backing the expedition will have secured a lucrative result for their investment.

THE BEST TEACHER

Old Experience Still Holds the Palm.

For real practical reliability and something to swear by, experience—plain old experience—is able to carry a big load yet without getting sway-backed.

A So. Dak. woman found some things about food from Old Experience a good, reliable teacher.

She writes:

"I think I have used almost every breakfast food manufactured, but none equal Grape-Nuts in my estimation.

"I was greatly bothered with weak stomach and indigestion, with formation of gas after eating, and tried many remedies for it but did not find relief.

"Then I decided I must diet and see if I could overcome the difficulty that way. My choice of food was Grape-Nuts because the doctor told me I could not digest starchy food.

"It has been a great benefit to me for I feel like a different person since I began to eat it. It is wonderful to me how strong my nerves have become. I advise everyone to try it, for experience is the best teacher.

"If you have any stomach trouble—can't digest your food, use Grape-Nuts food for breakfast at least, and you won't be able to praise it enough when you see how different you feel." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

McGill's Statement Refuted

Hon. Mr. Harcourt Says He Had No Knowledge Whatever of the Speculations on the New York Stock Market.

Toronto, Feb. 5.—Hon. Richard Harcourt, one of the directors of the Ontario Bank from 1900 down to the date of the suspension, yesterday in the police court, gave a direct denial to much of the evidence given by former General Manager McGill.

Personally he had no knowledge of the speculations in securities in the New York market, and so far as he was aware, none of the other directors were cognizant of that phase of the situation.

"I would not have remained a member of the Board thirty seconds," exclaimed Mr. Harcourt, "if I had known that one dollar of the bank's funds was invested in speculative securities."

Mr. Harcourt maintained that up to the very last Mr. McGill, on whom the Board relied for information, affirmed that the bank was sound, and, from the statements made to them from time to time, they had no reason to believe that the institution was in other than a most satisfactory position.

TORY GOVERNMENT IN BRITISH COLUMBIA

A Majority of Two to One---Mr. McInnes Was Defeated in Vancouver---Liberal Leader Was Elected.

Conservatives	24
Liberals	10
Socialists	3
In doubt	5

Next Legislature;

Conservatives—Bowser, MacGowan, Tatlow, Garden, McGuire, McBride (2), Thomson, Behnman, Davey, Carter-Cotton, Gifford, Parsons, Young, Pulton, Grant, Ellison, Mackay, Hunter, Schofield, Ross, Shatford, Hayward, Taylor—Total, 24.

Liberals—Macdonald, Oliver, Jardine, King, Naden, Jones, Forster, Kergin, Henderson, Hall—Total 10.

Socialists—Hawthornthwaite, Williams, McInnes—Total, 3.

In doubt, 5.

Vancouver, B.C., Feb. 5.—With a majority of two to one, Premier McBride and his party are again in power. A keenly fought contest in which each side with even more confidence than is usual on such occasions predicted victory for itself, ended on Saturday in the sweeping defeat of the Liberals.

LEADERS ELECTED.

Premier McBride was elected by large majorities in both Victoria and Dewdney. Mr. Macdonald, leader of the Opposition, was elected in Rossland, but his first lieutenant, Mr. W. W. B. McInnes, who resigned the Governorship of the Yukon, was snowed under in Vancouver. The standing at dissolution was Conservatives, 23; Liberals, 16; Socialists, 3.

MINISTERS DEFEATED.

Three of Premier McBride's ministers were returned, but Mr. Cotton, president of the council was defeated in Richmond, and the newly-appointed Minister of Education, Mr. Manson went down in Alberni, while Mr. Green, Minister of Lands and Works, was literally sacrificed by the Government at the beginning of the contest.

The crucial points of the struggle were the two cities, Victoria and Vancouver, and both of these elected a solid delegation of Conservatives, four in the capital and five in Vancouver.

CITIES WENT CONSERVATIVE.

The Liberals had counted on holding Victoria, and its effect could only have been offset by the capture of Vancouver. The latter was not accomplished, despite the strong personalities of several of the Liberal candidates, and with the loss of both cities the Liberal cause became hopeless. Nevertheless the party made a number of gains through the Province, defeating two ministers, as stated, and also the former Speaker, Pooley, in Esquimalt, while three other Liberal gains were Nelson, Skeena and Yale from the Conservatives and one from the Socialists at Newcastle.

Against seven gains which would have been ample to overthrow the Government had the party held its own elsewhere, the Liberals had to face a formidable array of losses, beginning with four seats in Victoria. The result in Victoria is perhaps in a measure a personal triumph for the Premier, who was returned at the head of the poll, with over 100 more votes than the next following Conservatives.

THE RESULTS.

Following are the results in the cities;

Vancouver—Five Conservatives elected;

Bowser, Conservative 3,197
MacGowan, Conservative 3,188
Tatlow, Conservative 3,087
Garden, Conservative 3,066
McGuire, Conservative 2,914
McInnes, Liberal, 2,332; Henderson, Liberal, 2,263; McInnes, Liberal, 2,241; Farris, Liberal, 2,151; Neelands, Liberal, 2,103; McVety, Socialist, 514; Kingsley, Socialist, 511; Scrobinga, Socialist, 504; Partington, Socialist, 507; Dubberley, Socialist, 501; Williams, Labor, 398; Perry, Labor, 284.

Victoria—Last election four Liberal; four Conservatives Saturday;

McBride, Conservative 1,607
Hanson, Conservative 1,466
Davey, Conservative 1,493
Thompson, Conservative 1,376
Cameron, Liberal, 1,168; Drury, Liberal, 1,190; R. Hall, Liberal, 1,092; McNivin, Liberal, 1,031; E. Hall, Independent, 853; Walters, Socialist, 404; Marcon, Socialist, 365.

New Westminster—Gifford, Conservative, 647; Howay, Liberal, 547; Rainey, Labor, 145.

Rossland—Macdonald, Liberal, 240; L. A. Campbell, Conservative, 136; A. F. Berry, Socialist, 98.

Nanaimo—Hall, Liberal, 314; Kirkpatrick, Conservative, 259; Phillips, Socialist, 90.

Nanaimo—O'Brien, Liberal, 212; Shepherd, Conservative, 136; Hawthornthwaite, Socialist, 344.

Cariboo—H. Jones, Yorston, Liberals.

Kamloops—Hon. F. J. Fulton, Conservative.

Taking the net results of the details obtainable yesterday it will be seen that Conservatives at least have 24 seats in the next House, which may increase by two or three, as it is by no means certain that both Liberals won in Cariboo, though the seats are conceded at this time. In Lillooet Mr. McDonald is almost sure of election, as also Mr. McPhillips in the Islands, Alberni is in doubt, but Mr. Brewster is ahead.

Leaders of Strike May be Excluded

Mr. Dunstan Indicates That He Will Distinguish Between Leaders and Followers.

Toronto, Feb. 5.—The Royal Commission, appointed to inquire into the strike of Bell Telephone operators, will sit at 10 o'clock this morning and begin to take evidence. Mr. Dunstan will probably be the first witness. The commission will visit the different exchanges this afternoon.

About 360 operators signed at the central office yesterday morning as being willing to return to work pending the finding of the commission. The girls will hold a meeting in the Labor Temple on Wednesday evening.

"We are not re-engaging any of the former operators today. All applications will be considered on their merits. There were those who left us deliberately and those who were led astray. Consideration will be given to skill and previous experience of a former operator re-engaged."—Mr. K. J. Dunston, Local Manager of the Bell Telephone Co.

"The Commissioners will be pleased to have any parties who desire to give evidence on either side appear before them in order to make the inquiry as full and complete as possible." Mr. W. L. Mackenzie King, Deputy Minister of Labor.

"The Animated Feather Duster Finds a Clean Sweep."

These Medical Facts

You Can Study With Profit

How few realize that twenty-five per cent. of all disease has its origin in some interference with the function of elimination.

The whole body exists by reason of the transfusion of fluids through its component parts.

Up to a certain point the body has power to reject to destructive elements, but this power is limited.

When it happens that the body is loaded with wastes and poisons which it can't eliminate, fermentation, decay, and germ life run riot through the blood.

Serious illness is the result unless nature is assisted by a cleansing tonic like Dr. Hamilton's Pills, which are purely vegetable, contain no mercury, no bismuth, no injurious metallic ingredient of any kind.

Such a medicine is the greatest possible assurance to every man and woman of health, spirits and contentment.

Grand results are achieved and famous cures made every day by Dr. Hamilton's Pills, as this letter proves.

From Newfoundland, Miss Lillian Anthony, of Upper Gullies, Conception Bay, writes: "In praise of Dr. Hamilton's Pills, I must say that I have used them with grand success for three years. They never fail to cure me of indigestion or constipation. Formerly my face was full of pimples, but now my complexion is clear and ruday. In more ways than I care to mention have Dr. Hamilton's Pills helped me; they would be good for every woman to use."

Insist on having only Dr. Hamilton's Pills. 25c per box or five boxes for $1.00, at all dealers, or by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., or Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $4 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 4, 1907

TAPPING THE AIR FOR NITRIC ACID

Fifteen years ago Sir William Crookes discovered a method of securing nitric acid from the nitrogen of the atmosphere. His process was, however, so expensive that it was not capable of being placed on a commercial basis. It gave other scientists hopes that some day they could hit upon a commercially practicable method, and many experimenters have since then been at work in the field.

Every one who knows anything of chemistry or of scientific agriculture knows how much the perfection of such a process will mean to humanity. The nitrogen in the air as it is mixed with the oxygen is inert, and only a very few plants are able to absorb any of it. While nitrogen in compounds enters to so huge an extent into all living matter, there has been no way to utilize this dead nitrogen set off by itself. Nitrates are the fertilizers which best increase the productivity of worn-out soil, and with a sufficient supply of cheap fertilizers an enormously greater population can be supported on the earth than would be possible in the previous state of our technical use of our resources.

Sir William has now announced as the result of his observation of the last stages of experiments being conducted by two professors at the University of Fribourg, Moszicki and Kowalski, that the problem has been solved and that he believes the method to be cheap enough to guarantee a commercial success. His bare announcement without details is sufficient assurance for the whole chemical world.

Arrangements are now being made for the patenting of the process and for its commercial exploitation. Till this organization is accomplished further announcement will not be made. Then Sir William will doubtless describe the process to a scientific audience. It is only known now that the electric power used by the Swiss professors in their experiments is very much greater than the English scientist controlled in his laboratory, and that the process obtains first nitrous acid, from that nitric acid, and from that the further compounds of nitrogen.

This discovery bids fair to be the greatest of the year 1907. Certainly no more important scientific achievement could be anticipated in any year, or even in a series of years, at the rate at which progress is now being made.

50,000 Laborers Required in the South

New Orleans, February 4.—It is estimated that no less than 50,000 laborers will be required for railway construction in the Southern States during the coming summer. At a meeting of the chamber of commerce Saturday a resolution was passed calling on the legislature to encourage emigration.

Brother of Frank K. Hippie Has Suicided

Philadelphia, Feb. 4.—Edward P. Hippie, a brother of the late Frank K. Hippie, who ended his life last summer after wrecking the Real Estate Trust Company of this city, of which he was the president, committed suicide at his home here yesterday with a revolver. Mr. Hippie's family were at breakfast when he committed the deed. His wife heard and unusual noise, and, sending her sons upstairs to investigate, they found the father in his bedroom with a bullet wound in his head. He was hurried to a hospital, but died on the way. Mr. Hippie was about 70 years of age, and had been in the real estate business. The police believe that brooding over the tragic ending of his brother's life caused him to kill himself.

CORNER IN HERRING

Nanaimo, B.C., Feb. 4.—A serious situation has arisen in the local herring industry here. A large number of seines are operating in these waters to the detriment of the gill net fishermen, and enormous catches have been made, so that the gill net fishermen, who are all white men, have been practically crowded out. Extensive has been the fishing that today only a small school of herring is left in the harbor, and the Japanese and their seines have almost entire possession of the fish. The gill net men are not catching a fish, and are doing some kill kicking of justifiable grounds.

Windows of Celluloid.

One of the many uses to which celluloid is put is in supplying window lights for the curtains of automobile tops. Celluloid is made in sheets of extreme thinness down to a thickness of only five-one thousandths of an inch, and such sheets of celluloid can be rolled up as readily and closely as sheets of paper. From sheets of transparent celluloid pieces are cut of the sizes required for the windows, and when these have been set in place they can be rolled up with the curtain, like any other part of it. While the window of celluloid can thus be readily rolled up it is liable to be dented or crumpled, as a roll of paper would be if crushed, and so celluloid is not a perfect material for this use, but it appears to be the best that has yet been found.

Lord Rothschild and Jay Gould.

Lord Rothschild, who is taking a prominent part in the commission which is considering as to the best territory for Jewish colonization, is the wealthiest member of the wealthiest and most famous banking house in the world. His monetary and social influence suggests the monarch rather than the financier. There is a story that Jay Gould once called upon him on business. Lord Rothschild sent out word that he was too busy to see the caller. Mr. Gould, not accustomed to being denied audience by any one, sent back rather a tart repetition of his request. After an interval the attendant returned with this reply from Lord Rothschild: "Tell Mr. Gould that Europe is not for sale."

New Diamond Field.

At Christiana, a little town in the Transvaal about seventy miles above Kimberley, an alluvial deposit has been discovered bearing diamonds, and the entire area has been staked out in claims, which are granted by the government, each fifty yards square. The "digging" for diamonds, which are found in the surface deposits, is somewhat similar to placer gold mining. There some 3,000 diamond miners, representing every nationality, are living in huts and tents with their families.

Horses Cry For It.

Thirty horses per hour is the average work per currying machine done in many stables. Furthermore, the animals thoroughly enjoy the massage, for this is virtually what the operation is, and when released from their stalls will often run over to the machine of their own accord. The look of perfect peace and contentment depicted on the face of the animal is an excellent testimonial in behalf of the grooming machine.—Scientific American.

Birds Lost at Sea.

In the far north and particularly along the ocean coasts birds are frequently storm driven and lose their bearings, so that many of them are lost at sea. They keep floating in the air, aimlessly striving to live, until exhaustion compels them to drop into the waves, which engulf them.

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tully.

Western Situation Desperate

Winnipeg, Feb. 2—The cattle situation in Alberta is reported as desperate. Severe storms are raging, and if the cold weather continues thousands of cattle will become food for wolves. Several herds have come into Medicine Hat and MacLeod from the prairies.

You cannot possibly have a better Cocoa than

EPPS'S

A delicious drink and a sustaining food. Fragrant, nutritious and economical. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

COCOA

Sold by Grocers and Storekeepers in ½-lb. and ¼-lb Tins.

AVOID A LIFE OF MISERY.

Don't Wed a Poor Man Who Has Neither Ambition Nor Energy.

Don't marry a poor man with no ambitions or energy. There are some men who never get on because they spend their time in complaining of how harshly the world has treated them instead of trying to surmount the obstacles and difficulties in their path.

The woman who is married to such a man is to be pitied, and every girl who is engaged to a man whose position does not compare favorably with that of other members of his sex should see that the fault does not lie with him. If it does, then she should seriously consider the advisability of remaining unwed, at any rate so far as he was concerned.

Any girl with a grain of sense in her head knows that the man who has never properly supported himself or contributed his share of expenses when living with his parents is not going to be able to support her. Matrimony with him will be the kind of grinding poverty that would kill the most robust sentiment that ever lived.

That is the poverty that has no hope to gild its horizon and no respect to make its present endurable, and the mother should use just as much effort to keep her daughter from marrying that type of man as she would to prevent her committing suicide in any other way.—San Francisco Examiner.

EFFECT OF WATER ON COAL.

How It Assists Combustion—Does Not Make the Coal Last.

It is often asserted that water on bituminous coal both aids combustion and "makes the coal last." Housewives who live where this coal is used and who are compelled to maintain stove or furnace fires are firm believers, as a rule, in this paradox. That water on coal cannot do both these people would know if they but thoughtfully considered it a minute.

The facts are these (and any one may easily verify them): In a light fire—that is to say, a stove or house furnace—water sprinkled on large lump coal really causes it to burn more rapidly. It soaks into the strata, into the porous surface, and, being there converted into steam, the lump is split into parts or the surface becomes corrugated and cavernous, thus offering a larger area of carbon to the active oxygen of the air. If the water is in excess of the amount which will do this it then no longer aids combustion, but retards it. Again, if the coal is fine a small dampness, nothing approaching wetness, however, may increase combustion by holding the particles apart, thus permitting the air to be admitted.

In short, says the Scientific American, water on coal favors combustion, when it does favor it, only by assisting the oxygen of the air to find more ready access to the surfaces of the carbon.

SELECTING A GOWN.

Keep in the same scheme of color in which the individual is made. In general wear few colors.

If a brilliant color is worn at all let it be near the face. Red is most atrocious when worn wrong.

If a person has a great deal of red or yellow in hair or face it calls for an extremely subdued color scheme.

In planning for different types of coloring where there is a warm scheme of color there should be no strong tints in the costume.

For a gown to be worn in the daytime consult the skin and hair coloring; in the evening the eyes, the reason being that artificial light throws into hair and skin the warmth not naturally there.

Two reds, one of which is vermilion and one crimson or cerise, with blue in them, are absolutely impossible. Cerises and crimsons must not be used anywhere in combination with scarlet types. A good plan to follow is to select things in slight contrast.

Aid to Mending Basket.

The mending basket is sometimes a terrible thing. Many a busy mother never finds the bottom. But there is a way to keep it a respectable size at least. In the laundry or wherever the ironing is done reserve the corner of some shelf for a small pincushion supplied with two or three needles of different sizes, a thimble, a pair of small scissors, two or three spools of cotton and a little box of buttons. As the clothes are picked out of the basket to iron and you find a rent here, a rip there and a button off somewhere else stop and fix it. It takes but a minute, and the task of mending is so distributed that the mending basket is no longer the source of so many weary sighs.

Pantry Laundry Bag.

A useful pantry article is a laundry bag for table linen. A capacious one may be quickly and easily made of two circular or square pieces of cretonne, fancy ticking or other strong material. In the center of one piece cut in X, turning down and binding the points thus formed. This gives a square opening. Attach a fancy cord to each corner of the opening by which to handle the bag. Sew the two pieces together in a seam and turn through the opening. Hang it on the back of the kitchen door and drop in soiled towels when passing.

Listless Children.

Normally healthy children should not be listless, and any lassitude not caused by illness should be corrected by parents immediately, though not by punishment, for if allowed to develop as the child grows it will prove a drag to ambition and in time create a spirit of laziness that is difficult to overcome. At least this is the opinion of the house physician in a babies' hospital.

Bad Society.

What you learn from bad habits in bad society you will never forget, and it will be a lasting pang to you. I tell you in all sincerity, not as in the excitement of speech, but as I would confess and have confessed before God, I would give my right hand if could forget that which I have learned in bad society.

LONDON'S GREAT SCHEME.

Ultimate Cost Will Probably Be $115,000,000 to Supply Electricity—Covers 451 Square Miles.

A great anti-trust move is proposed by the London County Council, which, if it can obtain the consent of Parliament, is going to spend $20,250,000 on a huge scheme for supplying London and the surrounding country with electricity. This would kill the threatened formation of a trust which is looming ahead with its inevitable accompaniment of increased rates.

It is proposed to cover an area of 451 square miles, comprising the County of London and parts of Middlesex, Essex, Kent and Surrey with the Council's system. A great central generating station will be built on the banks of the Thames below the city at a cost of $7,000,000, and the other $13,250,000 will be spent on the transmission and distribution of the power.

The majority of the London County Council is Progressive (Municipal-Socialist), and the scheme is opposed by the Moderates (Conservatives) on the Council, who favor another scheme for leasing the right to supply the whole London district with electricity to a corporation. In other words, the Moderates are backing the trust proposition.

Their corporation would simply be the controlling centre, which would combine all the existing electricity corporations in London, eliminate competition, regulate wages, and fix the rates to consumers at its own figure.

London hopes to be saved from the clutches of an electricity trust by the bold schemes of the County Council. The proposal, although it came late, was made a prominent issue in the London municipal elections, and gained the Progressives, who were threatened with a landslide, many votes.

If the Council does not take up the control of the electricity supply, it will fall into the hands of the trust, which, after running it for some years, will sell it back to the Council at a huge profit.

The Parliamentary Committee which considered the question of London's electricity supply last session decided that it was desirable that the Council should have control of the whole undertaking, and the big Liberal majority in the Commons, which is opposed to the trust interest, is certain to carry the scheme through. The only thing the bill will have to fear then is the House of Lords, which has already attempted to wreck some of the Council's improvement schemes.

In 1910, if the scheme goes through, the first two sections of the generating station will be working, and a great impetus will be given to the industries of London by a cheap and plentiful supply of power. The Council is confident that the revenue derived from the undertaking will be more than sufficient to cover the expenditure, including the charges for sinking fund and interest on capital, so that the Council's successful street car and other undertakings are likely to be followed by another great object lesson in municipal ownership.

A Distinguished Trio.

The Hon. Joseph Chamberlain is fond of relating an incident that occurred while he and Lord Rosebery were returning from the theatre one night. While crossing the street they were accosted by a ragged boy who, after sweeping the mud from their path, asked for alms.

Lord Rosebery was about to give the boy a coin when an idea struck him. "My boy," said Rosebery, "if you will hit that policemen a swat I will give you ten shillings." Prompt to the word, the boy crept in back of the officer, and, raising his broom struck him in the back, then turned and ran, but to the dismay of Rosebery, the officer caught the boy after a chase of a few yards.

Not wanting to leave the boy in a fix Rosebery tried to fix things up with the officer, but the worthy gentleman would not listen, and took them all three up to the station.

They were then taken before the judge of the station, and after surveying them through his glasses, he took down a book and, turning to Chamberlain, asked his name. "Hon. Joseph Chamberlain," was the reply, and the judge smiled.

Rosebery responded also with his full title, "Lord Rosebery."

The boy was next, and stepping to the front he drew himself up to his full height, and waited for the usual question, "Your name?"

"My name," said the boy, "Well, judge, I'm not the kind as what goes back on me pals. I'm the 'Duke of Wellington.'"

Ingratitude.

"Were you ever really glad to hang a man?"

"Only once," answered the sheriff. "I had prepared him a hearty breakfast of steak, eggs, potatoes, waffles and coffee."

"Yes?"

"And the infernal ingrate demanded stewed oats instead."

ARTHUR H. SYDERE,
Clerk of the Legislative Assembly.

Toronto, January 2nd, 1907.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

Tenders for Pulpwood Concessions

TENDERS will be received by the undersigned, up to and including the eighth day of March next, for the right to cut the pulpwood on a certain area, in the District of Nipissing, north of the Townships of Holmes, Burt, Eby, Otto, Beaton, etc., and immediately west of the interprovincial boundary line.

Tenders should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed, from time to time, for the right to operate a pulp or pulp and paper industry on the area referred to. Successful Tenderers will be required to erect mills on the territory, or at some other place approved by the Lieutenant-Governor in Council, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender, a marked cheque, payable to the Treasurer of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out the conditions, etc. The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc., apply to the undersigned.

F. COCHRANE,
Minister of Lands, Forests and Mines.

Toronto, December 29, 1906.

No unauthorized publication of this notice will be paid for.

THREATENED WITH PARALYSIS.

Peter E. Summers, of Kalamazoo, Mich., relates his experience: "I was troubled with Nervous Debility for many years. I lay it to indiscretion and excesses in early youth. I became very despondent and didn't care whether I worked or not. I imagined everybody who looked at me, guessed my secret. Imaginative dreams at night weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair loose, memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis. I took all kinds of medicines and tried many first-class physicians, wore an electric belt for three months, went to Mt. Clemens for baths, but received little benefit. While at Mt. Clemens I was induced to consult Drs. Kennedy & Kergan, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through my nerves. I was cured mentally, physically and sexually. I have sent them many patients and will continue to do so."

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had and besides it has the advantage of being the best quality and greatest strength.

THE REFUGEES

By A. CONAN DOYLE,

Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

her whole soul wrapped and consumed with jealousy and hatred of her rival. Ten struck, and 11, and midnight, but still she waited, fierce and eager, straining her ears for every footfall which might be the herald of news. At last it came. She heard the quick step in the passage, the tap at the anteroom door and the whispering of her page. Quivering with impatience, she rushed in and took the note herself from the dusty cavalier who had brought it. It was but six words scrawled roughly upon a wisp of dirty paper. It was her brother's writing, and it ran, "The archbishop will not come tonight."

CHAPTER XI.

DE CATINAT in the meanwhile was perfectly aware of the importance of the mission which had been assigned to him. He knew enough of the intrigues and antagonisms with which the court was full to understand that every precaution was necessary in carrying out his instructions. He waited, therefore, until night had fallen before ordering his soldier-servant to bring round the two horses to one of the less public gates of the grounds. As he and his friend walked together to the spot he gave the young American a rapid sketch of the situation at the court and of the chance that this nocturnal ride might be an event which would affect the future history of France.

"Are you armed?" he asked. "You have no sword or pistols?"

"No; if I may not carry my gun I had rather not be troubled by tools that I have never learned to use. I have my knife. But why do you ask?"

"Because there may be danger. Many have an interest in stopping this marriage. All the first men of the kingdom are bitterly against it. If they could stop us, they would stop it, for tonight at least."

"But I thought it was secret."

"There is no such thing at a court. There is the dauphin or the king's brother. Either of them or any of their friends would be right glad that we should be in the Seine before we reached the archbishop's house this night. But who is this?"

A burly figure had loomed up through the gloom on the path upon which they were going. As it approached, a colored lamp dangling from one of the trees shone upon the blue and silver of an officer of the guards. It was Major de Brissac of De Catinat's own regiment.

"Hello! Whither away?" he asked.

"To Paris, major."

"I go there myself within an hour. Will you not wait, that we may go together?"

"I am sorry, but I ride on a matter of urgency."

"Very good. Good night, and a pleasant ride."

"Is he a trusty man, our friend the major?" asked Amos Green, glancing back.

"True as steel."

"Then I would have a word with him." The American hurried back along the way they had come, while De Catinat stood chafing at this unnecessary delay. It was a full five minutes before his companion joined him, and the fiery blood of the French soldier was hot with impatience.

"I think that perhaps you had best ride into Paris at your leisure, my friend," said he. "If I go upon the king's service I cannot be delayed whenever the whim takes you."

"I am sorry," answered the other quietly. "I had something to say to your major, and I thought that maybe I might not see him again."

"Well, here are the horses," said the guardsman as he pushed open the postern gate. "Have you fed and watered them, Jaques?"

"Yes, my captain," answered the man.

"Boot and saddle, then, friend Green, and we shall not draw rein again until we see the lights of Paris."

For a mile or more the comrades galloped along. The road was very dark, and it was hard but for the loom upon either side to tell where it lay. De Catinat at least found it so, and he peered anxiously over his horse's ears and stooped his face to the mane in his efforts to see his way.

"What do you make of the road?" he asked at last.

"It looks as if a good many carriage wheels had passed over it today."

"What! Mon Dieu! Do you mean to say that you can see carriage wheels there?"

"Certainly. Why not?"

"Why, man, I cannot see the road at all."

Amos Green laughed heartily. "When you have traveled in the woods by night as often as I have," said he, "when to show a light may mean to lose your hair, one comes to learn to use one's eyes."

"Then you had best ride on, and I shall keep just behind you. So! Hola! What is the matter now?"

There had been the sudden sharp snap of something breaking, and the American had reeled for an instant in the saddle.

"It's one of my stirrup leathers. It has fallen."

"Can you find it?"

"Yes, but I can ride as well without it. Let us push on."

"Very good. I can just see you now."

They had galloped for about five minutes in this fashion, De Catinat's horse's head within a few feet of the other's tail, when there was a second snap, and the guardsman rolled out of the saddle on to the ground. He kept his grip of the reins, however, and was up in an instant at his horse's head.

"A thousand thunders of heaven!" he cried. "What was it that happened then?"

"Your leather has gone too."

"Two stirrup leathers in five minutes?"

"It is not possible that it should be chance," said the American gravely, swinging himself off his horse. "Why, what is this? My other leather is cut."

"And so is mine. I can feel it when I pass my hand along. Have you a tinder box? Let us strike a light."

"No, no; the man who is in the dark is in safety. I let my enemy strike lights."

"My rein is cut also."

"And so is mine."

"And the girth of my saddle."

"It is a wonder that we came so far with whole bones. Now, who has played us this little trick?"

"Who could it be but that rogue Jaques? He has had the horses in his charge. By my faith, he shall know what the strappado means when I see Versailles again!"

"But why should he do it?"

"Ah, he has been set on to it. He has been a tool in the hands of those who wished to hinder our journey."

"Very like. But they must have had some reason behind. They knew well that to cut our straps would not prevent us from reaching Paris, since we could ride bareback or, for that matter, could run it if need be."

"They hoped to break our necks."

"One neck they might break, but scarce those of two. They could not have thought to stop us. What did they mean, then? They could only have meant to delay us. And why should they wish to delay us?"

"For heaven's sake"— broke in De Catinat impetuously.

"Why should they wish to delay us, then? There's only one reason that I

(To be continued)

To stop a Cold with "Preventics" is safer than to let it run and cure it afterwards. Taken at the "sneeze stage" Preventics will head off all colds and Grippe, and perhaps save you from Pneumonia or Bronchitis. Preventics are little, toothsome candy cold cure tablets selling in 5 cent and 25 cent boxes. If you are chilly, if you begin to sneeze, try Preventics. They will surely check the cold, and please you. Sold by J. D. Tully.

As a Last Extreme.

Once a number of legal lights in Washington were gathered in the smoking room of a lawyers' club when the talk turned to a discussion of the veracity of lawyers. "The average man," remarked one disciple of Blackstone, "seems only too ready to assume we are all liars, a very unjust position, it seems to me. Do we not sometimes tell the truth?" he asked of his neighbor, a well known criminal lawyer.

"Certainly," promptly responded the latter. "We will do anything sometimes to win a case."

Same Thing.

Mrs. Scribbles—I believe the butcher is knocking at the door with his bill, Ferdinand. Scribbles—Tell him I am sorry, but I've just paid the rent and am short. Mrs. Scribbles—But it may be the landlord, Ferdy. Scribbles—Well, then tell him I'm sorry, but I've just paid the butcher and am short.—London Fun.

Making It Clear.

He—Will you marry me? She—No; I'm not a clergyman. He—Well, will you permit a clergyman to marry us? She—Yes; you to somebody else, and me to—well, somebody else.—London Tit-Bits.

Exhausting.

"They say early rising is very unhealthy."

"Of course. Many a woman has broken down her constitution getting her husband up in time for breakfast."

An Added Supply of Talk.

"I've had to get a new barber."

"Your old one getting careless?"

"No, but his baby is beginning to say cute things."

New York's Chamber of Commerce.

New York city has the oldest commercial corporation in the United States, the chamber of commerce, organized May 5, 1768, in historic Fraunce's tavern, where Washington had his headquarters and where he bid farewell to his officers after the Revolution.

Cats' Fur.

Cats' fur has no oily substance in it and consequently is more easily wetted through than that of most other animals.

Panama Jungle Animals.

Among the animals in the Panama jungles and swamps are deer, wild hogs, turkeys, pigeons, partridges, woodcock, rabbits, tapirs, monkeys, pumas, leopards, as well as some tigers and lions.

Lemons.

Before grating lemons it is well to wash them in a basin of lukewarm water, for on examination it will be found that the outside of a lemon is anything but clean, and if put under a microscope it will be discovered to have tiny black specks on it, which are the minute eggs of an insect.

BANKERS—The Crown Bank of Canada

SOLICITORS—Messrs. Bicknell, Morine, Bain and Strathy.

An investment which will not only yield big dividends, but will increase at par. per share $70 will next few years. A limited block of this stock is now placed on the market at 2ac. per share $70 will buy 100 shares, $200 1,000 shares, $2,500 10,000 shares.

THE PROPERTY

1. The east half of the north-east quarter of the south half of lot 6 in the 6th concession of Coleman Township.

2. The south-west quarter of the south half of lot 7, in the first concession of Flucke.

3. One 40-acre claim in the Township of Coleman, Anima-Nipissing District, adjoining claim No. 1041 I-2.

4. Twenty acres in the Township of Coleman, Anima-Nipissing District, being the north half of the south-east quarter of the north half of lot 19, concession V.

5. One 40-acre claim in the Anima-Nipissing District, being mining claim No. 1041-2, known as the "South Claim," situated about 1-4 of a mile west of Hay Lake and about one mile north of Anima-Nipissing. Total 180 acres.

6. 4,000 lots in the townsite of North Cobalt, beatifully situated on the west shore of Lake Temiskaming, containing 600 acres, close to the Green-Meehan and Red Rock properties, and only 700 miles from Toronto, on the Temiskaming and Northern Ontario Railway, and is sure to be the coming summer resort, as there is good fishing, boating, and bathing. The finest scenery, most interesting surroundings, and a very bracing climate.

These lots alone in a year or so will be worth the full capitalization of the company. The mining properties of this company are far better value than a great number of properties now on the market at double the price, without the townsite, which practically acts as a security, which is sure to increase in value every year, and protect every shareholder in full for his investment, with the chance of making very large money out of the development of the mining property.

Our shares will be increasing in value from year to year, and in three years from now should sell on the open market for $10.00 a share from the dividend it will then pay.

Parties wishing to secure an allotment can do so by wire or letter, as there is no doubt every share will be subscribed for before February 1st.

Call or write for prospectus, reports, maps, etc., that will give fullest information.

All drafts, checks, etc., may be made payable to the order of OWEN J. B. YEARSLEY.

The Capital of the Company is One Million Dollars ($1,000,000) in One Million Shares of One Dollar ($1.00) each, stock non-assessable.

OBJECTS OF THE COMPANY.

This Company has been organized by influential men for the purpose of engaging very extensively in the exploration and development of the mineral lands in Northern Ontario and with powers to buy and sell and develop promising mining claims.

The Company has already acquired the following valuable property known as the Currie property, being a location in the Temagami Forest Reserve, known as J. B. 22 on a plan filed by W. J. Blair, P. L. S., in the Bureau of Mines, on the 18th of September, 1906, said parcel consisting of thirty acres.

The location known as J. B. 22 in the Temagami Reserve is a very valuable one and adjoins the well-known Nadeau, Edison and Legree locations, from which ore has been shipped. The formation and ore in this section of the Temagami Reserve is similar to the best producing mines around Cobalt.

Mr. J. F. Whitson, Government Surveyor, who has just returned from Cobalt, says in an interview published in the "Evening Telegram" of December 3rd last: "Excellent reports have been received at Cobalt on the ore in the Temagami Reserve, and it is said that the findings there compare favorably with those around Cobalt."

The Company will prepare to sink a shaft on J. B. 22 and have no hesitation in saying that we will have ore ready for shipment May 1st, 1907.

Mr. Eggert, M.E., in his report on this property, says:

J. B. 22. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite the V. and VI. Concession of Coleman. Lease has been granted.

The claim is a 30 acre ore and about 600 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein, following the contract between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim, is stripped all the way across the 30 acres of J. B. 22 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18-inch vein of quartz, richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains, while the first one, as already said, is uncovered for all of 30 chains, making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 80 feet, and it shows 6 inch nicolite, 12 inch smaltite, together with cobaltite. Assays gave 672-1293-492-1161 oz. silver, or an average of over 700 oz. silver, which at the present price of 70c. is equal to $562.50 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes, and is one which needs only a shaft of 50 feet depth to be ready as a producer.

JACOB M. EGGERT, M.E.

New Liskeard, 13th November, 1906.

Do You Wish to Have a Share in the Wealth of Cobalt? The Opportunity Now Presents Itself to You.

This is an exceptional opportunity to secure stock in a first-class company at half value. So far as we aware no company has been organized in Cobalt district having better prospects.

The shaft on the Nadeau property, within 25 feet of our southern boundary, demonstrates the value of the ore in our jumbo vein. The Edison mine in close proximity is shipping ore, also the Legree and Kay Foster.

SUBSCRIPTION

We offer one hundred thousand shares at 50c. per share (par value $1.00) and believe the stock will sell above par within a few weeks. Subscriptions will be filed in order received and we reserve the right to reduce or return same. All subscriptions should be accompanied with cheque, draft or money order payable to order of the company at Toronto. Send today or it may be too late, as price will soon advance to par.

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 4 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 500 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 21 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 30 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

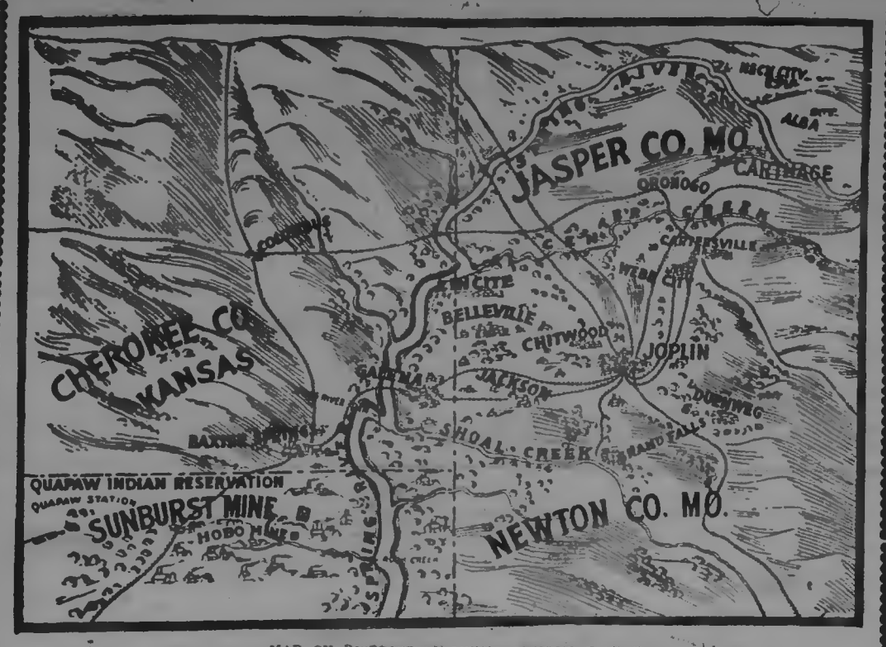
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 20 feet in thickness, lying at a depth of from 50 feet to 75 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magnolia, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 806,000 pounds of rich ore was taken out by the Hobo. This mine is 1½ feet from our property and is in the same ore bed. Shaft No. 2 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.



MAP OF DISTRICT SHOWING SUNBURST MINE.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize his opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor on such a proposition? At this price the business profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known, mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 3 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 20 feet. Ore is struck in shaft No. 3 at 57 feet depth, and the shaft is still in the ore at 76 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 26 feet.

Three shafts have been sunk. No. 1 shaft, 5 1-2 by 8 feet, is down 58 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 5 1-2 by 80 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 70 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 5 1-2 by 5 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable mines in the following figures showing the enormous annual dividends earned by lead and zinc mines in the South:

Oreola Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	48 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	80 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	58 per cent.	Linger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	140 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 100 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock;	$1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock;	$3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock;	$8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock;	$16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock;	$24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock;	$40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock;	$80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock;	$160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

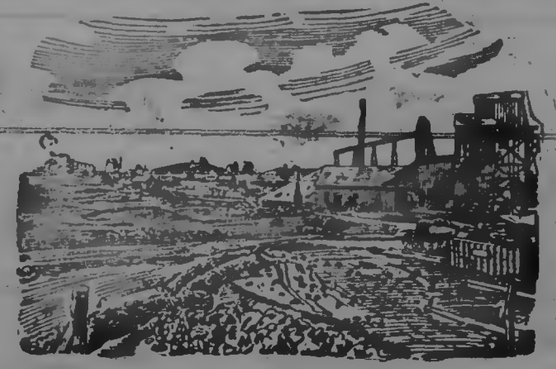
The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $51.12 per ton for lead and $26.61 for zinc to $42.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 80 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent, can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 967,109.00
A. W. Taylor	180	180,758.00
J. W. Aylor	40	576,571.00
The Burgner Mining Co.	80	199,579.00
Center Creek Mining Co. (production to date)	200	6,962,194.00
Mrs. E. J. Chinn	120	224,799.00
Majestic Consolidated Zinc & Lead Co.	53	234,486.00
Continental Zinc Co. (production to date)	200	1,577,583.00
Consolidated Troup Mining Co.	40	193,613.00
Daughtery-Davy-McMillan Estate	60	466,000.00
The Empire Zinc Co.	451	120,319.00
Fox Heirs	20	120,324.00
Granby Mining & Smelting Co., 1906		1,261,521.00
Granby Mining & Smelting Co., 1904		1,625,650.00
John G. Guinn	640	82,237.00
Pittsburg-Joplin Lead & Zinc Co.	10	98,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	413,204.00
United Zinc Co.	186	390,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.



BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Comp

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 78 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drilling their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

FEW CRACK BILLIARDISTS.

Schaefer Deserves Most Credit For Improving the Game.

The fact that very few first class billiardists have ever been developed is one of the strange features of the game. Vignaux, Schaefer and Slosson have been champions more than thirty years, the only others developed during all this time being Ives, Hoppe and Sutton, a most remarkable showing, not to be paralleled in any other branch of sport.

Of all the experts Schaefer deserves most credit for the development of the game to its present high standard. He always has been anxious and willing to aid in the development of youngsters, and Ives, Hoppe, Moralngstar and Sutton all were his pupils. The balk line nurse, the feature of play responsible for all high runs, however, is the invention of Sutton, and when as a shortstop he first sprung it he occasioned great surprise.

Schaefer is the father of all the rules under which billiards are played. At various times he has surmounted by his inventive genius the many barriers imposed on experts to decrease their speed and necessitated the making of new restrictions, for the other experts could all take advantage of the new discoveries as soon as they came to know them, and almost unending runs were the result.

In a championship contest between Jake and Ives the latter sat down with 14 to go, and Schaefer came to bat with 500 to go. The largest run ever made up to that time had been 288, and the Wizard seemed to have but little show to win. His great inventive genius came to the rescue, however, the anchor nurse was discovered, and Schaefer ran the game out. This was the only time the anchor nurse was allowed in a match game, for Ives after it was discovered could play it as well as Schaefer, and as it made the game too easy it was immediately barred.

Incidental to the above game, Frank White, a well known Chicago sport, won a most remarkable bet from Leo Mayer, the well known bookmaker. As Schaefer walked up to the table in the final inning White turned around to Mayer, who was making books on the contest, and said, "What are the odds now, Leo?" "One hundred to 1," said Mayer. "I'll bet you $10," said White. "Done," said Leo. And when the game was over Leo had to settle with the wise Mr. White, who, a billiard player himself, knew that a game was never over until the last point was made.—Washington Post.

Painting Barrels.

Did you ever see a Standard Oil man paint a barrel? No? It is a revelation. Tricks in all trades. The oil barrels, as every well informed man should know (Standard Oil being the biggest thump in the world), are blue as to bilge and bulge and white as to heads. The completed barrel is rolled into the shop by thousands. A man steps up with a brush of white paint and with three swipes executes a design upon the head, then spins the barrel along. It is caught by another man with a brush deeply dipped in blue paint. He takes the rim between his thumb and fingers, gives it a whirl and while that barrel is spinning runs his brush up and down. In less than three seconds that barrel is all blue. Then as it spins along the man with the white paints keels it over and with three more swipes makes the other head white. Talk about your bowling alleys!—New York Press.

Blind Football Fans.

When the 300 inmates of Henshaw's Blind asylum, Manchester, sat down to tea the other evening an officer read out to them the announcement in the Daily Mail of a special edition for the blind. There was a burst of applause when the reading was over, followed by a buzz of animated discussion.

"It is surprising," said Mr. M. Hillingworth, the governor, "what a keen interest the blind take in field sports. They follow the game of football in detail."

"Have you ever been to a football match?" he asked a blind youth.

"Yes," he replied.

"And you know the players?"

"Yes, I know them all and everything that is going on."—London Mail.

Single and Plural S Germans.

A journalist in Berlin has been exercising his ingenuity in attempts to explain the meaning of the letter S which appears with more or less frequency after the names of German military officers in the records kept at the ministry of war and in the kaiser's military cabinet. He has come to the following conclusions: One S after an officer's name means that this particular officer "sauft" (drinks); SS means that he "sauft stark" (drinks hard); SSS denotes that he "sauft sehr stark" (drinks very hard); SSSS means that he "sauft sehr stark schnappa" (drinks very hard schnapps); finally, SSSSS means that the "schnappa" is "schlecht" (bad). Any officer with five S's is summarily dismissed by the kaiser.

A Swell Bootblack.

A bootblack wearing a diamond stud and whose linen is as spotless as that worn by those whose shoes he shines is one of the fixtures of a government building in this city. He was highly insulted when a passing stranger, seeing his "kit," asked him to "polish 'em up." In a loud voice the son of Italy gave the well intentioned offender to understand that he "shined only by contract." This is a fact, and when at the end of each month he collects his "fees" the bootblack's pile in profits amounts to as much as the salaries of some of the men who employ him and is really in excess of that paid to many.—Philadelphia Record.

White Ants.

The white ants of Ceylon are very industrious. Their hillocks are about the size of a cocoanut and contain sponge-like nests, each inhabited by thousands of ants. Pinhead nodules of white fungus are cultivated in these nests as food.

Plums.

More energy can be extracted from one pound of plums than can be got from a pound of fresh pears or even from a pound of dried figs or a pound of prunes.

"Rosamond Chief"

GOLD MINING COMPANY

Having just been incorporated with a capital of 1,500,000 shares, par value $1.00 each, there has been deposited in the treasury 500,000 shares to be sold for developing work. Every share fully paid and forever nonassessable. No personal liability to any stockholder.

Our property is located in Kern county, about 85 miles north from Los Angeles, and near the celebrated Hamilton mine, within 4 miles of Rosamond on the Southern Pacific Railroad.

We have a 175-foot ledge with assay values from $5.00 to $40.00 per ton.

We are now selling a small block of treasury stock for the purpose of putting in a plant for working the ore, and we want you with us. As we have a first class mining property, not a prospect, we will only sell a limited amount of this stock at the low price of 5c per share. Send in your order at once. For further information and prospectus, address our office.

EXPERT'S REPORT.

Los Angeles, Cal., Dec. 22, '06.

ROSAMOND CHIEF GOLD MINING CO.,

Gentlemen: I have made a special examination of the property of your company, and I find this property a valuable one, consisting of four claims, namely, the Mary Anna, Maggie, Alice, and Little Gem. All four have valuable ledges with average assay value of $20.25 per ton. This average is taken from the surface to a depth of 10 feet. I am satisfied it will do a great deal better with depth and as developing continues.

Yours truly,

S. M. SARMAN.

SMART SET'S LOAD.

Women Who Follow Fashion Will Have Big Burden.

A course of physical culture may be necessary for the smart woman this winter if she hopes to endure the extraordinary load that fashion is laying on her form from the lobes of her ears to the toes of her feet. Even her picture hat, light as it is, compared to its size, is so large that it must make itself felt to an extent that no hat should do.

The old-fashioned two-button glove is no longer seen on the smart woman's hands. Twenty or twenty-four buttons measure the exaggerated length of her driving, morning or accented white kid "at home" gloves. Boots have doubled their height, while the simple laces on walking shoes have been replaced by ribbons tied in enormous bows.

A reporter who visited well-known London forms to learn the extent of this craze for magnificent adornments was met by the information that the demand for exaggeration is likely to increase.

"Picture hats are assuming the most extraordinary proportions," a [illegible] milliner confessed, but the most noticeable point is the gigantic shapes of the floral trimmings. A cabbage rose in pink velvet is becoming perilously near the size of a real cabbage. Bunches of grapes adorn the newest hats, each grape being about double the circumference of the genuine fruit.

"Veils are following the fashion in hats. The minute chenille spot is replaced by black velvet patches the size of a sixpenny piece, and as for hat-pins, I doubt if they can increase in size. Most of the latest patterns are adorned with knobs which would not make insignificant door handles."

"The tendency in jewelry is to adopt distinctly exaggerated styles," a well-known jeweler in Regent street said—"Large Oriental rings, heavily studded with jewels, are in great demand. Drop earrings, which weigh down the lobes of the wearer's ears, are made in a most massive pattern.

"Jeweled muff chains can rightly be termed 'fashion's fetters.' The tiny beads or crystals between the links of the chain have been replaced by lumps of turquoise, opal or amethyst in the rough. Cable chain bracelets bear a close resemblance to handcuffs in their proportions.

"We have noticed several points which show how the Brobdignagian mania has affected drapery goods," the manager of an Oxford street firm said. "The tiny glove handkerchief is quite out of date, and has been replaced by silk and cambric of much larger proportions. In the haberdashery departments buttons resemble five shilling pieces, made of paste, glass, silver or leather."

Unrehearsed Effects.

Some stories which Mr. Charles Manners of the Moody-Manners Opera, told the other day concerning incidents on the stage which upset the gravity of the players, and well-nigh wrecked important scenes, remind "P. T. O." of several similar contretemps. Miss Julia Neilson tells of some curious experiences in unrehearsed effects on the stage. "I remember," she told an interviewer once, "on one occasion playing in Dublin. It was Juliet. In the death scene, when I seized the dagger and stabbed myself, a very excited Irishman in the pit, overcome with sympathy and terror, shrieked 'Oh! Jim, she's done it!' I was so convulsed with laughter that I could only get up a giggle for the death struggle. And again, I was playing Pauline in 'The Lady of Lyons' with a weak Claude. He had been sick, and was not strong, so I told him when I rushed to him I would clasp my arms around him, and he must just give way a little. I flew to his embrace, and he gave way indeed, and down to the floor we both went together entangled in my train. We gathered ourselves up as best we could, and I caught him again with fervor, and the audience tried to stifle their laughter, when Claude's next words brought down the house: 'This is the heaviest blow of all.'"

Bats That Eat Fruit.

Fruit eating bats eat fruit only and are confined to Asia, the islands of the East Indian archipelago being one of their principal habitats. They cover the trees in daytime in vast multitudes, looking like a large flock of crows.

Toy Wagons.

It must be that the toy wagon is the favorite plaything of children the world over, for there is no country in which even up wagons are unknown, but in [illegible] countries where carts are used there are toy substitutes.

Historic Old New York.

Greenwich village, in New York city, as first brought into prominence when Sir Peter Warren, descended from an ancient Irish family and vice admiral of the British fleet, settled there in 1744. He married Susannah De Lancey and settled on a fine estate of more than 300 acres, running from Christopher street to West Twenty-first. It was laid out like an English park, with splendid hedges and avenues of trees and a fine old mansion, which was the resort of all the quality of old New York. His three daughters all made brilliant marriages in England. One became the Countess of Abingdon, and her name is preserved in Abingdon square. On the division of the estate at Sir Peter's death the homestead fell to her. She sold it to Abijah Hammond, who sold it to Abraham Van Nest, and it is still remembered by many as the old Van Nest house, demolished in 1865. Among other distinguished persons who have lived in Greenwich were Oliver De Lancey, William Bayard, Washington, Vice President and Mrs. John Adams, Aaron Burr and Tom Paine. Barrow street was originally named Reason street in compliment to the great infidel's best known book, "Age of Reason."

Useful Teeth.

Many different reasons are assigned by people for their unwillingness to submit to the extraction of teeth. But it was no fear of pain which was uppermost in the mind of Miss Mehitable Lamson of Willowby when told by the dentist that she would be much benefited by the loss of two of her prominent teeth.

"You say they can't be filled," she said, in evident distress, "and you couldn't get any others in for me for more'n a fortnight?"

The dentist admitted reluctantly that it was so.

"Well, then, I suppose I'll have to get on as best I can." And Miss Mehitable seated herself in the torture chair. "But I don't see how I shall make out. Here I am, chambermaid to the Willowby inn during the summer, and it's chock full of folks, with lots o' transients coming and going, and those are my pillowcase teeth!"

Weight of the Brain.

There is just five ounces less amount of brain matter needed to keep a woman from idiocy than there is needed for a man. The average weight of a man's brain is forty-nine and one-half ounces and that of a woman forty-four ounces. When a brain falls below thirty-seven and a half ounces in a man idiocy usually occurs. A woman's brain has to fall to thirty-two and one-half ounces before she reaches the same condition. Man has a larger brain in proportion to his stature than woman, while, on the other hand, woman has a larger brain in proportion to her weight. The female brain begins to lose weight after the age of thirty; that of the man not till ten or fifteen years later. The loss in a woman is slight, however, and she keeps up a high brain weight much later than a man.

The Deadly Dull Bachelor.

"It is always easy to see how long a couple have been married by noting whether the house is full of his friends or hers," according to a writer in the London Ladies' Field. "A man invariably begins by inviting all his bachelor friends to his house. He is anxious to show off his wife, and he fondly imagines that they will like her and that she will like them, which rarely happens." The writer then goes on to dissect the bachelor and concludes, "I don't know why one's husband's bachelor chums should, as a rule, be so deadly dull, but they usually are; and, as a matter of fact, it was probably their dullness which originally drove him into matrimony, only he has not the sense to see it." There would be fewer married if it weren't for the bachelors.

Might Be Worse.

When the poet Wordsworth died an old lady at Ambleside lost no time in telling the mournful news to an old and confidential manservant. "Ey, ey!" quoth Thomas. "It's a gre't loss nae doot, but efter a' it may not be sic a parlish loss as ye're coontin' on. Mrs Wordsworth, they say, is a gey, clever body, and she'll be carryin' on the business, we may be sewer."

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

Humphrey & Company

160 St. James Street, Montreal

BIG G

CURES in 1 to 5 days Guaranteed not to stricture. Prevents Contagion. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

MEN AND WOMEN.

Even Her Blood Turned to Water

When Dying of Pernicious Anaemia Her Life Was Saved by

..Ferrozone..

Probably very few cases are on record in which an absolute cure has been made of pernicious anaemia.

But Ferrozone did cure Miss Elaine Stanhope—cured her absolutely, and her mother Mrs. G Stanhope of Rothesay, Ont., says the following:

"My daughter complained of feeling tired. She was very pale and listless, and kept losing strength till too weak to attend school. The doctors prescribed different bottles of medicine but Elaine kept getting worse instead of better. She had Anaemia and we were afraid for a while that she might never rally. We read of a similar case, that of Miss Dezent of Stirling, Ont., being cured by Ferrozone, and this induced us to get it for Elaine. It took three boxes of Ferrozone to make any decided improvement, but when six boxes were used my daughter was beginning to be her old self again. It didn't take much longer to make a complete cure, and I am convinced that there is no better blood-maker than Ferrozone. It has made a new girl of Elaine. She has gained ten pounds in weight and looks the picture of perfect health. She is stronger and enjoys the best of spirits. The credit of her recovery is entirely due to Ferrozone."

Every young girl and young woman can make herself strong and healthy with Ferrozone.

It makes blood, nerve and tissue—makes it fast—makes it to stay.

Complexion soon becomes perfect, nerves get new strength, tiredness vanishes—perfect health is the reward for using Ferrozone, which is sold by all druggists—price 50c. per box; don't fail to try it.

Boarders Wanted

Good accommodation for boarders in a home with all modern conveniences. Apply at 29 Queen street. 6t

New Dominion Bank Improvement

The Dominion Bank, as might be expected with Mr. John Crane as local manager, is losing no time in getting its new premises prepared for business. Yesterday the north side of the former China Hall was enclosed by boarding preparatory to the insertion of a new cut stone front, as described in a former issue of The Times.

Barrie Horseman Has Gone

A Barrie despatch of yesterday noted that Mr. N. Dyment who has been seriously ill for the past two weeks, taking a turn for the worse on Sunday, passed away yesterday morning. Mr. Dyment was a prominent lumberman and horseman and was one of Barrie's most widely known and respected citizens.

FOR SALE

Forty shares of Peterborough Cordage Co. Stock at par if taken at once, or will exchange for Foster Stock at market quotation.

D. N. VAN DYKE,
½ Draper-st., Toronto, Ont

Beautiful Zephra

Zephra, a beautiful story of Norseland in four acts and grand transformation, will make its initial bow before a Peterborough audience on Friday evening, February 8th. Beautiful scenery, merry dances, sparkling music, gorgeous costumes, a strong story and a dazzling display of electrical effects, make in part this great spectacle, a beautiful drama of fairyland, once seen never to be forgotten. The opening night of Zephra will be made a gala night, and special effects will be used on that occasion. Seats go on sale at the Box Office Tuesday, February 5th, at 9 a.m., for all five performances.

Piles get quick relief from Dr. Shoop's Magic Ointment. Remember it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding, or blind piles disappear like magic by its use. Try it and see. J. D. Tully.

The New Term
—AT THE—
PETERBOROUGH BUSINESS COLLEGE
Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.

You cannot make a better investment.

For particulars, address

W. PRINGLE
Opposite Post Office, Principal.

LOCAL INCIDENTS

By The Times Man on the Street

—Nothing doing in the police court yesterday morning.

—The Woman's Art Association Reading Club met last night in the studio.

—Mr. Bagot, liveryman, lost a valuable horse yesterday from inflamation.

—The annual meeting of the Wm. Hall Poor Trust, was held in the council chamber yesterday afternoon.

—On Sunday evening Rev. Canon Davidson, and Rev Mr. E. A. Langfeldt of St. Luke's church, exchanged pulpits.

—The regular meeting of the Ladies' Aid Society of George street church will be held this afternoon at 3.30 o'clock.

—The St. Peter's school concert for Thursday promises to be a great success. There will be a chorus of some 200 voices.

—The next sitting of the First Division Court will be held on Thursday, February 22nd, before His Honor Judge Weller.

—There were twelve interments at Little Lake cemetery during the months of January. This is an unusually small number.

—A cottage meeting will be held on Thursday at the residence of Mr. Geo. Curtin, brickyard, at eight p.m. conducted by Rev. E. A. Langfeldt.

—The "turkey" of a local contemporary is really a "goose." This refers to a rifle competition. However the "Answer" is easily read.

—The 40th Northumberland Regiment celebrated its fortieth anniversary last Friday. Some fifty officers and guests gathered to honor the occasion.

—Yesterday a Times representative saw two bets made one of $5 in one of $10 as to whether Ald. Geo. Ball or P. C. Adams gets (he., got last night) the sanitary inspectorship.

—About eight o'clock yesterday morning the fire brigade had a call to Murray street. A chimney on Metheral's terrace was on fire. No damage was done.

—Mr. Geo. Cochrane began his duties as truant officer yesterday. Boys and girls who have been in the habit of playing "hookey" had better give up the habit.

—The Young Peoples' Association of St. John's church last night held a most successful dramatic evening Mr. Charles Reid very acceptably held the chair. Mr. Mat. Dryselade, B. Doucette took the leading parts.

—Yesterday evening as a leading local divine was calling on The Times city editor, the lights supplied by the Peterborough Light and Power Co., went down some 20 below zero. What in the matter with these lights any way.

—The time for receiving tenders for the new building of the Canadian General Electric Company has been extended until ten o'clock this morning. They will be received at the office of John Belcher, up to that hour.

—Messrs. John Hamm and N. B. Gould have purchased the Royal Hotel from Mr. Charles Nixon. The price paid was $6,000. Mr. Gall, of Toronto, the new proprietor, has a lease of the building for three years so the hotel business will have to be continued for this period. —Port Hope Guide.

—See our lines of society and business stationery, all qualities at prices to suit. Times Bookstore.

Wasted Water

Belleville Ontario. The manager of teh waterworks gives us the following interesting particulars. The ordinary house tap leaking 150 drops a minute runs a pint in 17 minutes, a gallon in 136 minutes—10.7 gallons in 24 hours. The same tap running just enough to prevent freezing runs a pint in 15 seconds, a gallon in 120 seconds, 30 gallons per hour, or 720 gallons per day.

Mr. Spence Elected Turnkey

Mr. George Spence, of Cobourg, has been appointed turnkey of the new counties' jail in that burg in place of Mr. Jas. Haig, resigned. The salary is $600, and Mr. Spence will enter upon his duties as soon as the prisoners are transferred to the new jail. Mr. Spence was elected reeve of Cobourg at the last municipal election.

Hugh Mackey Wins the Match

In last week's rifle competition at Messrs. Yeates Bros., George street shooting gallery for a tremendous goose resulted as follows;

Hugh Mackey	57
J. Simmons	56
Elmor Davis	56
George Barrie	54
M. Edmonson	55
T. Williams	55
Chas. Scales	54
Stan. Kennedy	53

Cobourg Thinks It Will be a City

The Cobourg Sentinel-Star is a strong advocate for the future of that moribund but pretty little country town. It notes that Cobourg some years ago wanted to be a city, going on to say that money was spent freely and some of it was thrown away, but the people were prepared to tax themselves to be great and prosperous;

"Our fine town hall was built and our railway to Peterborough. Thousands of our dollars were thrown into Rice Lake to make a solid bed across that large body of water. The prospect now in everything seems to be coming our way, and the ferry, the Canadian Northern Railway, the Canadian Pacific Railway and the terminus of the Midland Railway coming, as it should have come years ago to Cobourg. We have the best harbor on the north shore of Lake Ontario, on which we spend much money, and that harbor should be the asset against our debt, and give us a great start in the near future.

That our American forests abound in plants which possess the most valuable medicinal virtues is abundantly attested by scores of the most eminent medical writers and teachers. Even the untutored Indians had discovered the usefulness of many native plants before the advent of the white race. This information, imparted freely to the whites, led the latter to continue investigations until to-day we have a rich assortment of most valuable American medicinal roots.

Dr. Pierce believes that our American forests abound in most valuable medicinal roots for the cure of most obstinate and fatal diseases, if we would properly investigate them; and in confirmation of this conviction, he points with pride to the almost marvelous cures effected by his "Golden Medical Discovery," which has proven itself to be the most efficient stomach tonic, liver invigorator, heart tonic and regulator, and blood cleanser known to medical science. Dyspepsia, or indigestion, torpid liver, functional and even valvular and other affections of the heart yield to its curative action. The reason why it cures these and many other affections, is clearly shown in a little book of extracts from the standard medical works which is mailed free to any address by Dr. R. V. Pierce, of Buffalo, N. Y., to all sending request for the same.

Not less marvelous, in the unparalleled cures it is constantly making of woman's many peculiar affections, weaknesses and disturbing derangements, is Dr. Pierce's Favorite Prescription, as is amply attested by thousands of unsolicited testimonials contributed by grateful patients who have been cured by it of catarrhal pelvic drains, painful periods, irregularities, prolapsus and other displacements, caused by weakness, ulceration of uterus and kindred affections, often after many other advertised medicines, and physicians had failed.

Both the above mentioned medicines are wholly made up from the glyceric extracts of native, medicinal roots. The processes employed in their manufacture were original with Dr. Pierce, and they are carried on by skilled chemists and pharmacists with the aid of apparatus and appliances specially designed and built for this purpose. Both medicines are entirely free from alcohol and all other harmful, habit-forming drugs. A full list of their ingredients is printed on each bottle-wrapper.

Charles Crowley is Wanted at Lindsay

Chief Ramel has received a communication from Chief Nevison, of Lindsay as follows;

"I hold a warrant for the arrest of Charles Crowley, charged with seduction, Aged 23 years, large blue eyes, long, light brown hair, parted on the side, partly hanging down over his face. Fair complexion, smooth red, thin face. Weight 155 pounds. Height, five feet, nine or 10 inches. Wearing grey pants, grey checked coat and vest, and if he has an overcoat on it will be black. Soft felt hat with full crown, that is the crown is not dinged in as usually worn and he wears it a little tilted on the left side of his head. Walks quite straight with his head up. Patent leather shoes well worn.

SOCIAL AND PERSONAL

—Messrs. W. F. Turner and J. S. Ferguson, of the firm of J. J. Turner & Sons, have gone on a business trip.

—Mrs. F. S. Schneider, 170 London street, will not receive again until the third Tuesday and Wednesday of March.

—Mr. Jas. Pollard and his daughter, Miss Gertrude, of Fort William, are spending a month's vacation in the city.

—Mrs. T. W. Robinson, Weller St., will not receive today but will be at home the second and third Tuesdays in this month.

—Mr. R. Gliddon of the Conservatory of Music, left yesterday morning for Toronto, to attend the Mendelssohn choir concerts last night and this evening.

H. Vaughan, J. L. Hobden, J. B. Wallace, W. E. Young, W. R. Shriver, D. D. Williams, J. D. Webb, T. E. D. Pike, H. J. Pyne, F. A. Brady, A.H. Rands, all of Toronto, registered yesterday at the Oriental Hotel.

Mock City Council at the Local Y.M.C.A.

Last night a Times man happening into the Y.M.C.A. assembly rooms found that spacious apartment crowded from Alpha to Omega, with the youth (and incidentally some beauty) of Peterborough, the fair sex predominating. From the stage and the east end to the wall at the rear the hall was simply packed by young admirers and adherents of this, one of Peterborough's most commendable institutions.

The occasion of last night's great meeting was a mock city council meeting by some of the young men of the association. The acting mayor was Mr. Fred Brown who upheld his official position with dignity and credit to himself and his colleagues.

A deputation of ladies addressed the council among whom Miss Leary, daughter of Ald. Leary gave a good humored "roast," to Councillors Munro, Wood, Ames and others.

The mock council held a good session, celebrated for good debate, witty speeches and general adaptation to this work of the real city fathers.

Miss M. T. Corcoran Is Now Mrs. Cleary

Yesterday morning in St. Peter's Cathedral, Miss May Teresa Corcoran, daughter of Mr. Ryan Corcoran, Elm street, Peterborough, became the bride of Mr. Hugh John Cleary, of Charlton, New Ontario. The ceremony took place at seven o'clock and was performed by Rev. Father Galvin. The bridesmaid was Miss Stella Bull, and the groom was attended by Mr. John Hart.

The wedding party went direct from the cathedral to the bride's home, where a sumptuous wedding breakfast was served and hearty congratulations tendered by a large number of friends.

Mr. and Mrs. Cleary left yesterday evening for Charlton, where they will reside. The happy couple have the best wishes of a large number of friends.

A Quiet Place

A nervous-looking man went into a George street store the other day and sat down for a half hour or so, when a clerk asked him if there was anything she could do for him. He said "No, he didn't want anything." She went away and he sat half an hour longer, when the proprietor went to him and asked if he wanted to be shown anything. He said, "No, I just want to sit around. My physician has recommended perfect quietness for me, and says above all things I should avoid being in crowds. Noticing that you do not advertise in the newspapers, I thought this would be as quiet a place as I could find, so I just dropped in for a few hours seclusion." The merchant picked up a bolt of cambric to brain him but the man went out. He said all he wanted was a quiet life.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

Cattle Bought for House of Refuge

The management committee of the new County House of Refuge, Reeve Scott of Smith, chairman, is making arrangements to buy stock and implements for the House of Refuge farm, including three horses, and some eight or ten cows and the usual number of agricultural implements required for a hundred acre farm.

So far there are no inmates of the county house of refuge, but several applications have been made to the different township reeves.

The Look Company Officers Re-elected

As foretold in yesterday's issue of The Times the Peterborough Lock Works held a meeting yesterday afternoon. The election of officers resulted in the old board being re-elected as follows;

Hon. Pres., Senator Geo. A. Cox
President, J. R. Stratton.
Vice Presidents, W. G. Morrow.
Sec.-Treas., E. H. Howson.
Managing Director, Thos. Fortye.
Directors, (Wm. Irwin, A. L. Davis.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.
Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

VOICE SYMPATHY OF THE DOMINION

Parliament Adjourns After Sir Wilfrid Expresses Sympathy for Their Excellencies---Are Close to Canadian Life.

Ottawa, Feb. 5.—On the conclusion of the routine business in the House of Commons yesterday afternoon, the Premier, Sir Wilfrid Laurier, said: "Mr. Speaker, for reasons which will be appreciated even before they are uttered, I rise to suggest that the House should not proceed with the business, but that it should be adjourned. Hon. members assembled here are aware that Lady Victoria Gresfell, eldest daughter of their excellencies the Governor-General and Countess Grey, is no more A young woman not yet thirty years of age, happily married, mother of three children, she succumbed last evening to an insidious disease, against which she fought with great courage, but unfortunately she fought in vain The relations which have always existed between the holder of the office of Governor-General and the people of this country, have always been so intimate, and I may say affectionate, that never have Canadians been indifferent to any incident to the life of the incumbents of the office. Indeed, these affectionate relations have continued ever after the official connection of our Governor-General has been severed with Canada. Whatever may have happened to them and their families, whether of joy or sorrow, and more particularly of sorrow, the Canadian people have sympathetically desired to share. I think I may say that this is more particularly true of the present incumbent of the office than even of his predecessors. It will be admitted by all that, although their excellencies have been in this country only a little more than two years, they have entered more completely than have others into the life of the Canadian people. The sad event at Government House is doubly painful from the fact that it occurred almost in the midst of festivities which had been organized by their excellencies to promote and encourage art in this country. It is painful to reflect that even while those festivities were in progress the angel of death hovered at the door, and it was only their high sense of duty which impelled their excellencies not to postpone those functions. Under such circumstances the sympathies of the members of this House, the sympathies of the people of Canada will pour out on their excellencies in their bereavement. From every Canadian home, from the heart of every father and of every mother in this land, there goes forth the prayer that He alone who can comfort will give fortitude and consolation to their excellencies in this sad hour of their affliction I have the honor to move, seconded by Mr. R. L. Borden, that the House do now adjourn."

MR. BORDEN AGREES.

Mr. R. L. Borden, leader of the Opposition, said; "The Prime Minister has most fittingly and eloquently voiced the feelings that are uppermost in the hearts of the members of this House and in the hearts of the Canadian people today. On an occasion such as this a common bond of human sorrow and sympathy unites us. It is true, as the Prime Minister has said, that the past three weeks have been a period of very great sadness and trial to their excellencies, and we cannot have failed to remark that throughout that time they have borne themselves with unshrinking courage and unwavering devotion in the performance of the duties cast upon them by their high position. That devotion and that courage have won the respect and admiration of us all. Their excellencies can rest assured that in their bereavement they have the heartfelt sympathy of the Canadian people."

Wm. Hall Poor Trust Officers

At the annual meeting of the Wm. Hall Poor Trust for the Protestant poor of Peterborough, with Mr T. W. Robinson presiding, it was shown that some $900 had been expended for charitable purposes during 1906 This trust is doing a good work among the old people in the city. The officers elected were as follows:

Chairman—T. W. Robinson.
Sec.-Treas.—W. G. Ferguson.
Auditors—Jas A. Hall, F. E. Bell.

Ald. Harry Morgan Has Assumed Office

As first noted in yesterday's issue of The Time, Ald Geo. Hall has been appointed sanitary inspector.

By request of several of his personal friends we again say that Mr Harry Morgan, who stood next highest to the list of successful candidates at the recent municipal election, has taken the declaration of office, and is now a full-fledged member of the city council, entitled to take his seat.

The act provides that in the event of a vacancy during the year, the candidate receiving next highest vote to those elected as representatives shall fill the unexpired portion. The alderman resigning, and thus Ald. Morgan is now a representative of the city.

G.R.R. COCKBURN WAS ACQUITTED

Evidence Did Not Prove He Had Knowledge of McGill's Action

MAGISTRATE'S DECISION

McGill's Evidence Was Not Corroborated by Documents.

Toronto, Feb. 6.—After hearing Mr. G. R. R Cockburn's evidence yesterday, regarding his connection as president of the Ontario Bank—he having been charged with making false returns to the Government—Magistrate Denison acquitted the defendant honorably.

THE MAGISTRATE'S DECISION.

After the evidence for the defence was all in Crown Attorney Corley asked that a stated case be made to the Court of Appeal in order that the meaning of the statute might be ascertained, that whether with guilty knowledge or not the officer of a bank who signs a false statement shall be held to be guilty of a misdemeanor under the terms of the statute.

The magistrate held, in refusing to grant a stated case, that two facts must first be brought out to make the accused liable—first, that the statement signed was false, and, secondly, that he had a guilty knowledge that it was false. That a man should be guilty of a crime, having no wilful knowledge or intention, would be a strange construction, indeed, to put on the act, and no Parliament ever intended that such an interpretation should be taken of it.

"There have been few cases in Canada in which this clause of the statute has been used, but the most notable is in the case of the president of the Bank of Yarmouth, in which the charge was almost identical. Judge Longley, who had been Attorney-General of Nova Scotia, took this view of the case. There is no reason that I can see why I should [illegible] interpretation."

INNOCENCE OR GUILT.

"Now as to the question of the innocence or guilt of the accused, I am more on my own ground. I have tried a great many people, and have generally been able to satisfy myself as to their guilt or innocence. The Crown have entirely failed to bring this charge home to the defendant. Every witness produced has given evidence in Mr. Cockburn's favor, except the solitary evidence of the principal offender in the whole matter —Charles McGill. Unfortunately that man is under two charges in another court, and has been brought here with these two charges hanging over his head. That is one explanation of his conduct—a clear reason why he should give evidence as he did. I could see by his manner that he was putting in his defence on the two charges that were hanging over him."

The magistrate then reviewed the conduct of Mr. McGill, who was a witness, his effort at concealment, his secrecy in the matter of his investments, and the hiding of the books.

"I think that every tittle of evidence, except that one man's evidence is true, As a matter of law, there should be some corroboration. Mr. McGill was not corroborated by circumstances or by documents.

"It is seldom that I have a case that my mind is more clear about—the evidence that facts were withheld by the general manager."

The magistrate, in conclusion, pointed out that, while he refused to grant a stated case, the Crown attorney had recourse to the usual right to bring the matter to the attention of the Court of Appeal.

"If they hold that my judgment has been wrong, then, of course, I will prepare a stated case, if it is so desired," said Col. Denison.

They Have Both Been Acquitted

Woodstock, Feb. 6.—Arthur James, who was arrested in St. Catharines on Friday night on the charge of theft, was acquitted in the police court here yesterday morning. James was a boarder at the home of Joseph Gray.—About two weeks ago, while Gray was working in London, he disappeared with Mrs. Gray and two small children. Considerable furniture was shipped by the C.P.R. to Hamilton, on James' name. A charge of theft was made. At the police court Mrs. Gray swore that the furniture belonged to her. There was no case against James, and he was allowed to go. It now appears from the stories of the parties concerned, that Gray and the woman were never legally married. When she and James went to St. Catharines they did so with the intention of getting properly married. The wedding was set for Saturday, but was spoiled by the arrival of Constable Cox. James declares he will assume the responsibility of the upbringing of Mrs. Gray's children. They left for St. Catharines in the afternoon, where James has a position, and as soon as they can secure sufficient money they will be married.

The County Orange Lodge Holds Meeting

Unusually Large Attendance at the Orange Hall Last Night.

The annual meeting of West Peterborough County Orange Lodge, was held last evening in the Orange Hall, Simcoe street, the county master, Bro. J. W. Stuart, presiding. There was an unusually large attendance, nearly every primary lodge in the jurisdiction being represented.

After the lodge had been opened in due and ancient form, the W. county master appointed Bros. R. B. McGill, G. Sharply, S. Barrison, a committee on finance, and Bros. J. B. McWilliams, W. Hawes, and R. Hawley a credential committee.

The committee on credentials reported the following members present; J. W. Stuart, County Master, 122; J. C. Waldie, D.C.M., 321; W. A. Kindred, Co. Chap., 80; W. H. G. Armstrong, Co. R.S., 80; Col. J. W. Miller, 80; Jos. Batten, Co. Treas., 80; Geo. Bartley, Co. D. of C., 80; T. C. Houlden, Co. Lec., 321; J. A. McWilliams, P. C.M., 80; Stephen Harrison, P.C.M., 419; John H. Briggs, P.D.M., 457; Wesley Northcott, P.D.M., 1385; R. B. McGill, P.M., 80; Geo. Sloan, P.M., 80; Chas E. Wiley, P.M., 80; W. J. Hardis, D. of C., 80; E. G. Clark, F.S.,80; A. Robson, D.M., 457; D. Hamilton, P. M., 457; J. Carnochan, P.M., 80; John F. Leeson, W.M., 457; T. A. Young, P. D.M., 178; S. Hunter, D.M., 122; Geo. Brown, P.M., 80; C. F. Kinney, P.M., 321; W Garnish, P.M., 474; L. Davidson, D.M., 321; C. Garbutt, W.M., 122; Wm. Preston, P.M., 122; W. Northco, W.M., 1385; H. McClure, Dis. D. of C., 321; John Cunningham, 80; Rev. [illegible], Chap., 80; Chas. Armstrong, 457; Wm. Murray, 321; D. Gillespie, 122; R. H. Harrison, 417; M. Hawley, 80; H. T. Everett, 80; Jas. Garside, Com., 80; T. McKinsty, 424; C. Kinney, Treas., 321; Wm. Watt, R. S., 321; D. Charlton, R.S., 122; B. Everett, F.S., 1385; Wm. Brummwell, Treas., 1385; Geo. Armstrong, 1st Com. 457; C. McBrian, Lec., 457; C. H. Teuffmann, Lec., 80; S. J. Charlton, Chap. 122.

After considerable important business had been transacted, the following officers were elected for the incoming year;

Bro. W. N. G. Armstrong ... .C.M.
Bro. Wm. Preston ... ...D.C.M.
Bro. Rev. A. H. Bruce ... ...C.C.
Bro. W. G. Bartly ... ...F.S.
Bro. Geo. Sloan ... ...R.S.
Bro. Wm. Watts ... ...Treas.
Bro. Wesley Northcott ... ... D. of C.
Bro. C. McBreen ... ...Lec.
Bro. Wm Bumwell ... ...Dep. Lec.
Bro. Stephen Harrison... ...Dep. Lec.

Bro J. B. McWilliams, P.C.M., and Past Junior Deputy Grand Master of Ontario, East, duly installed the newly elected officers, after which the meeting adjourned to meet in Lakefield on the third Tuesday in June.

SPORTING TOPICS

BASKETBALL.

The Arrow Basketball Club will go to Belleville on Friday night to play their return game with the team representing Albert College of that city. The Belleville boys played here early in December and were defeated by a close score. The local team have been practicing well and expect to give the Belleville team a hard run.

• • • •

HOCKEY.

Last night the locals who will play against the Argos were selected.

• • • •

The Peterborough hockey team will be guests of the management of "Zephra," at the opera house, on Friday evening. The management are grateful to the hockey club for their kindness in having the Peterborough-Argonaut game on Wednesday evening, so as not to conflict with the performance at the opera house.

• • • •

BASEBALL.

It now seems that a junior baseball team is within next summer's possibilities. Those under seventeen interested in baseball are eligible.

• • • •

Owner and Officers Exonerated

Ottawa, February 6.—Capt. Thos. Donnelly has made his preliminary report on the wreck of the steamer Golspie, in which he exonerates the owners and officers from all responsibility for the wreck, and for the disaster which befell the five sailors whose limbs were frozen after the wreck. If these men had obeyed the instructions of Mate McLeod, the captain finds, they would not have been frozen.

—Eight colored stereoscopic views at Times Bookstore, years for only twenty-five cents.

AWFUL CONDITIONS IN WESTERN TOWNS

Owing to Scarcity of Coal and Wood---Brandon School and Light Plant Closed---Churches Curtail Meetings.

Saskatoon, Sask. Feb. 6.—In accordance with orders from Commissioner Perry, Sergt. Loggin prepared four sleds, each ten feet long and two and a half feet wide, fitted with shafts for big horses, to provide for a patrol of the Eagle Lake district, 100 miles west of Saskatoon, in order to bring relief to settlers suffering from lack of fuel or food. Sergt. Adams and three men are under orders at Regina to proceed to this city and make the patrol. The patrol is ordered out on the strength of reports, as yet unconfirmed, of suffering out in that district. It is reported that one mac named Hobbs, in Boston settlement, which is settled entirely by people from Boston, with a wife and two children, had got been located by his neighbors. The Eagle Lake trails is such that its condition is unknown. The object of the patrol is more precautionary than of necessity. Wood in the Eagle Lake district is scarce. The patrol will take sleeping bags but no tent will be taken.

SOME IN DIRE STRAITS.

Regina, Sask., Feb. 5.—The unusual spectacle of a fully-attended meeting of the city council in progress in the civic chamber on Sunday afternoon was witnessed in Regina Sunday last. The reason for such an unusual course was the consideration of the snow blockade on the north line and the necessity of giving an immediate response to the Provincial Government's appeal for united action to clear the line of railway and afford fuel relief to Davidson and other points. In calling the meeting the mayor expressed his regret at the necessity of calling the council together on Sunday, but it was in the cause of humanity, and he believed that under the circumstances they were doing as much good as by attending church. His reason for calling them together was the serious state of affairs now existing on the Prince Albert line, and the necessity for some action being taken immediately to relieve the situation. He had seen Hon W. R. Motherwell and Attorney-General Lamont, and from these gentlemen and other sources he gathered that the people of Davidson and other northern points were in dire straits and crying desperately for fuel. There was a Canadian Northern train crew and two engines in the yard here, but it was impossible for them to get north until the line line was cleared.

VOLUNTEERED HELP.

His Worship thought it was up to Regina to take the initiative and clear the line. He suggested that a gang of fifty, or, if necessary, one hundred, men, be organized, and placed at the disposal of the railway on the purpose of opening the line. His suggestion was endorsed by the council and the offer communicated to the C.N.R. at once, but they thought they could open the line in a day with their snow plows, and considered the city's offer unnecessary.

The question of whether or not it would be advisable to shut down the city school is now being seriously debated. This step has already been taken at Brandon, and many are of the opinion that it would be wise to do so here. At the present time the Board has about enough coal to keep the schools open for the next ten days, but it is felt that the stock in hand could be better utilized by being portioned out to the farmers and city residents who are actually in want of fuel. All the power will be shut off at midnight tonight.

TO HUSBAND FUEL.

It is proposed to run the electric light plant from 4.30 p.m. to midnight, and for the convenience of early morning risers from 5 a.m. to 7 a.m. By thus cutting out the day service the fuel stock will be appreciably husbanded.

The churches, like all other large institutions, are also confronted with the fuel problem. Two at least of the city churches, namely, Knox Presbyterian and Hamilton street Methodist, will hold no week-day service or meetings of any description during the present week It has even been suggested that for the present and until the position has been relieved the Sunday services shall be cut out, it being felt that any coal available for the churches could be better utilized in relieving the necessities of farmers and others.

The two districts suffering most are the Soo line and the Prince Albert line between Regina and Saskatoon.

BRANDON IN DISTRESS.

Brandon, Man., Feb. 5.—The shortage of fuel in this city is almost alarming. The prospects for relief in the immediate future are worse than they have been at any time this winter. Not a dealer in the city has a single pound of coal or a stick of wood, and the city supply is almost exhausted. The Electric Light Company are about out of fuel, and were forced to shut down their power service yesterday. The city is being lighted for a few hours' length. At the C.P.R. station it was learned that the Estevan branch line, over which the Souris coal is brought in, was completely blocked, with the probability that it would not be opened for a couple of days yet, which means that no Souris coal will reach here before Friday or Saturday, and only then providing the weather remains calm.

Citizens are again closing their houses and are going to live with friends who have a supply of fuel.

LOCKED IN SNOW, NO TRAINS.

Prince Albert, Sask., Feb. 5 — Inquiries of local wood merchants show that if the C.N.R. could handle the traffic no railway point in Saskatchewan need be short of fuel. Forty teams have been at work hauling wood into Prince Albert ever since the first snow, many of them making two trips a day, and dealers stated yesterday morning that they were prepared to step as much wood as the C.N.R. could take out. Four loaded cars have been waiting to go out for several days, and big stocks of wood are lying in all the locals yards. The forest which is supplying the wood extends from here to Athabasca.

NO TRAINS FOR THREE DAYS.

Montreal, Feb. 6.—Montreal is completely cut off from the Canadian west. No train has entered the Windsor Station from Winnipeg and the Pacific Coast since Saturday. Three expresses are overdue, and should the block continue it is quite possible that the transportation department may decide upon cancelling some of the delayed trains. The company has already discontinued the running of the double transcontinental expresses through a large part of the North-West, but passenger officials are most reluctant to cut down any further the through services. Weather along the north shores of Lake Superior and right on to Winnipeg is still reported as more terrible than anything previously experienced.

Offered Bribe for Vote

Kingston, Feb 3.—Evidence is accumulating that the report which credited the Mowat organization with spending $200 in the recent mayoralty election is grounded on fact. A woman called at the News office yesterday and said, incidentally, in the course of conversation that she was handed a bank bill prior to the election and asked to vote for Mowat. This she indignantly refused, and can now tell the story of the attempt at bribery.

Mr. Goodwill is Now Secretary

Good Successor to Mr. R. M. Denistoun in Children's Aid.

Mr. E. L. Goodwill, of the firm of Roger, Bennet, & Goodwill, has been appointed secretary and solicitor for the Children's Aid Society, at a meeting of the society held to fill the vacancy caused by the resignation of Mr R. M. Denistoun. Mr. Goodwill should be a good man for the position.

Mr. Denistoun resigned on account of his intended departure for the west. Much credit should attach to Mr. Denistoun for the hard and unpaid work he has devoted to this, one of Peterborough's most commendable charities. Mr. Denistoun, whose time means so much permanute has "many a time and oft" given a full half day or more towards seeing that some poor little "kid," whether of male or female, gets a chance in the great battle of life. Should the result of these "kids" lives turn out as well as did their sponsor in their defence, Mr. Denistoun will reap a rich reward and have his only trouble in carrying the weight of his accumulated laurels.

A Small Sensation

Kingston, February 6.—A small sensation has been created by the appearance in one of the local papers of a statement that in order to gain admission to society some parties have been paying money. This money has been paid to those who were in, for the purpose of their acting as an intermediary to those desiring to enter. In one case as much as a thousand dollars was paid by the father of a girl to a matron for her services as introducer of the debutante.

A GOOD PRESCRIPTION

To relieve a cough or break up a cold in twenty-four hours, the following simple formula, the ingredients of which can be obtained of any good prescription druggist at small cost, is all that will be required. Virgin Oil of Pine (Pure), one-half ounce; Glycerine, two ounces; good Whisky, a half pint. Shake well and take in teaspoonful doses every four hours. The desired results can not be obtained unless the ingredients are pure. It is therefore better to purchase each separately and prepare the mixture yourself. Virgin Oil of Pine (Pure) should be purchased in the original half-ounce vials, which druggists buy for dispensing. Each vial is securely sealed in a round wooden case, which protects the oil from exposure to light. Around the wooden case is an engraved wrapper, with the name—Virgin Oil of Pine (Pure), prepared only by Leach Chemical Co., Windsor, Ontario, plainly printed thereon. There are many imitations and cheap productions of pine, but these only create nausea, and never effect the desired results.

TRAINS BUTCHER CATTLE

GREAT SLAUGHTER OF CATTLE BY THE RAILWAYS.

Starving Animals Seek Shelter in Railway Cuts and Are Killed.

Medicine Hat, Alberta, February 6.—The fierce storms and heavy snow have resulted in famished stock drifting in large numbers on the railway tracks of the range section. Every passing train kills large numbers, and the slaughter has become so heavy on the Crow's Nest Pass from Dunmore to Lethbridge that the C. P. R. has employed a large number of Indians to drive the cattle from the right-of-way. The Indian scouts are patrolling the lines for miles through the Grassy Lake region, holding the half-crazed cattle by every device known to experienced cowboys.

The stock "drift" with the wind and snow until they strike a "cut" or the side of a heavy "fill" on the line, where they are protected from the fury of the storm. Here they remain in ever increasing numbers until passing trains scatter them. Under the Railway Act the transportation companies are practically responsible for all cattle killed on the right-of-way, regardless of the existence of cattle guards and fire fences. With a blizzard prevailing, sending teh snow over the plains at sixty miles an hour, the strongest fence is snapped like paper before a rushing herd of stock containing several hundred.

Is Confident in Future of Cuba

Montreal Man Returned From Southern Isle is Optimistic.

Montreal, February 6.—Mr. E. L. Pease, general manager of the Royal Bank of Canada, has just returned from a visit to Cuba. Mr. Pease was making a tour of inspection of the branches of his bank which are situated in the chief commercial centres of the Republic, and so had occasion to travel over both the eastern and western provinces of the island. His visit has given him a renewed confidence in the future of Cuba, whether or not the island is brought to form part of the United States or continues to be a free and independent republic.

"At the present time," he says, "the United States authorities have the affairs of the island well in hand. American troops are scattered all over the country, and the Washington Government is engaged in securing all the information possible as to the true state of public opinion and the real aims of the different political leaders in Cuba. In a word, Uncle Sam is taking means to ascertain if the people who are now under a provisional government are in a position to provide for themselves a stable representative administration."

"What do you think will be the result of it all?" was asked.

"That is rather difficult to say at present. I am confident, however, that every effort will be made to secure to Cubans a perfect autonomy, as the Americans stand pledged, before the world to do. For the carrying out of this purpose a fair election will be held at a time when the will of the people can be properly recorded. If it should be found, however, that in spite of all precautions independent government is impracticable in Cuba then I feel sure the United States will take over the management of the island affairs."

With regard to these elections Mr. Pease stated that he believed the Liberals would be largely in the majority, but that the Moderates would also be an important factor. There were many good men for the office of the presidency.

"At present," said Mr. Pease, in conclusion, "the financial situation is sound and the business outlook very good. But the political atmosphere is not so clear as it might be, and as is desirable.

POLICE NEWS

Daily Happenings in Court House and Station.

Only one case was tried at yesterday's session of the police court, viz. that of Chas. Beavis, who appeared for the third time within three months in the court. He was at out of jail the preceding day, after serving one month. As soon as he was free he took advantage of his freedom to absorb an abnormal amount of alcoholic stimulants, and was arrested again Monday evening. He pleaded not guilty to being drunk, but was given two months at Castle Nesbitt on a charge of vagrancy.

Beavis is a carpenter by trade, but when working he spends all his money to drink, and when the winter comes he is in without the means of getting intoxicated. He will spend a couple of months at hard labor on the hill.

INSURANCE REPORT READY

Report Will Deal Separately With Each Company.

Ottawa, February 6.—The finishing touches will be put on the report of the Royal Insurance Commission within the next few days, when the report will be placed in the hands of Hon. W. S Fielding, Minister of Finance. It will rest with Mr. Fielding then. The evidence will be laid on the table of the House, but it will doubtless be made public within a short time. It is understood that the report will deal separately with each company and society doing an insurance business in Canada.

An idea of the amount of evidence the commissioners have had to consider and digest can be gathered from the statement that the reports of the evidence taken bulk larger in volume than a Hansard record of an ordinary session of Parliament.

MUSIC AND THE DRAMA

Beautiful Zephra

That this splendid musical spectacle has well earned and is entitled to the word "beautiful" as a proper prefix will be readily assented to by those who were fortunate enough to be present at the opening performance on Wednesday night. Zephra is without a doubt one of the very best attractions ever seen in the Limestone City, and in saying this we but voice the sentiment of the entire public, for it is a musical extravaganza of a high order, and came to Kingston with a record of success unparalleled in the history of spectacular attractions.—Kingston Whig.

The opening sale of seats in Peterborough took place at the box office yesterday morning, and, judging from the demand for seats, standing room only will be in order. Seats are now on sale at the box office.

Losses of the Great Railways

Montreal, February 6.—Some idea may be formed of the losses sustained by the large railway companies if one takes into considerated that the G. T. R. has lost nearly 1,000 cars, the Pacific and Canadian Northern as many each, and the Pennsylvania nearly 1,-500. Men have been sent out in all directions to recover these cars.

What Does It Mean?

Dr. Hamilton Gives a Full and Satisfactory Explanation.

Look at your tongue!

Sometimes it's heavily coated sometimes it's clear and red.

Study this out and you'll find some interference with the functional activity of the body.

This means the bowels are not regular, the liver is sluggish and the blood is contaminated.

Strong cathartic pills act so destructively on the intestines as to promote deathly sickness; this often frightens people from taking medicine when they badly need it.

To the multitude of dangerous purgatives now on the market, Dr. Hamilton's Pills are a notable exception, they neither gripe, cause sickly feeling or headache, yet they cleanse and purify the entire system in one night. No other laxative acts with such mildness and certainty. Giving proper stimulus to the liver and kidneys, strengthening the stomach and lending valuable aid to digestion, it's small wonder that such marvelous results accompany Dr. Hamilton's Pills.

Mr. Geo. O'Hagerty, of Amherst, N. S., writes: "Last winter I worked in a lumber camp and neglected my health. I was dreadfully constipated and had a headache that fairly made me reel at times. I was sick and miserable, and hadn't the slightest ambition to work or stir around. I felt heavy and dull and had a bad taste in my mouth. I went into the city for Dr. Hamilton's Pills, which I knew were good for my condition. They fixed me up very quickly and have kept me in good condition ever since. There are other men in the camp that use Dr. Hamilton's Pills also. They say they wouldn't be without the pills for ten times their price."

Every dealer in the land sells Dr. Hamilton's Pills—25c. per box or five boxes for $1.00. By mail from N. C. Polson and Co., Hartford, Conn., U. S. A., and Kingston, Ont.

Children's Aid Society

PETERBOROUGH

For the care of neglected and ill-treated children. Incorporated by Act of Legislature 1893. Information requested. Informants' names kept strictly private. Office hours 10 to 12 a.m., 4 to 6 p.m. GEORGE COCHRANE, Agent and Assistant Secretary. Office, Division Court Building.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing materials, etc., gratuitously.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $2 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 6, 1907

WILL INCREASE THE GRANTS

The Ontario Government, no doubt owing to the pressure brought to bear upon them by politicians supporting them and who are opposed to the provision in the school law passed at the last session of the Legislature, fixing a minimum salary for teachers, have decided to try to accomplish their purpose by another way which they hope will prove smoother than the present.

They are therefore going to try a little coaxing and will consequently largely increase the Government grants to the schools and abolish the system of distribution that has been in vogue. The minimum township grant of $200 to each school will be retained, and Legislative grants will be as follows: An unconditional grant of $15 per annum to each section; a grant for purposes of equipment and accommodation; a grant of forty per cent. of so much of every salary as is paid in excess of $500 up to $600. These grants, it is estimated, will amount to $200,000, a sum exceeding by $200,000 the grants made last year, and by $262,000 the grants made in the last year the Ross Government was in office. The unconditional $15 grant and the contribution of forty per cent. to salary payments in excess of $500, make up $200,000 of the appropriation. That is, every section, no matter what its assessment, will get the unconditional $15, and in addition forty per cent. of whatever salary is paid in excess of $500.

The Government hopes that the act is amended as proposed will not evoke the strong objections which the legislation of last year encountered.

Give Part of Wages for Imperial Cotton

London, Feb. 4.—The Lancashire cotton operatives have evidently grasped the importance of the attempt which the British Cotton-Growing Association, is making to acquire land for the purpose of growing cotton for the Lancashire mills.

Over 30,000 factory workers in the Bolton district of Lancashire are each contributing a day's wages to the funds of the association, and cotton operatives in various others towns are doing the same.

Hundreds of spinners in Bolton and the surrounding towns are also taking up shares in the association.

Great Naval Review Feature of Month

British Fleet Will Manoeuvre off the Coast of Spain and Portugal.

London, February 1.—The largest number of battleships and cruisers ever brought together at one time will assemble at Lagos this month for the combined British manoeuvres, which are to take place off the coasts of Portugal and Spain. The Channel, Atlantic and Mediterranean fleets, with attendant cruiser squadrons, will take part in the evolutions.

This will provide one of the most gigantic object-lessons possible as to Great Britain's naval strength under present conditions. Not a ship in reserve will have been called out, and only three fleets with their attached cruiser squadrons of all those scattered all over the world will take part. The total number of ships which will assemble at Lagos will be sixty, divided as follows: Battleships, 30; cruisers, 16; scouts, etc., 14. When it is pointed out that the total of the effective fleets of Germany and France combined number seventy-seven ships, the power of the combined British fleet will be realized.

Lord Strathcona As a Prophet

London, Feb 5.—Lord Strathcona, in an interview, said the population of Canada by the end of the century would be 80,000,000.

A divorce has been granted to Robert John Cliff of Port Oballo, Wolverhampton, from his wife Emma. The corespondent was a single man named George Reynolds. The woman is stated to be living in Toronto with a printer, regarding whom the judge said he had no evidence.

Several pages of the report of the Self-Help Emigration Society are filled with letters from settlers speaking in the highest possible terms of experiences in the Dominion.

John Ennis, after forty years' service as passenger manager of the Allan Line, has retired into private life, with the good wishes of a host of friends of all social stations. Ennis was always ready to place his experience at the disposal of all interested in Canadian matters.

The Dominion Line has ordered a 14,000-ton twin-screw steamer from Harland and Wolff.

The noted horse Godolphin Treasurer, a royal winner, and three other well known horses have been sold to Matthew Marshall of Stranraer, for exportation to Canada.

Harry Churchill, a Canadian, charged with incendiarism at the Devon Assizes, told the judge that if sent to penal servitude it would be worse for everybody afterwards. Sentence was deferred.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Take Hall's Family Pills for constipation.

Fell From a Train Killed by Another

Toronto, Feb. 5.—One hundred and fifty English and Scotch immigrants arrived in Toronto yesterday morning from Montreal.

About forty miles outside of Montreal, at Apple Hill, one of the party met with an accident which cost him his life. He was passing from one coach to another, when he missed his footing on the icy platform, owing to the high wind blowing, and was thrown from the train. He fell across the adjacent tracks, and before he could get out of harm's way another train ran over him, cutting off both legs.

Those who arrived in Toronto yesterday morning did not know his name. He was called "Doctor" by his friends. On board the train with him were his wife and two children, on their way to Winnipeg. They went on to the next station, and from there returned to Montreal to look after the remains.

Constipation

Baked sweet apples, with some people, bring prompt relief for Constipation. With others, coarse all-wheat bread will have the same effect. Nature undoubtedly has a vegetable remedy to relieve every ailment known to man, if physicians can but find Nature's way to health. And this is strikingly true with regard to Constipation.

The bark of a certain tree in California—Cascara Sagrada—offers a most excellent aid to this end. But, combined with Egyptian Senna, Slippery Elm Bark, Solid Extract of Prunes, etc., this same Cascara bark is given its greatest possible power to correct constipation. A toothsome Candy Tablet, called Lax-ets, is now made of the Dr. Shoop Laboratories, from this ingenious and most effective prescription. Its effect on Constipation, Biliousness, Sour Stomach, Bad Breath, Sallow Complexion, etc., is indeed prompt and satisfying.

No griping, no unpleasant after effects are experienced, and Lax-ets are put up in beautiful lithographed metal boxes at 5 cents and 25 cents per box.

For something new, nice, economical and effective, try a box of

Lax-ets

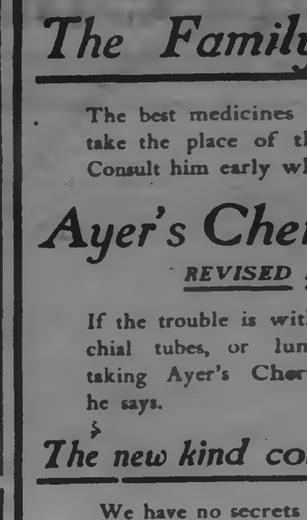
The REFUGEES

By A. CONAN DOYLE,
Author of "The Return of Sherlock Holmes"

Copyright, 1893, by Harper & Brothers

can see—in order to give other folk time to get in front of us and stop us. That is it, captain, I'd lay you a beaver skin to a rabbit pelt that I'm on the track. There's been a party of a dozen horsemen along this ground since the dew began to fall. If we were delayed they would have time to form their plans before we came."

"By my faith, you may be right."



The dozen ruffians, who had lurked in the shadow of the trees, sprang out.

said De Catinat thoughtfully. "What would you propose?"

"That we ride back, and go by some less direct way."

"It is impossible. We should have to ride back to the Meudon crossroads, and then it would add ten miles to our journey. We are surely not to be turned from our path by a mere guess. There is the St. Germain crossroad about a mile below. When we reach it we can strike to the right along the south side of the river and so change our course."

They mounted and rode on. Suddenly De Catinat's eye caught something in the gloom which brought a smile to his face. Away in front of them, between two dark tree clumps, lay a vast number of shimmering, glittering yellow points, as thick as flowers in a garden. They were the lights of Paris.

"See!" he cried, pointing. "There is the city, and close here must be the St. Germain road. We shall take it, so as to avoid any danger."

"Very good! But I should not ride too fast, when your girth may break at any moment."

"Nay, come on. We are close to our journey's end. The St. Germain road opens just round this corner, and then we shall see our way, for the lights will guide us."

He cut his horse with his whip, and the two galloped together round the curve. Next instant they were both down in one wild heap of tossing heads and struggling hoofs, De Catinat partly covered by his horse, and his comrade buried twenty paces, where he lay silent and motionless in the center of the road.

M. de Vivonne had laid his ambuscade with discretion. With a closed carriage and a band of chosen ruffians he had left the palace a good half hour before the king's messengers. On reaching the branch road he had ordered the coachman to drive some little distance along it and had tethered all the horses to a fence under his charge. He had then stationed one of the band as a sentinel some distance up the main highway to flash a light when the two couriers were approaching. A stout cord had been fastened eighteen inches from the ground to the trunk of a wayside sapling, and on receiving the signal the other end was tied to a gatepost upon the farther side. The two cavaliers could not possibly see it, coming as it did at the very curve of the road, and as a consequence their horses fell heavily to the ground and brought them down with them. In an instant the dozen ruffians, who had lurked in the shadow of the trees, sprang out upon them, sword in hand, but there was no movement from either of their victims.

M. de Vivonne lit a lantern and flashed it upon the faces of the two unconscious men. "This is bad business, Major Despard," said he to the man next him. "I believe that they are both gone."

"Tut, tut! By my soul, men did not die like that when I was young!" answered the other, leaning forward his fierce, grizzled face into the light of the lantern. "Pass your rapier under the third rib of the horses, De la Touche. They will never be fit to set hoof to ground again."

Two sobbing gasps and the thud of their straining necks falling back to earth told that the two steeds had come to the end of their troubles.

The Capital of the Company is One Million Dollars ($1,000,000) in One Million Shares of One Dollar ($1.00) each, stock non-assessable.

OBJECTS OF THE COMPANY.

This Company has been organized by influential men for the purpose of engaging very extensively in the exploration and development of the mineral lands in Northern Ontario and with powers to buy and sell and develop promising mining claims.

The Company has already acquired the following valuable property known as the Currie property, being a location in the Temagami Forest Reserve, known as J. B. 32 on a plan filed by W. J. Blair, P. L. S., in the Bureau of Mines, on the 19th of September, 1906, said parcel consisting of thirty acres.

The location known as J. B. 32 in the Temagami Reserve is a very valuable one and adjoins the well-known Nadeau, Edison and Legree locations, from which ore has been shipped. The formation and ore in this section of the Temagami Reserve is similar to the best producing mines at Cobalt.

Mr. J. F. Whitson, Government Surveyor, who has just returned from Cobalt, says in an interview published in the "Evening Telegram" of December 3rd last. "Excellent reports have been received at Cobalt on the ore in the Temagami Reserve, and it is said that the findings there compare favorably with those around Cobalt."

The Company will prepare to sink a shaft on J. B. 32 and have no hesitation in saying that we will have ore ready for shipment May 1st, 1907.

Mr. Eggert, M.E., in his report on this property, says.

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite the V. and VI. Concession of Coleman. Lease has been granted.

The claim is a 20 acre one and about 900 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein, following the contract between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim, is stripped all the way across the 20 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 8-inch vein of quartz, richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains, while the first one, as already said, is uncovered for all of 20 chains, making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and it shows 6 inch nicolite, 12 inch smaltite, together with cobaltite. Assays gave 672-1281-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of Ag. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes, and is one which needs only a shaft of 50 feet depth to be ready as a producer.

JACOB M. EGGERT, M. E.
New Liskeard, 17th November, 1906.

Do You Wish to Have a Share in the Wealth of Cobalt? The Opportunity Now Presents Itself to You.

This is an exceptional opportunity to secure stock in a first-class company at half value. So far as we aware no company has been organized in Cobalt district having better prospects.

The shaft on the Nadeau property, within 25 feet of our southern boundary, demonstrates the value of the ore in our jumbo vein. The Edison mine in close proximity is shipping ore, also the Legree and Kay Foster.

SUBSCRIPTION.

We offer one hundred thousand shares at 50c. per share (par value $1.00) and reserve the right to reduce above par within a few weeks. Subscriptions will be filed in order received and we reserve the right to reduce or return same. All subscriptions should be accompanied with cheque, draft or money order payable to order of the company at Toronto. Send to day or it may be too late, as price will soon advance to par.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 4 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 21 to 130 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 3, and it certainly shows up fine. This shaft now has 30 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

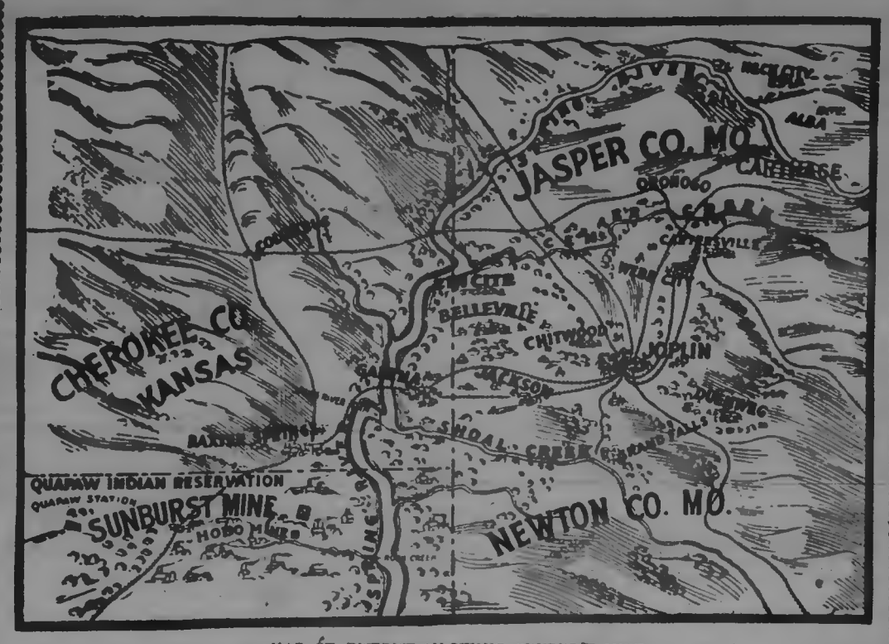
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magazine, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months $96,000 pounds of rich ore was taken out by the Hobo. This mine is 1350 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.



MAP OF DISTRICT SHOWING SUNBURST MINE.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00. You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply defy calculation—the figures speak for themselves. Were our property in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mines, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 8 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 57 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No. 1 shaft, 6 1-2 by 8 feet, is down 88 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 6 1-2 by 5 1-2 by 50 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 70-foot face of ore.

Shaft No. 3, 6 1-2 by 5 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines.

Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscoela Mining Co.	74 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	25 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	58 per cent.	Dinger Mining Co.	130 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	130 per cent.
		Underwriters Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 500 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $31.92 per ton for lead and $26.61 for zinc to $42.00 for lead and $46.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 30 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 967,169.00
A. W. Taylor	180	150,756.00
J. W. Aylor	40	676,671.00
The Burgner Mining Co.	80	198,579.00
Center Creek Mining Co. (production to date)	200	6,962,494.00
Mrs. E. J. Chinn	120	233,790.00
Majestic Consolidated Zinc & Lead Co.	53	234,600.00
Continental Zinc Co. (production to date)	200	1,573,583.00
Consolidated Troup Mining Co.	60	195,613.00
Daughtery-Davy-McMillan Estate	60	456,000.00
The Empire Zinc Co.	411	130,319.00
Fox Heirs	20	130,324.00
Granby Mining & Smelting Co., 1905		1,261,561.00
Granby Mining & Smelting Co., 1904		1,035,050.00
John G. Quinn	640	83,257.00
Pittsburg-Joplin Lead & Zinc Co.	10	98,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	413,304.00
United Zinc Co.	136	399,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 130 per cent., the Chapman 130 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 25 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 90 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

DARK BROWN TASTE

Your Head Aches
Tongue is Coated
Mouth is Coated
Stomach is Sick

The Gastric Juices Are Not Doing Their Duty and You're in the Grip of Nervous Dyspepsia.

A hot bitter fluid, and sour indigested food rise in your mouth.

Your vision is crossed with specks that float before the eyes.

Very shortly you'll have nausea, rank breath, and sleepless nights.

What you need is Ferrozone.

It regulates the gastric juices, puts new life into the stomach, braces digestive powers, gives the aid that's so badly required.

Ferrozone is the best treatment because it goes to the root of the trouble, remedies the conditions that cause dyspepsia and thereby cures permanently.

If you want proof, read the experience of Mr. E. P. Davison, a well known resident of Portland, who writes. "Ferrozone is beyond doubt a most powerful cure for indigestion and weak stomach. Food so badly disagreed with me that I was almost afraid to eat. Pastry and starchy foods fermented, caused sour risings and gave me headaches, brown taste, offensive breath. I grew weak, my weight ran down fifteen pounds and my looks fully indicated all that was wrong. Ferrozone put me on my feet again. It braced me up, renewed my digestion and made me a well man."

Doctor and patients alike speak of the merit of Ferrozone; it is different from other remedies, different because it cures so you stay cured. Try it; sold everywhere in 50c. boxes.

A Big Sale in a Little Store

The balance of China Hall's stock has been removed to 852 George street —above Brock street—where it will be closed out at greater reductions than ever, as it is intended to re-open with an entirely new stock. Some of our very finest and best goods are still unsold, such as Silver Plated Ware, Dinner, Tea and Toilet Sets, Fine China, etc. These will be sold at almost your own price, as we have only taken the present store for the month of February.

CHINA HALL CO.

A Belleville Flood Trouble

A Belleville despatch says, the river Moira has risen and caused much damage and inconvenience along the banks in Belleville. All the boat houses are inundated, as well as Victoria Park and many houses in lower Belleville are flooded, so that the residents have to move. Harbormaster Vandervoort fears an old-time flood, unless the weather moderates soon, as the mouth of the river is filled with anchor ice.

The New Term
—AT THE—
PETERBOROUGH BUSINESS COLLEGE
Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.

You cannot make a better investment.

For particulars, address

W. PRINGLE
Opposite Post Office. Principal.

LOCAL INCIDENTS

By The Times Man on the Street

—The Separate School Board will hold a regular meeting tonight.

—Yesterday the demand for tickets for the "War Correspondent" were unprecedented.

—For the largest and best assortment of fancy and comic valentines visit The Times Bookstore.

—The annual meeting of the Pre-Payment Meter Company, was held yesterday afternoon.

—The fire, water and light committee met last night for the purpose of taking up the fire alarm system.

—An excellent program will be rendered at St. Peter's school concert on Thursday evening, Feb. 7th.

—The Sans Souci Concert Company of this city, gave a concert in the Warsaw town hall yesterday evening.

—The Brass Workers will hold another dance in the Foresters' Hall, Simcoe street, on Monday night of next week.

—Much interest is being taken throughout the whole city, in the coming performances of "Zephra," by local talent.

—The bachelors of Millbrook gave a dance in the town hall of that village yesterday evening. A number from this city attended.

—The members of St. Martin's T. A.S., Lansmore, paid a return visit to St. Peter's T.A.S. yesterday evening.

—Mr. D. Stroud, of the well-known George street tea and coffee house, has purchased a valuable property in Belleville, to open a branch there.

—Lady Lansdowne, Daughters of England, will hold a special meeting tomorrow evening at eight o'clock. Sister Wolstenholme, President.

—We are pleased to say that Mr. A. Stevenson, Crown timber agent, who has been ill with grippe, is again able to take hold of his departmental duties.

—Fancy and comic valentines galore at Times Bookstore. If you want a handsome valentine at 25 or 50 cents, or one to cost two cents we have them.

—Marathon Lodge, No 39, Knights of Pythias, has issued invitations for a smoking concert to be held in the Foresters' Hall, Simcoe street, on Wednesday evening, Feb. 13th.

—The Brass Workers' dance in the Foresters' Hall Monday night, was one of the most enjoyable events of its kind held this season. About thirty-five couples were in attendance.

—A most hearty invitation is extended to the young men of the city to attend the social in the Y.M.C.A. parlors on Friday evening at eight o'clock. The Bursea Club of Murray street church will entertain.

—The funeral of the late Mrs. Jos. Beagley will be held this afternoon at 2.30 from her late residence, corner of Downs and Rogers streets, to St. Luke's church, thence to Little Lake cemetery.

—Rev. Wm. Major has received a telephone message from Toronto, stating that Miss McKinnon won't not be able to lecture tomorrow evening at All Saints' as she had received a cablegram to return to Persia at once.

TWELVE MILE RIDE

Trouble, But He Had an Object

We are willing to take trouble to get things we value.

A Mo. man was so much benefited by changing from coffee to Postum, that he was willing to ride about 12 miles to get it. His daughter writes

"My mother, father and myself have been drinking Postum for two years and have all been greatly benefited by its use.

"Before we dropped coffee and began to use Postum, Mother was poorly nourished and only weighed 98 lbs. After she used it a few weeks she began to gain in weight and she kept getting stronger and better until now she weighs about 150 lbs., and we all believe it was due to leaving off coffee and drinking Postum Food Coffee, because she has taken no medicine of any kind. While she drank coffee she was very nervous, but since using Postum she has had no such trouble.

"Father was troubled with indigestion, when he drank coffee, but Postum has changed all that. He says he likes the taste of it much better than coffee. When I happen to be visiting and drink coffee I am usually sick a few hours, everything sours on my stomach and I get very nervous.

"We find there's a big difference in the way Postum is prepared. It should be boiled properly according to directions—then its flavor is fine.

"Father rides about 12 miles to get it. He says he would not do without Postum if he had to go still farther to get it." Name given by Postum Co, Battle Creek, Mich. Read the little booklet, "The Road to Wellville," in pkgs, "There's a reason."

Individual Cups for St. Paul's

Mr. LePage, of Toronto, who was in the city yesterday making arrangements whereby individual cups will be used at the communion services in St. Paul's church. Mr. LePage's firm manufacture individual communion cups, which are now being used in a great many churches. It is understood that, at the next communion service in St. Paul's church, the individual cups, which are small glass receptacles, will be presented. To the number of some 700 by Mrs. M. A. Hazlitt.

You cannot possibly have a better Cocoa than

EPPS'S

A delicious drink and a sustaining food. Fragrant, nutritious and economical. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

COCOA

Sold by Grocers and Storekeepers in ¼-lb. and ½-lb Tins.

SOCIAL AND PERSONAL

—Mr. J. S. S. Tomilack, of Ottawa, is in the city.

—Mr. Chas. Baillie, of Cakefield, was in the city yesterday.

—Rev. J. G. Potter is confined to his house with a bad cold.

—Mr. Daniel Morrow, of Bobcaygeon, was yesterday registered at the Snowdon House.

—Mr. Bert Carmichael left yesterday for Kenora, where he will reside in future.

—Mr. R. R. Spirick, of the firm of Sparks Bros., Ottawa, is in the city on business.

—Mr. J. P. Morgan, of the Times, Hamilton, is spending a day or two in the city.

—Miss Ferguson who has been very ill for the past few days, was yesterday reported as somewhat improved.

—Ald. G. E. Elliott, who has been confined to the house for a few days, owing to a severe cold, is able to be out again.

—Mrs. John Crane has returned from Preston Springs, and will receive on Wednesday and Thursday afternoons of this week.

—Mr. Norman Brown, of the Bank of Montreal staff, Peterborough, who has been home on the sick list for some time, returned to Peterborough today.—Lindsay Post.

—Messrs. W. McIlroy, president, of the Canadian Ticket Agents' Association and W. Burton, will attend a meeting of the association at the King Edward Hotel, Toronto, this afternoon.

—Miss Edwards, of "The Rockland," Peterborough, is the guest of Mrs. Cole, Sweetland avenue. Miss Edwards has been the raison d'etre of many pleasing happenings during the week.—Ottawa Journal.

Second Y.M.C.A. Pop

The Y.M.C.A. Pop will be held in the hall on Saturday evening, Feb. 9th, at 8.15 o'clock. The feature of the evening, will be the "Story of Jean Valjean," told by Mr. R. M. Dennistoun. Mr. Gilbert Markle, violinist, and Miss W. Gumpricht, pianist, will contribute musical numbers. Mr. H. R. H. Kenner will preside.

Mr. Banks Here to Open Store

Mr. Chas. Banks, of Galt, the new local sporting goods man, who, as noted first in The Times, will open a store in the market building in the shop just vacated by Mr. Williams, has arrived in the city. He is accompanied by Mr. Wm. Wilkins, of Galt, who will manage the local store.

Board of Education Are Busy

The Collegiate Institute Committee of the Board of Education have made good progress on the new Collegiate Institute. The committee will have a report to make when the Board meets on Monday night. Many valuable suggestions were offered by the members of the Board who visited the Collegiate Institutes at Galt and Toronto.

Local Orchestra at Havelock

Mr. Archie Moore was at Havelock Monday night as master of ceremonies at the railwaymen's ball. Wilson's orchestra, of this city, supplied the music and the dancers numbered over two hundred. The ball was one of the most successful ever held and great credit is due to those in charge of the arrangements. A number from Peterborough were in attendance.

Baby Murray's Funeral

The many friends of Mr. and Mrs. Michael J. Murray, Parnell street, will sympathize with them in the loss they have sustained by the death of their infant daughter, which took place yesterday. The child was three months old. The funeral will take place this afternoon from the family residence to the Roman Catholic cemetery.

Why Not for Peterboro'?

A Montreal despatch says: The vexed gas question which has been troubling the city council for the past few months was settled today. The council decided that after 1910 they would give the Montreal Light, Heat & Power Company a twenty-year contract, with gas to be supplied at 90 cents per thousand feet. Ald Payette was father of the bill and piloted it through the city council.

The Canadian Northern

Ottawa, February 6.—The Canadian Northern Railway is pushing work on the location surveys of its line between Ottawa and Toronto. Seven parties are now out in connection with this work, and it is expected that contracts on a part of it at least will be awarded in the spring. It will take about two years to build. The contractor on the line between Hawkesbury and Ottawa states that the work is advanced so that by fall Canadian Northern trains will be running between Ottawa and Montreal.

Miss Lowry is Improving

Yesterday The Times on enquiry at St. Joseph's Hospital, found that Miss Lowry, of 900 Water street, who was injured on Monday night by a street car, was progressing favorably. It seems that Miss Lowry whilst recrossing the street, after getting a pail of water, fell and the car struck her before the motorman could stop its progress. He put on the brakes but not in time to save the lady from injury. All accounts available clearly demonstrate that no blame is attachable to the street car motorman. It was simply a case of a regrettable accident.

London, February 6.—The Dominion Line has ordered a new 11,000 twin screw steamship from Harland & Wolff, Belfast, for the Canadian service.

A Bold Step.

To overcome the well-grounded and reasonable objections of the more intelligent to the use of secret, medicinal compounds, Dr. R. V. Pierce, of Buffalo, N. Y., some time ago, decided to make a bold departure from the usual course pursued by the makers of put-up medicines for domestic use, and so has published broadcast and openly to the whole world, a full and complete list of all the ingredients entering into the composition of his widely celebrated medicines. Thus he has taken his numerous patrons and patients into his full confidence. Thus too he has removed his medicines from among secret nostrums of doubtful merits, and made them *Remedies of Known Composition.*

By this bold step Dr. Pierce has shown that his formulas are of such excellence that he is not afraid to subject them to the fullest scrutiny.

Not only does the wrapper of every bottle of Dr. Pierce's Golden Medical Discovery, the famous medicine for weak stomach, torpid liver or biliousness and all catarrhal diseases wherever located, have printed upon it, *in plain English*, a full and complete list of all the ingredients composing it, but a small book has been compiled from numerous standard medical works of all the different schools of practice, containing very numerous extracts from the writings of leading practitioners of medicine, endorsing in *the strongest possible terms*, each and every ingredient contained in Dr. Pierce's medicines. One of these little books will be mailed free to any one sending address on postal card or by letter, to Dr. R. V. Pierce, Buffalo, N. Y., and requesting the same. From this little book it will be learned that Dr. Pierce's medicines contain no alcohol, narcotics, mineral agents or other poisonous or injurious agents and that they are made from native, medicinal roots of great value; also that some of the most valuable ingredients contained in Dr. Pierce's Favorite Prescription for weak, nervous, over-worked, "run-down," nervous and debilitated women, were employed, long years ago, by the Indians for similar ailments affecting their squaws. In fact, one of the most valuable medicinal plants entering into the composition of Dr. Pierce's Favorite Prescription was known to the Indians, as "Squaw-Weed." Our knowledge of the uses of not a few of our most valuable native, medicinal plants was gained from the Indians.

As made up by improved and exact processes, the "Favorite Prescription" is a most efficient remedy for regulating all the womanly functions, correcting displacements, as prolapsus, anteversion and retroversion, overcoming painful periods, toning up the nerves and bringing about a perfect state of health. Sold by all dealers in medicines.

Peterboro Canoes for Ungava

Yesterday Charlotte street pavement was piled several feet high with "nests" of canvas shipped by a local canoe company to the Hudson Bay Company. This was only part of a shipment of several hundred ordered from the local firm (possibly Peterborough is better known by the canoes she ships than by all her highly bonused and tax-exempted factories within her borders.

G.T.R. Train Does a Mile a Minute

Mr. John Kearney of Newtonville, a G.T.R. section man, whilst cleaning out a switch at Port Hope, was struck by a passing freight train and had his left leg taken off above the ankle, the right one badly smashed, which will have to be amputated. His left hand was also cut off and his head terribly bruised. Drs. Powers and Clementa were immediately summoned and a special train was made up and the unfortunate man taken to the Toronto Hospital. The train went to Toronto in one hour or at the rate of one mile a minute.

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you, and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers heal up; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. You feel yourself a man and know marriage cannot be a failure. We invite all the afflicted to consult us confidentially and free of charge. Don't let quacks and fakirs rob you of your hard-earned dollars. WE WILL CURE YOU OR NO PAY.

☑ NO NAMES USED WITHOUT WRITTEN CONSENT.

THREATENED WITH PARALYSIS.

Peter E. Summers, of Kalamazoo, Mich., relates his experience:

"I was troubled with Nervous Debility for many years. I lay it to indiscretion and excesses in early youth. I became very despondent and didn't care whether I worked or not. I imagined everybody who looked at me, guessed my secret. Imaginative dreams at night weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair loose, memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis. I took many medicines and tried many first-class physicians, wore an electric belt for three months, went to Mt. Clemens for baths, received little benefit. While at Mt. Clemens I was induced to consult Drs. Kennedy & Kergan, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through my nerves. I was cured mentally, physically and sexually. I have sent them many patients and will continue to do so."

BEFORE TREATMENT AFTER TREATMENT

CURES GUARANTEED OR NO PAY

We treat and cure VARICOCELE, STRICTURE, NERVOUS DEBILITY, BLOOD DISEASES, URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES.

CONSULTATION FREE. BOOKS FREE. If unable to call write for a Question Blank for Home Treatment.

PETERBORO' DEFEATS TORONTO ARGONAUTS

After Putting Up a Strenuous Struggle the Visiting Team Were Badly Routed by the Locals.

The Argonauts of Toronto, and the Peterborough senior team met last night on the Brock street rink ice, in a senior O.H.A game, the locals winning by 10—5. The rink was well filled and proved to contain a very enthusiastic crowd. The Argos wore a uniform of red, white and blue, and by the shouting done they seemed to be all by themselves. But the Peterborough people gave the visitors every encouragement that was due.

The game started at 8.30, as scheduled. The first half was not very fast, but gradually brightened up towards the end. The puck seemed to stay around the Argos' goal, and after six minutes play, the locals scored. Both teams began to wake up after this and the game became fast. "Wally" Parnell playing a great game, and making several brilliant rushes The Argos' old defender was almost impassable, but after 20 minutes play, Peterborough scored again, after some clever work by Glover and Morgan This was followed by a rush by the visitors, resulting in a score for the visitors. The locals then let out and scored two goals within one minute of each other, which was partly due to the work of Crowley. Just about the close of the first half Morgan was ruled off, and the first half ended in favor of the locals by a score of 4—1.

The second half opened up at a very fast pace, and this was kept up until the finish. Moore, and Miller came out and showed themselves after a short combination, with a goal. Cullough and Hamilton were very conspicuous in a combination, which resulted in another tally for the water rats. Morgan then made one of those shots that made the large crowd present sit up and holler, when "Your Uncle" put a long shot from center which found its way into the nets.

Higginbottom proved himself an excellent stick handler, breaking up more than one of the local's combinations. Crowley and Glover put up a fast game, and made the visitors hustle some. During the first half of the game Morgan was put in the fence for two minutes, and in the second, Morrow visited the time keepers for two minutes. Parnell played one of the best games he has ever put up here. Referee Heins in the general opinion of the crowd should be put in charge of the Tate Optical Co., and have his "lamps" repaired.

The teams lined up as follows;

Argos.		Peterborough
	Goal.	
Cochrane		Laing
	Point.	
Morrow		Glover
	Cover-point.	
Welthan		Crowley
	Rover.	
Cullough		Miller
	Center.	
Tamblin		Morgan
	Right Wing.	
Higginbottom		Moore
	Left Wing.	
Hamilton		Parnell

Referee—Mr. Heins.

The 14th Regiment Hurkey team defeated the Marlboros in the Mutual street rink, Toronto, last night, by a score of 8—10.

If you are Constipated, dull, or bilious, or have a sallow lifeless complexion, try Lax-ets just once to see what they will do for you. Lax-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Lax-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

Mary Anthony Dies at Rochester, N.Y.

Rochester, Feb. 6.—Mary S Anthony, sister and lifelong co-worker of Susan B. Anthony, died yesterday at her home, 17 Madison street.

Miss Anthony would have been 80 years of age in April. She has survived her distinguished sister, Susan B. Anthony, by only eleven months.

Miss Susan often said that she could not have done what she had done for the cause of women suffrage, if it had not been for the kindly advice, loving sympathy, and earnest support of "Sister Mary." She had not been well since the death of her sister.

Explorer Makes Some Great Discoveries

Calcutta, Feb. 6.—News from Sven Anders Hedin, the Swedish traveler, who last year started from Chinese Turkestan on a journey of exploration to Thibet, has reached here. Hedin, who, when he sent off his courier, had already explored eight hundred and forty miles of unknown country, said he hoped to reach the monastic city of Shigatse, five hundred and thirty miles from Lhasa, at the end of February.

The geographical and geodetic results of the expedition are already exceptionally rich The explorer lost his whole caravan of animals, but not a single man, and all the maps and collections were saved.

Hedin discovered many unknown mountain ranges, rivers, and gold fields, and traveled eighty-four days in the solitude of an Arctic winter, not seeing a single Thibetan. Hedin's report concludes;

"The journey is the most wonderful I have made in Asia in my twenty-two years of travels."

House of Refuge Soon Populated

County Clerk Ed. M. Elliott, has sent certificates to the reeves of the various townships of the county to fill in for admission of patients in the Lakefield House of Refuge. There are two forms, one which is filled in by the reeve and the other by a close neighbor of the would be inmate. These certificates furnish the House of Refuge authorities with all the information required, such as his name, age, where he came from, what his or her occupation is or was, how long a resident of the county and all about present condition.

Reeve Scott of Smith, has already filled out three forms and the old people will be removed to the House of Refuge in a day or two. One of the three is now an inmate of the Protestant Home. Every municipality in the county will have from one to three inmates at the start, and as soon as possible they will be taken to the House of Refuge.

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 20 acre ore and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 20 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a cakilte vein 13 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 6 inch nicolite, 18 inch smaltite together with cobaltite. Assays gave 672-1233-972-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per. ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00). The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

W. H. JACKSON,

261 KING STREET WEST, - TORONTO, CANADA

JEROME TO HOLD THAW'S WITNESS

Prosecution Subpoens Man Who Testified for the Defence.

WILL KEEP HIM SECLUDED

Delphin M. Delmas Will Defend Thaw—He Bothered Jerome Considerable.

New York, Feb. 7.—Stanford White, displaying a pistol, threatened to take the life of Harry K. Thaw, according to the evidence of a witness introduced yesterday by the defence in the trial of Thaw for the murder of White. White had called at the Garden Theatre, where Evelyn Nesbitt was playing, on Christmas Eve, 1903, and it was after he had been told the young lady had gone away with Thaw that White, after saying, "Oh, that Pittsburger!" was heard to remark later, "I'll find and kill that ——— ——— ——— before daylight!"

This testimony was offered by Benjamin Boman, who then was the stage doorkeeper. Despite Mr. Jerome's searching cross-examination, the witness held to his critical story in every detail He answered with an emphatic "No," when asked if he had received any compensation from Thaw's attorneys.

Delphin M. Delmas yesterday assumed active charge of Thaw's defence, and Mr. Jerome found him a foeman worthy of his steel. There were several interesting tilts between the two, Mr. Delmas always suavely referring to his adversary as "the learned District Attorney."

AFTERNOON COURT.

New York, Feb. 7.—Immediately after witness Boman left the stand he was served with a subpoena for the prosecution. Counsel for the prosecution declared that Boman will not be permitted to leave the jurisdiction of the court if it can be prevented.

For the first time since the beginning of the trial the court room during the afternoon session was crowded to its utmost capacity, by the general public, a large portion of the audience being women. Justice Fitzgerald's warning of the morning that there might be testimony that might well shock their sensibilities seemed to increase rather than decrease, the number of women who sought entrance to the court room. Women who came from idle curiosity had no difficulty in passing court officers to whom they gave a friendly nod, while reporters and others whose business called them to the trial had trouble in getting within the doors.

Justice Fitzgerald's orders that no person not having business in the court room should be admitted during the trial had evidently been disregarded, and during the noon recess the opportunity to fill the court room was seized upon by those in charge of the door.

As soon as Justice Fitzgerald appeared, Mr. Jerome took up the argument against allowing the witness, Green, to answer the question as to whether in his opinion Thaw's manner after shooting White was rational or irrational. The District Attorney cited half a dozen decisions which he declared upheld his contention that Green was not a proper witness to testify as to Thaw's mental condition.

Justice Fitzgerald over-ruled Mr. Jerome's objections, and Mr. Green declared "Thaw's actions were irrational."

Mr. Green said that he was at the garden for pleasure, but that he wrote a story of the tragedy, which was published in his paper the following afternoon.

Two Children Taken to the Shelter

Last Night—Home Surroundings Are of an Unhealthy and Contaminating Influence.

At 7.30 o'clock last evening, Mr. Geo. Cochrane, agent for The Children's Aid Society, called into requisition the services of P.C. Newhall, to remove, by force if necessary, from a house on Water street, opposite the market, the two children of John Dunsford to the Children's Shelter, where they will find more healthy and beneficial conditions than apparently are to be found at their home. The children, a boy and girl, are aged ten and nine years, respectively, and Mr. Cochrane, on investigation, and from evidence furnished by neighbors, has concluded that their home surroundings are not desirable for children of such tender years.

It appears that Mr. and Mrs. Dunsford have been living on Water St. some two months now, during which time much drinking and carousing has prevailed to the neglect of their little ones, and with a total disregard for sanitary conditions. P.C. Newhall reports that when called in last evening he found the place in a filthy condition, and a dog and six or eight pups domiciled in the family living room. The latter fact alone gives some idea of the importance placed upon even the ordinary ideas of civilization and sanitary conditions by the head of the family.

Mr. Dunsford was off A Drake last night when the little ones were removed to the shelter. It is to be regretted that he has become a prey to drink, to the neglect of those for whose support and mental training he is responsible. And while Mr. Cochrane is to be commended for his prompt action in removing these two little ones from contaminating home influences, and placing them where their moral and physical well-being will be properly cared for, the law should step in and investigate the case. It is a shameful sight to see a man wasting his substance in drink to the neglect of those who should be nearest and dearest to him.

Local Livery Man Re-elected at Orillia

Mr. Bert McCollum, of McCollum Bros., the Water street liverymen attending the annual meeting of the Orillia Ranching Company in that town. This company owns 15,000 acres of land on the shores of the Georgian Bay. Two railways, the James Bay and Canadian Northern pass through it. The company has been in existence for two years. It is up sellabout half of the land and to retain the other half for ranching purposes.

On the property of the Orillia Ranching Company there are now a number of Angora sheep and it is likely that a large number more will be pleased on the farm in the spring. The officers elected were;

President, W. H. Manning.
Vice-President, Bert McCollum.
Sec.-Treas., S. P. Secord.
Directors, Messrs. Secord, S. C. Secord, W. H. Brown and the officers.

A Base Deceiver

On Tuesday night a young lady by name of Tilly Glass, complained to a Times' representative, that she had been cruelly deceived by a young man named Charles Clark, who had promised to marry her. It seems that the lady returned to come into the city for a few days, and made the acquaintance of the dashing Charley, who soon made rapid strides to capture the girl's affections, etc. Together they drove to Keene, Charley pointing out to her that the beautiful black horse they drove, belonged to him, and that he had many more such fine animals in the city.

That was not all, Charles stated he had been through the South African war, and had been shot through the leg and that he was in receipt of a Government pension, which would not only keep his new found bride (to be) but would enable them to enjoy many more such pleasant drives as the one they were then enjoying. Before they reached Peterborough something in the way of a damper, to his boisterous love making happened, and on reaching the junction of Brock and Aylmer Sts., the gallant lover (who happened to be a married man) gave his "gal" a fixed position on the corner of the above streets, with strict instructions not to move till he returned from putting his horse away, and brought back the necessary credentials to carry out his promise of making them man and wife, but Charles expected too much, for ladyship got tired of waiting, like Charles did of wooing, and found herself in the police station for the night. She has now returned to good old Keene, a sadder but wiser woman.

Peterboro' Bylaws

Toronto, Feb. 7.—The Standing Orders Committee of the Legislature decided yesterday morning that Fort William shall become a city. Its application was favorably passed upon.

Other applications which were favorably considered were;

The village of Port Perry to consolidate the debt.

The city of Peterborough to ratify money by-laws.

Mr. W. H. Hoyle presided, and there was a full attendance of members.

SPORTING TOPICS

THE TURF.

Referring to a mare well known in local sporting circles, the Galt Reporter says;

It is reported that Miss K. L. Wilkes, of Cruickston Park, recently made an offer of $10,000 for a New England horseman for the young trotting mare, Nahma, 2.14 1-4, by Peter the Great, 2.07 3-4, dam Carcas, by Himgan, 2.09 1-4, second dam, Houri, 2.17, dam of Hamomone, 2.10 -14, by Onward. Peter the Great, sire of Nahma, also sired Sadie Mac, the famous trotter, owned by Miss Wilkes. The offer is understood to have been refused.

Mr. Geo. Lipsett, the well known and thorough local horseman is to be congratulated upon having got a piece of the money by his fast mare, City Queen, in the 2.35 class at Ottawa. In this race there was great competition, and were it not for "Lipsey's" proverbial modesty, he would be sporting sparklers on his return.

Willie McMillen overloaded his ale compartment and got boisterous last night around the Royal Hotel, the result being Bill drifted into P. C. Newhall's arms and found a safe and sheltered port in Hotel des Cops, where he soon forgot all his troubles.

CITY BOARD OF WORKS IN SESSION LAST NIGHT

No More Signs on Posts Will be allowed---Those at Present Existing Will Remain Under Same Conditions as Overhanging Signs Until Council Orders Removal of all Posts.

The City Board of Works met last night when there were present; Mayor McWilliams, Chairman Ald. Duncan, Aldermen McIntyre, Johnston and Wilson.

Mr. Flynn was given permission to remove the trees opposite his hotel, the American House, providing he does so in a manner satisfactory to the engineer and also providing such act is approved of by the owner of the property.

Mr. Flynn's request to hang a sign outside his hotel on a post was not granted. The Board decided to avoid all obstruction on the streets in the shape of posts, of which there are already too many. A clause will be inserted in the bylaw governing the erection of illuminated signs, to prohibit the erection of any more sign posts. Those already up will be allowed to remain on the same terms and conditions as to license, etc., as overhanging signs, until such time as the council orders by resolution the removal of all posts.

Mr G. Walter Green appeared before the committee, with his requisition as submitted to the council on Monday night, for deed of a small portion of land on Gilchrist street lying between McDonnel street and the Grand Trunk track. The land in question measures some 30 feet, lying west of Mr. Green's old machine shop, and he wishes to use it for extending his works. Of course he is willing to pay the city a reasonable price for said land.

The Mayor moved, seconded by Ald. Wilson,—That Mr. Green's application be left over till the next Board meeting, Wednesday night, so as to give time for opposition to the matter, if any is contemplated. If no objection to the sale of this land is lodged, the solicitor will be instructed to take all necessary steps for the sale of the land, and give necessary notice thereof.—Carried.

OPENING OF ALBERT STREET

Mr. Murray appeared before the Board, and offered that while he could not see his way clear to give 40 feet of his land for the opening of Albert street, he would willingly deed the city 32 feet providing they opened a roadway of the necessary width.

Ald. Johnston moved, seconded by Ald. Wilson,—That the Board investigate this locality before taking any action.—Carried.

GILMOUR STREET SEWER.

The claim of Mr. Coughlin, for $8 expended in an effort to prevent the backing up of sewage into his cellar was again taken up. The plumbing inspector reported that he arrived on the scene when the plumbers engaged by Mr. Coughlin were examining the sewer connections, which he on examination found to be in proper condition. This was the first notice he had of the trouble, and he readily recognized that the main sewer was blocked. This he immediately reported to the engineer, who at once had the sewer flushed, thus removing all trouble. The engineer reported that the sewers had been flushed as regularly as necessary for all purposes, and the Board arrived at the conclusion that Mr. Coughlin had no claim on the city whatever. The engineer acted as soon as notified of the trouble which notification he received from Mr. Thompson, the plumbing inspector, who happened to be passing when Mr. Coughlin's plumbers were at work. Mr. Coughlin should have notified the city immediately he found trouble with his sewer

Ald. McIntyre took exception to this and urged that the city was liable.

BABB'S LANE.

Ald. Johnston moved seconded by Ald. McIntyre,—That if the property owners on Babb's Lane will give three feet on each side, and of the property owners on the west side will pay 60 per cent., for the cost of a granolithic sidewalk on one side of the street, the city will grade and watertable the lane and substitute the wooden walk with a granolithic one.—Carried.

The Board then adjourned.

POLICE NEWS

Daily Happenings in Court Room and Station.

Yesterday afternoon tears and repentance or, to give the prisoner the benefit of a doubt, chagrin poured plentifully adown the stern iron bars of cell No. 8 in the Hotel des Cops.

It seems that a boy of some 14 years of age by name Sanders, was arrested on a charge of stealing a penknife, worth perhaps 75 cents, from a little grocery store on Aylmer street.

The chief witness, (sic) for the prosecution is another kid of the same age named Shearer. When a Times' representative was in the police station, Sanders was behind the iron-barred door and Shearer arrived to see him. Recriminations at once resulted, each boy holding up his hand towards the high heavens, and swearing by all the immortal gods from Jupiter to Pluto, not to mention the almighty dollar deity that the other was the thief. Shearer who, with a certain amount of pride (?) confessed to having a thorough acquaintance with the interior of the cell occupied by his acquaintance, dating over several various arrests of his own person, vehemently asserted that Sanders had stolen the knife and hidden it in his fur gauntlet, pointing to the gauntlets lying on the cell bench as corroborated evidence. Sanders was just as certain that Shearer had stolen the knife and had slipped it into his pant's pocket. In any case, the prisoner Sanders admitted having sold the knife to a man named O'Brien for ten cents, although knowing it was stolen. Sanders was detained "in durance vile," whilst Shearer was taken to his mother's residence, to be detained there until this morning. When the court opens today there will probably be a "boysterous" time when the youthful prosecutor and defendant give their evidence.

Fifty Feet of Snow

Peublo, Colo., Feb. 6. — A despatch from Salida, Colorado, says; At least a dozen lives are believed to have been lost in a terrible snow slide that came down Monarch Mountain last night, overwhelming three business houses and burying their occupants under fifty feet of snow. The wrecked buildings are Skinner's saloon, Musso's rooming house and Schrader's restaurant, the inmates of which had no time to get out before the crash came. Several of them, however, have been rescued.

A Thinker's Thoughts

A thinker's brain wears away in proportion as it is used and this waste must be rebuilt by food (there's no other way) else the brain grows dull and is a poor instrument.

In Grape-Nuts food all the elements required for this brain building are found in the most liberal proportions, the parts of grains that supply the Phosphate of Potash to join with Albumen being especially selected in making

GRAPE-NUTS

food and trial 10 days will show any brain-weary or nervous wreck a great improvement.

"There's a Reason," as trial proves

Get the little book, "The Road to Wellville," in pkgs.

A SCHOOL TEACHER

Taught a Good Food Lesson.

It is a strain on nerves and patience for a teacher, not only to curb the antics of forty or fifty youngsters six to eight hours each day, but also to instil into their minds a mass of knowledge, including the famous three R's.

A teacher, living in Taunton, England, writes of the benefit she derived from Grape-Nuts food after the exhausting work in the schoolroom had almost ruined her health. She says:

"When I first began taking Grape-Nuts food, I was a teacher worn out in body and mind, and used to suffer very much from brain fag.

"I was also a martyr to indigestion.

"It is now plain that I lacked the power to digest and get value from my food.

"I felt much better after the first package, and by the time I had eaten three or four packages I was a new creature.

"My brain became clearer, and the powers of concentration much greater. I gained steadily in weight, my flesh becoming hard and firm. The sense of continual weariness vanished like magic, and I have not had a bad attack of indigestion since I first used Grape-Nuts.

"I have become so fond of the food that I look forward to my plate of Grape-Nuts with a little cream more than to the most costly dishes." "There's a reason." Name given by Postum Co., Battle Creek, Mich.

Pale Faced Girls

Thousands Using Successful Cure For Paleness and Anaemia

The pallid girl always lacks appetite. What little she eats is badly digested.

At night she is restless, she dozes, but doesn't sleep soundly.

Vital force must be increased, new blood must be supplied and a general rebuilding take place before she will feel like she ought.

Dr. Hamilton had invaluable experience in these cases and found nothing so prompt in building up the young women as his vegetable pills of Mandrake and Butternut.

Dr. Hamilton's Pills begin by cleansing the system and purifying the blood; they also improve digestion and render food ready for absorption. Additional nourishment is quickly supplied and the patient is fast strengthened and invigorated.

Full of spirit, ruddy and strong is the girl that assists her system by Dr. Hamilton's Pills.

The following recent letter from Miss Etta McEwen, of Haliburton, speaks for itself:

"In using Dr. Hamilton's Pills I find my system is wonderfully built up. It is certainly the most effective remedy I ever used. I have now a good appetite, sleep more soundly and awaken in the morning feeling quite refreshed.

"Formerly I felt tired and depressed. I looked as if a severe illness was hanging over my head.

"Nothing could give quicker results than Dr. Hamilton's Pills and I strongly advise every young woman to use them."

All dealers sell Dr. Hamilton's Pills, 25c. per box or five boxes for $1, by mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

Children's Aid Society

PETERBOROUGH

For the care of neglected and ill-treated children, incorporated by Act of Legislature 1893. Information requested. Informants' names kept strictly private. Office hours 10 to 12 a.m., 4 to 6 p.m. GEORGE COCHRANE, Agent and Assistant Secretary, Office, Division Court Building.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

UNION LABEL

PETERBOROUGH, FEBRUARY 4, 1907

TUBERCULOSIS AMONG WORKERS

Harry Thomas, secretary of the Trades and Labor Council of the United States, and Canada, is quoted as saying that 30 per cent. of the members of the unions composing that body are suffering from some sort of tuberculosis. Most of the sick benefits paid out, he says, are given to the victims of consumption—a name which fits the "white plague" as well now as it ever did.

The estimate of one-fifth of the membership of the labor organizations in the Trades and Labor Council may be excessive. It seems too terrible to be literally true. But the fact is beyond dispute that tuberculosis is especially and lamentably prevalent among certain trades and occupations. It rages among wage-earners far more extensively than it does among farmers, for instance, or doctors and lawyers and ministers. In a certain degree it is a scourge of the poor, just as Bright's disease, though found in all classes and conditions of men, is most common among those who spend money freely.

That this is so is a sad commentary upon the industrial civilization of the age. It is unjust that the workers of the world whose labor is most vital to human comfort and existence, the toilers whose productive power is at the bottom of everything, should be particularly subject to a destructive and preventable disease. Such conditions must be changed. Such wrongs must yet be righted.

The appeal for help in combating tuberculosis which Secretary Thomas has made to Dr. John H. Lowman, as president of the anti-tuberculosis society, will no doubt be answered as effectively as the resources of the society permit. Valuable aid will be given. But the problem is great and far-reaching. It demands sustained effort. It cannot be solved or disposed of all at once. The state and local authorities will have to do more than they have ever done to beat back and finally reduce to the minimum the ravages of tuberculosis.

This is a matter which every right-thinking and high-minded employer should consider an imperative duty. He ought to feel that he must take whatever measures lie within his power to reduce to the least possible degree the danger of tuberculosis among the men and women who serve him. He should do his best to see that they shall not be exposed to the white plague by lack of ventilation and cleanliness in the rooms where they work. If the conditions of their labor involve the peculiar and often destructive dangers which come from metal dust, infection from handling foul substances, etc., every safeguard which common sense and science suggest ought to be used to lessen the risk of such work.

Sooner or later it will be considered intolerable that human life should be needlessly exposed to the peril of so destructive a disease as tuberculosis. Then there will be far bitter and more adequate provision than now exists for the relief and cure of sufferers from that great destroyer. The workers of the world will not always be the especial victims of the white plague.

Multi-Millionaire Philanthropist Dead

Paris, Feb. 6.—Daniel Osiris, the philanthropist, who presented Malmaison to the French nation, is dead.

M. Osiris bequeathed $5,000,000 to the Pasteur Institute.

Daniel Osiris was a wealthy Greek, who purchased Malmaison, the chateau, a few miles from Paris, which was the residence of the Empress Josephine from 1798 to 1815, renovated it, and in December, 1900, presented it to the French people for use as a Napoleonic museum. He replaced some of the former fittings and furniture, and employed artists to obliterate the traces of pillage left by the Russians and the Communists. In 1899 M. Osiris presented to the Institute of France a sum representing an annual income of about $6,500 for a triennial prize of $20,000, open to all countries, for the most remarkable work or discovery of general interest, especially in the fields of surgery and medicine.

A Big Lumber Land Deal

Sherbrooke, February 6.—Messrs. B. C. Howard & Co., completed a large lumber deal with Mr. George Hall, of Nicolet. It comprises the purchase of saw mill and rights on the Chaudiere River, together with about 10,000 acres of fine timber lands. The price is supposed to be up to the $100,000 mark, or over. The Sherbrooke firm now owns over 18,000 acres.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

Piles get quick relief from Dr. Shoop's Magic Ointment. Remember it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding, or blind piles disappear like magic by its use. Try it and see. J. D. Tully.

New York Crippled by Snow.

New York, Feb. 6.—The heavy snowstorm which set in in this vicinity yesterday grew as the night went on, and today traffic is much crippled. Railroad trains came groping their way into stations, ferry boats crawled across dimmed rivers, and everything in the way of city transportation above ground was far behind schedule time. Nearly a foot of hard, dry snow and a high wind, which prevailed practically all of yesterday and last night, rendered travel by land and water difficult and uncomfortable, and in some instances risky. Great trouble was experienced in the congested parts of Manhattan Borough, and of Brooklyn, but the outlying parts of the city and the suburbs suffered most. Hundreds of New Jersey, Long Island and West Chester commuters rather than brave the storm to reach their homes remained in the city over night.

You cannot possibly have a better Cocoa than

EPPS'S

A delicious drink and a sustaining food. Fragrant, nutritious and economical. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

A Hair Dressing

If you wish a high-class hair dressing, we are sure Ayer's Hair Vigor, new improved formula, will greatly please you. It keeps the hair soft and smooth, makes it look rich and luxuriant, prevents splitting at the ends. And it keeps the scalp entirely free from dandruff. Stops falling hair, also. Does not stain or change the color of the hair.

J. C. Ayer Co., Lowell, Mass.

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers heal up, the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear, the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. You feel yourself a man and know marriage cannot be a failure. We invite all the afflicted to consult us confidentially and free of charge. Don't let quacks and fakirs rob you of your hard-earned dollars. WE WILL CURE YOU OR NO PAY.

NO NAMES USED WITHOUT WRITTEN CONSENT.

THREATENED WITH PARALYSIS.

BEFORE TREATMENT

Peter E. Summers, of Kalamazoo, Mich., relates his experience.

"I was troubled with Nervous Debility for many years. I lay it to indiscretion and excesses in early youth. I became very despondent and didn't care whether I worked or not. I imagined everybody who looked at me, guessed my secret. Imaginative dreams at night weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair loose, memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis. I took all kinds of medicines and tried many first-class physicians, wore an electric belt for three months, went to Mt. Clemens for baths, but received little benefit. While at Mt. Clemens I was induced to consult Drs. Kennedy & Kergan, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through my nerves. I was cured mentally, physically and sexually I have sent them many patients and will continue to do so."

AFTER TREATMENT

CURES GUARANTEED OR NO PAY.

We treat and cure VARICOCELE, STRICTURE, NERVOUS DEBILITY, BLOOD DISEASES, URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES.

CONSULTATION FREE. BOOKS FREE. If unable to call write for a Question Blank for Home Treatment.

The REFUGEES

By A. CONAN DOYLE,
Author of "The Return of Sherlock Holmes"

Copyright, 1898, by Harper & Brothers

"Where is Achille Latour?" asked De Vivonne. "He has studied medicine at Montpellier."

"Here I am, your excellency. It is not for me to boast, but I am as handy a man with a lancet as with a rapier. Which would you have me look to?"

"This one in the road."

The trooper bent over Amos Green. "He is not long for this world," said he. "Methinks that it were well for me to pass my dagger through his throat."

"Not for your life!" cried the leader "If he die without wound, they cannot lay it to our charge. Turn now to the other."

The man bent over De Catinat and placed his hand upon his heart. As he did so the soldier heaved a long sigh, opened his eyes and gazed about him with the face of one who knows neither where he is nor how he came there. De Vivonne, who had drawn his hat down over his eyes and muffled the lower part of his face in his mantle, took out his flask and poured a little of the contents down the injured man's throat. In an instant a dash of color had come back into the guardsman's bloodless cheeks and the light of memory into his eyes. He struggled up on to his feet and strove furiously to push away those who held him. But his head still swam, and he could scarce hold himself erect.

"I must to Paris," he gasped. "I must to Paris. It is the king's mission. You stop me at your peril."

"He has no hurt save a scratch," said the ex-doctor.

"Then hold him fast. And first carry the dying man to the carriage."

The lantern threw but a small ring of yellow light, so that when it had been carried over to De Catinat Amos Green was left lying in the shadow. Now they brought the light back to where the young man lay. But there was no sign of him. He was gone.

De Vivonne caught the false doctor by the throat and, hurling him down, would have choked him upon the spot had the others not dragged them apart.

"You lying dog!" he cried. "Is this your skill? The man has fled, and we are ruined!"

"He has done it in his death struggle!" gasped the other hoarsely. "He cannot be far off."

"That is true. He cannot be far off," cried De Vivonne. "He has neither horse nor arms. You, Despard and Raymond de Carnac, guard the other, that he play us no trick. Do you, Latour, and you, Turberville, ride down the road and wait by the south gate. If he enter Paris at all he must come in that way. If you get him, tie him before you on your horse and bring him to the rendezvous. In any case, it matters little, for he is a stranger, this fellow, and only here by chance."

The two horsemen rode off in pursuit of the fugitive, and De Catinat, still struggling desperately to escape, was dragged down the St. Germain road and thrust into the carriage, which had waited at some distance while these incidents were being enacted. Three of the horsemen rode ahead, the coachman was curtly ordered to follow them, and De Vivonne, having dispatched one of the band with a note to his sister, followed after the coach with the remainder of his desperadoes.

The unfortunate guardsman had now entirely recovered his senses and found himself with a strap round his ankles and another round his wrists, a captive inside a moving prison which lumbered heavily along the country road. He had been stunned by the shock of his fall, and his leg was badly bruised by the weight of his horse. His mind, however, pained him more than his body. He sank his head into his pinioned hands and stamped madly with his feet, rocking himself to and fro in his despair. What a fool, a treble fool, he had been! He, an old soldier, who had seen something of war, to walk with open eyes into such a trap!

But then came a return of that common sense which lies so very closely beneath the impetuosity of the Celt. The matter was done now, and he must see if it could not be mended. Amos Green had escaped. That was one grand point in his favor. And Amos Green had heard the king's message and realized its importance. It was true that he knew nothing of Paris, but surely a man who could pick his way at night through the forests of Maine would not be balked in finding so well known a house as that of the archbishop of Paris.

And then the thought of escape occurred to his mind. Might he not even now be in time perhaps to carry his own message? Who were these men who had seized him? And where were they taking him to? Full of curiosity he peered out of the windows.

A horseman was riding close up on either side, but there was glass in front of the carriage, and through this he could gain some idea as to his whereabouts. The clouds had cleared now, and the moon was shining brightly, bathing the whole wide landscape in its shimmering light. To the right lay the open country, broad plains with clumps of woodland and the towers of castles pricking out from above the groves. On the left, but far away, lay the glimmer of Paris. They were leaving it rapidly behind. Whatever his destination, it was neither the capital nor Versailles. Then he began to count the chances of escape. His sword had been removed, and his pistols were still in the holsters beside his unfortunate horse. He was unarmed, then, even if he could free himself, and his captors were at least a dozen in number. There were three on ahead, riding abreast along the white moonlit road. Then there was one on each side, and he should judge by the clatter of hoofs that there could not be fewer than half a dozen behind. That would make exactly twelve, including the coachman—too many, surely, for an unarmed man to hope to baffle. At the thought of the coachman he had glanced through the glass front at the broad back of the man, and he had suddenly in the glimmer of the carriage lamp observed something which struck him with horror.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

WHITE & WHITE,
Wheeling, Investment Brokers West Virginia

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 3 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 24 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Dryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 30 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the ramp, which is proving up the drillings which have been made since the camp started."

This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run in and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 20 feet in thickness, lying at a depth of from 67 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 20 feet in thickness, and found only 67 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magaska, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 1% feet from our property and is in the same ore bed. Shaft No. 2 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realise his opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

MAP OF DISTRICT SHOWING SUNBURST MINE.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body, of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 60 feet in diameter. The shaft of the Hobo Mine was sunk within 5 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 20 feet. Ore is struck in shaft No. 3 at 67 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 67 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No. 1 shaft, 6 1-2 by 8 feet, is down 85 feet, well timbered, and has good shaft-house and derrick. From this shaft prospect drifts have been driven, in all about 300 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 6 1-2 by 8 1-2 by 90 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 70 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 6 1-2 by 8 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $35,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscoola Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	45 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	80 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	88 per cent.	Dinger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$40.00 buys 500 shares of stock; $4.00 down, $4.00 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $61.52 per ton for lead and $26.63 for zinc to $42.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 80 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 987,160.00
A. W. Taylor	120	150,750.00
J. W. Aylor	40	676,571.00
The Burgner Mining Co.	80	150,570.00
Center Creek Mining Co. (production to date)	200	6,982,494.00
Mrs. E. J. Chinn	120	220,700.00
Majestic Consolidated Zinc & Lead Co.	52	254,490.00
Continental Zinc Co. (production to date)	240	1,571,583.00
Consolidated Troup Mining Co.	40	193,612.00
Daughtery-Davy-McMillan Estate	60	456,000.00
The Empire Zinc Co.	171	120,312.00
Fox Heirs	20	130,724.00
Granby Mining & Smelting Co., 1905		1,261,541.00
Granby Mining & Smelting Co., 1904		1,035,050.00
John G. Guinn	640	83,287.00
Pittsburg-Joplin Lead & Zinc Co.	10	96,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	413,304.00
United Zinc Co.	135	290,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 90 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

Severe Pains in the Groin

Trying Experience of a Well Known Citizen in St. John, N.B.

The case of Mr. Chas F. Olive, for years foreman in the "Gazette" of St. John, N. B., is a striking evidence of the power of Ferrozone.

No remedy has such a record for restoring sufferers from acute stomach and kidney trouble. It invariably does cure.

"For several years" writes Mr. Olive, "I have had kidney trouble and until quite recently I suffered torture. A few months ago my condition assumed a very serious form. I consulted several city doctors, used different pills, but without the slightest benefit. I suffered from an intense pain in the groin, and the increasing seriousness of my trouble prompted me to try Ferrozone. It gave me quick relief, and a half-a-dozen boxes cured. Ferrozone I can recommend as a specific for disordered kidneys."

Won't you try Ferrozone too, 50c. per box at all dealers in medicine.

Boarders Wanted

Good accommodation for boarders in a home with all modern conveniences. Apply at 29 Queen street. 6t

Annual Meeting of 57th Regiment

The annual meeting of The 57th regiment, Peterborough Rangers, was held yesterday evening. The work of the past year was reviewed and plans for the coming military season discussed. The meeting was held in the officers' mess at the drill hall.

FOR SALE

Forty shares of Peterborough Cordage Co. Stock at par if taken at once, or will exchange for Foster Stock at market quotation.

D. N. VAN DYKE,
½ Draper-st., Toronto, Ont

Valuable Dog Brought Here

Mr. Bert McCollum of the local livery firm of McCollum Bros., Water street, whilst in Orillia on Tuesday attending a meeting of a company he is interested in, purchased a valuable greyhound pup, that was imported from the Old Country two months ago and it is now only eight months old. This is the kind of dog that is worth paying dog-tax on.

Buying Stock for House of Refuge

The Board of Management of the County House of Refuge have appointed Councillor Scott and Warden McNulty a committee to purchase stock for the farm. These gentlemen are now busy buying cattle and horses. The farm implements, such as plows, harrows, mowers, threshers, etc., will be bought as required. The managers also decided to make some changes. The ground immediately surrounding it will be lowered some what, so as to show more of the foundation.

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tully.

The New Term

—AT THE—

PETERBOROUGH BUSINESS COLLEGE

Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.

You cannot make a better investment.

For particulars, address

W. PRINGLE
Opposite Post Office, Principal.

ADVERTISE IN THE TIMES.

LOCAL INCIDENTS

By The Times Man on the Street

—See south window for valentines, Times Bookstore.

—A lady's hand satchel, is awaiting an owner at the police.

—There was nothing doing in the police court yesterday morning.

—Grasshoppers and mosquitos are conspicuous by their absence these days.

—The Board of Works met last night. Particulars elsewhere in this issue.

—The Lakefield Portland Cement Company, has shipped five car loads of cement to Edmonton and Saskatoon.

—Branch No. 30, C.M.B.A. had a successful meeting yesterday evening at which over twenty candidates were initiated.

—Local hotelmen say that hot beef tea these days is running neck and neck with orders for whiskey and other brands of tangle-wit decoctions.

—All young men are cordially invited to the Y.M.C.A. parlor tomorrow evening to the social to be given by the Baraca Club of Murray street church.

—The meeting of the Quarterly Official Board, which was to have been held at George street church Tuesday evening, was postponed until Tuesday evening next.

—At the opening of the second session of the Alberta Legislature in Edmonton, Col. E. B. Edwards, 7th infantry brigade, was in command of the Lieut.-Governor's staff.

—The local Elks have decided to hold a dramatic evening in the Forresters' Hall, Simcoe street, on Tuesday, Feb. 19th, when the work of the order will be exemplified. It is expected several visitors from other cities will be present.

—His many friends will deeply regret to hear that Mr. A. W. Carscallen, ex-M.P., of Marmora, suffered a paralytic stroke, at his home in Marmora, and is now in a precarious condition. This is the second stroke Mr. Carscallen has suffered, the first being some years ago.—Belleville Intelligencer.

Lakefield is Shipping Lumber

The Cavendish Lumber Company of Lakefield, are making large shipments of lumber to Prescott and Ogdensburg, shipping about forty cars per week to these points and the mill there is kept bustling to keep up with orders.

Mr. F. D. Kerr to Lecture

The next meeting of St. Paul's church Young Men's Guild will be held on Tuesday night of next week, when Mr. F. D. Kerr, barrister, of Dennistoun, Peck & Kerr, who spent several weeks on the Continent last summer, will give an address on his trip abroad and on the principal points visited.

Millbrook Bank Clerks' At Home

There was a large attendance of the elite of Millbrook and their invited guests at the bank clerks' annual "at-home" in that village. A very pleasant time was spent, the descendants of those who sat at the proverbial "head of Amir's wealth being jolly good fellows and most hospitable hosts. Quite a number of Peterborough's 400 were present.

Conservative Club Meeting Tonight

At the lecture to be given in the Young Conservative Club rooms this evening by Mr. D. W. Dumble on "John Bright," Mr. J. G. M. Wilson, vice president of the club will occupy the church. Mr. H. Theobald, the pianiste, will give several selections, and Mr. Firth will sing. All men are cordially invited to attend. Liberals or Conservatives will be made equally welcome.

Satisfactory Report of Water Works

The local water commissioners have a surplus of $6,933.54 or an increase for this year of over $2,469.29 over the preceding period. The commissioners took in some $31,500 whilst their total expenses were about $24,500 $10,617.47 was spent in laying mains and setting hydrants, and $4,009.34 in laying service pipes. A balance of $4,464.25 to the credit of profit and loss account was carried to the contingent account making that fund, at the present writing, some $9,932.

GUARANTEED STOMACH REMEDY

Will Refund Money If Mi-o-na Fails to Cure

You may ask why it is that Mi-o-na stomach tablets are sold under a guarantee to refund the money unless they cure, when no other treatment for stomach troubles is sold in this manner.

The answer is simple and conclusive. Other medicines for stomach troubles merely digest the food, while Mi-o-na strengthens the whole digestive system so that it soon becomes able to care for all the food that is eaten.

If you do not use your arm or leg for a month, the muscles become flabby and weak and you have to resort to artificial help. It is the same way with the stomach muscles. If they are not used, they become so weak that it is necessary to continue using a digestive with the food you eat.

On the other hand, when you use Mi-o-na, your stomach soon grows so strong that you can give up the use of medicine.

Mi-o-na costs 50c. a box and does more real good than a dozen boxes of ordinary digestive tablets.

We absolutely agree that your money will be refunded should you buy a 50c box of Mi-o-na stomach tablets and not be satisfied with the results. Mi-o-na is sold by druggists everywhere, or will be sent by mail on receipt of price, 50c.

Write today for a free sample package, and also give us your symptoms, and one of the best known stomach specialists will give your case his careful and personal attention without charge. Booth's Mi-ona Company, Buffalo, N. Y.

SOCIAL AND PERSONAL

—Mr. Theo. King, of Whitby, is in the city.

—Mr. G. A. Brodie, Brouffville, was in the city yesterday.

—Mr. R. Harris, of Ingersoll, is registered at the National.

—Mr. W. S. Cook, of the Brinton Carpet Company, left yesterday for Halifax, where he will take the steamer for Liverpool, Eng., and then to Kidderminster.

—Mrs. S. J. Sheridan, 72 Weller street, will not receive Friday, but will be at home the second and third Tuesdays of the month, for the remainder of the season.

—Mr. Harry Lockington a well-known tonsorial artist, formerly of this city, but now of Cobalt, has been visiting here for a few days, and has returned to Cobalt.

—Mr. John Guest representing Messrs John Robertson & Son., Ltd. the largest distillers of Scotch whiskey, Dundee, Scotland, is calling on his customers in the city. He is a guest at the Queen's Hotel.

New Armouries Contract is Let

Positive Results That Reward the Good Work Done by Mr. R. R. Hall, M. P.

Yesterday Mr Gus Hay received the pleasing intelligence that the contract for the erection of the new armories in this city has been awarded, although to an outside contractor, viz., George A. Proctor, of Barrie, the price being $125,190. The tenders were opened at the Department of Public Works yesterday morning. Contractors from all parts of the country tendered for the work.

Mr. Proctor's prices were considerably less than any of the other tenderers, and the contract was given to him. Several Peterborough men tendered on the work.

No time is specified for the completion of the work, but it is understood that the contract will be completed within the next two years.

During the satisfaction naturally created by so splendid a building being erected within the borders of our city, it is but right to recall and emphasize the strenuous efforts put forth by our member of the Dominion Parliament, Mr. R. R. Hall. The new armories will be a standing monument to the work that Mr. Hall has done for the city.

Pre-payment Meter Company a Success

Satisfactory Annual Meeting of the Shareholders, when Officers Were Re-elected.

Judging by the 1st annual meeting of the Pre-payment Meter Company shareholders, those interested in this progressive company have every reason for congratulation. The statement presented by the directorate was unanimously accepted.

The old Board of Directors, viz., W. Hamilton, J. H. Larmonth, A. A. Hollingshead, A. Parker and J. H. McClellan were re-elected.

At a subsequent meeting of the directors Wm. Hamilton was re-elected president; J. H. Larmonth, vice-president; A. Parker, as managing director, and A. A. Hollingshead as secretary-treasurer.

W. R. Morris, was re-appointed auditor.

Those present took a tour of inspection through the various machines and appliances and were agreeably surprised at the good work being done. Orders are now pouring in as fast, if not faster, than the company can turn out the goods.

Western Canada Is Well Described

The Advertising Department of the Canadian Pacific Railway has issued a most interesting booklet entitled "Western Canada," an advance copy of which has reached The Times.

This book is handsomely illustrated, giving typical views of Winnipeg and western farming scenes. In the book is a large enfolded map of the far western provinces, showing the routes already completed by the C. P. R. and also routes already surveyed, so that intending settlers or others can easily judge how such land as they may contemplate purchasing is situated as to transportation facilities. Any one interested in Western Canada can procure a copy of this book gratis by applying to Mr. W. T. Robson, Advertising Agent, C. P. R., Montreal.

—For the largest and best assortment of fancy and comic valentines visit The Times Bookstore.

Concert in Separate School

This evening a concert will be given in St. Peter's hall new Separate school. Harry M. Bennett, Miss L. Ball, Miss L. Halliban, Miss B. Hackett, Mr. John King, Mr. Chas. Delaney, Master Joseph Morrow, boy soprano, Masters Joseph Butler, Joseph Clancy, D. Barnett, Mrs. W. J. Morrow, and other well known local talent will take part.

An East Ward Romance Busted

It was whispered yesterday that a gay Lothario of this city who has recently been paying considerable attention to a married lady of the east ward, will not renew his love matters there. A husband's sturdy fists backed by a heart to heart talk with the sherer of his woes and joys, has nipped out little local romance in the bud. It seems that hubby happened home Tuesday during a call by the trans-Otonabee caller, unexpected by either hostess or guest.

Nursing Mothers and Over-burdened Women

In all stations of life, whose vigor and vitality may have been undermined and broken-down by over-work, exacting social duties, the too frequent bearing of children, or other causes, will find in Dr. Pierce's Favorite Prescription the most potent, invigorating restorative strength-giver ever devised for their special benefit. Nursing mothers will find it especially valuable in sustaining their strength and promoting an abundant nourishment for the child. Expectant mothers too will find it a priceless boon to prepare the system for baby's coming and rendering the ordeal comparatively painless. It [illegible] weak women, who suffer from frequent headaches, backache, dragging-down distress low down in the abdomen, or from painful or irregular monthly periods, gnawing or distressed sensation in stomach, dizzy or faint spells, see imaginary specks or spots floating before eyes, have disagreeable, pelvic catarrhal drain, prolapsus, anteversion or retro-version or other displacements of womanly organs from weakness of parts will, whether they experience many or only a few of the above symptoms, find relief and a permanent cure by using faithfully and fairly persistently Dr. Pierce's Favorite Prescription.

This world-famed specific for woman's weaknesses and peculiar ailments is a pure glyceric extract of the choicest native, medicinal roots without a drop of alcohol in its make-up. All its ingredients printed in plain English on its bottle-wrapper and attested under oath. Dr. Pierce thus invites the fullest investigation of his formula knowing that it will be found to contain only the best agents known to the most advanced medical science of all the different schools of practice for the cure of woman's peculiar weaknesses and ailments.

If you want to know more about the composition and professional endorsement of the "Favorite Prescription," send postal card request to Dr. R. V. Pierce, Buffalo, N. Y., for his free booklet treating of same.

You can't afford to accept as a substitute for this remedy of known composition a secret nostrum of unknown composition. Don't do it.

Miss Mildred Allen Yesterday's Bride

Yesterday afternoon, in the presence of some 200 invited guests, at 2.30, in St. Thomas' church, Millbrook, the marriage of Miss Mildred Mary Linnecar, only daughter of Rev. W. C. Allen, rector of the parish, and granddaughter of the late Ven. Archdeacon Allen, to Mr. Louis Henry Winslow of Woodleigh, Ida., was solemnized. The service was celebrated by the bride's father.

Miss Helen Allen, of Oakland, Cal., acted as bridesmaid, charmingly attired in white net over white silk trimmed with pink ribbon. Mr. Geo. Beal of Lindsay, supported the groom. The ushers for the occasion were: Messrs. T. W. Allen, of Lakefield; Wood, of Winnipeg, and Mr. Arthur Payne of Toronto.

The bride was becomingly attired in point d'esprit over white silk and carried a shower boquet of white roses and lilies of the valley. The bridesmaid carried a handsome boquet of pink roses. The choir rang a specially rehearsed version of "Oh Perfect Love."

After the ceremony in the church was concluded, the wedding party adjourned to the residence of Rev. W. C. Allen, where a sumptuous wedding dejeuner was served.

The happy couple left on the five o'clock G.T.R. train for Toronto, Buffalo and other points. On their return Mr. and Mrs. Winslow will reside at "Woodleigh," Ida. The groom's present was an elaborate amethyst pendant. The other presents were of unusual value.

To stop a Cold with "Preventics" is safer than to let it run and cure it afterwards. Taken at the "sneeze stage" Preventics will head off all colds and Grippe, and perhaps save you from Pneumonia or Bronchitis. Preventics are little toothsome candy cold cure tablets selling in 5 cent and 25 cent boxes. If you are chilly, if you begin to sneeze, try Preventics. They will surely check the cold, and please you. Sold by J. D. Tully.

RAILWAY TO HUDSON BAY IS DISCUSSED

Senator Ferguson Warmly Upholds Commercial Connection With Europe by Way of Churchill.

Ottawa, Feb. 8.—In moving in the Senate yesterday for papers regarding the navigation of Hudson Bay, and establishing a line of steamers between Canada and Europe He thought that the proposals for railways to that bay, Senator Ferguson discussed the question of establishing a commercial connection between Canada and Europe by way of Hudson Bay.

He said the resources of the Hudson Bay and communication to Europe via Hudson Straits had frequently been discussed in the Senate from 1878 to 1904 In these discussions the route was discredited by interests affected by St. Lawrence navigation.

Churchill is situated 250 miles west of St. Louis and St. Paul. The distance to Liverpool is the same as from Montreal. Churchill communicates with the open sea as directly as Halifax.

Development in the Yukon and at Cobalt have given us a glimpse of the value of our hinterland. The territory surrounding the bay contains valuable minerals, the extent of which can only be ascertained when the country is supplied with means of communication Valuable timber grows along the rivers flowing into the bay, and water power exists almost everywhere on these rivers. The fisheries of the bay and inland waters of Ungava and Keewatin will, when developed, become one of the best resources of the Dominion.

Senator Ferguson quoted Markham Bell, Wakeham, Gordon and Low as practically agreeing on a four months' season of navigation of Hudson Straits. The entire absence of rock and shoals, made the route to Europe, via Hudson Bay, an ideal one in the summer months. Icebergs were not encountered except for about 100 miles west of the mouth of the straits. The length of the day during the season of navigation greatly facilitated navigation.

When James Bay is reached by rail the whole coast of the bay will be opened for public enterprise and will result in an enormous impulse to the enterprise of Toronto, Montreal, and other Canadian cities.

Another proposition was the extension of the Canadian Northern Railway from the Pass of the Saskatchewan to Churchill The concession of over a million of acres of land in Saskatchewan for the building of the last 60 miles of the road was a most improvident one. It was practically a subsidy of $100,000 per mile for a railway which will not cost more than a third of that amount. The further extension to Churchill, a distance of about 400 miles should now be proceeded with.

A railway to Churchill with ample elevator accommodation at that place will prove of more value in carrying out the grain and cattle of the Northwest than half a dozen National Transcontinental Railways and will not cost a tithe more of the amount of the obligations assumed by the Government for the Grand Trunk Pacific.

The harbor of Churchill, which is bound to become a national asset, should belong to a Western Province. On the ground of its being a Western Province as well as its present insufficient dimensions, Manitoba is entitled to the greater part, if not the whole, of Keewatin.

Senator Ferguson suggested that Ungava should be reserved and should be incorporated with Newfoundland when that Province entered Confederation, on the condition that the ancient colony abandoned its territorial claim to the Atlantic shores of Quebec.

Senator Power thought it would be well for Canada to pause before entering on so serious an undertaking as the construction of a line of attendance.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

William McMullen was charged yesterday morning with having been found drunk in a public place. William who drove here with a livery horse from Omemee, a week ago, admitted the soft impeachment, and admitted having had "a good time" on the $10 he brough with him As his coin had gone for booze ninsky he could not pay the $2 fine imposed, so went to Gaol in Neabitt for a term of ten days.

Robert Sanders, a boy of 14 years of age, was charged with having stolen, on Feb. 4th, a pair of rubbers, the property of Thos. Hickey. The boy pleaded not guilty. Elmer Galvin, another little boy went into the box and said he was at Hickey's store on Hunter street with Saunders. Saunders saw a pair of rubbers on a box in front of the store and said he was going to steal them. He advised Saunders not to take them. Saunders took them and put them under his overcoat.

Mr. Hickey, next witness, said he saw three or four boys in front of his shop, and recognized Shearer. When he took in the goods which had been displayed in front of the store, at night he missed some goods. Could not recognize Saunders.

Saunders in the box said that the other boy took the goods and handed them to him, and he carried them away and put them on.

Saunder's father in the box, said he had come here from Detroit. He could not get the boy to go to school.

The magistrate gave Saunders a heart to heart talk, and allowed him to go suspended sentence, ordering Truant Officer Geo. Cochrane to take the boy to school at once and have a weekly report made of his attendance.

Then the three boys, Saunders, Shearer, and Galvin were charged with having stolen a knife from Mrs. Jay who keeps a little store on Aylmer street.

Mrs. Jay testified to Galvin having come to her shop to offer to pay for the knife.

Miss Jay, daughter of the first witness said the three prisoners had been in the store pricing pocket knives. Whilst she turned to get some collar buttons, a knife was taken from the counter. She recognized the knife produced in court as her property. The boys offered to buy her ten cents each, when she missed the knife, but they did not put up the cash.

Another boy called as a witness said that Saunders had sold him the knife at the C.P.R. depot for 10cents, telling him he had brought it from Detroit. Little Galvin then gave evidence and swore that Saunders had slipped the knife into his pocket whilst in the store.

The magistrate allowed the boys all to go, but Mr. Cochrane, truant officer, will take them to school this morning and report weekly on their attendance.

WHITE & WHITE,

Wheeling, Investment Brokers West Virginia

Mrs. Harry Thaw Cried In Court

In the Witness Box She Testified to While Having Deceived Her.

New York, Feb 8.—Evelyn Thaw, the wife of the prisoner, was in the witness box yesterday. She testified that she had refused to marry Thaw when he proposed to her in Paris in 1903, because of an incident connected with her relations with Stanford White.

Mrs. Thaw said she met Stanford White at a luncheon in 1901. She thought him "very big and ugly." The party to which she was taken was "in a dingy Twenty-fourth Street house." The luncheon was in a private apartment sumptuously fitted up. "I was told in advance I was going to luncheon with some society people, and had hoped it was the Waldorf, as I wanted to see that hotel," she said.

The witness told of an experience with White in a house rented by him She became unconscious after taking some champagne, and awoke to find White had taken advantage of her She sat up all night after he had taken her home.

Mrs. Thaw broke down and cried, and could hardly proceed as she related her experience with White. Then sat with his face buried in a handkerchief.

"Mr. Thaw, said Mr. Thaw, when she told him, "Got down on his knees, picked up the edge of my dress and kissed it."

White made Mrs. Thaw promise she must never tell her mother. He said it was all right—that there was nothing so nice as young girls and nothing so loathsome as fat ones. You must never get fat." The effect of her story on Thaw was terrible. He sobbed and walked the floor, stayed up all night sitting in the room and to fling it over.

Mrs. Thaw said she told Thaw the second time he proposed she could not marry him, for Whites would always know, and would laugh at him and talk.

Committees of the 57th Regiment

The annual meeting of the 57th Regiment, which was held beyond the intrusion of the press representatives, resulted in the following committees being nominated, viz.;

Regimental — Major Stevenson, Chairman; Major Hayes and Captin Clegg.

Mess —Lt.-Col. Halliday, chairman; Major Hayes and Captain McLean.

Rifle — Captain Clegg, chairman; the officers commanding companies, and one man from each company.

Band—Captain Walker, chairman; Captain Clegg, and Captain McWilliams.

Trip — Captain Mills, chairman, Captain Bennett and Mr. F. A. Clarke.

Nominating—Lt.-Col. Miller, chairman, Captain Davidson, Captain Walker, Captain Bennett and Captain Claxton.

Auditors—Captain McLean and Mr. Kelly.

Will Join Canadian Union

Hamilton, February 7.—About 75 members of the Street Railway Company's Employees' International union have severed their connection with the local branch of that organization and have applied to the Canadian association for a charter. They intend to form a branch of the Canadian association here. They have been dissatisfied ever since the recent strike.

Selling Liquor After Hours

Brockville, February 7.—As the result of the recent visit to Brockville of Ontario Government detectives, several hotelkeepers will be summoned for selling liquor during prohibited hours. The presence of the detectives in town was not known, and the announcement of the prosecutions has caused consternation in the ranks.

Great Showman Dead

New York, Feb 8.—Elmer S. Dundy of the firm of Thompson and Dundy, died last night at the home of his mother in this city.

Mr. Dundy was born in Omaha, Neb., in 1862. When the Pan-American Exposition opened at Buffalo, Elmer Dundy joined partnership with Frederick Thompson in the show business. Success led to many other ventures, among the most noticeable being Luna Park at Coney Island, and the management of the Hippodrome at this point in this city.

Quake to Shake New England

Middletown, Conn., February 6—Horace Johnson, the Middle Haddam weather prophet, predicts that New England will experience a severe earthquake on St. Valentine's Day. He says that at that time a great attractive force will be brought to bear on the earth's central force. This will cause the earth to stretch and quake. There will be more than one shock, but the shocks will be of short duration, although severe when in action, according to the Middle Haddam prophet. Southern New England will probably be the part most affected, he says, and the quake will extend into New York and New Jersey.

Brockville Has Power Proposition

Brockville, February 7.—The Hannawa Falls Power Company, of New York State, want Prescott and Brockville to combine on power supply scheme, and they will then make a proposition to deliver power on this side of the border.

Good Entertainment In North Monaghan

Riverdale Sunday school, North Monaghan, was the scene on Wednesday night of an enjoyable entertainment given in aid of Mr. Walter Huntingford, a well-known member of the above institution, on his departure for the West. This well-known chapel was filled to its utmost capacity by a most orderly crowd of North Monaghan veterans. Among those present were, Mr. Alfred Saunders, chairman, his wife and daughter Miss Gertrude, the latter delivering a recitation which called for much applause, a beautiful solo was rendered by Mr James Anderson and his sister, Mrs. George, whom Mr. Saunders referred to as Miss Anderson, forgetting that she was now married; caused much merriment Mr. and Mrs. Stephen Payne were noticeable amongst the gathering, as also were Mr. Ernest Saunders, Mr. Thomas Stoner, Mr. Harry Rinde and Mr. Fred Newtnall, and many other distinguished persons, assembled to pay a farewell tribute to their young and esteemed friend about to leave the good old township to seek his fortune in the far West. The good order and feeling is to be attributed to Chairman Saunders, who at the opening of the concert, eloquently addressed the congregation, thus ensuring perfect order throughout, what afterwards developed into a most enjoyable social evening.

At the breaking up of the proceedings, heaps of good wishes were showered on Mr. Huntingford for his welfare in the glorious West.

British Warships Will Visit Canada

Montreal, February 7.—Rear-Admiral George Neville, who will command the first cruiser squadron of the British navy to visit Canada, next summer, is no stranger to Canadian waters, having been attached as a midshipman to H. M. S. Canada when she was stationed at Halifax as part of the North Atlantic squadron many years ago. He joined the navy at the age of thirteen in 1863, starting as a midshipman on H. M. S. Britannia. He advanced rapidly in the service, becoming a commander in 1886 and a captain in 1897. He was twice around the world with the late Duke of Edinburgh, once in in the Galatea and once in the Comus. He served under the duke in a number of warships. He was created C. V. O. in 1905, and is an officer of the Legion of Honor.

Mr. Matthew Taylor Has Passed Away

Mr. Robert Fair yesterday received the sad news of the death of Mr. Matthew Taylor, of Schenectady, N.Y. who was formerly yardmaster of Schenectady and at one time superintendent of the American Locomotive Works in that city. He was a citizen highly esteemed and had many friends in Peterborough. In company with his daughter he spent several weeks each summer fishing at Buckhorn and other points. Visitors to these resorts next year will miss the genial countenance of Mr. Taylor.

—The Junior Chapter of St. Andrew's Brotherhood will hold their annual supper and entertainment in St. John's school house this evening. The entertainment will start at eight o'clock, silver collection will be taken at the door.

A Pretty Wedding In St. Peter's

A pretty wedding was solemnized in St. Peter's Cathedral yesterday morning, when Miss Frances Owens, daughter of Mr. John Owens, of this city, became the bride of Mr. John T. Carter, also of Peterborough. The ceremony was performed by Rev. Father Galvin in the presence of a number of friends. The bride was attended by her sister, Miss Catharine Owens, while Mr. Michael Hennessy supported the groom.

The wedding breakfast was served at the home of the bride's father, Sherbrooke street. Mr. and Mrs. Mrs. Carter left on a wedding trip to Montreal, Boston and other points east. They will reside in this city.

Mr. V. Eastwood Is Well Cared

A pleasing function was held in the Peterborough Hardware Company's premises, early on Wednesday evening when Mr. Vincent Eastwood, the former president, who will shortly assume the honored position of local manager of the Royal Bank of Canada, was called in and Mr. Manson Comstock, the new managing director, read an address, while Mr. Harry Morgan, the vice-president, on behalf of the staff, presented him with a handsome gold-headed cane, suitably engraved.

BIG BUILDING PROGRAM

Canadian Pacific Railway Will Extend its System in the West.

Saskatoon, Sask., February 7.—It is considered probable the C. P. R. will run their last trains to Edmonton via the Yorkton, Shesho and Saskatoon line rather than by the Kirkella or Pleasant Hills branch. The completion of these lines will put the C. P. R. right into the centre of the choicest lands of Western Canada. The C.P.R. will ask Parliament at the present session for permission to build a line from Saskatoon south-west seventy-five miles through the famous Goose Lake country to connect with their line from Lacombe, also for the right to build a line from Regina north to Lumsden and just west of Long Lake right into Saskatoon.

Lady Swettenham es Hospital Cook

London, February 7.—H. P. Copeland, of Kibblestone Hall, Staffordshire, whose eldest daughter, Mary Emilia, was married about two years ago to Sir Alexander Swettenham, Governor of Jamaica, has received letters from her. In one of them she writes;

"I was driving into Kingston when the earthquake took place with Lady Dudley, and the carriage was nearly upset. We drove on, and when we reached the city we found that Lord Dudley and Sir Alexander were uninjured. We helped many ladies who had been wounded.

"On returning home, my husband and I carried provisions to the hospital, and I sat up all night cooking them. It was an awful night to see the wounded and the injured—a hideous nightmare!"

Men Will Not Strike

Ottawa, February 7.—The paper makers at E. B. Eddy Company and J. R. Booth's mills say there is no possibility of trouble or a strike among them. The question, they say, of an eight-hour day was never brought up, nor was an increase of wages discussed.

Charlotte Street's Win the City Championship

Last night the weekly City League matches were played off, Charlotte treet defeating Auburn by 4—3, and Strathconas winning from High Lifes by 4—2. The first game was very fast, the boys from the deserted village making the pathway to their goal very rough. Tucker was largely to blame for the losing team's defeat, as he was almost continually keeping company with the timekeepers. He seemed to like cracking the Methodists whenever an opportunity was offered. The scoring on the Charlotte street side was credited to Dusty and Long, while the fair Auburns' work was mostly done by Donnel. The game was very wild in the second half, Auburn doing the rough work, but Charlotte street took their medicine without a word. Toward the finish Quinn did a Jim Jeffries' stunt, and knocked his opponent a nice hook under the chin, then for a minute or two the whole bunch got mixed up, and the fight was only brought to a close by the strenuous efforts of the referee George Lynch, and the game ended without any further trouble, no more goals being scored by either side. This makes Charlotte street the holders of the cup for another year. The line up was as follows;

Auburns		Charlotte street
Daroch	Goal.	Campbell
Shaw	Point.	Roddy
Crough	Cover-point.	Moore
Clegg	Rover.	Long
McDonnell	Centre.	Dusty
Hillier	Right Wing.	Quinn
Tucker	Left Wing.	Gross

The second game did not prove so exciting, the Strathconas having it very much their own way. Seymour was there with the goods and landed two goals in the second half. Myers of the High Lifes also starred in his long lifts and his close checking. Rose had a very interesting time, the Strathconas swept the rink with him and he was all in after the game. The scoring for the Strathconas was done by Seymour and McMilne, while the High Lifes all had a finger in any goal they sent home. One conspicuous thing about these two games, the first two teams all the game through had men decorating the fence, while in the last game only one man was sent off, and only for a minor offence.

The line-up for the last game was as follows;

Strathconas		High Lifes
Wilson	Goal.	Bowers
Maher	Point.	Ford
White	Cover-point.	Myers
Seymour	Centre.	Rose
McMilne	Rover.	Cameron
Westherston	Left Wing.	Ferguson
McGrath	Right Wing.	Downie

Mr. George Lynch referred both games most impartially.

WEST IS OPTIMISTIC ON FUEL SHORTAGE

Two Days of Sunshine and Famine Will be Forgotten---Worse in the North-western States.

Winnipeg, Feb. 8. —Give Western Canada two days of warmth and sunshine and the optimism which is usually bubbling over in Western hearts will sidetrack much of gloom and grumbling occasioned by exceptional severity of weather, accompanied as it has been, by car shortage and consequently fuel and even coal oil shortage in towns more remotely situated. There is little evidence to show that American newspapers are discriminating in news or making any effort to prejudice intending immigrants.

SUFFERING IN DAKOTA.

St. Paul newspapers, for instance, publish under black headings harrowing tales of suffering in Dakotas, and simply record the fact that Western Canada is suffering from fuel shortage. Mayor Ashdown, at the Board of Trade meeting yesterday, speaking of the car shortage, said it was not the present situation that was the cause of complaint. It was the culmination of a situation of years, and not of weeks. He believed the roads were doing everything possible now.

OUTSTANDING FEATURES

Western authorities, as Board of Trade and newspapers, are pointing out two things, first, the exact definite need of certain communities, caused by a combination of circumstances, such as the coal strike, the car shortage, caused by Western expansion, the delay of the dealers in laying in supplies of fuel last fall, and the blockade caused by the unusual snow; and next, they are urging that these definite needs, due to explainable and unusual causes, be not magnified into mountains and considered as the normal state of affairs in the West. It is pointed out, too, that in some cases fuel was available, but that owing to the stoves or furnaces being adapted to other kinds of fuel, it could not be used. For instance in Manitoba a good deal of wood is burned, and in some cases where schools were closed coal was obtainable, but could not be used because the school furnaces were fitted to burn wood. In some cases, too, electric plants were reported shut down, they were supplying civic and domestic lighting, but were not supplying power for factories, printing offices, etc., in order to save fuel. With a spell of normal weather to allow the railways to open up their branch lines and get trains moving freely again, the difficulty will be over.

MUSIC AND THE DRAMA

THE WAR CORRESPONDENT

Last night the Grand Opera house was crowded to the doors, with an enthusiastic audience who thoroughly enjoyed the War Correspondent. This is well described as a "musical play," every act being characterized by catchy and melodious snatches of musical effort. The scenes which are typically Russian, are backed by special and appropriate scenery. Mr. Vincent McCarthy, with his easily judged Hiberrian nomenclayture is a cosmopolitan as much as could be desired in the part of a war correspondent. Mr. Justin Cooper as Prince Alexis Nashtamoff in the Russian imperial service, portrayed his character as though to the manner born. Miss Mabel Addington as Mamie Doyle demonstrated that her dramatic powers and vocalism were of a high character.

Taken as a whole the company last night were far above the average that has appeared on before the Peterborough footlights. The success of last night's performance, as viewed both from behind and in front of the footlights should convince the Peterborough public that under the management of Messrs. S. J. Turner & Sons, the Grand Opera house will in future only entertain and exhibit the best of high-class shows that travel through this part of Ontario.

Boy Injured in Victoria Park

Yesterday afternoon one of the many children who make a practice and pleasure of sleigh-riding and tobogganing down the hill in Victoria Park, was seriously injured. As is known to the residents of Water St., hundreds of children daily, through the winter months, take advantage of the declivity in the park, sliding down on any old thing from the lid of a sloppan to a $5 toboggan or bobsleigh.

Yesterday afternoon a young son of Mr O'Brien, the school inspector, was sleighing down the hill His sleigh slewed somewhat and the boy was thrown against a tree, sustaining a severe blow on the head. The boy was at once taken to Dr. McKinnon's surgery, 453 Water street, where the doctor examined his wounds. Dr. McKinnon found that young O'Brien has had a slight concussion of the brain, and ordered him home at once.

SPORTING TOPICS

HOCKEY.

Kingston and Midland will play at the Mutual street rink on Feb. 18th, instead of at Peterborough as per schedule.

• • • • •

Hall and Ross, who accompanied the Kenora Thistles to Montreal, are back with their own team, Brandon, Man. Kenora play their next game at home with Winnipeg Strathconas at Kenora, when Whitcroft will get his first chance to show just how good he is. However, when he goes to Brandon, the test will be a much better one. When he goes up against a few players like Hall he will have plenty to chance to develop his nerve.

• • • • •

Peterborough goes to Midland next Tuesday night, Kingston plays the Argos in Toronto on Wednesday night, Marlboros come here on Friday night.

• • • • •

CURLING.

Four rinks of Peterborough curlers played at Bobcaygeon yesterday. Three rinks went to Cayuga by train yesterday morning, and the remainder started at noon to drive over. They were a representative bunch whose only fear was that a cork might be drawn and had a good time in the rock-bound burg, where good feed, spring from every rock, like sap in the fishing season from every eddy of the river.

• • • • •

Swettenham's Friends Sprang a Surprise-

Kingston, Jamaica, Feb. 7. — At a meeting of the city council held yesterday, at which the attendance was small, Philip Stern, the representative of Kingston in the legislative council, proposed a motion expressing unabated confidence in Governor Swettenham. After a short debate the motion was carried by four votes to two.

The passage of this motion has created much indignation in Kingston, and notice already has been given that it will be rescinded.

Do You Seek Health ?

Consult Dr. Hamilton And You Will Be Shown the Way.

Thousands are in the same boat—all sickly, bilious... and feeling far from well.

Trouble is, the system is clogged with impurities which need to be cleared away.

Before downright sickness arrives you should cleanse and purify the system with Dr. Hamilton's Pills.

At once you feel their mighty influence building up weak spots, clearing out disease, and putting you again on your feet.

These purely vegetable pills change your tired, worn-out condition to one of health and vigor, because they supply the body with nourishing blood that builds up and enlivens the entire system.

Mr. John Whitley, of Stanwood, P. O., Ont., knows the merit of Dr. Hamilton's Pills, and says: "I wouldn't be alive today had it not been for Dr. Hamilton's Pills. Last winter I was sick with grippe, and when spring came I was weak, bilious and rheumatic. I used enough medicine to cure twenty times, but I didn't get any help till I tried Dr. Hamilton's Pills. They purified my blood, took the yellow color out of my face, put new tone in my my stomach, and increased my appetite. The bilious attacks and rheumatic pains gradually departed, and Dr. Hamilton's Pills made a new man of me. I proved their merit, and proclaim them a medicine for all men."

If better health and prompt recovery are important, get Dr. Hamilton's Pills of Mandrake and Butternut today. At all dealers, 25c. per box, or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

THE LESSON IN A CRIME

The Thaw case as presented in the newspapers from day to day during the great trial is bound to prove nauseating to some natures.

Many good people will bitterly deplore the broadcast publication of such wickedness, and think it a wanton catering on the part of the mercenary press to the most depraved tastes of the public.

Many parents must abhor the idea of all the details in this shocking tragedy and in these lives of iniquity being flaunted before their innocent boys and girls.

But such is human life, mind you.

Yes; human life has its black shadows of sins and sorrows which are just as real and just as potential as are the high lights of virtue and of joys.

We can't dissipate darkness simply by shutting our eyes to it.

We can't—either as individuals or as humanity in the mass—drive blemishes from the face of any such easy subterfuge as making a mirror that lies.

We can't help the unfortunate and the infamous from the quicksand by serenely contemplating the immaculate blue sky.

We may thus fool ourselves; we may thus snuggle down amid comfortable delusions that we and the rest of the world are good and true and happy, and that jealousy, malice, murder are not of our sphere.

But we only shut our eyes against truth and tie our hands against duty. The vice we would ignore nevertheless exists, and its deadly infection can invade our homes and contaminate our loved ones all the more easily because of ignorance.

Harry Thaw himself was zealously nurtured and shielded by as loving and pure a mother as ever lived.

Murder makes unpleasant reading. But it is necessary reading to every man and woman who would know life, not falsely idealised, but as it actually is.

The newspaper that would not publicly expose crime, proclaim its manifold punishments and impress upon the popular mind as deeply as possible warnings against it, would be faithless to its high duty, and would merit its swift loss of public respect and confidence.

There is much benefit to be gained from the story of this great crime by all wise enough to see in it one of the pregnant lessons of real life.

The parable of the Prodigal Son has influenced more people than the Sermon on the Mount.

Weak Kidneys

Weak Kidneys, surely point to weak Kidney Nerves. The Kidneys, like the Heart, and the Stomach, find their weakness, not in the organ itself, but in the nerves that control and guide and strengthen them. Dr. Shoop's Restorative is a medicine specifically prepared to reach these controlling nerves. To doctor the Kidneys alone, is futile. It is a waste of time, and of money as well.

If your back aches or is weak, if the urine scalds, or is dark and strong, if you have symptoms of Brights or other distressing or dangerous kidney distress, try Dr. Shoop's Restorative a month—Tablets or Liquid—and see what it can and will do for you. Druggist recommend and sell

Dr. Shoop's Restorative

R. D. TULLY.

Robbin to Make Cabinet Changes

Winnipeg, Feb. 8.—Important changes in the personnel of the Manitoba Cabinet will be announced during the next few days. It is understood that Hon. Colin H. Campbell, the Attorney-General, will retire, and his place be taken by J. H. Agnew, now Provincial Treasurer. The vacant Treasurership will go to Hugh Armstrong, who will contest Portage la Prairie in the coming elections, running against Edward Brown, leader of the Manitoba Liberal party. Portage la Prairie not being a political town in any way, the election there will go to the most popular candidate, politics making no difference.

For weeks past the leaders of the Conservative party have been contemplating a change, and it is learned authoritatively that the decision, only just been arrived at, is as above. Hon. Colin H. Campbell will retire from politics and devote his whole time to legal practice. The move will be most popular with both parties as Campbell has not gained in popularity during his last term in office in fact, Conservatives as well as Liberals will be glad to see another man in his place.

By this move it is hoped to add to the popularity of the Government in the country, as by it they will give another portfolio to rural districts.

There is a report current here to the effect that Hon. D. H. McFadden, Provincial Secretary, will also retire, but this he strenuously denies.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

The Kaiser Is the Conquering Hero

Berlin, Feb. 7.—Emperor William today is described as being in great good humor over the result of yesterday's re-balloting in the Reichstag elections which emphasized the Government victory of January 25th.

His Majesty had never witnessed such spontaneous enthusiasm for himself as he did last night, when a procession was formed, 40,000 or 50,000 strong, and marched through the streets to the palace, singing "The Watch on the Rhine" and other patriotic songs, nor had he felt such unity of purpose between himself and the people. The Emperor was returning to the palace shortly before midnight, after hearing a lecture on turbine engines, when he first met the enormous crowds heading towards the palace. His Majesty's automobile was surrounded, and he was scarcely able to advance. The people followed the Emperor to the palace, where thousands were massed in the Luetgarten, fronting the castle. In perfect order the people waited for the Emperor to address them from the balcony, which he did, his remarks being received with prolonged applause.

The Government now counts upon 187 to 210 members of the Reichstag to support the colonial policy upon which the House was dissolved. The present position of the parties is as follows: Center, 105; Conservatives, 60; Agrarian and Anti-semitic group, 29; National Liberals, 55; Radical, 46; Socialists, 43; Poles, 20; Alsatic-Lorrainers, 7; Independents, 10; Guelph party, 1; Danish party, 1. The defeat of the Socialists in the Kingdom of Saxony, where they lost 13 seats has caused much surprise.

Boy's Eye Torn Out.

Kingston, Feb. 7.—A very distressing accident occurred at Piccadilla, a hamlet in the rear of Frontenac, when a young son of John Salisbury had his eye torn out. The lad was in the general hospital here. He was sliding down a hill On one of his trips the sleigh became unmanageable, and ran into a thorny bush, with the result that his eye was torn out by one of the stout branches.

Struck the Kaiser.

Berlin, Feb. 8.—While the Kaiser was automobiling in Unter der Linden yesterday morning, he was struck full in the face with a snowball. The culprit, a boy, stood aghast when he saw his missile, which he intended for another boy, burst on his Majesty's face. The Kaiser brushed off the snow, laughed goodhumoredly, and playfully shook a menacing finger at the boy, who, recovering from his momentary terror, fled hotfoot.

The REFUGEES

By A. CONAN DOYLE,
Author of "The Return of Sherlock Holmes"

Copyright, 1893, by Harper & Brothers

The man was evidently desperately wounded. It was strange indeed that he could still sit there and flick his whip with so terrible an injury. In the back of his great red coat, just under the left shoulder blade, was a gash in the cloth where some weapon had passed, and all round was a wide patch of dark scarlet which told its own tale. Nor was this all. As he raised his whip the moonlight shone upon his hand, and De Catinat saw, with a shudder, that it also was splashed and clogged with blood. The guardsman craned his neck to catch a glimpse of the man's face, but his broad brimmed hat was drawn low, and the high collar of his driving coat was raised, so that his features were in the shadow.

And now they had come to a spot where the main road ran onward, but a smaller side track wound away down the steep slope of a hill, and so in the direction of the Seine. The advance guard had kept to the main road and the two horsemen on either side were trotting in the same direction when, to De Catinat's amazement, the carriage suddenly swerved to one side and in an instant plunged down the steep incline, the two stout horses galloping at their topmost speed, the coachman standing up and lashing furiously at them and the clumsy old vehicle bounding along in a way which threw him backward and forward from one seat to the other. Behind him he could hear a shout of consternation from the escort and then the rush of galloping hoofs. Fast as the coach went, its pursuers went faster still. The rattle of their hoofs was at the very back, and suddenly at one of the windows there came into view the red, distended nostrils of a horse. Slowly it drew forward, the muzzle, the eye, the ears, the mane, coming into sight as the rider still gained, and then above them the fierce face of Despard and the gleam of a brass pistol.

"At the horse, Despard; at the horse!" cried an authoritative voice from behind.

The pistol flashed, and the coach lurched over as one of the horses gave a convulsive spring. But the driver still shrieked and lashed with his whip, while the carriage bounded onward.

But now the road turned a sudden curve, and there, right in front of

"At the horse, Despard; at the horse!"

them, not a hundred paces away, was the Seine, running cold and still in the moonshine. The bank on either side of the highway ran straight down without any break to the water's edge. There was no sign of a bridge, and a black shadow in the center of the stream showed where the ferryboat was returning after conveying some belated travelers across. The driver never hesitated, but, gathering up the reins, he urged the frightened creatures into the river. They hesitated, however, when they first felt the cold water about their hocks, and even as they did so one of them, with a low moan, fell over upon ... pard's bullet had found its mark. Like a flash the coachman hurled himself from the box and plunged into the stream, but the pursuing horsemen were all round him before this, and half a dozen hands had seized him ere he could reach deep water and had dragged him to the bank. His broad hat had been struck off in the struggle, and De Catinat saw his face in the moonshine. Great heavens! It was Amos Green.

CHAPTER XII.

THE desperadoes were as much astonished as was De Catinat when they found that they had recaptured in this extraordinary manner the messenger whom they had given up for lost.

"A thousand thunders!" cried one. "And this is the man whom that devil's brat Latour would make out to be dead!"

"And how came he here?"

"And where is Etienne Arnaud?"

"He has stabbed Etienne, and taken his coat and hat."

"What! While we were all within stone's cast?"

"Aye, there is no other way out of it."

"By my soul," cried old Despard, "I had never much love for old Etienne, but I have emptied a cup of wine with him before now, and I shall see that he has justice. Let us cast these reins round the fellow's neck and hang him upon this tree."

Several pairs of hands were already unbuckling the harness of the dead

This Company owns FIVE MINING CLAIMS containing 160 ACRES, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 3 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 9-foot level, show 133 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 640 ACRES, divided into 4,000 lots, beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. conversion of Coleman. Lease has been granted.

The claim is a 20 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 80 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $160,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows: 5 inch nicolite, 18 inch smaltite together with cobaltite. Assays gave 672-1243-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50 c); par value One Dollar ($1.00). The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 200 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 1 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 90 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune-making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 3½ to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 90 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and zinc in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Sunburst, The Indiana, just to the west, is showing up remarkably rich lead and zinc in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases—all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

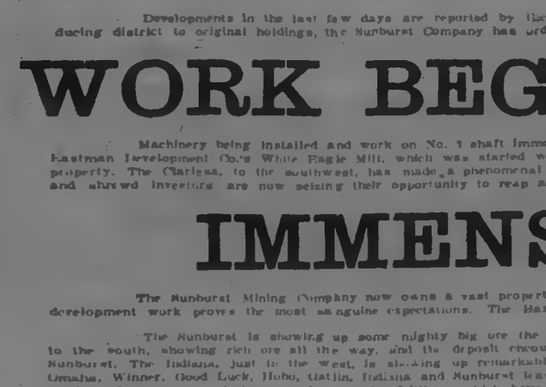
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magarrell, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 135 feet from our property and is in the same ore bed. Shaft No. 2 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.



SHAFT NO. THREE

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize his opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $40.00 now and remitting only $5.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $40.00 worth, although your first payment is but $5.00.

You really invest $5.00 and get all the benefit of an investment of $40.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

MAP OF DISTRICT SHOWING SUNBURST MINE.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 8 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 1 at 57 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places, it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No. 1 shaft, 6 1-2 by 8 feet, is down 83 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 300 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 by 9 1-2 by 80 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 70 feet, then west 60 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 5 1-2 by 9 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 15 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscenia Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	45 per cent.	Mocking Bird Mining Co.	64 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	90 per cent.
Conqueror Lead and Zinc Co.	50 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	90 per cent.	Dinger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Lead Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.00 down, $1.00 a month for 9 months.
$32.00 buys 400 shares of stock; $2.20 down, $2.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $51.42 per ton for lead and $38.41 for zinc to $52.00 for lead and $46.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 50 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 997,169.00
A. W. Taylor	180	180,758.00
J. W. Aylor	40	576,571.00
The Bunger Mining Co.	80	195,579.00
Center Creek Mining Co. (production to date)	200	6,967,196.00
Mrs. E. J. Chinn	120	223,799.00
Majestic Consolidated Zinc & Lead Co.	53	254,480.00
Continental Zinc Co. (production to date)	200	1,573,593.00
Consolidated Troup Mining Co.	40	191,618.00
Daughtery-Davy-McMillian Estate	60	456,008.00
The Empire Zinc Co.	171	120,819.00
Fox Helrs	20	120,124.00
Granby Mining & Smelting Co., 1906	...	1,204,521.00
Granby Mining & Smelting Co., 1904	...	1,035,656.00
John G. Quinn	640	23,547.00
Pittsburg-Joplin Lead & Zinc Co.	10	95,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	418,294.00
United Zinc Co.	126	290,576.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have nine shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 250 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 90 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

INFORMATION COUPON

Clip and Mail To-Day.

Tired, Off Color, Lacking in Strength

You feel real seedy.
No snap, ambition or spirit.
You've noticed your color is miserable.
Noticed that your blood is thin, that you feel the cold, that trifles bother and worry you.
You ought to be vigorous and ruddy—you eat enough, sleep fairly well—but still that listless feeling hangs right on.
To overcome this condition all the vital functions must be stimulated.
You accomplish this by taking Ferrozone.
How it makes the appetite jump.
There follows as a natural consequence an abundant supply of rich, red blood.
Vitality and strength you'll soon find throbbing within you, because your food is digested so thoroughly that it's readily assimilated.
You soon notice that your color is coming back, and endurance too, and soon the joy of life, health, vigor, strength—and with these come the oldtime zest for everything that makes life worth living.
Ferrozone is a marvelous body-builder, blood-former and strength-giver.
Ferrozone, by supplying the aid the body needs to build up, gives the recuperative power that will enable you to do your work easily, and to maintain strength.
Try it for a month.
See if you don't find it just the thing you need to make you strong. No a man, woman or child who needs more strength, better nerves and surer health who won't find it in Ferrozone. This nourishing tonic makes you feel like new—brings back the feeling of spirit and ambition you had years ago. Try Ferrozone, sold everywhere in 50c. boxes.

Good Conjoint Meet of Chapters

Addresses were given by Rev. Canon Davidson, Rev. A. E. Langfeldt, Mr. J. Bell, Mr. Bennett and others, before a well attended meeting of the St. John's, St. Luke's and All Saints' Chapters, held in St. John's Guild room. Director R. J. Devey presided.

The February Rod and Gun

King Winter, and the many delights he brings in his train, form the most prominent feature of the February issue of ROD AND GUN AND MOTOR SPORTS IN CANADA, the representative Canadian sportsmen's magazine published by W. J. Taylor, at Woodstock, Ont. Montrealers delight in winter, and celebrate his advant and continued presence with games that make the Canadian commercial capital famous all over the world. How enthusiastically these are carried on is well described by Mr. F. W. Lee. A snowshoe tramp in the country is a delight in itself, and this vigorous pastime, and its accompanying sights, are pleasantly told about by Miss Merrill. Miss Lang describes a similar tramp which was taken by a party to a lumber camp on one of the first benches of the Selkirks, and here both visitors and visited entertained each other with bear stories. Hake fishing through the ice is a fine descriptive paper of an exhilarating pastime as practised in New Brunswick. Beagles in Nova Scotia, Big Game in British Columbia, Duck and Chicken Shooting in Saskatchewan, Ontario's Commercial Fisheries, and other papers, in addition to the departments, show what a wide range of subjects is dealt with in this number, and how completely the magazine fills its mission in exploiting Canada and Canada's sporting attractions to the benefit alike of native and visiting sportsmen. No part of Canada, and no phase of out-door life is neglected, and though the field is so vast the attempts made to fill it are so excellent, that the magazine deserves the high place it has achieved and so worthily fills.

The New Term
—AT THE—
PETERBOROUGH BUSINESS COLLEGE
Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.
You cannot make a better investment.
For particulars, address
W. PRINGLE
Opposite Post Office, Principal.

LOCAL INCIDENTS

By The Times Man on the Street

—A meeting of the St. Andrew's church board of managers was held yesterday evening.

—The annual concert was held in St. Peter's school yesterday evening, before a large audience.

—Mr. J. G. M. Wilson occupied the chair at the Young Conservative Club rooms yesterday evening. Mr. Dumble gave a splendid address.

—The Arrow Basketball team leave this afternoon for Belleville, where they will play a game with Albert College tonight.

—The members of the choir of St. Paul's church were entertained yesterday evening by Mrs. Robt. Hall, Homewood avenue.

—The 57th Regimental band was at the Jackson Park rink yesterday evening. The ice was in good condition and there was a large attendance.

—The non-commissioned officers of the 57th Regiment will hold their annual dance in the Foresters' Hall, Simcoe street, Friday evening.

—The annual meeting of the officers and teachers of George street Methodist church Sunday school will be held this evening at eight o'clock.

—St. John's church young people's association met yesterday evening to elect a new president. Mr. C. H. Reid having resigned that position owing to his leaving the city.

—An adjourned meeting of the Quarterly official Board of Charlotte street church, and not George street as stated, will be held next Tuesday night.

—Last night's game of the city league hockey teams was a corker. Dusty the Charlotte street club star did good work such as should entitle him to a prominent place on the superlative O.H.A. bunch.

—The hockey club will be the guests of the management of "Zephra," and Messrs. Turner, at the opera house this evening. The boys will occupy the boxes, which will be decorated with the club colors, blue and white.

—Mr. J. H. Larmonth, manager of the Peterborough Light and Power Co., had completed the statement of the electric light and gas business, and has forwarded it to Mr. Stuart in Chicago. As soon as it is sent back it will be taken up by the committee.

—A special meeting of the City Council will be held on Monday night for the purpose of allowing Alderman Morgan to take his seat, and to appoint him to two of the standing committees to succeed sanitary inspector Bull who resigned to accept his new position.

—Yesterday the Rapid Tool Company, one of Peterborough's leading new factories, shipped away their first large shipment of their new bits. These double-pointed bits have already been described in The Times, so do not require further description.

—Brantford's mayor has been committed for trial at the spring assizes in the matter of a libel suit brought by a Mr. Montgomery of that city. The mayor has been granted bail. The case arose out of statements alleged to have been made during the recent municipal elections.

Mr. Mitchell in Liquors Exclusively

Mr. F. J. R. Mitchell, Hunter St., one of the oldest grocers in the city, has decided to go out of the conjoint business. He will devote his time and attention exclusively to the liquor trade. Mr. Mitchell will, as soon as his grocery stock is disposed of, confine himself exclusively to liquors.

Mark Street Church Notes

At a meeting of the board of management of Mark street church, Rev. J. G. Lewis was reappointed to the Nicholls hospital board. Mr. McMeletyre was appointed representative on the charity board. Messrs. M. Carton, Jas. Tighe and Wm. Porter were appointed church society representatives.

Presbyterian Church for Buckhorn

The Presbyterians of this district will be pleased to learn that at a meeting held in Buckhorn, True Blue Lodge recently, with Rev. J. A. G. Stirling in the chair, and Mr. John Jones as secretary, it was decided to erect a Presbyterian church at Lakehurst, Buckhorn and Rockhurst. The many visitors who flock to Buckhorn during the summer months will gladly welcome this new means of grace.

East Durham Orange Officers

The Orangemen of East Durham have elected the following officers for the current year:
County Master, F. W. Reynolds, Bethany.
Deputy County Master, James Paul, Manvers.
Chaplain, Rev. R. D. Nelles.
Recording Secretary, George Fowler, Millbrook.
Financial Secretary, C. W. Richards, Millbrook.
Treasurer, Mr. Shaw, Millbrook.
D. of C., G. E. Mercer, Port Hope.
Lecturer, R. H. Holland, Port Hope.
1nd Lecturer, P. W. Reynolds, Millbrook.

Will solve the problem when a coffee-drinker is ailing
POSTUM
10 days
"There's a Reason"

SOCIAL AND PERSONAL

—Mr. J. H. Burnham is spending a few days in Toronto.

—Miss Estelle Ackerman is spending a few days in Millbrook.

—Mr. James Kendry has returned from a business trip to New York City.

—Adjutant Wiggins, of the Salvation Army, is laid up with a severe cold.

—Mr. George Allen of Drummond Station, was in the city yesterday on business.

—Mr. F. J. Doig of Drummond station, was a guest at the Queen's Hotel yesterday.

—Miss Jennie Meiklejohn, of Campbellford, is a guest of her cousin, Miss Lumsden, Bonwell avenue.

—Mrs. W. H. Meldrum and Miss Meldrum will not receive today, but will be at home Friday, February 16th, afternoon and evening.

—Miss Pearl Lundy of Peterborough, was the guest of her brother, Mr. Jas. Lundy, last week.—Hastings Star.

—Mrs. W. H Meldrum and Miss Meldrum will not receive today but will be at home on Friday afternoon and evening, Feb. 15th.

—Mr. Dave Kearns of Bethany, was in the city yesterday, shaking hands with his friends over the advent of a daughter.

—Mr. Joseph Ingram, of Manvers, yesterday arrived in the city, to become a resident. He will live on Pearl avenue.

—Mr. P. J. Creedon, superintendent of the Rapid Tool Co., left yesterday per G.T.R. for Columbus, O., on a business trip.

—Messrs. Chas. James and M. C. Tooley left yesterday for Bobcaygeon to curl against the veterans of that rock-bound burg.

—Mr. Raymond Kincaid, a well-known stock buyer of Manvers, was in the city yesterday, calling on Mr J. H. Gardiner, the local auctioneer.

—Mr. Wilford Eastland, leaves on Saturday, to accept a good position with a leading Detroit oil and paint wholesale house, to go on the road.

—The many friends of Miss Ferguson, corner of Simcoe and Stewart streets, will be pleased to learn that she is improving in health, and was able yesterday to get out of bed.

—Mr Harry Hannah of Manvers, was in the city yesterday, and received the congratulations of his friends here on the advent of an heir (a boy 11 pounds weight).

—Mrs. S. J. Sheridan, 72 Weller street, will not receive today, but will be at home the second and third Tuesdays for the remainder of the season.

—Mr. Chas. Sullivan of St. Catharines, who has been the guest of Mr. Charles Cavanagh at the Cavanagh House for a few weeks, returned to his home yesterday.

—Mr. F. H. Dobbin, a member of the executive of the Canadian Press Association, left yesterday morning for Toronto, to attend the gathering of the association.

County Deputation In Toronto Today

A deputation from the county council as foretold in a former issue of The Times will go to Toronto this morning to ask assistance from the Ontario Government in connection with the outbreak of small-pox there last year.

The deputation will consist of Reeve Hales, of Chandos; Reeve Booth, of Burleigh and Anstruther; Reeve Johnston, of Belmont and Methuen, Reeve Thompson, of Havelock, and E. A. Peck, county solicitor.

The visitors will first tackle the Provincial Board of Health.

The county council last year granted the northern townships $400 to help defray the liability incurred by the epidemic, but this is only a small portion of the total outlay.

The deputation will also interview Hon. Nelson Monteith, Minister of Agriculture, and point out to him the advisability and importance of having a Farmers' Institute formed for the northern part of the county.

Two Local Ladies Were In Danger

The Hastings Star referring to some of Peterborough's best known citizens, says;

"On Saturday afternoon, while a party composed of Miss Pearl Lundy, of Peterborough; Miss Blanche Clarry, Mr. J. Robinson, of Peterborough, and Mr. D. J. Lundy, of town, were driving behind a local livery team, a serious accident was averted by the skilful management of Mr. Lundy. The sleigh slewed on a icy road turning the rig completely over and throwing the occupants into the ditch. The horses ran away a short distance with Mr. Lundy hanging on to the reins, but were soon brought to a standstill, no damage being done more than breaking the whip.

Wedded at the Cavanagh House

On Wednesday evening a pretty but unostentatious wedding was consummated in the Cavanagh House, on Simcoe street, when Miss Minnie LaSelle of Arnprior, was united in marriage to Mr. Jas. Kellman, formerly of Tillsonburg, but now of the Bell Telephone Co. of this city. The ceremony was performed by Rev. J. G. Potter, in the presence of the friends of the contracting parties. The bride who was becomingly attired in a pretty travelling suit of grey with hat to match, was assisted by Miss Fay Coughlin. Mr. Stanley Russell of this city acted as best man.

Mr. and Mrs. Kellman will reside in the city.

"The Blood is The Life."

Science has never gone beyond the above simple statement of scripture. But it has illuminated that statement and given it a meaning ever broadening with the increasing breadth of knowledge. When the blood is "bad" or impure it is not alone the body which suffers through disease. The brain is also clouded, the mind and judgement are affected, and many an evil deed or impure thought can be directly traced to the impurity of the blood. Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery. It enriches and purifies the blood, thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rheum, hives and other manifestations of impure blood.

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the "Golden Medical Discovery" has performed the most marvelous cures. In cases of old sores, or open eating ulcers, it is well to apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood cleansing constitutional treatment. If your druggist don't happen to have the "All-Healing Salve" in stock, you can easily procure it by inclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the "Golden Medical Discovery."

You can't afford to accept any medicine of *unknown composition* as a substitute for "Golden Medical Discovery," which is a medicine OF KNOWN COMPOSITION, having a complete list of ingredients in plain English on its bottle-wrapper, the same being attested as correct under oath.
Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.

Mr. Dumble Spoke Last Night

Police Magistrate D. W. Dumble last night gave a most masterly address before a crowded audience in the Young Conservative Club. His address was well received and demonstrated that the speaker had made a thorough study of the life and principles advocated by England's great commoner, John Bright.

Bell Telephone Work Completed

It is currently reported that the Bell Telephone Company linemen, who have been making such vast improvements to the local system since early in the winter, will complete their work next week and will transfer the scene of their operations elsewhere. Since the work was commenced many improvements have been effected. The men engaged on the work have had to put up with considerable hardship owing to the steady cold weather.

The Beautiful Zephra a Huge Success

One of the Most Brilliant Operatic Spectacles Ever Produced in Peterborough---One Continuous Flow of Scenic Effects, Song, Dance and Evolutions---For Benefit of 57th Regt. Band.

The first presentation of the beautiful operatic spectacle "Zephra" last night reflects credit on all concerned. A good audience was present, and one continual demonstration of approval of the work of those taking part in the production prevailed throughout the entire performance. The scenic effects are simply superb, and rival anything of that nature ever before witnessed in Peterborough. The whole piece is staged with a precision and thoroughness that reflects the control of a master hand in Mr H. J. Booth, under whose direction the opera has been prepared and produced. The presentation is one continuous flow of pleasing surprises in brilliant spectacles of inanimate and animate beauty. The costumes are charmingly picturesque and harmonious in their many colorings, so as to present the best effects without that gaudiness which characterizes so many spectacular offerings.

The personel of Zephra is composed of about two hundred members, from little tots of six or seven years of age, up to man and womanhood, and the high degree of perfection to which they have been trained denotes considerable time and patience, and remarkable skill on the part of Mr. Booth. They are all local people, and show commendable care and interest in their work. The many and varied evolutions were irresistibly gone through and elicited much enthusiasm and continuous applause. For three good hours the audience was carried through an ever changing program of song, dance, drill and scenic transformation, with sufficient story to present a plot. Encores in abundance were called for, but the director would not permit of response owing to the length of the piece. The whole presentation is one that cannot offend, and must please the most fastidious taste. It is indeed a merry, sparkling and catchy musical spectacle, and that it was handled so successfully and acceptably by amateurs is truly marvelous. No one who can possibly attend should miss the opportunity of witnessing "Zephra."

CAST OF PROLOGUE.

Princess Neyera ..... Ruby Hart
Flora, a friend of Neyera ..... Muries Wallace
Fairy Queen ..... Mona O'Shea
Prince Juan ..... Douglas Layfield
Sir Solon ..... Max Bradburn
Sir Alexis ..... Karl Halpany
Boy Blue ..... Harold Hatcher

CAST OF CHARACTERS.

Zephra, Queen of Norseland ..... Nellie McCabe
Neyera, daughter of Decius ..... Bertha Parnell
Flora, friend of Neyera ..... Florence Butcher
Unis, Fairy Godmother to Neyera ..... Mona O'shea
Karama ..... Pearl Morgan
Miss Commodore ..... Ruth Dawson
Aultra, friend of Neyera ..... Nellie Graham
Nita ..... Jessie Spence
Cupid ..... Muriel Morin
Queen's Pages ....
King Decius, King of Norseland ..... Walter Wesley
Juno, Prince of Mythland ..... Vernon Morphet
Sir Alex, Minister of State ..... George Lynch
Sir Solon ..... W. Mellroy
Sir Thorar, a Knight ..... J. Watt
Olaf, attendant to Decius ..... Robert Heideman
Heridrix attendant to Decius ..... Robert Mein

Mona O'Shea was charmingly acceptable as the Fairy Queen, and sang her numbers in a clear sweet voice that was much appreciated.

Nellie McCabe sustained her role of Zephra with true queenly dignity, while Walter Wesley as King of Norseland deserves considerable credit for his conception of the impossible old tyrant of a monarch and father; his clear bass voice suited this song admirably.

Bertha Parnell, in her difficult role of Princess Neyera, was charmingly true to her character and she sang in splendid voice.

W. Mellroy, as Sir Solon, carried his part to perfection, and his solos were admirably rendered.

George Lynch's conception of Sir Alexis, minister of state, was splendid, he delivered his lines with the proper amount of feeling, and acted the part with that amount of self-importance and dignity the character calls for.

Florence Butcher, as Flora, friend of Neyera, was exceedingly acceptable, and true to her part. As also was Vernon Morphet in the character of Juno.

Jessie Spence was a favorite in her charming dancing number.

Nellie Graham, in song, with act companying evolutions and chorus, was irresistibly pleasing, as usual.

The Japanese Karama, a charming, grotesque dance, with solo by Pearl Morgan, and accompanying chorus, was perhaps the most catchy number on the program. Miss Morgan sang her song with rare grace and effect.

The dances were all splendidly rendered; they were pleasingly varied and novel in character, and very demonstratively received by the enthusiastic audience.

The drill of the White Hussars, some 24 young ladies in white uniforms, was very skilfully executed, and the evolutions were charmingly picturesque and perfect in detail. The grand finale which followed, presented a beautiful sight. Miss Ruth Dawson sang in good voice, in exceedingly sparkling march solo, followed by chorus and evolutions on a stage completely crowded with gaily costumed performers on whom descended in a perfect shower forty thousand yards of many colored serpentine confetti. This presented a truly brilliant spectacle.

The grand transformation finale was a marvel of beauty and ingenuity, and concluded an entertainment reflecting the highest measure of credit on both Mr Booth, the director, and all those taking part.

The remaining four productions should be most liberally patronized.

Sudden Death of Mr. Jas. Martyn

The Port Hope Guide says that:

Mr. James Martyn, of Peterborough, died very suddenly at the home of her father, Mr. Larmon Beebee, Mount Pleasant, Hope Township, Thursday morning. Mrs. Martyn went there a month ago, to visit with friends in Hope, and Port Hope, and two weeks ago, while on her way to Robert Martyn's at Welcome, she fell, spraining her ankle, and was at once taken back to Mr. James Martyn's. Her husband came down from Peterborough yesterday evening on the 4.20 train.

Mrs. Martyn retired at the usual hour Wednesday night, and was to all appearances, in the best of health. At six o'clock, Thursday morning she took a fainting spell, and her daughter Bella, who was sleeping with her at once called for aid. Everything possible was done but she never rallied, passing away in a few minutes. Death was due to heart failure.

Deceased was well known to many Port Hopers, and much sympathy is expressed for the husband and family in their sudden and irreparable loss.

A Hard Luck Family Discovered

Rockvale, Feb 8.—Sammie Fisher of this place walks in his sleep. Sunday night, while sleeping upstairs, he rose and began to walk. In the darkness he fell down the stair to a landing, severely injuring his shoulder and arm, then he rolled from the landing to the floor, and injured his hip.

In the morning his father, Thomas Fisher, while leaning telephone poles to Cedron, had his leg severely crushed between two poles and is confined to the house as a consequence.

Bad luck seems to follow the Fishers. A little over a year ago a brother of Thomas was killed on the track near Markdale; last Fall another brother was injured at the same crossing, and now comes these two accidents.

Albert Condon, of Douro, Better

Albert Condon, a young man from Douro, aged 17 years, who was on Thursday taken to the residence of his sister in the city, suffering from a broken jaw, nose and other injuries about the head, caused by a tree falling on him, as he was assisting his brother in felling a tree was reported last night as being somewhat improved although still very

Dr. C. A. Neide Has Gone

Dr. C. A. Neide passed away at Fort Henry, N.Y. on January 30th. Many old friends who attended the American Canoe Association meet at Junipor Island, Stony Lake, some years ago, will remember the deceased, who was a prominent figure in connection with the big gathering. They will learn of his death with deep regret.

Campbellford Cheese Board Officers

The annual meeting of the Campbellford cheese board, was well attended. The election of officers resulted as follows:

President—D. Robertson.
1st Vice-President—R. W. Rutherford.
2nd Vice-President—R. Grills.
Secretary-Treasurer—John Givan.
Auditors—H. F. Shey and J. A. Stewart.

Wireless Telegraph in Peterboro

Those in touch with the most recent modern electrical experiments and attainments will be interested to learn that there is on exhibition in Mr. F. R. J. MacPherson's store George St. a wireless telegraphic outfit, which belongs to Rev. Mr. Marsh, of Springville. The outfit was manufactured in Detroit. The instruments have not worked satisfactorily for a few days and Dr. Marsh had them repaired by Mr. C. P. Walker, electrician with Mr. MacPherson, who cleverly did the work required.

INS AND OUTS

Canadians who thought they had lost money on an oil well are now getting big dividends. Oil's well, that ends well.

* * * * *

The Examiner says that a dollar will go only half as far as it would some years ago. Still it makes up for that to some extent by going twice as fast.

* * * * *

Our little Hunter street contemporary prints an item about "true heroism," which in all very well in its way, but is a little off color. This g. f. j.'s conception of a real hero is a man who can look his wife straight in the eye and tell her the truth, the whole truth, and nothing but the truth.

* * * * *

A member of Caledonia team of Scotland jumped 6 feet 1 inch, a case, it appears, of Caledonia Springs.

* * * * *

A local physician remarked to The Times yesterday that people would be healthier if they ate less. Under the present schedule of prices, this g. f. j. might add that they would be much richer.

* * * * *

Another uprising is threatened in Cuba. The people down there have been working pretty steadily for a month or so, and naturally want a change.

* * * * *

A citizen of Uncle Sam's domains, who is staying in town, asked this great family journal what the national air of Canada is. This g. f. j. hereby informs our visitor that it is blamed cold. This is no joke, either.

* * * * *

It is surprising how many friends a man has until he needs one.

* * * * *

The man who is always right is always a nuisance.

* * * * *

It is called a "cold snap," but the use of the latter word is not plain unless it means that it is a snap for the coal barons.

* * * * *

And now once again Messrs. McKee and McGrath are yoked together as city assessors. Mr. McKee is not the kind of a man to be content to carry the books and let his partner do the assessing.

MILDER WEATHER BRINGS RELIEF

Fuel Situation in the West Had Reached Critical Stage.

CHANGE WAS OPPORTUNE

Praise and Blame for the Railways—Saskatchewan Situation.

Winnipeg, Feb 9.—Milder weather prevails throughout Western Canada today. It has come none too soon. From reports the situation in many towns is simply desperate. Mr. T. D. Robinson, of Winnipeg, one of the prominent fuel importers of the West, writes to the press complains West, writes to the press complaining bitterly about the service of the Canadian Northern, by stating at the same time that the Canadian Pacific has made great efforts to serve its territory. Since the Canadian Northern took over the Prince Albert branch of the C.P.R., the service has been a farce. People of the district assembled in meeting have appealed to the Government to take over the line.

THE FURTHER WEST.

Despatches from Regina state that citizens just returned from Winnipeg where they had been interviewing the Canadian Northern officials, said that these were doing their upmost to give a service on the line to Prince Albert, but that these officials who operated the road for the C.P.R. in 1904, said, the conditions now in regard to shape of the track, depth of snow and severity of the weather, were worse this year than in 1904. In the meantime the Government of Saskatchewan is through the Department of Agriculture, urging individual citizens to do their part as the railway and Government have done all possible. Citizens are in a circular letter asked where they live within twenty or twenty-five miles of wood to organize parties and to endeavor to break roads to get fuel. Fortunately, these efforts will now be rendered easier by the milder weather, which will also assist the railways immensely.

Splendid Year for Dominion Bank

This Bank Now Has an Authorized Capital Stock of $5,000,000.

The thirty-six annual shareholders' meeting of the Dominion Bank held in the head offices, Toronto, on Wednesday, January 30th, ult., is of special local interest, not only on account of the splendid general financial statement presented but because this bank has comparatively recently opened a branch in this city.

The results attained during the past year must be most encouraging to Mr. C. A. Bogert, the new general manager, who, after some eight years duties as manager of the Montreal branch, succeeded the late Mr. Theodore G. Brough in the former responsible position. Mr. Bogert has proven himself a worthy successor to Mr. Brough.

Owing to the phenominal expansion of the Dominion Bank's business, the directors submitted a proposition whereby the remaining $1,000,000 of authorized capital stock is to be issued; this make the total authorized capital stock $5,000,000.

During the year several new branches were opened, and where conditions made it expedient, desirable sites were purchased and offices erected. In Ontario new branches were opened at Chatham, Dresden, Peterborough, Tilbury, Windsor and two in Toronto; new branches were also opened at Calgary, Edmonton and Regina.

One important feature of the annual meeting was the increase suggested and adopted, of the number of directors from seven to nine members. The directorate elected were Messrs. A. W. Austin, W. R. Brock, R. J. Christie, T. Eaton, J. J. Foy, K.C., M.L.A., W. D. Matthews, E. R. Osler, and the two new members, Messrs. Jas. Carruthers, of Montreal, and A. M. Nanton of Winnipeg.

As is generally known the recently opened local branch of this bank is under management of Mr. John Crane, whose business ability and personal popularity, while local manager of the Ontario Bank, succeeded in making the Peterborough branch of this bank the largest and most successful of the Ontario Bank's agencies. With Mr. Crane as local manager, and in the splendid new quarters to be occupied in about two months' time at the corner of George and Simcoe streets, the local branch of the Dominion Bank is assured of a large share of this city's banking business.

Junior Brotherhood Holds a Banquet

Annual Banquet and Entertainment—Reading of Reports.

The Junior Brotherhood of St. John's church held their annual banquet and entertainment last night in the school house. The bill of fare was tastefully gotten up, and was enjoyed most heartily by those present.

After the banquet the boys went into the Sunday school where their parents and friends were waiting to hear the program, which proved to be a rare treat. Mr. Fair very ably presided, and the Halpanny orchestra furnished the music for the evening.

The program was as follows:

Orchestra selection—Mr. Mrs. and Frank Halpany.
Club swinging—Mathew Dryadale.
Recitation—Mathew Dryadale.
Comic song—Mr. Coleman.
Banjo solo—Wm. Dundas.
Song—Cyril Dewy.
Recitation—Jack Donnistoun.
Selection by the orchestra.
Recitation—Mr. Williams.
Recitation—Frank Halpany.

Speeches of encouragement to the boys were delivered during the evening by the chairman, Rev. Canon Davidson, Mr. Dewey and Joseph Bell. The boys certainly deserve great credit for the grand work they are doing, and by the speeches made last night the Senior Chapter will have to hurry to keep up with the Juniors. A vote of thanks was moved by Mr. Dewey for the kind help of the splendid talent and the boys then made for home after singing "God save the King."

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

A hot customer, whose name could not be ascertained last night, and who showed signs of a recent scrap, spent the night in the police cells.

A local citizen will face the Police magisterial orchestra of Justice of Lakefield next week, on a charge of abusive language laid by a resident of that village. It appears that the accused was at Lakefield a few days ago, and had a "session not of prayer," with a Lakefield man. The Peterborough man is alleged to have called the Lakefield resident "a kuak," and to have used several other epithets of a similar character. County Magistrate Gilmour will go to Lakefield the first of next week to dispose of the case.

Edward Herron, better known as "Teddy," was brought up before Judge Weller yesterday on a charge of highway robbery in the form of stealing $10 and a watch from the person of Mr. Wm. White, Smith's Falls, and was sentenced to one month in the county jail, with hard labor. Mr. Kerr, the counsel for the prisoner severely cross-examined the prosecutor, but his evidence varied little from that given in the police court. P. C. Newhall was also cross-examined but he testified as previously given in the court.

His Honor in passing sentence said that this offence was getting too common in Peterborough, and he was going to stop it. He remarked that he had intended to send the prisoner to the Central Prison, but owing to his mother he would change it to a month in the county jail with hard labor. While his Honor was reading sentence the prisoner wept bitterly and pleaded mainly for freedom.

"I have no sympathy for men of your class," remarked Judge Weller who come to a city, and make friends with strangers showing and lavishly spending their money; but you have the protection of the law all the same.

—Some of the local curlers who went to Bobcaygeon last night returned by last night. Surely the "haul of goods sold there must be as good as in the fishing in the summer time.

He Killed Governor and a Policeman

He Then Committed Suicide After Trying to Escape.

WAS A YOUNG MAN

He Also Wounded the Manager of a Theater.

Penza, Russia, Feb 9.—S. A. Alexandrowsky, Governor of Penza, was shot and instantly killed by a young man as he was leaving the theater last night. In attempting to escape, the assassin also killed the assistant chief of police and a policeman, and wounded the manager of the theater. The terrorist then shot himself and died in a hospital.

The assassin was not identified. But bullets which he used subsequently were discovered to be weaponed.

M. Alexandrowsky was well known as chief commissioner of the Red Cross in the field during the war between Russia and Japan.

ATTEMPTED TO ESCAPE.

After killing the Governor and assistant chief of police, the assassin seeing that it was impossible to get through the crowds outside the building, rushed into the theater, firing wildly. The manager attempted to grapple with the murderer, who fired at him, but missed, and killed a policeman who was in the line of fire.

In a second attempt to capture the assassin the manager was severely wounded. The terrorist fled through what he evidently believed to be one of the exits, but found himself in the ladies' cloak room. An attendant, realizing the situation, pointed to the stairs as a means of egress, and no sooner as the assassin disappeared the attendant locked the door behind him. The stairs, however, only led to a loft, and was murder subsequently was found there unconscious from a bullet wound from

The Lake George Mining Co.

The directors of the Lake George Mining Company will appeal to the investor as one of the most conservative of the Cobalt ventures. The capital stock has been placed at $600,000, which is only $600 an acre on the eighty acres included in the two claims held by the company. This will compare favorably with almost any other incorporation in the Cobalt field, and only half of the stock, or $300,000 is being issued. The claims held by the Lake George Company, which is named from a small lake on the northern claim, lie one to the north and the other to south of Cesar Lake. It will be remembered that Co. Gordon, the noted engineer, located a promising vein of native silver of the bottom of this lake last year, and as the vein runs north and south in the direction of the two claims, this and the presence of other indications have dictated the resolve to develop the property as speedily as possible. It is confidentially expected that the deeper levels will justify all the expectations aroused by the surface. Alongside the properties are the Hudson Bay mines, paying 9000 per cent, and the Cleveland-Cobalt property will esteemed by experts. The big veins of silver Queen also run west towards the southern claim.

The stock now placed on the market is offered at par, and certainly presents a very favorable opportunity to the investor on the showing made. The charter of the company will be issued from the government offices today. The Provincial Securities Company, Limited, Traders' Bank Building, are the transfer agents.

Another Gilmour Hotel Action

Ottawa, February 7.—William Campbell, the contractor who was injured by the falling of the wall of the burned Gilmour Hotel, instituted an action for $5,000 damages before Judge MacMahon.

The Latest Local Wearer of the Ermine

Barrister John Green is Judge at a Mock Trial.

The many friends in this city of Mr. John Green, one of Peterborough's oldest members of the bar, will congratulate this gentleman on his promotion, if only in the meantime temporarily, to the bench. Mr. Green with his proverbial impartiality and generally conceded knowledge of the law, will undoubtedly make a notable acquisition to the higher local judiciary in the mock trial for Tuesday next in All Saints' church.

The first notice which will come before his Honor will be a breach of promise suit, Mackenzie vs. Johnson, which will be heard on Tuesday night next, Feb. 12th. This case promises some sensational developments. Mayor McWilliams and Mr. F. D. Kerr are the counsel engaged in the case, and the suit is creating much interest in the city. This great breach of promise case before Judge Green will be tried in A. Tuesday evening at eight o'clock, in the Sunday school room of All Saints' church, under the auspices of the Young Men's Guild.

Whether the trial is a mock one or not, it is a matter of fact as to the interest being taken in the proceeding, and we have well demonstrate that if the jurisdiction of the bench is ever contested upon by a member of the local bar, it will be done at some later date.

A Cavan Residence Destroyed by Fire

On Thursday at midnight a disastrous fire occurred in Cavan whereby the house of Mr. David Armstrong, of the seventh con. of Cavan, was destroyed.

The house was a two storey frame structure, and was burned rapidly. Mr. Armstrong, the only inmate of the house at the time, was sleeping down stairs. About 12.30 he was awakened by the roaring of the flames and went out doors and discovered that his house was on fire. He tried to go upstairs, when the roof suddenly fell in and he had to get out. The contents of the house were destroyed, and Mr. Armstrong saved only what he wore. Miss Armstrong, who resides with her brother, was fortunately away at the time. The cause of the fire is supposed to have been a defective chimney.

There was an insurance of $400 on the house. Fortunately the fire did not spread to the stables and outbuildings.

GUIDES CHILDREN

Experience and a Mother's Love Make Advice Valuable.

An Ills. mother writes about feeding children.

"If mothers would use Grape-Nuts more for their little ones, there would be less need for medicines and fewer doctor bills.

"If those suffering from indigestion and stomach troubles would live on Grape-Nuts, how fast good milk for a short period they would experience more than they otherwise would believe.

"Our children have all learned to know the benefit of Grape-Nuts as an appetizing, nourishing food, and every evening, with few variations like this: 'Mama, let's have toast and Grape-Nuts for breakfast,' or, 'let's have eggs and Grape-Nuts'—never forgetting the latter.

"One of our boys in school and 15 years of age repeatedly tells me his mind is so much brighter and in every way he feels so much better after having Grape-Nuts as a part if not all his breakfast." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

—The new Dominion Bank premises, recently vacated by the "China Hall," are now entirely surrounded by scaffolding preparatory to the contemplated cut stone front and other extensive improvements.

HEALTH OFFICERS SEEK PHYSICIANS' HELP IN FIGHT AGAINST CONSUMPION.

The Kansas and Minnesota State Boards of Health have made a new move against tuberculosis. Letters have been mailed to both physicians and patients, requesting that the former co-operate with the board in its fight against consumption by supplying full information relative to each case that comes under their observation, and advising the latter as to the best known methods of treatment. Among the instructions offered to tuberculosis patients are the following:

Men with consumption should not wear beard or moustache. Sleep alone. Keep the windows open day and night; fresh air is essential. Dress warmly, and don't be afraid of the cold. Eat plenty of nourishing food. Don't spit on the floors or in public places. Stay out of doors all you can; remember that sunshine kills the germs of consumption.

These are wise instructions, and should be observed by every one afflicted, as the most important duty is to get well. Colds and coughs should not be neglected, as colds inflame the lungs, and the cough is extremely wearing on the system.

An eminent authority on lung trouble says that the following simple formula will break up a cold in twenty-four hours, and cure any cough that is curable: Virgin Oil of Pine (Pure), one-half ounce; glycerine, two ounces; good whiskey, a half pint. Shake well and use in teaspoonful doses every four hours. Great care should be exercised in securing pure ingredients, and to avoid substitution it is best that they should be purchased separately and the mixture prepared by yourself. The Virgin Oil of Pine (Pure) can be secured from any good prescription druggist in the original half-ounce vials, as purchased for dispensing. Each vial is securely sealed in a round wooden case, with engraved wrapper, with the name—Virgin Oil of Pine (Pure), prepared only by Leach Chemical Co., Windsor, Ontario—plainly printed thereon. There are many rank imitations of Virgin Oil of Pine (Pure), which are put up under similar names and style of package. Never accept these as a substitute for the Pure Virgin Oil of Pine, as they will invariably produce nausea, and never effect the desired result.

Do You Think For Yourself?

Or, do you open your mouth like a young bird and gulp down whatever food or medicine may be offered you?

When an intelligent thinking woman in need of relief from weakness, nervousness, pain and suffering, does it means much to you that there is one tried and true honest medicine of known composition, sold by druggists for the cure of woman's ills.

The makers of Dr. Pierce's Favorite Prescription, for the cure of weak, nervous, run-down, over-worked, debilitated, pain-racked women, knowing this medicine to be made up of ingredients, every one of which has the strongest possible indorsement of the leading and standard authorities of the several schools of practice, are perfectly willing, and in fact, are only too glad to print, as they do, the formula, or list of ingredients, of which it is composed, in plain English, on every bottle-wrapper.

The formula of Dr. Pierce's Favorite Prescription will bear the most critical examination of medical experts, for it contains no alcohol, narcotics, harmful, or habit-forming drugs, and no agent enters into it that is not highly recommended by the most advanced and leading medical teachers and authorities of their several schools of practice. These authorities recommend the ingredients of Dr. Pierce's Favorite Prescription for the cure of exactly the same ailments for which this world-famed medicine is advised.

No other medicine for woman's ills has any such professional endorsement as Dr. Pierce's Favorite Prescription has received, in the unqualified recommendations of each of its several ingredients by scores of leading medical men of all the schools of practice. Is such an endorsement not worthy of your consideration?

A booklet of ingredients, with numerous authoritive professional endorsements by the leading medical authorities of this country, will be mailed free to any one sending name and address with request for same. Address Dr. R. V. Pierce, Buffalo, N. Y.

PETERBOROUGH, FEBRUARY 8, 1907.

A SQUARE DEAL

Under the above caption the Brantford Expositor makes the following plea on behalf of the boys and girls in the schools of our Province, which will find an echo in the minds of many if not all interested in the training of the young:

"The children of this Province are entitled to a square deal. The period of childhood is one of growth and development; it ought also to be one of happiness.

"The movement for the restriction of child labor is commendable, and will find that cordial support which its importance merits.

"But all the grievance is not to be found in the period succeeding the child's schooling. In the school itself in many parts of this Province, child labor is in vogue to an unreasonable extent.

"Pupils are taught throughout the day and assigned tasks and studies that engage their attention, in many instances, long into the night, with the result that if there is mental development it is too often at the expense and sacrifice of the physical.

"Fortunately, school boards are recognizing the importance of this system, and in Brantford and elsewhere are removing the home work burden from the pupils. With regard to the examination evil the same can be said for Brantford, though not for many other centres.

"The spirit in which examinations are conducted is all wrong. Every pupil should approach such a test with serene mind. He should take pride and pleasure in doing the very best that is in him; he should not worry or fret. He should understand that it is creditable to do well; it may or may not be discreditable to get a low mark. He should learn that here, as in all emergencies in life, it is best to keep cool. The examination has too long been the terror of youthful students."

Railways Undergoing Great Misfortunes

Winnipeg, Feb. 8.—The weekly earnings of the C.N.R. and C.P.R. show heavy falling off compared with similar months last year, due to the extraordinary condition prevailing in this section of the West. Local railroad men predict that there will be no improvement during February. The volume of traffic handled is lower than at any time in the history of Western railroading, and in most divisions freight trains have been indefinitely cancelled.

Railroad men do not hesitate to say that the opening of spring will bring new terrors for the operating department in the form of floods of unprecedented volume.

Conditions generally are recognized as critical and with a most teachable to the street car motorman, gloomy outlook.

Japs Are Masterful.

New Chwang, Feb. 8. — Land has been bought from the Chinese here under military compulsion by the Japanese administration, and handed over to the Southern Manchurian Railroad, extending its concession. This road will be under military rule with ten councillors to be selected by the Government. The Lao Ting Railway is extending its concessions at all stations which will injure foreign interests.

Do You Easily Tire?

If a Day's Toil Exhausted Body or Brain Find the Reason Why?

We all inherit a disposition to disease. With one it's consumption, another heart disease or perhaps nervousness.

At first you are languid, but as the fatigue increases you lose appetite and spirit, feel as if work wasn't in your like.

Surely no clearer evidence of ill-health is needed.

Thousands have been in the same sickly condition; those who heeded not were sorry—those who used Dr. Hamilton's Pills were cured.

Your weakness proves germ life has eaten up the vitality of the blood, and a cleansing tonic like Dr. Hamilton's Pills is urgently needed.

At once your blood will freshen and gain strength.

Digestion will so improve that additional nourishment will be supplied to all needy organs.

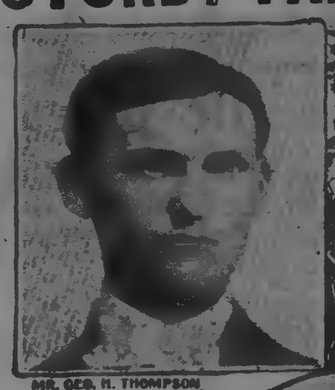
Surplus vigor will be instilled into the system till disease and weakness are completely driven out.

When you can renew your health with this safe vegetable remedy, the prescription of a noted physician, your duty is clear. Get Dr. Hamilton's Pills at once.

Remember this; it is the prescription of an eminent physician you use in taking Dr. Hamilton's Pills. Absolute safety and permanent results guaranteed in every case of tremor, weakness, headache and debility.

Price 25c. per box or five boxes for $1.00, at all dealers, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

STURDY FARMERS KEEP OFF ALL CATARRHAL ILLS BY TAKING PE-RU-NA.



MR. GEO. H. THOMPSON.

At Work On the Farm and Feeling Well All the Time.

Geo. H. Thompson, Craft, Miss., writes:

"I have been cured of catarrh by your medicines, Peruna and Manalin. I had been affected with catarrh of the stomach about all my life, and was taken bad every Spring and Summer.

"I used several kinds of patent medicines, but they did me no good. I then took a treatment under an M. D., which did me but little good. By this time I had come to where I could eat nothing but a little soup. I had severe pains, had lost in weight and could not do anything. I began taking your medicines, Peruna and Manalin. I then weighed 126 pounds, but after taking several bottles of Peruna and one bottle of Manalin, I weighed 168 pounds.

"I am now at work on the farm and feel well all of the time. I eat all I want to and my friends say that I look better than ever before. I will ever praise Peruna for its healing power."

Pe-ru-na is a Systemic Remedy.

If Peruna proves efficient for catarrh in one place, it will be equally potent in any other place, because it is a systemic remedy.

The people generally are very much misinformed as to the nature of catarrh.

Catarrh is usually believed to be confined to the head, nose and throat. Latterly we sometimes hear of catarrh of the stomach and catarrh of the bowels. Seldom, if ever, do we hear of catarrh of any other organs.

It is not because these organs are not subject to catarrh, nor that catarrh of these organs is not a very common disease, but simply because it is not generally known that affections of these organs may be due to catarrh.

MR. GUSTAV SCHMIDT.

Chronic Catarrh of Head and Throat Lasted Thirty Years.

A Letter Praising Pe-ru-na.

Mr. Gustav Schmidt, Spring Valley, Ill., writes:

"I had catarrh of the head and throat formover thirty years. It became worse every year. About three months ago I commenced to take Peruna and Manalin, and now I am entirely cured of that troublesome sickness. Your medicine is surely a blessing to mankind. You can truly say that you have not lived in vain, Doctor, and I thank you for the good you have done me. May you enjoy a long life to help suffering humanity."

MR. W. J. TEMPLE.

Climatic Ailments Overcome By Pe-ru-na.

Mr. W. J. Temple, R. F. D. 3, Delaware, Ohio, writes:

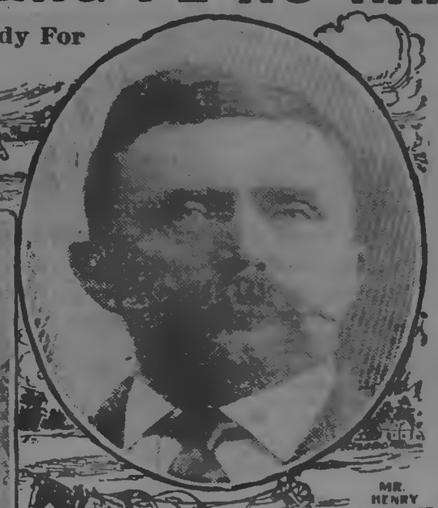
"I am a farmer and so necessarily must be exposed to all kinds of weather. About three years ago last winter, I was taken sick with bowel and stomach trouble.

"One doctor called it ulceration of the bowels, another called it colitis. Another doctor helped me temporarily.

"Then a druggist recommended Peruna and I followed his advice. I took altogether five bottles and I consider myself a well man.

"Before using Peruna, it was utterly impossible for me to do a day's work, but now I can do farm work without the least trouble or fatigue. I consider Peruna the best medicine and tonic on the market.

"I had not eaten a meal for five years without distress until I took Peruna. I have recommended it to several friends with good results."



MR. HENRY SCHROEDER.

Pe-ru-na, a Household Friend.

Mr. Henry Schroeder, Estey, Mich. writes:

"I suffered for almost ten years with catarrh of the stomach and all doctoring was of no avail. I took nine bottles of Peruna and two of Manalin and am now entirely cured.

"I recommend the medicine to all who are afflicted with this disease. It is my household friend."

One of Dr. Hartman's Grateful Correspondents.

Mr. W. R. Callahan, proprietor of Big Hill Farm, and prominent fruit grower and stock raiser, Glenvar, Va., writes:

"I write to express my kindness toward you and your good medicine, Peruna.

"I had a very bad spell of sickness and could not eat anything at all. My head, stomach, in fact, my whole body ached, and it looked as though nothing would do me any good. I had almost given up.

"I decided to try a bottle of your Peruna and before I had taken half the bottle my appetite came to me and my head became all right. In fact, I was all right all over. Peruna cured me."

While Peruna is not confined to any one class of people, yet it is probably true that the farming class more than any other, rely upon Peruna for the prevention and cure of all climatic diseases.

A TALK TO FARMERS.

THE farmer is the salt of the earth.

Without the farmer, the industrial world with all its flurry and immense wealth could not exist for a day.

It is upon the soil that we all depend for our living.

No matter how far one may be removed from tilling the soil, or how little he may know about the farmer's vocation, he is vitally dependent upon the things which grow in the soil.

Farming is the basis of all wealth and is the bulwark of all civilization.

The farming class is rapidly becoming intelligent and shrewd in business management.

The reuben and the country bumpkin have disappeared and in their stead a practical well-trained business man, capable of the highest form of commercial activity, has arisen.

Peruna is a very popular medicine among the farming class.

Many a family depends largely upon Peruna as a family medicine and the family physician.

Some farmers are far removed from physicians, and in any case they are far more self-reliant and more liable to depend upon a household remedy than people who live in the cities.

Dr. Hartman, who for many years was a farmer himself, and who still owns and manages one of the best farms in the State of Ohio, is a friend of the farmer, and it is with the farmer that the immense bulk of his correspondence is conducted.

The millions of booklets published and distributed by Dr. Hartman every year circulate chiefly among the farming class.

A large number of unsolicited testimonials concerning Peruna come from the farmers every year.

MR. J. B. ALEXANDER.

A Necessity in the Home.

J. B. Alexander, publisher of the "Fruit and Floral Guide, a Magazine of Horticulture," published in Hartford City, Ind., says of Peruna:

"I was afflicted with catarrh of the throat and head for over ten years. I was treated by many physicians, but grew worse until I was seldom able to go out in cold weather.

"About one year ago I was advised to try Peruna, which I did, and I am now entirely well of the catarrh.

"Peruna is a necessity in our home. With the first symptoms of a cold we use it, and are never afflicted with catarrh.

"I advise all who are afflicted with catarrh to try Peruna. There is certainly nothing equal to it as a catarrh medicine."

Dr. Hartman Interested in Farming.

Notwithstanding Dr. Hartman's busy professional career, he still continues to be interested in farming. He is the owner and manager of one of the largest farms in the State of Ohio, with several thousand acres of the best tilled land in the Middle West, and with hundreds of the best blooded percheron horses ever imported or raised in this country.

Dr. Hartman relies upon Peruna entirely in cases of sickness in his own family.

School Masters Not Allowed to Form Union

Paris, Feb. 8.—A new phase of the question of the right of the public employes to organize after the fashion of trades unions has arisen in France. The school masters of several districts have formed associations (syndicates) upon the instigation of the Radical Socialists and have joined the general Labor Federation. There was practically no attempt to conceal the fact that the purpose of the organization of teachers was the propagation of doctrines of anti-militarism as expounded by Herve and his followers, internationalism as preached by Jaures and the general idea of the solidiary of the interests of the working man as against those of the capitalistic classes.

The Government promptly forbade "teachers' syndicates." M. Briand, in announcing the decision to a deputation, said, "Because of the nature of your service the State can never permit you to act as other employes do. You are not working for an ordinary employer, but for the State and revolt against the State is revolt against the country whose representatives vote your salary."

Higher Tariff For the Germans

Berlin, Feb. 8.—Baron Von Zedlitz Und Neukirch, one of the leaders of the so-called Free Conservative wing of the Conservative part, writing to Der Tag yesterday on the new Reichstag, says that the agrarian high protective tariff majority will be stronger in this House than in the old. The Baron predicts that the Government will have to use extraordinary adroitness and vigor in order to obtain any concessions from the extreme high protectionists. Although Von Zedlitz does not mention the United States it is only with the United States, Spain and Argentina that tariff differences are pending. The members of the center party appear to be disposed to harass the Government in the Prussian Diet today by an interpellation as to whether the inquiry into the recent Reden mine disaster has demonstrated that the regulations for protecting the miners in State-owned mines were strictly observed.

A Castle In Ireland.

The name of castle for a country house is preserved in Ireland, rather curiously, for Ireland has not the vestiges of French customs so noticeable in Scotland. The dullest little villa, so it be solitary in an Irish country place, bears that name, and the smile of the Saxon when he arrives and sees the castle is cheap and unscholarly. Where the Celt—the female Celt, that is—does earn and deserve that slight sign of derision is in her practice with her visiting cards intended for London use. The word castle there for a second and country address does seem to suggest machicolations, if not sieges and sally ports.—London Chronicle.

PALACE OF HEALTH.

Remarkable Hall In London For Making Surgical Operations—Has Most Up-to-Date Improvements.

The finest and most scientific operating theatre in London has just been built in the new wing of the Central London Throat and Ear Hospital, which was opened by H. R. H. Princess Louise, on November 19.

The world has been scoured for the latest and most up-to-date improvements, with the result that the new operating theatre is a species of marble hall wherein dust cannot find a home.

The floor is laid with Terrozzo marble, mosaic, noiseless and non-absorbent. The walls are lined with big Sicilian marble. Very large slabs are employed, so that there shall be fewer niches for dust. And where joins are necessary the slabs are made to fit closely by an ingenious method of fixing by clamp as well as by cement.

There are no corners in the whole room, and the system of ventilation ensures that all air entering the apartment comes from above the roof of the building, far away from ground dust and the chimneys of Gray's Inn road. Lest injurious particles should even then steal in, there is a perforated zinc screen, which allows only the purest air to pass through. Nor can the air be cold or damp, for a noiseless fan first throws it upon a number of electric heat lamps, controlled in such a manner that any desired temperature may be obtained.

Close upon a hundred thousand cases are dealt with in a year in this remarkably efficient hospital. Humanity is the watchword, and it is carried out with method and simplicity. In order that patients may not be unnerved by the sight of deadly-looking instruments and the assembly of students, there is a new anaesthetic room on the same hygenic lines which characterize the operating theatre—in the form of an ante-chamber. Here the patient is placed under an anaesthetic, and conveyed by means of a clever moving operating table into the adjoining theatre.

All this is part of a great scheme by which, as soon as ever funds permit, the hospital will be further extended so as to become one of the most elaborate and humane scientific institutions in the world. Donations, however, are urgently needed, and intending subscribers—who should send to the secretary in the Gray's Inn road—may be assured their money will be used wisely and with economy.

A Finlander's Gift.

A coin was exhibited by Sir Frederick Treves during an address on hospitals at Nottingham, which, he declared, was in value "absolutely beyond price." It was a twenty kroner piece (equal in English currency to 18s.), connected with the following touching anecdote:

"Years ago a Norseman came to the London Hospital to be cured of a trouble which prevented him from earning his living, and was put under my care. I operated, the man was cured, and there the matter, so far as I supposed, ended. Three weeks after the man left he came to my house. I did not know that he was aware of my name, still less of where I lived, and I am ashamed to say that I supposed he had come begging.

"He said, 'It is now three years since I left Finland. Before I left, my wife sewed this coin in the band of my belt, and told me on no account to part with it until I was starving. For three years this coin has stood between me and starvation. The value to you is nothing, the value to me I cannot express, but when I was in the hospital I was determined you should have it.

"'I am proud to say that since then I have been starving, and since I left the hospital I have not slept in a bed, but I would not part with the coin because I wanted you to have it.'"

What magnificent piece of jewelry could equal the value of that coin?

An Astronomer Royal.

One of the best known of living astronomers is Sir David Gill, who has been royal astronomer at the Cape of Good Hope since 1879. Sir David the son of an Aberdeenshire magistrate, was educated at Aberdeen University, and after graduating set up a small private observatory near the college. Here he pursued his studies for a number of years until engaged to conduct the private observatory of the Earl of Crawford, and to organize his expedition to Mauritius to view the transit of Venus. In 1877 he proposed and conducted an expedition to Ascension Island to determine the solar parallax by observations of Mars. For his success at this time he received prizes from the Royal Astronomical Society and the Institute de France. Since then he has organized several expeditions, and has been connected as director with a large number of geodetic surveys, principally in Africa. In 1882 he photographed the great comet, and pointed out the desirability of using photography for cataloguing stars. His publications are numerous, all dealing with astronomical and mathematical questions, and the annals of the Cape observatory contain heaps of unpublished manuscript records and observations.

DOLLAR PACKAGE FREE

Man Medicine Free

You can now obtain a large dollar-size free package of Man Medicine—free on request.

Man Medicine has cured thousands upon thousands of weak men. Man Medicine will cure you; restore you to full strength.

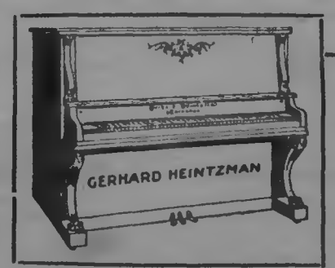
Man Medicine cures vital weakness, nervous debility, early decay, discouraged manhood, blood poison, brain-fag, backache, prostatitis, kidney and bladder trouble and nervousness.

You can cure yourself at home by Man Medicine, and the full-sized dollar package will be delivered to you free, plain wrapper, with full directions how to use it. The full-size dollar package free, no payments of any kind; no receipts; no promises, no papers to sign. It is free.

All we want to know is that you are not sending for it out of idle curiosity, but that you want to be well, and become your strong, natural self once more. Man Medicine will do what you want it to do—make you a real man.

Your name and address will bring it; all you have to do is to send and get it. We send it free to every discouraged man. Interstate Remedy Co., 786 Luck Bldg., Detroit, Mich.

—On Saturday we will sell eight colored stereoscope views for only 25 cents. Hundreds to choose from. Times Bookstore.



Gerhard Heintzman PIANO

That beautiful mellow-resonant tone so like the cultured human voice, is frequently referred to by piano-experts as the **Gerhard Heintzman Tone.**

A sensitively responsive touch, substantial construction and durability are also characteristic of the celebrated Gerhard Heintzman Piano.

NERVOUS DEBILITY

OUR NEW METHOD TREATMENT will cure you, and make a man of you. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers heal up, the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear, the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. You feel yourself a man and know marriage cannot be a failure. We invite all the afflicted to consult us confidentially and free of charge. Don't let 'quacks and fakirs rob you of your hard-earned dollars. WE WILL CURE YOU OR NO PAY.

NO NAMES USED WITHOUT WRITTEN CONSENT.

THREATENED WITH PARALYSIS.

BEFORE TREATMENT

AFTER TREATMENT

Peter E. Summers, of Kalamazoo, Mich., relates his experience:

"I was troubled with Nervous Debility for many years. I lay it to indiscretion and excesses in early youth. I became very despondent and didn't care whether I worked or not. I imagined everybody who looked at me guessed my secret. Imaginative dreams at night weakened me—my back ached, had pains in the back of my head, hands and feet were cold, tired in the morning, poor appetite, fingers were shaky, eyes blurred, hair loose, memory poor, etc. Numbness in the fingers set in and the doctor told me he feared paralysis. I took all kinds of medicine and tried many first-class physicians, wore an electric belt for three months, went to Mt. Clemens for baths, but received little benefit. While at Mt. Clemens I was induced to consult Drs. Kennedy & Kergan, though I had lost all faith in doctors. Like a drowning man I commenced the New Method Treatment and it saved my life. The improvement was like magic—I could feel the vigor going through my nerves. I was cured mentally, physically and sexually. I have sent them many patients and will continue to do so."

CURES GUARANTEED OR NO PAY.

We treat and cure VARICOCELE, STRICTURE, NERVOUS DEBILITY, BLOOD DISEASES, URINARY COMPLAINTS, KIDNEY AND BLADDER DISEASES.

CONSULTATION FREE. BOOKS FREE. If unable to call write for a Question Blank for Home Treatment.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 24, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

How to Enjoy the Circus.

There ain't much pleasure in this life fer men as old as me—that is, a feller thinks they ain't when he is sixty-three. O' course, he likes to smoke his pipe an' set around an' gas an' argue with the boys to git his leisure time to pass. A man who's gettin' 'long in years—too weak to hoe or plow, fer pleasure of the good old kind—has small chance anyhow. But there's one thing I like to do—one thing I sure enjoy—it's goin' to a circus with some poor, big eyed small boy. I always like to have it be the first show he's been to. I like to watch those big eyes snap. Oh, snap they always do. I like to see him smile an' clap an' crane his neck around an' see him eatin' peanuts, throwin' shells down on the ground. It don't seem very long ago that I was eight or nine, nor long since the first show I saw seemed simply grand—divine. I 'member how I set up there jest in a fit of joy. You see, I know the feelin' that comes to the big eyed boy. I don't care much for circuses like once I used to care. But, friend, I get my pleasure takin' little fellers there. An' while I set enjoyin' it—I mean that kid's real joy—I almost cry to think that I can't be once more a boy.

Man and His Pockets.

A tailor who had received an order for a suit of clothes was asked by the customer's wife for an interview.

"I want to ask you as a special favor," she said, "not to put any pockets in my husband's clothes."

"Why not?" asked the astonished tailor.

"Because they are responsible for his looking so shabby so much of the time," she explained. "He wears his clothes for weeks without pressing because he says it is too much trouble to change the things in his pockets to another suit. He says that half the men who go around in seedy clothes do so for the same reason. If that is so, just leave out the pockets, and they will have no excuse for shabbiness."

"That is a new point of view," said the tailor. "I will see about it."

But when the suit came home it had the usual number of pockets.

Alligator and Crocodile.

Among the many differences between the alligator and the crocodile there is a striking one—the alligator never leaves fresh water, while the crocodile often goes to sea.

Neuralgia.

When the nose is bleeding never hold it over a basin or hold the head down in any way. This only causes further rush of blood to the broken tissues in the nose. The head should be held up and back, the flow being caught in handkerchiefs or cloths. One of the most effective and simple means of checking a nosebleed is to press on the upper lip.

Common Names.

Mary is the most common Christian name. Out of every thousand English people 68 are named Mary, 66 William, 62 John and 60 Ellen.

ROYAL NAVY CUSTOMS

ONE OF THEM DATES BACK BEFORE THE DAYS OF DRAKE.

Senior Officer Must Always Enter a Boat Last and Leave It First—The Scran Bag and Its Contents—Admiralty Lords More Generous Now In Replenishing It Than Formerly—Some Quaint Rules.

In the British navy, to say that a thing is a custom of the service is to say that it must be done that way and no other.

It is nowhere laid down, for instance, that the senior officer shall always enter a boat last and leave it first; but the expression on a certain captain's face might have led one to believe that one of the laws of the Medes and Persians had been broken when, on taking the newly-joined chaplain ashore with him on one occasion, he said, "Now then, padre, jump in," and the reverend gentleman politely replied, "After you, sir."

This custom is one of the oldest in the service, says The Grand Magazine. It doubtless dates from before the days of Drake, if not, indeed, from those of Noah himself, probably the last to enter the Ark after all his juniors and proteges had been safely embarked.

The gunroom mess consists of the sub-lieutenants, all other commissioned officers of equivalent rank and all midshipmen and cadets. Midshipmen are divided into two lots, "senior" and "junior." The former are over 18 years of age, and are allowed many privileges, such as smoking and so on, denied to the juniors.

As a specimen of the customs which remind the juniors that they are still in bondage, the one known as "Fork in the Beam" is worth notice. It may be sprung upon its victims at any time during or after dinner.

When the president of the mess sticks a table fork into one of the beams overhead it is a signal for all juniors to clear out of the mess as fast as legs, arms or anything else can carry them. The last out receives several good whacks with a dirk scabbard on the most convenient part of his body as he disappears through the door. The scramble that results would disturb the equilibrium of most older and more sedate diners than those usually found in a gunroom.

The Scran Bag.

One of the most important and best known inatitutions in the service is the scran bag. It is well known that the allowance of paint and materials for keeping a ship clean, as laid down by the British Admiralty, is quite inadequate for that purpose. My Lords are much more generous nowadays than they used to be, but the first lieutenant or commander has still to put his hand in his pocket if he wishes his ship to look really smart.

The small supply of these necessities which the Admiralty provides for cleaning brasswork, etc., is augmented from the takings of the scran bag. A ship must be spick and span and tidy as any housewife could wish to see her home.

Nothing must be out of place, and nothing must be left lying about; but sailors, like other mortals, are only human, and, consequently, leave articles of clothing and personal property in places where they ought not to. This is an offence for which they are liable to disciplinary punishment; but a brilliant, though unknown, officer many years ago devised a scheme by which all the articles thus found are promptly seized by the ship's police and placed in the scran bag.

There they remain until the next Thursday afternoon, which is the time set aside for men to make and mend clothes. The bag is then opened by the master-at-arms, and the owners may redeem their lost property by paying a fine of an inch of yellow soap for each article.

The price of this soap is a penny an inch, and the fine is usually paid in cash, not in kind.

Some Quaint Rules.

Several quaint rules are enforced in the officers' messes, the origins of which are lost in the oblivion of antiquity. For instance, one rule lays down that no officer may place his feet on the table unless he has sailed around both capes—i.e., Cape of Good Hope and the Horn. Any one not eligible found in this elegant attitude is fined drinks around by all the members who happen to be in the mess.

The same penalty is enforced if an officer happens to unsheath his sword in the mess. It is very difficult to see why this should be regarded as an offence, unless that in olden days, when times were harder and men rougher, swords were sometimes drawn in earnest among officers.

One sometimes hears one officer remark to another: "I say, So-and-so, your sword looked pretty rusty at divisions." Thereupon, perhaps, the unsuspecting victim draws the maligned weapon to prove its cleanliness, only to be greeted with a shout for drinks.

If any one mentions a lady's name, or makes a bet at dinner before the King's health has been drunk he is liable to be called on by the president to pay for a round of port at dessert.

When an admiral or captain comes on board a ship he is piped over the side; that is to say, as the boat comes alongside a boatswain's mate gives forth a shrill crescendo pipe and repeats it as the officer steps on to the quarter deck, every one present saluting at the same time. The origin of this is to be found in the privilege which all officers of a certain rank enjoyed many years ago of being hoisted on board in a chair slung from the main yard of the old three-deckers. The sacredness of the quarter deck is well known to all; no person in His Majesty's navy goes on to it without saluting—be he the humblest boy or an admiral of the fleet.

BIG G CURES in 1 to 5 days. Guaranteed not to stricture. Prevents contagion. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

ADVERTISE IN THE TIMES.

DANCE OF THE LAMAS.

Adventures of a British Agent In Bhutan and Thibet.

Mr. Claude White, the British political agent at Sikkim, made two expeditions into Bhutan last year and during the late summer, details of which are now published for the first time, says The London Daily Express.

During the first journey, which was undertaken to invest the Tongsa Penlop, the ruler of Bhutan, as a Knight Commander of the Indian Empire, for the services he rendered during the Thibet campaign, the entire country was crossed, and portions of Thibet which had not been visited by white men were traversed. Everywhere Mr. White was received with absolute friendliness.

The Tongsa Penlop himself undertook a difficult and dangerous journey of over ten days from his residence at Biaga to meet Mr. White at Lhakhang. At Lhalong Monastery, one of the most noted in Bhutan, the chief incarnate lama is the nephew of the Tongsa Penlop. Here a great reception was organized in honor of the British political officer.

As the caravan approached up the gorge towards the ancient monastery it was met by masses of lamas, all wearing dark red robes. When Mr. White and the Tongsa Penlop had been escorted up to the monastery an extraordinary lama dance was organized in their honor. This took place in the courtyard of the monastery, the various dancers wearing grotesque masks of animals' heads.

During the summer mission Mr. White was beyond the limits of Bhutan proper, and traveled for a prolonged period through hitherto unknown parts of Thibet.

Mr. White came across the takin (Budocas axicolor), an exceptionally rare animal, which, so far as is known, had never been previously seen alive or shot by a European. Mr. White was presented with a very fine specimen by the Tongsa Penlop, but it died in the Chumbi Valley on its way home.

Its habitat is just below the snow line. This extremely rare animal, which in appearance is half-ox, half-antelope, is stated by the natives to exist only in three places in Bhutan.

The foothills of Bhutan are admirably adapted for the cultivation of rubber, etc., and the people are extremely anxious to trade with us. Eventually, it is stated, they will form a valuable market for Manchester cotton goods.

Mr. White discovered a shorter route to Lhasa than the one now known.

British Soldier and Religion.

At the first meeting of the committee recently appointed by the British Secretary of State for War to advise the Army Council in all matters affecting the spiritual and moral welfare of the army met at the War Office. Mr. Haldane, War Secretary, made a brief address, in the course of which he said: "No soldier fights his best who is not an idealist, and touched with idealism about his duties. Every man has in him a latent spark which can be kindled and which can send through him that idealism which raises him to a different level of personality. There are times when the history of our race has shown that it is so."

After alluding to the stimulus of religion on the body and the fact still that the British soldier, simple as he is, is capable of being profoundly stirred by the broad features of religious life, which brings home to him the consciousness that he has a side of his nature in which he is more than a mere finite being, a side in which God is imminent in him.

In conclusion, he said: "I am very glad of the evidences which pour in on me from all sides of the fact that the increase in the education and the intelligence of the men of to-day, as compared with those of a generation ago, are telling on the condition of the soldier in the army, and are beginning to raise him to a higher level.

"But we want to stimulate this advance, and we feel that we can best stimulate it under the supervision and by the advice of those who are concerned with religion—with religion in its broadest sense. And it seems to us that in the army is a field in which those who are concerned may find abundant opportunity of working together, as indeed they are already doing to a considerable degree."

High Priced Bumblebees.

Many years ago the farmers of Australia imported bumblebees from England and set them free in their clover fields. Before the arrival of the bees clover did not flourish in Australia, but after their coming the farmers had no more difficulty on that score. Mr. Darwin had shown that bumblebees were the only insects fond of clover nectar which possessed a proboscis sufficiently long to reach the bottom of the long, tube-like flowers and at the same time a body heavy enough to bend down the clover head so that the pollen would fall on the insect's back and thus be carried off to fertilize other flowers of the same species. The bumblebees sent to Australia cost the farmers there about half a dollar apiece, but they proved to be worth the price.

His Weapon.

In some parts of Ireland it is a custom among bank clerks to speak of one another as "officers" to the bank, but little Jim Bender, the recently imported Cockney waiter in a County Mayo hotel, was not aware of this custom.

"Have you seen any of our officers here this morning?" asked a lordly knight of the quill of Jim a few days ago.

Jim glanced keenly at his interrogator.

"Yussir," he answered promptly; "it isn't three minutes ago since one of 'em went out with his sword be'ind 'is ear."—London Answers.

Stop Chinese Riots

Shanghai, February 7.—Anti-Christian riots broke out yesterday at Chinkued, near Soo-Chow, province of Kiang-Soo. Troops temporarily restored order and reinforcements have been sent to the scene of the outbreak.

SOLICITORS—Messrs. Bicknell, Morine, Bain and Strathy.
TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns FIVE MINING CLAIMS containing 160 ACRES, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Hucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 8 veins, shaft and vein uncovered across entire eighty acres.

A recent assay of Anima-Nipissing claims, taken from 3-foot level, show 153 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 640 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 2. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 20 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 20 acres of J. B. 2 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch nicolite, 18 inch smaltite together with cobaltite. Assays gave 672-1283-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00). The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only, we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

W. H. JACKSON,

261 KING STREET WEST, - TORONTO, CANADA

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst mines—having added 200 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 3 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 90 days, is now producing some eight to ten tons of zinc ore per shift—*being the record breaker of the district so far.* This property is immediately to the northwest of the Sunburst property. The Chanteys, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now taking their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 24 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 90 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 75 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are in the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magasha, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 19 per cent. In three months 600,000 pounds of rich ore was taken out by the Hobo. This mine is 175 feet from our property and is in the same ore bed. Shaft No. 1 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore body.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 pr. cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the *small investor* through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

MAP OF DISTRICT SHOWING SUNBURST MINE.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this imminently rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you will look it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 23, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 60 feet in diameter. The shaft of the Hobo Mine was sunk within 3 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 2 at 65 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 26 feet.

These shafts have been sunk: No. 1 shaft, 5 1-2 by 8 feet, is down 85 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 lineal feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 8 1-2 by 90 feet, well timbered, with shafthouse, derrick and hoisterhouse in good repair. From this shaft a drift is driven north 70 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 5 1-2 by 8 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 15 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines.

Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of coal and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself.

Very respectfully yours,
M. S PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscela Mining Co.	24 per cent.	Kaiyeid Mining Co.	60 per cent.
Ontonwood Mining Co.	38 per cent.	Morking Bird Mining Co.	64 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	89 per cent.
Comberor Lead and Zinc Co.	50 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	68 per cent.	Linger Mining Co.	140 per cent.
B. & H Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 100 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$72.00 buys 900 shares of stock; $8.20 down, $8.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $51.12 per ton for lead and $36.61 for zinc to $42.00 for lead and $46.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 40 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1906 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 387,160.00
A. W. Taylor	120	180,750.00
J. W. Aylor	40	570,571.00
The Burgner Mining Co.	80	19?,579.00
Center Creek Mining Co. (production to date)	120	1,575,503.00
Mrs. E. J. Chinc	200	6,952,194.00
Majestic Consolidated Zinc & Lead Co.	52	231,799.00
Continental Zinc Co. (production to date)	208	1,575,503.00
Consolidated Troup Mining Co.	40	191,619.00
Daughtery-Davy-McMillan Estate	60	415,806.00
The Empire Zinc Co.	411	120,313.00
Fox Hedre	20	120,121.00
Granby Mining & Smelting Co., 1905		1,261,541.00
Granby Mining & Smelting Co., 1906		1,015,650.00
John G. Gumm	640	82,407.00
Pittsburg-Joplin Lead & Zinc Co.	10	99,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	413,294.00
United Zinc Co.	120	390,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 2, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 240 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in this section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Blue Jacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

horse when De Vironne pushed his way into the little group.

"It is as much as your lives are worth to touch him," said he.

"But he has stolen Etienne Arnaud."

"That score may be settled afterward. Tonight he is the king's messenger. Is the other all safe?"

"Yes, he is here."

"Tie this man and put him in beside him. Unbuckle the traces of the dead horse. So! Now, De Carnac, put your own into the harness. You can mount the box and drive, for we have not very far to go."

The changes were rapidly made. Amos Green was thrust in beside De Catinat, and the carriage was soon [illegible] up the steep incline which it had come down so precipitately. The [illegible] had not a word since [illegible] had remained absolutely still, with his hands crossed over his chest, while his fate was [illegible]. Now that he was alone [illegible] with his comrade, however, he frowned and muttered.

"Those infernal horses!" he grumbled. "Why, an American horse would take to the water like a duck. Once over the river, we should have [illegible] to Paris."

"My dear friend," cried De Catinat, [illegible] his manacled hands upon those of his comrade, "how nobly you have stood by me! But how came you there? Never in my life have I been so astonished as when I saw your face."

"I said to himself," [illegible] it would be a sur[illegible] you knew who was [illegible] be. "When I was [illegible] horse I lay quiet, [illegible] it seemed to me to be [illegible] to me than to stand with [illegible] clinking in my ears [illegible] all got round you, and I [illegible] the ditch, crept along it, got [illegible] the shadow of the [illegible] was beside the carriage be[illegible] they knew that I was gone. I [illegible] that there was only one [illegible] by which I could be of use to you. The [illegible] was leaning round, with [illegible] head turned, to see what was going on behind him. I cut with my knife, sprang up on the front wheel and clapped his tongue."

"And then?"

"I pulled him down into the ditch, and I got into his coat and his hat. I had hardly got the reins before they were all back and bundled you into the coach. I was not afraid of their seeing me, but I was scared lest I should not know which road to take, and so set them on the trail. But they made it easy to me by sending some of their riders in front, so I did well until I saw that by track and made a run for it."

The guardsman again pressed his comrade's hands. "You have been as true to me as hilt to blade," said he. "It was a bold thought and a bold deed."

"And what now?" asked the American.

"I do not know who these men are, and I do not know whither they are taking us. I fancy that they are taking us to some place where they can shut us up until this business blows over."

"Well, they'll need to be smart about it."

"Why?"

"Else maybe they won't find us when they want us."

"What do you mean?"

For answer the American, with a twist and a wriggle, drew his two hands apart and held them in front of his comrade's face.

"Bless you, it's the first thing they teach the papooses in an Indian wigwam! Put your hands out." With a few dexterous twists he loosened De Catinat's bonds until he also was able to slip his hands free. "Now for your feet, if you'll put them up. They'll find that we are easier to catch than to hold."

But at that moment the carriage began to slow down, and the clank of the hoofs of the riders in front of them died suddenly away. Peeping through the windows, the prisoners saw a huge, dark building stretching in front of them, so high and so broad that the night shrouded it in upon every side. A great archway hung above them, and the lamps shone on the rude wooden gate studded with ponderous clamps and nails. In the upper part of the door was a small square iron grating, and through this they could catch a glimpse of the gleam of a lantern and of a bearded face which looked out at them. De Vivonne, standing in his stirrups, craned his head up toward the grating, so that the two men most interested could hear little of the conversation which followed. They saw only that the horseman held a gold ring up in the air and that the face above, which had begun by shaking and frowning, was now nodding and smiling. An instant later the head disappeared, the door swung open upon screaming hinges, and the carriage drove on into the courtyard beyond, leaving the escort, with the exception of De Vivonne, outside. As the horses pulled up, a knot of rough fellows clustered round, and the two prisoners were dragged roughly out. In the light of the torches which flared around them they could see that they were hemmed in by high turreted walls upon every side. A bulky man with a bearded face, the same whom they had seen at the grating, was standing in the center of the group of armed men issuing his orders.

"To the upper dungeon, Simon!" he cried. "And see that they have two bundles of straw and a loaf of bread until we learn our master's will."

"I know not who your master may be," said De Catinat, "but I would ask you by what warrant he dares to stop two messengers of the king while traveling in his service?"

"By St. Denis, if my master play the king a trick, it will be but tie and tie," the stout man answered, with a grin. "But no more talk! Away with them, Simon, and you answer to me for their safe keeping."

It was in vain that De Catinat raved and threatened, invoking the most terrible menaces upon all who were concerned in detaining him. Two stout knaves thrusting him from behind and one dragging in front forced him through a narrow gate and along a stone flagged passage. They made their way down three successive corridors and through three doors, each of which was locked and barred behind them. Then they ascended a winding stone stair, and finally they were thrust into a small square dungeon, and two trusses of straw were thrown in after them. An instant later a heavy key turned in the lock, and they were left to their own meditations.

Very grim and dark those meditations were in the case of De Catinat. A stroke of good luck had made him at court, and now this other of ill fortune had destroyed him. There were his people in Paris, too—his sweet Adele, his old uncle, who had been as good as a father to him. What protector would they have in their troubles now that he had lost the power that might have shielded them?

But his energetic comrade had yielded to no feeling of despondency. The instant that the clang of the prison door had assured him that he was safe from interruption he had felt all round the walls and flooring to see what manner of place this might be. His search had ended in the discovery of a small fireplace at one corner and of two great clumsy billets of wood, which seemed to have been left there to serve as pillows for the prisoners. Having satisfied himself that the chimney was so small that it was utterly impossible to pass even his head up it, he drew the two blocks of wood over to the window and was able by placing one above the other and standing on tiptoe on the highest to reach the bars which guarded it. Drawing himself up and fixing one toe in an inequality of the wall, he managed to look out on to the courtyard which they had just quitted. The carriage and De Vivonne were passing out through the gate as he looked, and he heard a moment later the slam of the heavy door and the clatter of hoofs from the troop of horsemen outside. The seneschal and his retainers had disappeared; the torches, too, were gone, and, save for the measured tread of a pair of sentinels in the yard twenty feet beneath him, all was silent throughout the great castle.

The window was large enough to pass his body through if it were not for those bars. He shook them and hung his weight upon them, but they were as thick as his thumb and firmly welded; then, getting some strong hold for his other foot, he supported himself by one hand, while he picked with his knife at the setting of the iron. It was cement, as smooth as glass and as hard as marble. His knife turned when he tried to loosen it. But there was still the stone. It was sandstone, not so very hard. If he could cut grooves in it he might be able to draw out bars, cement and all. He sprang down to the floor again and was thinking how he should best set to work when a groan drew his attention to his companion.

"Something on your mind?" said Amos Green, sitting down upon his billets of wood. "What was it, then?"

The guardsman here made a movement of impatience. "What was it? How can you ask me when you know as well as I do the wretched failure of my mission? It was the king's wish that the archbishop should marry them. The archbishop should have been at the palace by now. Ah, I can see the king's cabinet. I can see him waiting. I can see madame waiting. I can hear them speak of the unhappy De Catinat."

"I see all that," said the American stolidly, "and I see something more."

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

WEAK WOMEN READ BELOW

One woman in three is struggling against weakness.

Are you one of the weak ones?

Not exactly sick, but oh, how miserable!

You discharge your daily duties but who can measure the burden, the trial?

Talk of bravery, where find a finer spirit than among half-sick women, fighting, struggling to do their duty against terrible odds—and they never give up until they drop.

If you could put a drop of blood under the microscope the cause would be revealed.

You would find the blood thin and watery, red cells far too few, the carrier of life very greatly reduced in vitality, and this means slow death.

Ferrozone cures weakness by fortifying both appetite and digestion, and making plenty of blood.

Ferrozone cures weakness by supplying nutriment and building material, by giving the body the constituents it requires for restoring tired organs.

It gives vim, vigor and endurance.

Ferrozone is a tissue builder.

It adds force to all the vital functions—the stomach, liver, kidneys.

Ferrozone gives sound sleep, sound digestion, promotes perfect removal of all the body wastes.

Ferrozone makes the body glow with health.

Any weak, pale or sickly woman that Ferrozone won't cure—why she must be hopeless. Wonderful power in Ferrozone, wonderful cures it makes, and this you can prove by trying it. Sold everywhere in 50c. boxes.

Peterboro' Deputation in Toronto

A Toronto despatch of yesterday says that a deputation representing several municipalities in Peterborough County waited on Hon. Dr. Reaume and asked the Government to assist in the payment of a debt incurred in stamping out an outbreak of smallpox in 1905 and 1906. The cost was about $5,000. No promise was made.

Mr. J. A. McWilliams Was Honored

At the regular meeting of the Royal Black Preceptory, No. 261, Royal Black Knights of Ireland, held in their temple, Simcoe street, Thursday evening, Sir Knight John A. McWilliams, Past Preceptor, was presented with a handsome Past Preceptor's jewel. The presentation was made by Past Preceptor Sir Knight Jos. Batten.

An Asphodel Silver Wedding

On Friday evening, Jan. 25th, Mr. and Mrs. Nelson Beavis, of Asphodel, formerly of Norwood, entertained some 60 or 70 friends to honor of their twenty-fifth anniversary of their wedding day. Mr. and Mrs. Beavis were the recipients of a large number of beautiful gifts, demonstrating the high esteem in which they are held by their neighbors. Among the gifts was a handsome silver pudding dish given by the Aux-Iliary of the W.M.S. of the Methodist church, Hastings, of which Mrs. Beavis is president.

LOCAL INCIDENTS

By The Times Man on the Street

—Albert College, Belleville, is celebrating its semi-centennial.

—The annual meeting of Knox church will be held on Wednesday night of next week.

—The Men's T.A.S. Debating Club met yesterday evening in the rooms for the transaction of business.

—The annual dance of the non-commissioned officers of the 57th Regiment was held in the Foresters' Hall, Simcoe street, last night.

—The regular meeting of the Sunday School teacher training class was held yesterday evening. Mr. J. W. Kelly had charge of the meeting.

—The annual entertainment of St. John's Junior Chapter Brotherhood of St. Andrew, was held last night in the school room, with Mr. Robert Tait in the chair.

—A concert under the auspices of the Ladies' Aid, will be given in the Cavanville Methodist church on Thursday, Feb 14th, by the George street Methodist church choir, Peterborough.

—Fears are arising among the friends of Edward Cochrane, M.P., for East Northumberland. He has just recovered from the operation for cancer at the hospital in Ottawa, but there is a general decline.

—Much favorable comment was heard throughout the city yesterday over the admirably delivered and comprehensive lecture given by Mr. D. W. Dumble before the Young Conservative Club.

—The annual meeting of the officers and teachers of George street church and Grace church Sunday schools was held yesterday evening, when reports were presented and officers elected.

—Truant Officer Cochrane early yesterday morning was on hand and took the boys as stated in yesterday's Times to their respective schools notifying the teachers to keep an eye on them.

—"Zephra" last night for a local show drew a phenomenal attendance. Those who have been instrumental in getting up this splendid presentation have every reason for public and self congratulation.

—Mr. Tenbine Guerin, who last summer and spring so efficiently acted as inspector for the Ontario Department of Fisheries, expects today to get the matter of his many months' delayed pay satisfactory settled.

—The Rev. H. C. R. Sinclair, B.A., has tendered his resignation as pastor of the Presbyterian church here, and will leave next month. Mr. and Mrs. Sinclair's many friends will regret their departure.—Pembroke Falls Gazette.

—The first of a series of receptions and entertainments to be given by the young men's societies of the different churches was held in the Y.M.C.A. yesterday evening. The Hurses Class of Murray St. Baptist church had charge of the entertainment, and carried the matter to a most enjoyable and successful conclusion.

—It is rumored about town today that the Bank of Montreal has purchased the block at the corner of Queen and Walton streets, including the stores of Fulford Bros., and W. D. Stephens, Mr. Johnston, the local manager, stated that he had heard the rumor, but as yet nothing definite had been decided upon.—Port Hope Guide.

—The sound made in days gone by by Tubal Cain was heard yesterday morning on the market square as Mr. Doig, with sledge hammer and vim demolished some of those played out and unsightly antique farming implements that have, for some time made the square resemble a cross between a junk shop and an out-at-elbows North-western flag station.

SOCIAL AND PERSONAL

—Mr. and Mrs. W. J. Shier, of Lindsay, were in the city yesterday.

—Mr. E. A. Peck, was in Toronto yesterday on business.

—Mr. L. F. Clarry, of Hastings, was in the city yesterday.

—Mr. Arthur Mann is confined to the house with an attack of la grippe.

—Miss Leah Rogers, of Campbellford, is the guest of Miss Doris Donaldson, east ward.

—Mr. Percy Mitchell of Calgary, is visiting his aunt Mrs. J. H. Sherwood, 561 Bethune street.

—Mrs. Jas. E. Fowler has returned from visiting friends in Peterborough.—Havelock Standard.

—Mr and Mrs. Vincent Eastwood left yesterday evening for St. Catharines, to spend a few days at the Welland.

—Messrs. R. M. Fee and Thos. Sadler, the well-known Lindsay lumbermen, were guests at the Snowden House yesterday.

—Dr. C. S. Coughlin, superintendent of the Institute for the Deaf and Dumb, Belleville, is in the city, on his way home from Toronto.

—Mr. Kennedy owner of the famous Kennedy-Cobalt Mine was in the city yesterday in the interests of his great and promising silver producer.

—Miss Annie Stevenson, of Peterborough, and Miss Gladys Carling, of Ottawa, are visiting Mrs. A. W. Brodie of Kendal avenue.—Toronto News.

—Mr. John King, of King and Sherwood, the local contractor and stonemason, is visiting in Toronto.

—Mrs. Moore, Mrs. J. C. Kell's mother is ill with pneumonia, and for one of her age the gravest outcome may not be unexpected.—Millbrook Reporter.

—Mr. Monty Wilson, the well-known Garden Hill cheese manufacturing expert, was in the city yesterday on business. Monty was in his usual delightful humor, and noted that Cavan is still "It" when cheese making is considered.

—Millbrook Reporter; Ted Burnham has been appointed to a position on the staff of the Bank of Toronto here, and took up his duties on the first of the month. We are pleased to have Ted amongst us again.—Mr. Calvin Tee, who has spent six years at the military school at Kingston, has given up that life and expects to enter into other engagements in Peterborough. He has been spending a few days with old friends here.

THE DOMINION BANK

Proceedings of the Thirty-Sixth Annual General Meeting of the Stockholders.

THE THIRTY-SIXTH ANNUAL GENERAL MEETING OF THE DOMINION BANK was held at the Banking House of the institution, Toronto, on Wednesday, January 30th, 1907.

Among those present were noticed:

Lieut.-Col. Sir Henry Pellatt, Dr. Andrew Smith, Dr. C. O'Reilly, Messrs. W. D. Matthews, James Carruthers, Wm. Ross, W. R. Brock, J. J. Foy, A. Monro Grier, J. J. Dixon, L. H. Baldwin, W. Glenney (Oshawa), Aemilius Baldwin, F. J. Harris, W. C. Harvey, W. A. Dixon, J. G. Ramsey, W. Crocker, R. Mulholland, P. Leadley, W. C. Crowther, Jas. Matthews, David Kidd (Hamilton), W. T. Ramsay, R. M. Gray, J. T. Small, S. Samuel, J. A. Proctor, W. Cecil Lee, G. N. Reynolds, W. G. Cassels, Wm. Dayies, F. J. Phillips, H. Gordon Mackenzie, J. Gordon Jones, R. J. Christie, H. B. Hodgins, S. Nixon, Ira Standish, David Smith, A. W. Austin, H. W. A. Foster, Cawthra Mulock, F. D. Benjamin, Jas. Scott, F. H. Gooch, A. R. Boswell, J. F. Kavanagh, A. Foulds, E. C. Burton, Victor Cawthra, W. Mulock, Jr., F. J. Stewart, A. H. Campbell, Jr., J. D. Tees, A. Bell, Richard Brown, C. A. Bogert, and others.

It was moved by Mr. L. Baldwin, seconded by Mr. S. Samuel, that Mr. W. D. Matthews do take the chair, and that Mr. C. A. Bogert do act as secretary. Messrs. A. R. Boswell and W. G. Cassels were appointed scrutineers.

The Secretary read the Report of the Directors to the Shareholders, and submitted the annual statement of the affairs of the Bank, which is as follows.

To the Shareholders:

The Directors beg to present the following statement of the result of the business of the Bank for the year ending 31st December, 1906.

Balance of Profit and Loss Account, 30th December, 1905	$249,437.97
Profit for the year ending 31st December, 1906, after deducting charges of management, &c., and making provision for bad and doubtful debts	539,360.36
	$788,798.33
Dividend 3 per cent., paid 2nd April, 1906	$90,000.00
Dividend 3 per cent., paid 3rd July, 1906	90,000.00
Dividend 3 per cent., paid 1st Oct., 1906	90,000.00
Dividend 3 per cent., payable 2nd Jan., 1907	90,000.00
	$360,000.00
Transfer to Reserve Fund	400,000.00
	$760,000.00
Balance of Profit and Loss carried forward	$28,798.33

Reserve Fund

Balance of credit at account, 30th December, 1905	$3,500,000.00
Transferred from Profit and Loss Account	400,000.00
	$3,900,000.00

With great regret, we have to record the sudden death in May last of Mr. Theodore H. Brough, the late General Manager, who had been in the service of the Bank continuously since 1875. He was the Chief Executive Officer for seven years, during which short time he accomplished much for the development and welfare of the institution.

Mr. C. A. Bogert, Manager of the Montreal Branch for eight years, and who entered the Bank more than twenty-five years ago, was appointed to succeed him.

On account of the continued expansion in the business of the Bank, your Directors have decided that it is an opportune time to issue the remaining one million dollars of authorized Capital Stock; and, having in view future requirements which may reasonably be expected, have approved of a by-law to be submitted for your consideration at the Annual Meeting, which provides for a further increase in the Capital Stock to the extent of one million dollars. This will make the total authorized Capital five million dollars.

You will also be asked to consider a by-law increasing the number of Directors from seven to nine, which is thought to be advisable owing to the diversity of our interests throughout Canada and the gradual extension of our operations.

During the twelve months just closed Branches of the Bank were established at the following points, and, when expedient, desirable sites were purchased and suitable offices erected. In the Province of Ontario, at Chatham, Dresden, Peterborough, Tilbury, Windsor, and in Toronto, at the corners of Avenue road and Davenport road, and Queen street and Broadview avenue; in the Province of Alberta, at Calgary and Edmonton, and at Regina, Sask.

In addition, we have to inform you that in December last, the private banking business of Messrs. John Scurry & Company, at Windsor, was acquired under terms advantageous to the Shareholders, which transaction includes the purchase of a commodious building, well situated in this important centre.

It was found necessary to provide larger premises for our North End Branch, Winnipeg, and for this purpose a valuable property has been secured.

The Directors, following their usual custom, examined the Securities and Cash Reserves of the Bank as on December 31st, 1906, and found them to be correct; they also verified the Head Office Balance Sheet, including all accounts kept with Foreign Agents.

Every Office of the Bank has been carefully inspected during the past twelve months, and each Branch has been visited by the General Manager since his appointment in May last.

E. B. OSLER,
President.

The Report was adopted.

Bylaws were passed increasing the number of Directors from seven to nine, and providing for an increase of $1,000,000 in the Capital Stock, which will make the total authorized Capital of the Bank $5,000,000.

The thanks of the Shareholders were tendered to the President, Vice-President and Directors for their services during the year, and to the General Manager and other Officers of the Bank for the efficient performance of their respective duties.

The following gentlemen were elected Directors for the ensuing year: Messrs. A. W. Austin, W. R. Brock, James Carruthers, R. J. Christie, T. Eaton, J. J. Foy, K.C., M.L.A., Wilmot D. Matthews, A. M. Nanton, and E. B. Osler, M.P.

At a subsequent meeting of the Directors, Mr. E. B. Osler, M.P., was elected President, and Mr. Wilmot D. Matthews, Vice-President, for the ensuing term.

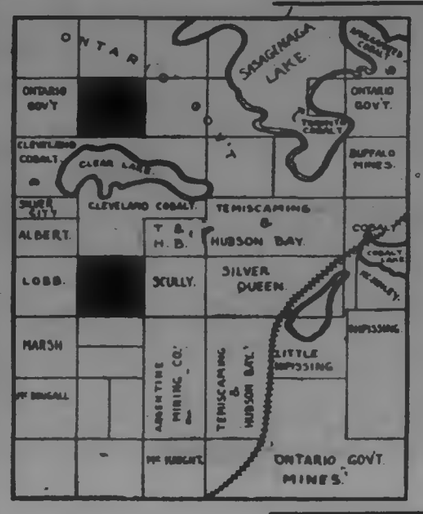
LAKE GEORGE COBALT SILVER MINING COMPANY, LIMITED

affords conservative mining men and others an investment of greatest merit by reason of the immense profits that will most surely be forthcoming.



Authorized Capital Only $600,000

Divided into 600,000 Shares

Par value $1.00 each—fully paid and non-assessable
Only 300,000 shares for sale at par

PROPERTIES
MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east, on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

100 Teams, 100 Miles, With Wood for Sufferers

Heroic Effort to Carry Fuel From Prince Albert to Saskatoon---Newly Wedded Pair Nearly Perished in a Blizzard.

Maple Creek, Man., Feb. 11.—John Duncan, a well-known rancher, was married Monday, and started for his ranch on Skull Creek, with his bride. Their team wandered from the trail, and they were found yesterday almost dead. They are in the hospital here, and Duncan's feet will have to be amputated. Many reports of people perishing in the storm are being received here.

ENGLISH BARRISTER PERISHED.

Weyburn, Sask., Feb. 11.—At Goose Lake, Assess Mclntosh, a member of the English bar, a man of prominence, whose presence in the West has been a mystery for some months, has perished in a blizzard, with a companion, he was driving from the post office. They got lit the trail. The Mounted Police found this companion nearly dead, near the sleigh, but the lawyer will not be found until the snow melts. He evidently wandered out on the plains, and was covered up.

A HUNDRED LOADS OF WOOD.

Prince Albert, Feb. 9.—Today one hundred teams are hurrying southward, loaded with cordwood. Each carried one cord, and farmers are supplying relays of horses. The fuel will be sent as far south as Saskatoon, 100 miles. It will not be sold, but a strict account kept, to be settled for on some basis at a later date. To those destitute there will be no charge. The whole country in the North has turned out with the resolution, in spite of the very low thermometer, to volunteer for the appalling hundred mile drive. As each team will be required to make but twenty miles, however, it may not be past human endurance.

The Kingston, Jamaica, Earthquake and Fire

Mrs. J. Hasmer, of Peterborough, Receives News From the Wrecked City.

The following letter, received by Mrs. J. Hasmer, of Peterborough, from a friend who suffered in the recent earthquake and fire at Kingston, Jamaica, will no doubt prove of interest to our readers:

Kingston, Jamaica, January 18, 1907.

How shall I tell the tale of woe! We were visited by a most terrific earthquake on the afternoon of the 14th instant. Kingston and its suburbs have been totally destroyed. In a minute or so the whole city and surroundings were a mass of ruins, and we, like all its inhabitants, are homeless today. And yet we feel that we can be but still and murmur not, since it was the Lord's doing. We have much to be thankful for; oh! so much. Whilst hundreds of our fellow creatures have been buried beneath the ruins, their poor bodies in very many instances burned to cinders—we have been most mercifully preserved; even our very pet animals have come out of so great and terrible a catastrophe without so much as a scratch.

Malcom had a most providential escape, and how Annie got down from our garret still remains a mystery. I had just left her to give the cook some old letters to burn (which by the by saved her), and turned into the garden to gather some violets for Malcolm before going up to dress for the afternoon. I had only plucked about three, when I heard, oh! such a noise, the like of which I hope never to hear again. I quickly made to the garden gate, only to be jerked backwards and forwards in a most terrific manner. I was not able to see my hands before me in consequence of the thick cloud of dust and white lime that rose from the falling buildings. In one fell blow every house that wasn't flat down was totally uninhabitable. We hadn't an out building that wasn't as flat as a pancake (except the old bath room). The garret is so wrecked that I fear that there will not be a possibility of saving any of the heavy furniture. Annie and I, at the risk of our lives, have saved our pillow clothing and bed room crockery. Each trip was made with trembling steps, and with such a feeling of thankfulness that we have got safely down. We both felt as though we were treading on the very brink of our graves. The place is in such a critical condition that we have decided not to go again and my poor piano is seemingly intact except for bits of plaster from the ceiling lying on top; but I am afraid its rescue is impossible, as it is badly situated.

All who have lawns have taken refuge there. We spend our days and nights in our back yard, near the gates. Our parks and race course are crowded with people of all classes. The whole city presents a scene of desolation; on every hand nothing but debris is visible and in many parts the saddest of all sights was the number of dead bodies lying in the streets. Hundreds have not only been buried beneath the ruins but also burnt. Among these was ——— ———. He could only be recognized by the cards in his card case and his rings; he only arrived in Kingston a week ago today.

What are we going to do? God only knows. For a long time there will be no means of earning money. The fire which followed the earthquake has made the destruction complete; it swept both sides of King street to the water's edge, and in Harbor and Port Royal streets from Luke to Orange street—so that the general stock has been burned out. The churches are all down; a scene of devastation from end to end. Spanish town and St. Andrew's have suffered too, though not to the same extent. The bodies that are now being dug out are burned. It was sad to see the city cart going around picking up the dead. An experience like this can never be forgotten. All cable communication has been cut off. We still continue to have hopes, though slight in comparison. God was indeed merciful to us, but we have had a hard experience to look forward to; all have suffered there is none to help the other. There is, however, One who will give us strength according to our need, and in His hands we leave our future. Both this and the Hanover street house will require to be rebuilt—no repairs will do, they are totally wrecked. Malcom has been called into service as one of the city guard. Any amount of plunder has been going on. I have always had the greatest horror of earthquakes. We have not changed our clothes since Monday.

Kaiser's Son Will Take a May Bride

Prince August Wilhelm Will Marry Earlier Than Was Expected.

Berlin, February 9.—The Kaiser's decision to marry off his son, Prince August Wilhelm, at the age of 19, has caused some surprise. It is due to motherly anxiety of the Empress that the match is due. The bride-elect is Her Majesty's niece, Princess Alexandra Victoria of Schleswig-Holstein-Sonderberg-Glucksberg, who is 17 years old. She has the reputation of being a very charming, simple-mannered girl. She has been very simply and carefully brought up, and is an excellent Haus frau and a good cook.

Of all the Kaiser's sons, Prince August Wilhelm is the most studious and the fondest of literature and art. Since he left the military school at Wiesn, where his brothers were educated, he has had little time to devote himself to study. His two terms at the Bonn University barely sufficed for him to attend a score of lectures. Then came a rapid tour of the museums and picture galleries of Italy, with a tutor. The Prince then desired to return to the university for at least a couple of years, but his early marriage will put an end to this. Drilling a squadron will be his fate instead.

Coming to Canada To Secure Fortune

English Lad Inherits Wealth From Father Whom He Never Knew.

Niagara Falls, Ont., February 9.—Henry Woodford is coming to this country from England shortly to receive the larger part of the fortune, some $70,000, left by his father, Henry E. Woodford, whom he never knew. The story is a most romantic one.

Henry E. Woodford was born in Tipton, England, in 1836. In 1864, when a little more than 19 years old, he married Mary Aggott, of Bloomsbury. The couple came to America, and lived in Toronto, where Woodford worked as a printer. After a time they returned to England, where the young wife died in giving birth to a son. The child, was named Henry. The father, crazed with grief, left his infant son with friends in the old land and came again to America. He worked in Toronto, Stratford and Quebec, and in 1884 came to the then village of Suspension Bridge. He made money and saved it, and was a prominent citizen of the place. When the Woodford will was produced it showed that in his declining days Mr. Woodford's mind had turned back to his early life. The will gave one-tenth of his possessions to charities. The remaining six-tenths were to be given to the long lost son if he could be found.

Conservative Gathering Now In Prospect

Will be Held in Ottawa Some Time Next Summer.

Ottawa, February 9.—A big Conservative convention, with delegates from all over Canada, will probably be held in Ottawa next summer.

The intention is to follow the example of the Liberals in 1893, and hold a large demonstration, at which a new platform will be prepared to confront the government at the next general election, which will very likely take place after another session of Parliament has been held.

The Liberal convention of 1893 accomplished much in cementing the party and preparing the way for the victory of 1896.

The Conservatives say that the time is opportune for similar action on their part. In the meantime it is suggested that the present session should pass over as quietly as possible, as there is likely to be some change in the trade and tariff policy of the party at the coming convention so as to meet the requirements of the growing west and the high tariff which confronts the Dominion to the south.

It is said that a good time for the convention would be about the time the Canada Central Fair is on, a day or so before it begins. No better point than Ottawa could be secured for a convention—especially a political gathering.

Marlborough Gets the Sum of $100,000

London, February 9.—The Duchess of Marlborough, formerly Miss Consuelo Vanderbilt, and her two children, the Marquis of Blandford and Lord Ivor Spencer Churchill, with W. K. Vanderbilt, Jr., her brother, have left for Beaulieu.

It is said that the children will spend six months yearly with each parent. Under the new arrangement the Duchess' father will allow her and the Duke each $100,000 a year.

Napoleon's Spooning

Cleveland, Ohio, February 9.—A valuable print tabooed by Emperor Napoleon was found today in an old bookstore by J. P. Kepfort, opposite the Rockefeller Building. It shows the Emperor and his second wife, Marie Louise, in an affectionate attitude. The picture is one that escaped the ruler and his servants.

This print is a reproduction of the copy made from the Gerard painting of the Emperor, with a picture of Marie Louise added. The Emperor was so angered with the picture, it is said, that he ordered it and all reproductions destroyed, and the few that escaped destruction are now highly treasured.

Farm and Cash Faded Rapidly Away

Forty-Year Resident of Zorra Takes to Woodstock to Escape From Misery.

Woodstock, Feb. 10.—Weak with age and sickness, without food or fire, and wholly dependent upon the charity of the neighbors (ours about for the past six months. Mrs. Alexander Ross has dragged out a miserable existence in a wretched shack on the Governor's road, about two miles west of the city. Her condition was such that steps were taken by the authorities which resulted in her removal to the General Hospital. Her condition now is somewhat improved, but it is hardly expected that she can recover.

Mrs. Ross is well known throughout both Zorras, she having lived for the past forty years on lot 10, concession 9, West Zorra. About twenty years ago her husband, Donald Ross, died, leaving her in possession of two hundred of the finest acres in West Zorra, with probably $5,000 in the bank, together with a good stock and all the implements necessary to carry on a successful farm.

There was one son, Davin, and he is probably the cause of his mother's condition. About thirteen years ago Mrs. Ross deeded the entire property to Davin, and although with all those accessories, Davin's indolence lost for him everything. Davin was like several other boys, given a wee bit to the bottle. He also had a great tendency to separators, engines and everything pertaining to machinery, and, although "Jack of all trades," orangemaster of none. He was illiterate, and his poor education, coupled with his love for the bottle succeeded little by little in losing money, farm and all.

Davis, however, showed great business zeal in signing over one acre to his wife, where they now live. Mrs. Ross had a life lease on the property, and when all was gone, she was given a half acre on the Governor's road, where she has been residing until removed to the hospital. Davin Ross still lives on the one acre on the corner of the old farm. He has a large family, and they eke out a mean existence. His little garden is conspicuous for the weeds it grows, and if one were to pass there today he could hear the pathetic squeal of a razorback pig as it wallowed in its pen.

Intercolonial Also Is Short of Cars

Ottawa, Feb. 10.—The Department of Railways has received from the Government of Saskatchewan a request that a number of cars and locomotives from the Intercolonial Railway be loaned for use in the West, in view of the inability of the railways there to supply or move cars enough to meet the immediate necessities of the people. Hon. Mr. Emmerson replied that, owing to lack of cars and motive power on the Government railways, he regretted that none were available for use in the West. The Intercolonial is about as badly off in this respect as any of the other railways. There are now 1,000 cars on the trucks which cannot be moved owing to scarcity of locomotives, and there are 18,000 cars of goods waiting to be shipped, but no cars to meet the demand.

"The car shops we all away behind in their orders," said Deputy Minister Butler last night. "We are like all the rest of the roads, and cannot get new cars fast enough to keep pace with the growing traffic."

FOUND LETTERS IN A FISH TANK

Further Traces of a Systematic Robbing of the Mails.

ROBBERY TOOK PLACE JAN. 5

Grand Trunk Car in Hamilton Yards Apparently Entered by the Thieves.

London, Feb. 11.—The robbery of a bag of mail matter from a rail car at Hamilton on Jan. 5 was brought to light at the Grand Trunk car works in this city a day or two ago, and now officers are doing their utmost to get a clue to the identity of the thief.

For some time past residents of Palmerston, Southampton, and other northern towns and villages have made complaints to the post-office authorities about the mysterious disappearance of mail, but all attempts to fathom the matter were futile.

Recently, however, a car used for the carrying of fish to be deposited in lakes and streams arrived at the Grand Trunk shops here to undergo repairs, and when a workman looked into one of the tanks he was much surprised to find an open mail bag and a large quantity of letters, papers, and magazines. The address of the letters had been opened, while the wrappers had been torn from the magazines and papers.

Mr. Thomas Trevorrow, master car builder, was notified, and he in turn informed the post-office inspector's office of the matter. After the mail matter was taken to the post-office. The contents of the letters had been thrown into the tank without being replaced in the envelopes, the result being that it was impossible in many instances to have the letters forwarded to the persons for whom they were intended. The same thing pertained to the papers and magazines.

The robbery of the mail car must have taken place in the yards of the Grand Trunk at Hamilton, where the train for Palmerston is made up. The thief had access to a car into the car while the mail clerk was absent, and securing the bag, had taken it to the fish car, which was standing on a siding awaiting removal to London to be repaired. The date of the robbery was fixed without any difficulty. The fish car, however, had laid in the Hamilton yards for nearly a month after the robbery, and as no person there had any reason to go through it the robbery remained undiscovered until the car was sent to London.

Lord Kitchener Was Not Injured

London, Feb. 10—Lord Kitchener has wired as follows: "My horse put its foot in a hole and fell. I was not injured in the slightest; am perfectly well, and have been out all day. Thanks for kind enquiry."

The enquiry was made regarding the narrow escape from a serious accident which Lord Kitchener had during manoeuvers outside Poona. While Lord Kitchener and Gen. Richardson, commanding the Poona division, were inspecting the trenches of some hill defences, both rode over a covered trench, which collapsed beneath their weight.

Both were precipitated into the trench, a depth of some 14 feet, and Lord Kitchener's horse rolled over him. The shock was great, but fortunately the commander-in-chief was not injured.

General Richardson broke his collarbone.

A Nurse's Error Is the Cause of Death

In a Toronto Hospital She Gave Dose of Iodine in Mistake for Tonic.

Toronto, Feb 10.—Supposedly as the result of a mistake on the part of a nurse, Miss Dessie Smith, aged 60 years, died yesterday at St. Michael's Hospital.

Mrs. Smith was admitted to the hospital on January 4. She underwent a slight operation, and made a satisfactory recovery. A slight cold was the only bad result. At the time she was taking cascara as tonic.

Wednesday morning, it is said, the nurse in attendance administered by mistake a mixture containing iodine, a poison. When the mistake was discovered the house doctors at once gave Mrs. Smith the usual antidotes. She lived until yesterday afternoon.

The doctors held that death may have been caused from acute pneumonia, resulting from the emergency measures taken after the mistake was discovered.

Mrs. Smith's husband is a carpenter in the employ of Christie, Brown, and Co. She leaves a grown-up family.

Vatican Will Fight

Rome, Feb 10.—The Vatican authorities, after studying the text of the circular issued by the French Minister of Education, M. Briand, to the Mayors regarding the making of contracts with the parish priests for the lease of the churches, do not accept the clause which provides that the Mayors may not renew new contracts with new parish priests as this, it is declared, would submit the priests to the Mayors' exchequer. Nor does the Vatican accept the proposed amendment in the organization of cultual associations, as it is not proposed that this latter shall recognize the hierarchy.

Tolstoi Described as the "Sick Beadle"

London, Feb 10.—M. Maurice Maeterlinck, in an article which appears in the Petit Bleu of Brussels, deals with Count Tolstoi's recent attack on the Shakespearean plays. M. Maeterlinck laments the ignorance of Shakespeare, especially prevalent in France, which is the sole reason why any consideration is paid to such attacks. Tolstoi, he adds, has in past years presented an afflicting spectacle to his adherents. "We who have loved him so much tremble to read whenever he breaks silence. He now gives to the world poor, feeble messages of morbid resignation, messages such as might have been conceived and elaborated by a monk of the year 1000 or by a sick beadle."

The Legal Points in the Harry K. Thaw Trial

Jerome Will Have Difficulty In Upsetting Wife's Story

New York, Feb 10.—The nature of District Attorney Jerome's cross-examination of Evelyn Nesbit Thaw, who has already spent two days on the witness stand in the defence of her husband, was the principal subject of discussion when court adjourned yesterday until Monday. Mrs. Thaw's direct examination has continued almost without interruption for two days, and there is as yet no sign of the climax—the moment when the attorneys for the defence will turn her over to the District Attorney for cross-examination.

The District Attorney has a difficult problem to face in his cross-examination. With the truths or falsity of the stories the witness has testified she told her husband he has nothing to do. The statement that she told her these things Mr. Jerome cannot possibly disprove. His strongest chance in cross-examination is to make her stumble in the story as she has told it with the gentle guidance of her husband's attorneys, or compel her to admit telling him other things about her past life, which would tend to undermine in his mind the effect of the story of her relations with Stanford White. He can introduce evidence, if he can get it, generally affecting her credibility as a witness, but so far the main statements in her testimony, Stanford White himself, if he were alive, could not go on the witness stand and deny them. The point in the case is not as to the truth of these stories, but as to their effect on Thaw's mind. This fact was impressed on the jury yesterday when the court, at the request of the District Attorney, informed the jury that under the law the prosecution could not introduce evidence with the object of disproving any statement that Evelyn Nesbit Thaw has made except the statement that she told her husband all the things she has testified to.

That Mr. Jerome will strenuously object to the further introduction of what he termed "Testings of the Tenderloin" was plainly shown late yesterday, when he claimed, and was sustained by the court, that as yet there had been no evidence to show that Thaw is now, or ever was, insane, and that until this was shown any more of these stories would be entirely immaterial. This ruling by the court may bar any other stories that Evelyn Thaw may have to tell, until such time as it has been shown that there is a reasonable doubt as to the proper balance of Thaw's mind at the time of the shooting. If this is done, then the flood gates are likely to open for the admission of almost anything that Thaw may have told his wife or she had told him, or that he heard in any other way, that to any extent might have contributed to the unbalancing of the mind. Several attempts were made yesterday to show that Thaw was of unsound mind, but the District Attorney blocked them for the time being.

Thaw's attorneys stated last night that Mrs. Thaw would again assume the stand Monday morning on direct examination.

Reach North Sydney After Many Perils

Captain and Crew of the Wrecked Schooner Elizabeth N. Nicholson Arrived Safely at Aforesaid Place.

North Sydney, N.S., Feb. 10.—Captain Thomas Nicholson, Ruksport Town, owner of the Gloucester schooner Elizabeth N. Nicholson, which was wrecked ashore several days ago at Lark's Harbor, Bay of Islands, but was successfully pulled off Sunday, arrived here the other night on the steamer Bruce. With the captain came eight men belonging to his vessel, besides three of the crew of the Gloucester schooner, M. B. Stetson. Both vessels are now frozen hard in the ice at Lark's Harbor and will remain there till spring. On the Elizabeth, N, are four hundred barrels of salt fish and about eight hundred barrels of frozen herring. The latter no doubt will be destroyed. The Stetson has also a large quantity of fish on board, which will likely become a total loss. Captain Nicholson and crew with the exception of a couple of men, who will remain by the ice-bound craft, are expected here on their way to Gloucester.

Captain Nicholson and the eleven fishermen who came with him tell a harrowing tale of hardship undergone in abandoning their vessel in the ice. From Lark's Harbor the men were obliged to walk twenty-two miles to Barchy Cove, part of the journey in the teeth of a furious and blinding snowstorm over cliffs and hills covered with ice and snow. Both Captain Nicholson and cook, Thomas Edwards of the Elizabeth N., had a narrow escape from death. While walking on the ice it gave way precipitating Edwards into the icy water. A life chain was formed by the men and with great difficulty the cook was saved. No sooner was he rescued than Captain Nicholson went through, and for the second time the benumbed fishermen were obliged to lie on the ice and form a life chain.

When the shore was reached the men were in a fatigued condition, and could not have stood out much longer. However, the sought shelter in a nearby house, where they were kindly received by the good people at Birchy Cove, who did everything possible to alleviate their sufferings and prepare them for their journey to Port aux Basques.

Yesterday morning Captain Nicholson, together with the crews of both vessels left for Gloucester. Captain Nicholson will return again just as soon as the ice begins to break up at Bay of Islands.

The remainder of the crew of the auxiliary Gloucester schooner Vigilant, which was carried ashore at Wood Island and afterwards destroyed by fire, also arrived on the Bruce and took to their Gloucester.

The steamer Bruce reached port with her passengers and a small freight, after a remarkably good trip, everything considered, of about eight hours. The steamer again demonstrated her ice-breaking ability by ploughing through over twenty miles of ice, which at times caused the passengers worry lest the steamer would be obliged to return to Louisburg.

The Beautiful Zephra Liberally Patronized

Mr. Booth Says He Has Always Found Canadians Warm-hearted—He Praises the Skill of His Local Talent—Two More Performances.

The two presentations of this beautiful scenic and musical offering at the Grand Opera House, Saturday matinee and night, were liberally patronized, and deservedly so. At the evening performance the rough edges naturally consequent upon the first appearance of 200 local people in so big an effort had worn off, and the manipulator of the lime-light met his cues more promptly than on Friday evening. The whole piece was executed with a high degree of precision and finish on Saturday evening, which materially enhanced the audience's enjoyment of a truly a superb production as "Zephra."

After the first act, Saturday night, Mr. H. J. Booth, the talented director and manager of the piece, addressed the audience in a few well-chosen words, thanking them for their valued patronage, and eulogizing Canadians as a truly warm-hearted and lovable people. Mr. Booth is an American, and his appreciation of the sons and daughters of this great Dominion is very acceptable; and in return the opera house, tonight and Tuesday evening cannot hold sufficiently large audiences to offer Mr. Booth the appreciation due him for the hands of Peterborough for the marvellous musical spectacle he has so skilfully prepared and produced. Mr. Booth was very reserved in taking to himself any credit for Zephra's success, contending that without the materials necessary to so large an undertaking this effort as would have been fruitless; the had found in Peterborough exceptional talent for his purposes and they had admirably rose to the occasion. He had only had four weeks in which to train the nearly 200 local memembers comprising the company, and the results had been most gratifying to him indeed. He invited continued liberal patronage the next two performances, as the production is for the benefit of the 57th Regt. Band, of which all citizens should feel proud.

Zephra is in reality a pantomime modeled on the lines of those great Christmas productions that made the old Drury Lane theater, London, England, famous. So stupendous and brilliant an offering has never before been made in Peterborough, and one can have no real conception of its beauty its flittering pageantry, beautiful scenery, merry songs and music, fascinating dances, wonderful drills and evolutions, which is acceptable measure of sentiment commends the piece to all lovers of clean entertainment; there is nothing to offend, and everything to please.

The spectacle is staged and operated so smoothly that Mr. Booth undoubtedly enjoys the hearty co-operation of Messrs. J. J. Turner & Sons, lessees of the Grand, in his scenic work. This should be appreciated by the public.

The work of the Band's orchestra is excellent, and materially contributes to Zephra's success.

The drill of the White Hussars is so splendidly offered that their evolutions are executed amidst a continued shower of applause.

Foreigners Raid Bar Room

Brockville, February 7.—The inhabitants of the village of Somerville, near Gouverneur, were disturbed the other night by a gang of twenty-five miners from the Caledonia mines, who appeared at the hotel there and demanded drinks. The proprietor refused them liquor, and they began to bombard the place. The windows of the hotel were broken, and several gained entrance to the bar-room by breaking down the door. After getting a liberal supply of fire-water they left. Warrants have been sworn out for several of the gang, who were Italians and Hungarians.

To Stop Overcrowding

Toronto, February 9.—The overcrowding of street cars was discussed again by the Board of Control, and the city solicitor was instructed to ascertain whether the company could be indicted under the criminal code. If a case can be made out against the railway, the legal department will enter a criminal prosecution at once.

IMPROVE YOUR COMPLEXION

Give Up Cosmetics And Seek The Cause of Your Bad Color.

When it's so easy to bring back the bloom of youth, to remove the blemishes and fill the hollows, isn't it foolish to plaster on cosmetics? Hollowed eyes and fallen in cheeks are produced by disorders of the alimentary canal.

Remove the cause—correct the condition that keeps you from looking as you ought. Use Dr. Hamilton's Pills and very soon you'll have a complexion to be proud of.

Just imagine how much happier you will feel when those pimples and murky look have gone.

Healthy looks came to Miss Vrooman, a well known resident of Belfast, from using Dr. Hamilton's Pills. I used to look so yellow I thought it might be jaundice. There was simply no color in my cheeks at all. Today my skin is clear and never gets that murky, dull appearance, it had before. Dr. Hamilton's Pills have also given me a good appetite and improved my general health also."

Not only the complexion, but every organ of the body is strengthened, cleansed and made healthy by Dr. Hamilton's Pills. Buoyancy, vim and a feeling of vigor invariably follow their use. Sold in yellow boxes by all dealers; 25c. per box or five boxes for $1.00, or by mail from N. C. Polson & Co., Hartford, Conn., U.S.A., and Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

CARVING OUT A CAREER

Men who have achieved great things in life are not always estimated at their true value until their lives are inscribed in the nation's history. While these giants in commerce, statesmanship, and in other walks of life, are in the flesh the world seems never able to view them from the proper perspective, and hence it is left for succeeding generations to gather inspiration from their lives.

Such a man as this was the late Mr. Timothy Eaton, and such was his life. The originator of the departmental store idea in this country, a prince among Canadian merchants, and a man who ranked high in the world's mercantile life, the people of this country during the time that he was building up his extensive business and carrying out his ever-enlarging enterprises, probably as in other similar cases, failed to see the man. Those who knew him best speak of him as a man of sterling worth and of high ideals, a man who while achieving remarkable success in his own life never lost sight of the interests of his fellowmen. Of his means he gave freely to charitable and philanthropic enterprises, and in a very special manner he showed consideration for his great army of employes by closing his big store at 6.30 every afternoon, being the pioneer in the early closing movement in Canada.

To the rising generation and to the youth of the next generation also, perhaps, the name of Timothy Eaton will come as a source of inspiration, for what men have done others can do. Mr. Eaton began in very lowly circumstances, and came to Canada with little more than his knowledge of the draper's business, in which he had just completed his apprenticeship. Possessed, however, of the qualities which win, he soon had a little business of his own; and although doubtless many times discouraged, and often confronted by obstacles which would have daunted a man with less will power, he triumphed over all discouragements and surmounted all obstacles and rose to a commanding position among his fellowmen, a credit to himself, and honor alike to the land of his birth and the country of his adoption.

Many will find fault with his methods, but the fact remains that the poor Irish boy, the youngest of a family of nine, children of a widowed mother, who were in straitened circumstances, by his own energy and ability in this Canada of ours, carved out for himself world fame as a merchant.

The possibilities before the youth of our day are even greater than those of forty or fifty years ago, and the same qualities that have brought success to the men of our country who today stand out conspicuously among their fellows, will achieve for the men of tomorrow even greater things.

Another Gilmour Hotel Action

Ottawa, February 7.—William Campbell, the contractor who was injured by the falling of the wall of the burned Gilmour Hotel, instituted an action for $6,000 damages before Judge MacMahon.

WOMEN DOG THIEVES.

Pets Stolen on London Streets and Afterward Disposed Of.

Dog thieves have been very busy recently in the neighborhood of Oxford street, Regent street, and Piccadilly.

The police believe that there is an expert and highly-organized gang at work. The ordinary dog thief with his sack for small dogs and a stout piece of rope for the larger ones is always at work; but recent losses point to a more daring method of appropriation. It is believed that many of the thefts of smaller dogs are committed by women. They hang about on the outskirts of crowds of ladies looking into the shop windows, and the small terrier is snapped up and either concealed under the cloak or the thief hails a passing hansom. As the female thieves are invariably well dressed, the fact that they have a more or less protesting small dog under their arm occasions no comment.

Of the larger types, collies and poodles are the most sought after by the dog thieves, because they seem to be more easily handled by strangers, and because they always command a good market on the Continent, especially in France. The smaller dogs have various fates. They may be "faked" to some extent and sent down to "Club Row," in Shoreditch, where there is a regular dog market every Sunday market, and where ten or fifteen shillings can easily be obtained for a good terrier, the purchaser, of course, having to run the risk that the dog is stolen and may be claimed. Another method of disposing of them is through the medium of various papers, and a third resort is to hold them to ransom. This last method is by far the most profitable way of realising, but it requires to be carefully carried through.

To show the extent to which dog stealing is carried on, it may be mentioned that at Vine Street Police Office there were recently eight notices offering rewards for "lost" (the polite way of putting "stolen") dogs, and at Marlborough street and all the other west-end offices a correspondingly large number. The rewards offered ranged from a minimum of £1 up to £20.—London Daily Mail.

Whistler's Magic With the Brush.

Whistler was a whimsical genius even as an art coach, and Mr. Cyrus Ounce gives with pen and pencil in the November number of "The Pall Mall Magazine," some interesting reminiscences of the way in which "The Master" used to touch up a student's drawing into a burlesque or a masterpiece, according to his humor.

We all crowded around breathlessly watching his every movement; this was certainly a treat never to be forgotten. Intense interest was depicted on our eager and pleased faces, and I am sure we all inwardly felt horribly elated and a great pity for those of our fellow students who were not present.

There stood frail little Whistler staring at the model as though she were a ghost; open eyes and mouth, working on the palette, he held his breath, then, slowly extending his arm, and gently but firmly drawing the brush along the canvas, he uttered a deep sigh, almost a puff of relief, ending with the finish of the stroke. This painful process was repeated at almost every touch, and was exceedingly comical. It was marvelous though, to see the transformation he wrought; from an ordinary study he changed it to a canvas containing all the qualities of a great master.

As the time went on uneasiness prevailed; we shifted from one foot to the other, leant on each other's shoulders, and exchanged glances of sympathy with the model, who was lifting first one leg, then the other, in a wild endeavor to get the blood to circulate, making horrible faces as she looked at the clock (Whistler would only have women models, never men.) This had not the slightest effect on Whistler, who became more and more excited, his strokes more energetic, and the white lock reared itself defiantly in his disheveled hair.

With a louder puff than any that had preceded it, Whistler suddenly laid down his brushes, saying, I think that's better."

We surged around the picture, and several laughing offers were made for it; but the lucky possessor carried it off triumphantly, for I am sure that up to the last moment he had expected Whistler to say: "I'll let you take this with me."

London's Dinner Hour.

A momentous change has been decreed in the habits of London society, initiated by the King, says a note in the society columns of a London paper. His Majesty disapproved of the tendency to make the dinner hour later and later and has decreed that hereafter the fashionable dinner hour shall be from 6.30 to 7.30. Before this change was instituted society dined from 8 to 9. The new dinner hour, which is a return to earlier manners, is welcomed by everybody. It will benefit the theatres, which have lost many patrons through the late dinner hour, and it will also send more people to the restaurants for supper. People who dined at 8 o'clock were not always inclined for supper afterward and could not reach the theatre before the middle of the performance.

London's Juggernauts.

Horse drawn vehicles still hold pride of place in the list of London's juggernauts despite the popular impression that the various forms of motors hold the lead. A return supplied by the Home Secretary for the past month shows that the accidents numbered 3,056, with personal injuries in 968 cases and 28 deaths, of which 23 were caused by horse drawn vehicles. The following is a summary of the return: Horse drawn vehicles, 902; electric tram cars, 129; motor cars and cycles, 155; motor omnibuses, 95.—London Express.

Albert Condon, of Deure, Better

Albert Condon, a young man from Douro, aged 17 years, who was on Thursday taken to the residence of his sister in the city, suffering from a broken jaw, nose and other injuries about the head, caused by a tree falling on him, as he was assisting his brother in felling a tree, was reported last night as being somewhat improved although still very

SELECTIONS

BALLOONING.

The Cost and the Fascination of This Aerial Sport.

I have often been asked how ballooning compared with other sports both in cost and in enjoyment. The first cost to those who wish to soar above the clouds is smaller than in automobiling, but each ascension costs some $300. A flight may last less than an hour or it may continue the better part of a day.

The tendency is toward flights of longer duration, as invention helps the aeronaut, and with the multiplication of its devotees, particularly among the amateurs, the records will become longer both in hours and miles.

When one leaves the earth the impressions come so fast that one can hardly differentiate them. They produce a kaleidoscopic effect. A man must stop and concentrate his mind on certain special sensations, or else on returning to earth he will find that he has no sensation in particular to tell about.

There is the impression of the crowd of people shouting and waving their hands. Before you realize it they have vanished as individuals. The earth sinks from you, the houses become tiny boxes, and large rivers appear brooks that you could easily jump across.

The lakes are pools, and marsh land seems solid. This latter was the cause of my friend Nocquet's landing where he did and sacrificing his life. Forests become smooth like pasture land. Railroad trains are like crawling worms, and all the earth sounds eventually cease.

At 1,000 or 2,000 feet you pass the dust line, which is as clearly marked as the line between water and air. As high as 2,000 feet there are still frequently seen butterflies, mosquitoes and other insects. Remarkably beautiful effects of clouds are seen from the balloon, especially when the sun shines on them. They often seem like snow banks, and their edges are always bluish, like water, and ever give the aeronaut the sensation of approaching the ocean.

When in the clouds you can see only the basket and its occupants, and you may suddenly pass out of them to find that you are driving straight into a mountain peak, as we did once. If you stay in the fog there is nothing to warn you of such a danger except the roaring of the wind in the treetops, and a quick casting out of ballast may be necessary to save you from balloon wreck on the crags.—Dr. Julian P. Thomas in Appleton's.

Australian Gold.

Although most of the Australian gold is now obtained from depths of hundreds and thousands of feet, it is still possible to acquire a respectable nugget by pick and shovel close to the surface. The other day some workmen were making a drain near the city hall of Bendigo when the pick of one of them rebounded after having struck something hard. "That must be a nugget," remarked a jocular bystander. "I'll look," said the workman, and the next moment he had a lump of quartz thickly studded with gold in his hands. Then the earth that had been thrown out in the making of the drain was "cleaned up," as the miners say, and smaller gold specimens were secured. And now, if the law permits, a shaft is to be sunk in the back yard of a hotel close by.

Denatured Alcohol.

It is very misleading to base elaborate arguments on German experience with denatured alcohol. The conditions are by no means similar. Germany has no natural supply of gasoline and kerosene as have we. Germany depends upon alcohol; we do not. There are many problems to be met in this matter. In this work the farmer, distiller and machinists must co-operate. The advantages from the increased use of alcohol for industrial purposes will be manifold, and if the farmer keeps awake he will get his share of them.—Farming.

Individuality in Gifts.

Individuality should be the one thing looked for in Christmas gifts. They should be the particular thing the recipient desires, if possible, and if there is anything that can be marked it should be. One handkerchief marked with all the initials is worth half a dozen bought with a single initial, which any one might have. Everything is marked this year, the lingerie and even fine shirt waists in tiny handkerchief letters. It only costs a few cents a letter to have this done.—Harper's Bazar.

Maple Insect.

A scale insect known as the cottesy maple scale has been doing a good deal of damage in some parts of the United States, especially in fine sugar maples grown for shade. This scale is much larger than the San Jose, larger even than the oyster shell bark louse. It has been found that the insect could be controlled by a winter treatment of kerosene emulsion, which should be made up rather strong.—Country Gentleman.

An Electric Overcoat.

The Electrical World announces the invention by a resident in Paris of an appliance known as the "electric thermophile." It consists of a light battery to be carried in the pocket and an arrangement of wires attached to an ordinary suit of clothes which will keep the wearer warm and do away with the necessity for an overcoat or of doors or a fire at home.

AN OPEN LETTER

From Mr. W. J. Gage, Chairman Executive Committee National Sanitarium Association.

The Trustees carry on this work, having faith in a generous response to their appeals for necessary funds.

TORONTO, CAN., 1907.

DEAR FRIEND,—Out of the several hundred letters received, I reprint on this sheet two that suggest the urgent need and the work of the Muskoka Free Hospital for Consumptives.

The pity of it all is that no letter, or letters, can be written, telling the full story of those who are seeking help.

Because of the contagious nature of the disease, the lot of these poor sufferers has become an increasingly sad and difficult one. To tell the plain truth, relatives and friends often shrink from caring for their afflicted ones through dread of this disease.

The doors of every hospital in Toronto are closed to the consumptive, and this is generally the case elsewhere.

In Canada—the most prosperous country in the world—a country justly proud of its Christian and benevolent institutions—what shall be done?

The doors of the Muskoka Free Hospital for Consumptives stand wide open for these poor sufferers.

All that is now needed to care for double the number of patients in residence, is money. During the past year much has been done to prepare for the extension of the work. A new water supply and sewage system have been installed.

As soon as the work is fully known, all the money needed will be forthcoming. Sir Thomas Barlow, the King's physician, after a visit to the Free Hospital this summer, sent his cheque for five pounds, in appreciative recognition of the work. The Misses Dow of Montreal this month send their cheque for six hundred dollars. All classes and creeds help.

The widow's mite and the rich man's gifts, all come to encourage the trustees to carry on and extend this great national charity.

$50,000 is needed. Will you share in the privilege of helping?

Yours sincerely,

W. J. Gage

NO FATHER, NO MOTHER, NO HOME, WORSE THAN A PRISONER.

GARFIELD BRACEY, BERLIN, ONT.—Enclosed please find doctor's certificate and examination papers. Hope you will secure me a place in your Sanatorium. You will notice my circumstances is a hard one: no father no mother, no home worse than a prisoner. Nobody wants me on account of my disease. Hoping you will have the charity and consider my position and give me a position at once in your Sanatorium, I ever pray.

AN ORPHAN, WITHOUT HOME OR MEANS.

DR. A. E. HANNA, PERTH:—I have a patient here, a young fellow in whom I am greatly interested. He has tuberculosis. He is a poor young fellow, an orphan, out of house, without any means. If we get him up would you take him in and do the best you can for him? I know how difficult it is to accommodate all who require treatment, but this is a special case.

"I shall pass through this world but once. Any good thing, therefore, that I can do, or any kindness that I can show to any human being, let me do it now. Let me not defer it or neglect it, for I shall not pass this way again."

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 80 acres of rich land and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 3 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full d[illegible] is about ten feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of [illegible] and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 24 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 8, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bigner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 3, and it certainly shows up fine. This shaft now has 90 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week in the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with the south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gattin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s, Omaha, Winnet, Good Luck, Hobo, Gattin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 10 to 20 feet in thickness, lying at a depth of from 50 feet to 75 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in sinking holes and sinking shafts to prove not only the existence of paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 50 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the big unboundaries of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tip-on, Magnolia, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 800,000 pounds of rich ore was taken out by the Hobo. This mine is 1,125 feet from our property and is in the same ore bed. Shaft No. 1 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 3 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize his opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

MAP OF DISTRICT SHOWING SUNBURST MINE.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the subdivide of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 3 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 1 at 55 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91-feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 55 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 26 feet.

Three shafts have been sunk. No. 1 shaft, 5 1-2 by 8 feet, is down 88 feet, well timbered, and has good shaft-house and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 8 1-2 by 80 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 20 feet, then west 60 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 5 1-2 by 9 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter And Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $75,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on all year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Osceola Mining Co.	24 per cent.	Katydid Mining Co.	60 per cent.
Cottonwood Mining Co.	75 per cent.	Mocking Bird Mining Co.	64 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	90 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	28 per cent.	Linger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	146 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it. Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$75.00 buys 400 shares of stock; $8.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $4.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

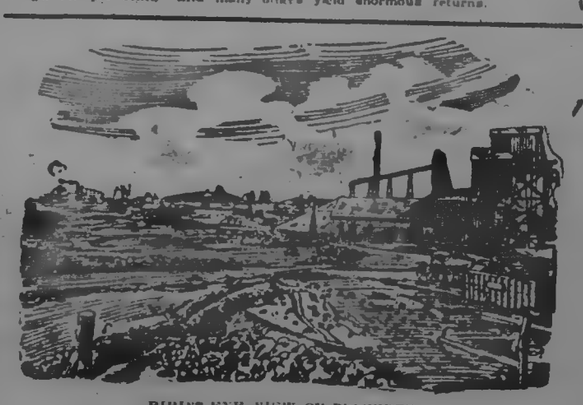
The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1900 from $61.12 per ton for lead and $26.50 for zinc to $52.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 30 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year last shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 367,160.00
A. W. Taylor	120	160,754.00
J. W. Aylor	40	570,571.00
The Burgner Mining Co.	80	198,5[illegible].00
Center Creek Mining Co. (production to date)	80	6,[illegible].00
Mrs. E. J. Chinn	200	22[illegible].00
Majestic Consolidated Zinc & Lead Co.	170	[illegible].00
Continental Zinc Co. (production to date)	52	[illegible].00
Consolidated Troup Mining Co.	280	[illegible].00
Daughtery-Davy-McMillan Estate	80	199,819.00
The Empire Zinc Co.	60	484,000.00
Fox Heirs	411	120,312.00
Granby Mining & Smelting Co., 1905	20	170,324.00
Granby Mining & Smelting Co., 1904	...	1,251,251.00
John G. Quinn	...	1,[illegible].00
Pittsburg-Joplin Lead & Zinc Co.	640	82,[illegible].00
Pittsburg-Missouri Zinc & Lead Co.	10	90,000.00
United Zinc Co.	120	413,204.00
	186	290,474.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.



BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 320 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Blue Jacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 90 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and, at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

THE BLAST FURNACE.

In Cleaning One It Is Necessary to Use Dynamite.

The function of a blast furnace is the reduction of ores to metallic iron. The iron ore, like stone and coke, is put in at the top and the iron and slag are drawn off at the base. The temperature of the interior of a blast furnace when in operation varies according to circumstances, but the molten iron when drawn off is about 1,500 degrees F., indicating a much higher temperature inside.

To withstand such terrific heat, which is maintained by a powerful blast of air which acts much in the same manner as a forced draft on a boiler, the furnace is lined on the inside with a fine grade of fire brick, thoroughly burned. This wall of noncombustible material is about four feet thick, outside of which is the steel jacket of the furnace, about one-quarter of an inch thick.

The lining of a furnace will last from two to six years, according to the nature of the material smelted, the furnace being in continuous operation during that time. It takes about six weeks to reline a furnace.

After a furnace is "blown out," or ceases to be used, there is a quantity of iron which cools and solidifies at the base of the furnace. This is called salamander, and it is necessary to use dynamite to loosen this material and get it out of the furnace so that repairs can be consummated. Salamander has a ready sale, as it is a fine grade of pig iron.

As a rule, when trade conditions are good a blast furnace is never allowed to cool down or be taken out of blast except at intervals of several years for relining.

Took the Wrong House.

On one of the southern railroads there is a station building that is commonly known by travelers as the smallest railroad station in America. It is of this station that the story is told that an old farmer was expecting a chicken house to arrive there, and he sent one of his hands, a newcomer, to fetch it. Arriving there, the man saw the house, loaded it on to his wagon and started for home. On the way he met a man in uniform with the words "Station Agent" on his cap.

"Say, hold on. What have you got on that wagon?" he asked.

"My chicken house, of course," was the reply.

"Chicken house be jiggered!" exploded the official. "That's the station!"

Snow.

The protection afforded to the earth by snow is shown by Ebermayer in "The Influence of Frost." In one observation the temperature of the air above the snow was 6 degrees below zero. Under the snow the thermometer stood at 32 degrees.

Heavy Weapons.

Roman swords recovered from tombs weigh six to ten pounds, and battle axes weighed twenty, showing the great strength of Roman soldiers.

MAKING SHOES.

An Industry That Illustrates the Spirit of Specialization.

No other industry displays so forcibly the modern spirit of specialization and organization as the shoe business. The last sixty years have witnessed a casting loose from former methods, with the evolution of marvelous labor saving machinery and the perfection of thoroughly organized business systems.

Thus the reader may experience a shock of surprise in learning that that crude and primitive article, the shoe peg, is still in use. Peg mills are scattered throughout the hardwood belt of the northeastern United States. Three small mills in northern New Hampshire annually convert some 3,500 cords of birch wood into 170,000 bushels of pegs.

The white and yellow birch, the only species used, is delivered at the mills in cord wood form. The sticks are peeled of their bark and then sawed transversely into sections of a thickness equal to the length of the pegs to be. From the saws these disks are carried by endless chains to a workman who operates a swiftly revolving bur that gouges out the small knots and other imperfections of the wood. Then the pieces pass between a pair of heavy roller presses, which score the wood in closely parallel lines. Another pair scores at right angles to the first. The tiny interstices between the checkered lines will be the points of the pegs.

The splitting machine has the next turn. The essential features of this device are a striated cylinder, which catches in the scorings and thus feeds the disks into the machine, and a long horizontal knife which jigs up and down with lightninglike rapidity, hitting the scored lines with unerring accuracy as the disks are shoved along beneath it. It requires two such machines to complete the work, the first splitting the wood into narrow ribbons and the second cutting in the other direction into the single pegs.

The continuous stream of pegs which issue from the machine passes under the sharp scrutiny of women, who deftly cull out the dark colored heart wood and turn the good pegs aside upon an endless chain to carry them through the finishing processes.

They must be bleached by sulphur fumes, dried in hot kilns, polished with powdered soapstone in metal lined revolving drums, screened free from dirt and finally bagged in canvas sacks for shipment.

The bulk of this enormous output goes abroad to furnish cheap footwear for the peasantry of Europe.—Youth's Companion.

Turkeys and Grasshoppers.

Machines for gathering grasshoppers have been invented and tried, but the most successful grasshopper gatherer is the turkey. It has the advantage of being a very profitable one too. A ranchman in western Kansas raised turkeys enough last year to keep eighty acres free from damage by this insect pest. Next year this ranchman intends raising turkeys very extensively for this purpose, and nearly all of his neighbors are planning to do the same. If there were a hundred turkeys to each quarter section in this alfalfa belt there would not be enough grasshoppers left to damage any crops. And without considering the good that turkeys do, turkey raising is a profitable industry where insects are so plentiful. After they attain the age of three or four weeks, says Country Life In America, they can obtain their whole living in the fields and cost the farmers nothing until late fall.

Cipher Price Marks.

"The cipher price mark, the tag not marked '1.75,' but 'P17CDG,' is getting to be a thing of the past," said a jeweler. "The public mistrusts it. There is nothing that wins the confidence of the public like a price mark in big, plain figures. Most cipher price marks are easily read. They have for their key, as a rule, the sentence 'I push trade.' The 'T' is 1, the 'p' 2, the 'u' 3, and so on down to the 'e,' which stands for 0. Thus '$2.75' in cipher would be '$p r. h.' Ciphers are useful for firms that give long credit, for such firms must naturally ask more from a six months' customer than a spot cash one. But they are very unpopular things. They arouse universal mistrust."—New Orleans Times-Democrat.

Comforts in Hotels.

One of New York city's newest hotels offers its patrons a number of attractive little touches which make it very different from the bare hostelry of other days. Each room has a closet in which are found hangers for coats, skirts and trousers. Each dressing table has a pincushion, tray and powder box. Each room has a desk already provided with ink, pens, stationery and blotters. The tables have spreads, and the chairs have tidies. Surely the modern hotel keeper knows all the secrets of the house comfortable.—New York Press.

France's Battle Line.

In case of war with Germany the matter would be decided along the line of the Vosges. Throwing into the sea 200,000,000 francs every year under the pretext of protecting Nancy, Lille and Paris is serving the interests of MM. Schneider and consorts. It is no less going against those of France and the republic.—Paris Action.

Barbarous Paris Water.

We are far from blaming the prefecture of the Seine for warning us that it is dangerous to drink the water that it supplies us without boiling it. The system, in spite of the millions wasted, is absolutely barbarous. When it does not rain we have no water, and when it does rain the water is not drinkable.—Paris Eclair.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

ADVERTISE IN THE TIMES.

A PATRIOT'S PRAYER.

Though we must die, let me not die
In ignominious strife,
With fate invincible, and sigh
To linger out my life,
With powers decayed, enfeebled mind
And slowly slackening breath,
Burden of pity to my kind
And dead before my death.

No, let me perish, sword in hand,
At honor's sudden call,
Guarding my menaced motherland
And for her safety fall.
Or mount the scaffold with firm gaze,
Martyr to some great cause,
And end my not inglorious days
For freedom's outraged laws.

What is this life except a trust
For nobleness and right,
The torch which, while we may, we must
Still bear and keep alight;
And when, from our exhausted will
It flickers, hand it on,
That it may burn and beckon still,
Till time itself be gone.

But if, in unheroic days,
No great deed may be done,
Let me at least deserve this praise:
"He lived and died as one
Who looked on life with fearless eyes,
And with intrepid mind;
So leaves, where now he silent lies,
An honored name behind."

—Alfred Austin.

RENOVATING THE ABBEY.

Westminster Abbey Begins to Show Effects of Time's Hand.

Like others of England's historic cathedrals—Westminster and Exeter, for instance—Westminster Abbey has begun to show the effects of the hand of time, and the ravages of London's atmosphere.

Repairs upon the Abbey have now been begun, under the direction of the architects of the Ecclesiastical Commissioners, and for several years there will be work going on behind unsightly palisades and scaffolding, much to the disappointment of French and American visitors to London.

Motor omnibuses are held to be partly responsible for making repairs necessary, and residents in Dean's Yard, adjoining the Abbey, are outspoken in their complaints against the vibration which accompanies the motor omnibus traffic to Victoria. A new line has recently greatly augmented the number now passing the north front of the Abbey.

North Front Damaged.

It is to the north front that the greatest amount of damage has been done. Scaling of the stone has become general, and spread along the entire front, seriously affecting the effigies of several bishops and martyrs. A few days ago a large section of stone fell just after the passing of a motor omnibus.

A policeman on point duty near the Abbey front said that the jarring is plainly felt inside the Abbey. The Victoria bound *motors* are worst, he said, and the amount of vibration appears to depend upon the manner in which they take the curve into Victoria street.

The architects admit that in every case where appreciable portions of stone have fallen flaws have been discovered, due to the encroachments of time and weather.

$100,000 For Repairs.

Lack of means has delayed the work of renovation during recent years, but as there is now available some £20,000 a year, the north front is to be re-faced, practically in entirety.

The vibration is distinctly perceptible to worshippers.

How advisable it is to look to the repairs of our historic abbeys and cathedrals is well illustrated in the case of Exeter Cathedral, where the dean has just made the disquieting discovery that the south tower is resting on falling foundations. In the thirteenth century Bishop Quivil removed the fourth wall in order to throw the chapels at the base of the tower into the transepts—a fact which may have helped considerably to bring about the present condition of things. It is all the more serious in the case of Exeter, as the tower contains one of the heaviest peals of bells in the country.

Rothschilds Never Prosecute.

While the Bank of England makes it a point never under any circumstances to relinquish the prosecution or to refrain from the punishment of those who have defrauded it in the slightest degree, being willing, if need be, to spend thousands of pounds to capture and prosecute people who have robbed it of even a few shillings, the Rothschilds make it a rule never to appeal to the courts or to the police in such matters. Of course, they are, like every other banker, the victims of dishonesty, but neither the police nor the public ever hear about the matter. This has always been a principle of the heads of the house, who take the ground that it is better to bear the loss in silence than to disturb popular confidence in the safety of the concern by allowing it to be seen that its treasures are not adequately safeguarded.

Du Maurier Heroines.

When Mrs. Frances Hodgson Burnett was first presented to Du Maurier, who was, in point of fact, rather an undersized man, she exclaimed: "Oh, I am so glad that you are not six feet tall!"

"But why?" asked Du Maurier.

"Because for these many months," replied Mrs. Burnett, who is considerably below the medium height, "you have simply denied us the right to live. You have made us feel that a woman who is not six feet tall has not the right to exist."

"Oh, that is only a trick of mine!" laughed Du Maurier. "I have started again and again to make my heroine a little woman, but before I know it she has somehow grown way beyond my own recognition."

Stop Chinese Riots

Shanghai, February 6.—Anti-Christian riots broke out yesterday at Chinkued, near Soo-Chow, province of Kiang-Soo. Troops temporarily restored order and reinforcements have been sent to the scene of the outbreak.

This is the Safest and Greatest Buy.

SOLICITORS—Messrs. Bicknell, Morine, Bain and Strathy.
TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns **FIVE MINING CLAIMS** containing **160 ACRES**, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Hucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
2 claims, 40 acres, Portage Bay District, showing 4 veins, shaft and cut 50 feet of vein uncovered.
2 claims, 60 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 8-foot level, show 143 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 160 ACRES, divided into 1661 lots, beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 82. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI concession of Coleman. Lease has been granted.

The claim is a 40 acre one and about 40 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the cobalt bearing Nadeau vein following the contact between the middle Huronian quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 80 acres of J. B. 82 at which point it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of small bowlders and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch smaltite together with cobaltite. Assays gave 872-1245-482-that is, silver to the average of over 800 oz. silver, which at the present price of 70c. is equal to $560.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 60 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.0) The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold . It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. There is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

THE REFUGEES

By A. CONAN DOYLE,
Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

"What then?"

"I see the archbishop tying them up together."

"He could not be at the palace."

"On the contrary, he reached the palace about half an hour ago."

De Catinat sprang to his feet. At the palace!" he exclaimed. "Then who gave him the message?"

"I did," said Amos Green.

If the American had expected to surprise his companion by the announcement he was woefully disappointed, for De Catinat approached him with a face which was full of sympathy and trouble.

"My dear friend," said he, "I have been selfish and thoughtless. That fall from your horse has shaken you more than you think. Lie down upon this straw and see if a little sleep may [illegible]

"I tell you that the bishop is there!" cried Amos Green.

"He is there," said De Catinat soothingly, "he is most certainly there. I trust that you have no pain?"

The American raved in the air with his hands. "You think that I'm crazy," he cried, "and, by the eternal, you are enough to make me so! When I say that I saw the bishop I mean that I saw to the last. You remember when I stepped back to your friend the major?"

"It was the soldier's turn to grow excited now. "Well?" he cried, gripping [illegible] again.

"I [illegible] a scout into the [illegible] matter is worth it, we [illegible] one at another hour, and [illegible] another comes back with his [illegible] Iroquois fashion [illegible] good for you."

"Oh, I believe that you have [illegible]

"I went back to the major then, and I recalled to him when he was in Paris to [illegible] by the archbishop's door. I showed him this lump of chalk. 'If we've been there,' said I, 'you'll see a great cross on the left side of the doorpost. If there's no cross, then pull the latch and ask the bishop if he'll come up to the palace as quick as his horses can bring him.' The major started an hour after us. He would be in Paris by half past 10; the bishop would be in his carriage by 11, and he would reach Versailles half an hour ago—that is to say, about half past 12. By the Lord, I think I've driven him off his head!"

De Catinat spun round the cell now, waving his arms and his legs, with his shadow capering up the wall behind him, all distorted in the moonlight.

"Oh, if I could but do something for you!" he exclaimed.

"You can, then. Lie down on that straw and go to sleep."

By persuasions and a little pushing he got his delighted companion on to his couch again and heaped the straw over him to serve as a blanket.

So weary was the young guardsman that it was long past noon and the sun was shining out of a cloudless blue sky before he awoke. For a moment, enveloped as he was in straw, and with the rude arch of the dungeon meeting in four rough hewn groinings above his head, he stared about him in bewilderment. Then in an instant the doings of the day before, his mission, the ambuscade, his imprisonment, all flashed back to him, and he sprang to his feet. His comrade, who had been dozing in the corner, jumped up also at the first movement, with his hand on his knife and a sinister glance directed toward the door.

"Oh, it's you, is it?" said he. "I thought it was the man. They brought those two loaves and a jug of water just about dawn, when I was settling down for a rest."

"And did he say anything?"

"No; it was the little black one."

"Simon, they called him."

"The same. He laid the things down and was gone. I thought that maybe if he came again we might get him to stop. Maybe if we got these stirrup leathers round his ankles he would tell us where we are and what is to be done with us."

"Pshaw! What does it matter since our mission is done?"

"It may not matter to you—there's no accounting for tastes—but it matters a good deal to me. I'm not used to sitting in a hole, like a bear in a trap, waiting for what other folks choose to do with me."

"There's no help but patience, my friend."

"I don't know that. I'd get more help out of a bar and a few pegs." He opened his coat and took out a short piece of rusted iron and three small, thick pieces of wood, sharpened at one end.

"Where did you get those, then?"

"These are my night's work. The bar is the top one of the grate. I had a job to loosen it, but there it is. The pegs I whittled out of that log. You see, peg number one goes in here, where I have picked a hole between the stones. Then I've made this other log into a mallet, and with two cracks there it is firm fixed so that you can put your weight on it. Now these two go in the same way into the holes above here. So! Now, you see, you can stand up there and look out of that window without asking too much of your toe joint. Try it."

De Catinat sprang up and looked eagerly out between the bars.

"I do not know the place," said he, shaking his head. "It may be any one of thirty castles which lie upon the south side of Paris and within six or seven leagues of it."

He was dropping back to the floor and put his weight upon the bar. To his amazement it came away in his hand.

"Look, Amos; look!" he cried.

"Ah, you've found it out! Well, I did that during the night. I could make no way with my knife, but when I got the bar out of the grate I managed faster. I'll put this one back now, or some of those folk down below may notice that we have got it loose."

"Are they all loose?"

"Only the one at present, but we'll get the other two out during the night. You can take that bar out and work with it while I use my own picker at the other. You see, the stone is soft, and by grinding it you soon make a groove along which you can slip the bar. It will be mighty queer if we can't clear a road for ourselves before morning."

"Well, but even if we could get out into the courtyard where could we turn to then?"

"One thing at a time, friend. Anyway, there is more air in the yard than in here, and when the window is clear we shall soon plan out the rest."

The two comrades did not dare to do any work during the day for fear

He sprang down at him in an instant with his bar.

they should be surprised by the jailer or observed from without. The instant that night fell they were both up upon the pegs, grinding away at the hard stone and tugging at the bars. It was a rainy night, and there was a sharp thunderstorm, but they could see very well, while the shadow of the arched window prevented their being seen. Before midnight they had loosened one bar, and the other was just beginning to give when some slight noise made them turn their heads, and there was their jailer standing, open mouthed, in the middle of the cell, staring up at them.

It was De Catinat who observed him first, and he sprang down at him in an instant with his bar, but at his movement the man rushed for the door and drew it after him just as the American's tool whizzed past his ear and down the passage.

"It is scarce worth while to go on," said De Catinat.

"We may as well be doing that as anything else. If my picker had been an inch lower I'd have had him. Well maybe he'll get a stroke or break his neck down those stairs. I've nothing to work with now, but a few rubs with your bar will finish the job. Ah, dear, you are right, and we are fairly treed!"

A great bell had begun to ring in the chateau, and there was a loud buzz of voices and a clatter of feet upon the stones. Hoarse orders were shouted, and there was the sound of turning keys. Five minutes passed, however, and yet another five minutes, without any one appearing.

"Well, I'll have that bar out, after all," said the American at last, rising and stepping over to the window. "Anyhow we'll see what all this caterwauling is about." He climbed up on his pegs as he spoke and peeped out.

"Come up!" he cried excitedly to his comrade. "They've got some other game going on here, and they are all a deal too busy to bother their heads about us."

De Catinat clambered up beside him, and the two stood staring down into the courtyard. A brazier had been lit at each corner, and the place was thronged with men, many of whom

(To be continued)

Rheumatism

I have found a tried and tested cure for Rheumatism! Not a remedy that will straighten the distorted limbs of chronic cripples, nor turn bony growths back to flesh again. That is impossible. But I can now surely kill the pains and pangs of this deplorable disease.

In Germany—with a Chemist in the City of Darmstadt—I found the last ingredient with which Dr. Shoop's Rheumatic Remedy was made a perfected, dependable prescription. Without that last ingredient, I successfully treated many, many cases of Rheumatism—but now, at last, I unfailingly cures all curable cases of this heretofore much dreaded disease. Those sand-like granular wastes, found in Rheumatic Blood, seem to dissolve and pass away under the action of this remedy as freely as does sugar when added to pure water. And then, when dissolved, these poisonous wastes freely pass from the system, and the cause of Rheumatism is gone forever. There is now no real need—no actual excuse to suffer longer without help. We sell, and in confidence recommend

Dr. Shoop's Rheumatic Remedy

PROPERTIES

MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide" The value of the North claim he submits is "enhanced by the fact that on the claim next east on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

STEAMBOAT DRAMA.

Floating Palaces That Furnish Entertainment For River Towns.

Anybody who lives in a town on the banks of the Mississippi river and hears a calliope play at 5 o'clock in the morning knows that it is not a circus that is coming to town. It is the floating palace, which is the name given to a unique form of theatrical transportation entertainment that is used only on the river and its tributaries, the Ohio and the Missouri.

There are at the present time more than a dozen floating palaces. Each of them carries a well equipped stage, a company of from sixteen to thirty-five actors and actresses, and has seating capacity for from 200 to 700 persons. Each of the boats has a steam piano with which the people from the countryside are called to the landings, where the shows are given on the boats, and most of the boats carry pretty fair bands.

Nowhere else in this country or abroad is the drama carried up and down rivers on steamboats. Barring the railroad, the favorite means of transportation in England and in continental Europe is the wagon. There are many wagon shows in this country, but they would find it difficult to reach all the towns that are easily reached by the floating palaces. Many of the towns that get all their dramatic sustenance from these floating playhouses have no railroad connections whatever. If it were not for the shows that float down or up to them by boat they would have to go without theatrical fare.

Mark Twain, who knows the big river about as well as anybody, used to be well acquainted with the old time managers of a few of the floating palaces. He introduces one of them into "Huckleberry Finn." But times change, and men change with them, and the floating palaces of today is much more elaborate and much finer than were the floating palaces of the older time.

They play to thousands of persons each season, and they give pretty good shows. Their managers, who live in Cincinnati and St. Louis, make good profits on the investment.—Chicago Tribune.

The Face of Admiralty.

It is reported that Japan will see the Dreadnought and go Great Britain 1,000 tons better, laying down a battleship of 23,000 tons service displacement. Of course the mistress of the seas will not ignore the challenge, and we must prepare to hear of a British battleship of 25,000 tons. The Japanese, being a proud and progressive people, will not sit still and may be counted on to push the building mark on their side to 25,000 tons. By that time our own big ship enthusiasts will wake up, and the taxpayers will be invited to contribute the cash for a floating fortress of 32,000 tons. So does the race for naval supremacy go, the mind of the competitive world being at present fixed upon displacement as if there was no other factor to be taken into account.—Boston Transcript.

Eating Soap.

From a communication read to the Association of Belgian Chemists it seems that continental bakers are in the habit of mixing soap with their dough to make their bread and pastry nice and light. The quantity of soap used varies greatly. In fancy articles like waffles and fritters it is much larger than in bread. The soap is dissolved in a little water. To this is added some oil, and the mixture, after being well whipped, is added to the flour. The crumb of the bread manufactured by this process is said to be lighter and more spongy than that made in the ordinary way.

An Overworked Title.

A New York book publisher declares that the house business in recent literature has been overdone. "No house book will come from our presses from now on," he says. He cites "The House of Mirth," "The House of Fulfillment," "The House on the Hudson," "The House With the Green Shutters," "The House of a Thousand Candles" and a half dozen other literary structures of like character erected recently as an evidence that architecture is being overdone by the makers of books of fiction, to say nothing of "The House That Jack Built."

Mexican Holidays.

El Mundo, a Mexican evening paper, in referring to the labor situation in Mexico, complains of the excessive number of holidays which the peon thinks he is entitled to and which he takes regardless of considerations. Out of 365 days of the year, according to that newspaper, 131 are devoted to obligatory and traditional idleness. The appalling calculation is made up as follows: Sundays, 52; saint Mondays, 52; solemn feast days, 15; holy days, 8; national feasts, 3; family feasts, 6; total, 131.

Indians In Connecticut.

Connecticut still has a few Indians in its midst. The secretary of the Home Missionary society of the state, Rev. Joel S. Ives, recently preached to a native audience at Mohegan, a Congregational church under the care of the society. There are about twenty-five members, and a young woman has recently taken charge there. The place is between Norwich and New London.—Indian's Friend.

Voting on a Play.

M. Boggiano's voting apparatus at theaters has received but scant notice. When the spectator leaves his seat he is presented with a disk, which he throws into a certain aperture if he considers the piece good and into another if he thinks it bad.—Paris Journal des Debats.

William IV.'s Shampoo.

Wilhelmina Countess of Munster, who died recently, published two years ago a volume, entitled "My Memories and Miscellanies," in which she tells the following story of William IV. at Windsor: "Every morning my brother and sister used to be sent for by King William for us to see his kind, cheery face and head washed by his old valet, Jemmett, in a large silver ewer in the most delicious rosewater. The ceremony used always to be performed by Jemmett, who had lived with the King for years. A fresh bottle was used each time, being uncorked in the room; the King, whose hair was short and quite white, would place his head over the ewer, a large towel having been tied around his neck, and the sweet water was poured over it, into the ewer, and then a sponging process used to go on for some moments, filling the room with delicious odor. I think at that moment I wished I was King—more than at any other time. After the ablution came the drying on a soft towel; then the coat and waistcoat were donned, and with a rosy and sweet-smelling face, the old King, after kissing his small chil-

PATENTS PROMPTLY SECURED

Engineers and others who realize the advisability of having their Patent business transacted by Experts. Prelim. ary advice free. Charges moderate. Our Inventor's Advisor sent upon request. Marion & Marion, New York Life Bldg. Montreal; and Washington, D.C. U.S.A.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

HOW IS YOUR VITALITY?

Are You Physically Strong and Able to Work As You Used To?

Perhaps you lack courage?
Out of joint with everything?
Scarcely on speaking terms with your neighbor.

Such low health is pitiable—but curable.

Your brain is fagged, your blood is weak, your reserve of strength all gone.

What you need is Ferrozone, that great vitaliser and nutritive tonic.

It's by making flesh and blood, by infusing Iron and Oxygen into the system that Ferrozone builds you up. It repairs the weak spots, instils new life into worn-out organs—makes you feel like new.

Think it over. By nourishing and strengthening, Ferrozone lifts age for the old and imparts resiliance and buoyancy to the depressed.

Why not be strong and ruddy-colored?

Why stay weak?

Use Ferrozone and enter the healthy life it's sure to bring. Price 50c. per box at all dealers.

Wild Honey Found in Tree

On Wednesday whilst a young man named Payne was chopping down a tree on Mr. Lefevre's farm, he found that it had been the home of a swarm of wild bees. The honey comb was six feet in length and 14 inches through, and was filled with frozen honey.—Lakefield News.

Little Miss Godfrey Passed Away

The many friends of Mr. and Mrs. Hamilton Godfrey, corner Lock and Lansdowne streets, will sympathize with them in the loss they have sustained by the death of their daughter, Olive Pearl, who passed away Saturday morning, aged two years and six months.

The funeral will take place to Little Lake cemetery today.

Mr. Dawson Kennedy is Agent

Mr. Joseph Rickerby, who has been prospecting within six miles of Cobalt, with Mr. Neil Campbell of Sault Ste. Marie, is in the city for a few days. Mr. Rickerby reports that things are booming at Cobalt. When asked by a Times representative concerning the Kennedy-Cobalt mine, he spoke in enthusiastic terms of their property. On their own property Messrs. Rickerby and Campbell have sunk a shaft to the depth of 13 feet and found a good vein of silver. It might be noted that Mr. Dawson Kennedy, of 600 Water street, has taken the local agency for the Kennedy Cobalt stock, which he is fast disposing of.

The New Term
—AT THE—
PETERBOROUGH
BUSINESS COLLEGE
Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.

You cannot make a better investment.

For particulars, address

W. PRINGLE
Opposite Post Office, Principal.

—On Saturday we will sell eight colored stereoscope views for only 25 cents. Hundreds to choose from. Times Bookstore.

LOCAL INCIDENTS

By The Times Man on the Street

—The next annual meeting of the Ancient Order of Foresters of District No. 6, will be held in Ubiscity.

—The township council of Douro, have decided to aid Mrs. Christie and daughter to the House of Refuge.

—Fifty-seven head carcases of beef passed the market-weigh scales on Saturday. This should supply many a table.

—Mr. Dennistoun's lecture on Jean Valjean, at the Y.M.C.A. Pop was well attended and highly appreciated.

—A regular meeting of the Board of Education will be held at the secretary's office, 437 George street tonight at 7.45 p.m.

—The Committee on the revision of prizes for horses met Saturday afternoon in connection with the Peterborough Industrial Exhibition.

—Rev. Geo. Henderson of Port Hope, preached special sermons with the Sunday school anniversary of George street Methodist church yesterday.

—The skating races at tomorrow's carnival in Brock street rink will be worth five times the price of admission. It is said Ben Dusty will enter.

—The Ladies' Aid Society of St. Andrew's church will hold a special meeting tonight at the residence of Mrs. F. L. Hutchison, Charlotte street.

—The old Bell telephone wires along the north side of Charlotte street, are quickly being taken down. A large gang of men were busy there on Saturday at this work.

—A hockey match will be played in Brock street rink tonight between teams representing the C.P.R. and G.T.R. telegraph offices. The game is called for nine o'clock.

—There will be an important meeting of the City League Executive tonight at eight o'clock in the Oriental, when a full representation of the league teams is requested.

—Dr. Morrison has been elected chairman of the local Board of License Commissioners. At their organization meeting, Messrs. H. LeBrun and James Kendry, the other members were present.

—At four o'clock yesterday afternoon a number of young believers from the Gospel Hall were baptised in Bethany Tabernacle. Mr. W. J. Mapledoram preached a sermon on the ordinance of baptism.

—Mr. M. McNamara, proprietor of the Kincaid Farm, is dividing the property up into ten acre lots. Already five reports that ten have been sold for market garden purposes, and inquiries are being made for others.

—This morning is washing day at the police court, quite a large washing too. The line is quite a length, and by the time the sheets are all hung out, it will be getting late, as there are a few women and lawyers to assist in yarn stretching.

Good Entertainment at the Local Y.M.C.A.

Saturday evening the 2nd Y.M.C.A. "Pop" came off duly as advertised.

The evening opened by a instrumental solo by Miss W. Gumpricht, which was loudly applauded. Mr. Gilbert Markle followed by a violin selection, which was also a top notcher.

But the principal event of the evening was the well-known story of "Jean Valjean," adapted by Mr. M. Dennistoun from Victor Hugo's "Les Miserables." Before Mr. Dennistoun arose to give his lecture, the chairman, in a few words thanked the audience for turning out in such numbers to hear the speaker of the evening. He said it was a most decided compliment to the lecturer, as Mr. Dennistoun had render this lecture quite a few times before in this city.

Mr. Dennistoun in a short preface, explained that his rendering of the story was only a synopsis of the world-famous novel, but that he had endeavored to retain as much as possible of Mr. Hugo's fine language.

He then proceeded to deliver his reading which he did in his own inimitable style.

The evening closed with a vote of thanks for the speaker, and "God save the King."

Havelock Hotel Man Gets a Legacy

The Havelock Standard says, Mr. Chas. Armstrong, of town, is receiving the congratulations of his friends on being left a legacy of about $15,000. The money was willed him by a sister. Other sisters and brothers of Mr. Armstrong are left about $50,000 among them. The estate of the deceased lady was situated near Edinburgh, Scotland. The Standard extends congratulations on mine host Armstrong's good fortune.

Mr. Dalton Leaves Town.

Mr. Ernie Dalton left Saturday night on the 5.10 train for his home in Toronto, Mr. Dalton will be missed by the many friends he made during his stay in Peterborough, and will long be remembered by those who heard him in the leading role of the "Mikado," which was put on here some time ago.

Chemong Park Hotel Manager

Mr. George Brown, who recently opened up a restaurant on Yonge street, Toronto, has disposed of this business and will on or about June 1st, again take the management of the Chemong Park Hotel. Although local option prevails there Mr. Brown's past experience with that hotel, and his large number of friends here will ensure a good business being done at the park. He will, shortly after the hotel opens have one party of 900 who will attend a convention in the city.

SOCIAL AND PERSONAL

Mr. George Jackson of Toronto, was in the city on Saturday.

—Rev. J. W. Wardside of Montreal, conducted the services at Knox church yesterday.

—Miss Muriel Moore is home from the Ladies' College at Whitby and is visiting her father.

—Miss W. McFarlane left for Toronto Saturday morning, where she will spend a few weeks with friends.

—Mr. Enoch Morrison, general merchant of Harwood, Rice Lake, was in the city on business on Saturday.

—Mrs. Vincent Eastwood will not receive again until the second Tuesday in March, as she is absent from the city.

—Mr and Mrs. James Hill, of Mitchell, Ont., who came here to attend the funeral of Mr. Schill leave for home this morning.

—Mr. Ed. Fitzpatrick, sec.-treasurer of School Section No. 9, Asphodel, was in the city Saturday in connection with the proposed new school.

—Miss Mabel Bradburn and her sister, Mrs. Hounsom, came up from Peterborough for the Mendelssohn Choir concerts this week. Miss Bradburn was visiting friends in Huron street.—Toronto Globe.

—Mrs. John Birdsall, of Peterborough, spent Sunday in the village visiting friends.—Dr. W. H. Blanchard, of Peterborough, was in the village this week on a professional visit.—Miss M. McWilliams, of Peterborough, is at present in the village visiting her sister, Mrs. R. Carter.—Mrs. John Holmes returned home from Peterborough on Thursday where she had been spending a few days visiting friends.—Lakefield News.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

Only one case was tried at Saturday's session of the police court, Robert Lamberville, was charged with vagrancy. Robert claimed to have been working for a Douro farmer. It seems that he had spent two successive nights in the police station. He was allowed to go on the understanding that he got out of town at once.

There will be one "Sunday drink" to be tried at this morning's police court. Joe O'Toole was picked up yesterday "under the influence." The distinction between a "Sunday" and an ordinary drunk is that the Sunday imbiber gets soaked for $5 as compared with the usual week day tariff of $2 for working on week days.

An Englishman was arrested on Saturday night, charged with being d. & d. The prisoner will ascertain where he is at when the police court opens today.

Patrick Heffernan, who a week ago was admitted to St. Joseph's hospital, on Saturday after turning off the steam heaters throughout the building, demonstrated that he was insane as alleged. He managed to escape from the hospital yesterday, but was shortly captured by P. C. Memary in bed over an Aylmer street shop.

Cecil Shannahan, a gentleman known to the local police who in Dec. Dec 5th, last skipped to Port Hope, after a warrant of commitment had been made against him by the local police magistrate, but returned to Peterborough last Wednesday, was on Saturday night captured in bed at the residence of a relative by P.C. Newhall and P.C. Mabarry, who entered by a rear window, placed him under arrest. About two hours after being brought to the station a friend called and paid up the outstanding fine against Shannahan, amounting to $6.35, so Cecil was allowed to go.

Quaker Oats Co. Will Pay Ten Per Cent.

The American Miller for February contains the following item of local interest,

"Some rumors of a proposed increase in the dividends of the Quaker Oats Company have been heard, and it is expected the common stock will be benefitted. The present rate is six per cent. regular and two per cent. extra, but the understanding is that the rate will be raised to 8 per cent. regular and 2 per cent. extra thus placing the stock on a 10 per cent basis. The annual meeting will be held next month and the exact figures for the year will not be ascertainable until that time. The financial position of the company has been greatly changed during the year. The preferred stock has been increased from $6,000,000 to $9,000,000 and the common stock has been raised from $4,000,000 to $4,500,000. During the year the fixed charges were reduced $66,000 through the payment of the $1,000,000 American Cereal bonds. However, this has been more than offset by the increased dividend charges, which have increased about $140,000. It is expected that this will be more than made up in earnings, so that the surplus for the year should be well in excess of $600,000. The company's present surplus is $958,423.

Council Meetings Tonight

There will be a meeting of the Committee of the Whole, and also a special meeting of the Council tonight, when Ald. Morgan will be answered a question on the two committees of which ex-Ald. Ball was a member. The appointment of a member of the Court Of Revision will be taken up, and there are other matters as well, including some of the legislation that will be contained in the city's private bill.

ASK THE WAITER FOR

served dry with cream to pour over. The hotel will serve it.

"There's a Reason"

ADVERTISE IN THE TIMES

The Story of a Medicine.

Its name—"Golden Medical Discovery" was suggested by one of its most important and valuable ingredients—Golden Seal root.

Nearly forty years ago, Dr. Pierce discovered that he could, by the use of pure, triple-refined glycerine, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native medicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the now world-famed "Golden Medical Discovery," for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its make-up.

A glance at the full list of its ingredients, printed on every bottle-wrapper, will show that it is made from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the Hon. Secretary's endorsement from the leading medical experts and writers on Materia Medica who recommend them as the very best remedies for the diseases for which "Golden Medical Discovery" is advised.

A little book of these endorsements has been compiled by Dr. R. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Doctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the "Golden Medical Discovery" are advised not only for the cure of the above mentioned diseases, but also for the cure of all catarrhal, bronchial and throat affections, accompained with catarrhal discharges, hoarseness, sore throat, lingering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated are liable to terminate in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not perform miracles. It will not cure consumption in its advanced stages. No medicine will. It will cure the affections that lead up to consumption, if taken in time.

Mrs. J. Hanna Won the Bean Contest

It will be remembered that for some time past there has been in Stroud's tea store window, a large sealed glass jar full of beans, with an offer of curtain prizes for the best guesses as to the actual number of beans contained therein.

The contest has now been decided, the first prize being awarded to Mrs. J. Hanna, whose estimate of the beans was 12,755.

The other prize winners in order were Gladys Pentland, 12,730, Mrs. Crocker, 12,768, and Mrs. Johnston, of Douro, 12,725. The actual number contained was 12,747. Other guesses ran from as low as 1129 upwards. Mr. R. M. Glover made affidavit as to correctness of the count, etc.

Porter Bros. Will Open a New Store

Owing to the rapidly increasing business at their George street "Delicatessen," are making arrangements to open a branch store farther south. They have secured the lease of the King Edward restaurant, near Charlotte street, for a term of years, and intend to have it renovated and fitted by the first of May in March.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

Foresters' Carnival Tomorrow Night

Great interest is being taken in the great Foresters' carnival to be held in Brock street rink tomorrow, Tuesday night.

The committee have arranged for a direct wire from Midland, and returns of the hockey match will be given out at the rink according as the game progresses.

The prizes for the different contests are on exhibition in the window of W. C. Wescott, boot and shoe dealer, George street. The mile race is creating considerable interest as a number of entries have been received. The band will be in attendance.

It is expected that an exceptionally large number of skaters will be in costume.

Suggested New Site For Normal School Reported Too Costly

City Council Met in Committee and Special Session Last Night---Who is to Blame for Sewage Backing Up Onto Mr. Coughlin's Premises?---Board of Works Will bring Engineer and Plumbing Inspector Up on the Carpet.

The City Council met in Committee of the Whole last evening, when there were present. His Worship, Mayor McWilliams and Aldermen Stevenson, Duncan, Bradburn, McIntyre, Leary, Wilson, Johnston, Elliott, Morgan and Phelan.

Water Commissioners T. F. Matthews and W. H. Moore were present in the interest of the clause, in the city's bill now before the legislature, asking power for the water commissioners to levy a tax on all property fronted by water mains, whether vacant or not, and seeking to make the commissioners a body corporate. The commissioners advanced that property fronting water mains should be taxed according to assessed land values, which they argued to be the most equable principle in sight. Mr. Matthews offered that a 3-mill rate on assessed land values would be an equable tax to chargw for construction of water mains. They wished, however, the council to decide which system it would be best to ask the legislature to confirm; that of charging for water mains by a running frontage tax or a rate on assessed land values. The commissioners advised the latter system.

Ald. Stevenson argued that water mains should not be paid for according to assessed values, but according to the number of feet of main laid by a property owner's premises. The location in which property is situated does not affect the number of feet of main served to such property. He would reap no more benefit from water service to a property on Dalhousie street, than from similar service to a house on George street. He favored the tax being levied on a running front rate, irrespective of assessed values; especially as it costs no more per foot to lay a main in the center of the city, than on the outskirts.

Ald. Bradburn moved, seconded by Ald. Johnston,—That the Water Commissioners be authorized to change the wording of their application to the legislature, to provide for their taxing all property fronting water mains on a system to defray the cost of constructing said mains.—Carried.

The sub-committee reported that they had not been able to arrive at an agreement with the Otonabee Power Co., as to the detailed terms upon which said company shall supply the city with 600 electrical horse power for manufacturing purposes. In the event of an agreement being arrived at the city would recommend that the Federal Government give the lease of No. 4 dam to the Otonabee Power Co., at their rendered figure, in the interests of Peterborough. The committee were not satisfied with the terms of the power company's proposition, and so reported to council, who authorized the committee to meet the company again, in an effort to secure conditions which will meet the council's views.

NORMAL SCHOOL SITE.

The sub-committee, of which his Worship was chairman, reported that they had investigated the proposal to purchase the lands lying south of Dixon Park for a site for the Normal School. They approved of lots 16, 17, and 18, plan 71, as a [illegible] from which the new school could be seen over the whole northern half of the city, and the upper portion from most of the rest of the city. If these lots were purchased it would be necessary to purchase also lots five to ten, which lie between the site and the brow of the hill, as if these were permitted to be built on the site would be ruined. It would also be necessary to buy Mr. Blackwell's, and one vacant lot between the actual site and Benson avenue. Options on the ten vacant lots required were secured from Mr. S. Clegg, which figured at over $4,900, considerably more than double the estimate of the committee, and if the same rate had to be paid for the Blackwell house and lot, the whole property would cost about $7,500. The committee considered the prices excessive, and recommended that no further action be taken in the matter; the Board of Education were also agreed that at the prices asked the purchase could not be considered.

This report was adopted by the council.

The site for the Normal School will consequently remain as originally selected, to the north of this locality.

STREET WATERING.

The question of what basis should be adopted by which to pay for street watering again came up. It appears that the half mill previously charged for street watering purposes is not an equable system. In three districts the 1-2 mill on the assessed values of property does not quite pay the cost of street watering in those districts; in the east ward this 1-2 mill does not pay within one-half the cost of that ward's watering; while in the central or commercial district of the city, which is watered by the fire team, the 1-2 mill raises a tax of $900, and the cost of street watering in said district only cost about $400. Thus the commercial portion of the city is, under the present system, assisting in defraying the cost of street watering in other districts. It also transpired that there is no team in the fire hall capable of drawing the new water tank purchased for use in the city's commercial district, and the advisability of purchasing another team arose.

Ald. Leary offered that it was high time six horses were kept in the fire hall, and that another man should be engaged to drive the water cart for the commercial district; said man could fill in his time on other work when necessary.

The council acquiesced in this and

Ald. Leary moved, seconded by Ald. Wilson,—That the Fire, Water and Light Committee be authorized to purchase another team of horses.—Carried.

It was also understood that another man be employed, if necessary, for street watering purposes. The time of this team and man taken up in watering the central portion of the city to be charged up against the Board of Works.—Carried.

DEPUTATIONS.

Ald. Bradburn moved, seconded by Ald. Leary,—That the Mayor, Alderman Stevenson and the city solicitor, be a deputation to go to Toronto, when necessary, regarding the city's private bill.—Carried.

Ald. Wilson moved, seconded by Ald. Duncan,—That the Mayor, Ald. Morrow and the solicitor be a deputation to go to Toronto, if necessary, to interview Mr. Dunwoodie, of the Cortes Company, and that Mr. J. P. Matthews be invited to accompany the deputation.—Carried.

THE KINNEAR SIDING.

The Kinnear Company asked permission to cross George street with a siding into their premises; they claimed the grade at the rear of their premises too steep for a siding on which a locomotive could operate.

The committee took a contrary view to this, and claimed that if the gully were filled up a siding from the C.P.R. spur line could be effected.

Ald. McIntyre moved, seconded by Ald. Bradburn,—That the Kinnear Company be not allowed to run a siding across George street.—Carried.

TO PURLISH ASSESSMENT ROLL.

Ald. Johnston urged that the assessment rolls be published in the interest of the general public. People wanted to know how property in general is assessed, and properly so.

Ald. Johnston moved, seconded by Ald. Wilson,—That the Mayor, Ald. Johnston and the city clerk be a committee to enquire into the feasibility and cost of printing the assessment rolls.—Carried.

Counoil In Session

The committee then went into council.

A telegram was read from J. Alex. Culverwell, notifying council that he was about to offer the city a proposition to furnish power from Burleigh Falls for manufacturing purposes.—Received.

Ald. Morgan, who took his seat in council that night for the first time, was placed on the Fire, Water & Light, and Property committees, in place of ex-Ald. Bell, resigned. The Fifth Ward was congratulated by Ald. Johnston on having secured in Ald. Morgan, a capable representative.

BOARD OF WORKS' REPORT.

Ald. Duncan submitted the following:

Gentlemen,—Your Board of Works beg leave to report and recommend as follows:—

1. That a clause be inserted in the bylaw being prepared regarding the illuminated signs, providing that no signs be permitted to be erected on the streets on posts, and that those now on the streets be allowed to remain on the same terms as overhanging signs until such time as their removal is ordered by resolution of the council.

2. That the city treasurer be authorized to purchase and pay for such street railway tickets as the city engineer finds necessary for the use of himself and officers and employes of his department while engaged on city business.

3. That the city engineer be instructed to examine into the condition of the sidewalk on Perry street, between Stewart and Aylmer streets, and to take such action as he thinks necessary to remedy any defect.

All of which is respectfully submitted.

This report was adopted.

TO PAY COSTS.

Ald. McIntyre again raised the question of Mr. Coughlin's bill for costs sustained by him by reason of the sewer being blocked on Gilmour street, thus causing the sewage to back up into his house. He advised that he be paid the $8 expended by him in this connection.

Ald. Phelan acquiesced in this if the sewer was blocked, and thus the city should be liable.

Aldermen Duncan and Johnston took exception to this. The officials had reported no blame could be attached to the city and the council should stand by them.

Ald. McIntyre offered that as according to Mr. Coughlin, the plumbing inspector had been working with the plumbers on Coughlin's house three days, and that the plumbing should have been left in proper condition.

The Mayor and Ald. Duncan contended that Mr. Coughlin had backed down from the above statement when it was suggested that the plumbing inspector report on the matter.

Ald. Wilson stated that Mr. Coughlin told him today that the plumbing inspector was at his home three days with the plumbers, and consequently was to blame. He simply did not wish to injure the plumbing inspector.

Ald. Morgan acquiesced in this and said Mr. Coughlin had told him that the plumbing inspector's report was not true. He backed down from his assertion before the committee re the inspector, simply because he did not wish to throw any city official down and did not dream that the city would refuse to reimburse him. He was quite ready to meet the Board of Works again face to face with the city officials.

Ald. McIntyre said he understood the Gilmour street sewer had not been flushed since the fall.

Ald. Bradburn thought the sewers were not flushed frequently enough.

On suggestion of Ald. Duncan this matter will be again investigated by the Board of Works, whom Mr. Coughlin and the engineer and plumbing inspector will be asked to meet on Wednesday evening.

FIRE ESCAPES.

Ald. Leary raised the question of sufficient fire escape being provided in buildings where a large number of hands are employed. He knew of one building in particular lacking fire escape sufficient for the big staff employed there.

This was referred to the city solicitor to report.

COURT OF REVISION.

A bylaw appointing members of the court of revision passed its several readings. A. E. Dixon is the Mayor's choice and Wm. Langford the council's. Sheriff Hall is chairman, and Bernard Morrow is another member. Their salaries are $50 per annum.

LICENSES FOR AMUSEMENTS.

A bylaw fixing licenses for places of amusements passed its several readings. The Street Railway Company's toboggan slide comes under this bylaw, and will be charged an annual fee of $10.

The council adjourned at midnight.

CATARRH GROWING LESS

Due to the Use of Hyomei Cures Without Stomach Dosing.

Inquiry at the local drug stores shows that the sale of remedies for catarrh has decreased very much in the last year. Some medicines which were formerly bought a gross at a time are now purchased in half dozen lots, and are rarely called for.

There is one notable exception to this decrease in sale, and that is Hyomei. This remedy is, in fact, responsible for the decrease in sale of catarrh medicines, as it has made so many cures of catarrhal troubles that naturally there is much less demand for remedies for that disease.

People who have been trying different medicines for catarrh during many years were induced to begin the use of Hyomei by the guarantee that the remedy would cost nothing unless cured. Much to their surprise, they found that Hyomei did what it claimed (if it did not it could not be sold under this guarantee) and they soon become ardent advocates of the use of Hyomei.

There is no disagreeable stomach dosing with Hyomei; it is used by being breathed through a neat pocket inhaler. The complete outfit costs but one dollar, extra bottles, if needed, fifty cents.

All druggists should be able to supply you with Hyomei, or we will send it by mail on receipt of price, and every package is sold with the distinct understanding that it costs nothing unless it cures. Write us today for a symptom blank, which we will send you free, together with a treatise on Catarrh and how to cure it. When you fill in and return to us the symptom blank, our consulting physician will give your case the best care and attention, and write you a letter of advice without charge. Booth's Hyomei Company, Buffalo, N. Y.

Skating Exhibition

A great exhibition of fancy and speed skating will be given in the Brock street rink Wednesday night, Feb. 13th by the followed world-famed skaters:

J. K. McCULLOUGH.
NORVAL BAPTIE.
G. BELLEFUILLE.
FINNBRED, the great Norwegian speed skater.

A quartette of the best skaters in the world.

Skating allowed after the exhibition.

THE "HAPPY" FARMER

Our Junior Reporter Has Something to Say on the Subject.

A few days ago an article appeared in the columns of this great family journal referring to the advantages of a country life in contrast with life in a city. Our junior reporter, seems to take exception to our remarks, and has handed us the following for publication. It is understood, however, that this F. F. J. does not endorse the sentiments of our scribe, who spent his early life on the farm:

"A certain class of newspaper men assert that a farmer is the most independent man on earth, and that he has nothing to do but to enjoy life. That when winter comes and the blizzards on the wing he toasts his feet in the oven and reads the local newspaper and the only thing that disturbs him in a call three times a day to a banquet of mince pies and other luxuries. It is a mistake. The industrious farmer begins work long before the sun thinks of getting up. With his soul shrouded in gloom he proceeds to build a fire and soften his boots with a sledge hammer. He then takes a lantern and shovels his way to the barn and feeds the hogs. It is then time to feed the newly arrived calf, which seems to delight in butting a pail of milk over the filler of the soil until he only needs to be stamped to pass for a package of olemargarine. He crawls through a barbwire fence and digs the hay out of the snow, feeds the cows, cleans the stable, gathers up the frozen chicks, chases a stray pig worth 25 cents for four miles, and does not catch it, doctors a sick horse, freezes his fingers, gets kicked by a one eyed horse, and when the gloaming comes and quietness broods over all the earth, he has a single half hour to meditate and wonder how he will pay his taxes. This is farming as I see it."

Non-Indian, Indian Sues for Damages

It will be remembered that about five weeks ago some trouble arose in a Hunter street hotel, when Richard Cornelius, who has the "cognomirks" but not the legal definition of an Indian, was bit over the head by the wine clerk in the barroom.

Cornelius has entered an action in the division court against the proprietor for $80 damages for injuries received. A local legal firm is looking after the case for Cornelius and it will come up at the next sitting of the division court.

It will be remembered that Cornelius had to go to the hospital for treatment, and was out of pocket a good as the result of the fracas. The case was one in which a great deal of interest centered and developments in the new suit will be eagerly watched.

Rev. E. A. Langfeldt on Lenten Season

Rev. E A Langfeldt, rector of St. Luke's church, has issued the following Lenten address to his parishioners:

Dear Parishioners,—

As we are now entering upon the Holy Season of Lent, let me urge upon you to remember the following rules and obligations for loyal and true followers of Christ:

To pray earnestly.

To crucify the flesh and all its lusts.

To seek out and perform acts of charity.

To seek to influence your neighbor for good.

To attend as many services of the Church as you can.

To practice self-denial and add to your Easter offering.

To study your Bible, both systematically and prayerfully.

To seek His grace in the Sacraments and Life of His Church.

To abstain from worldly pleasures and places of amusement.

To examine yourself regularly as to your thoughts and manner of life.

To be true to the Church's teaching and to your own convictions of duty in the matter of keeping this Lent.

To receive the Holy Communion, as often as it is celebrated, first preparing for the same by self-examination and prayer.

If you do this you will grow in grace and in fitness for the Kingdom of Heaven, and the Lord will bless you.

Your friend and rector,
E. A. LANGFELDT.

Miss Maggie O'Leary Now Mrs. M. O'Brien

A Pretty Ceremony Celebrated in St. Joseph's Church, Douro.

Yesterday morning, Miss Maggie O'Leary, daughter of John O'Leary, of Ottonabee, became the bride of Mr. Michael O'Brien, of Peterborough. The ceremony took place at nine o'clock, and was celebrated by Rev. Father Kelly. The bride was attended by Miss Minnie Sullivan, of Douro, while Mr. Thomas O'Brien, of Peterborough, supported the groom.

After the ceremony the wedding party drove to the home of the bride's father where a sumptuous wedding dinner was enjoyed.

The newly wedded couple will reside in Peterborough.

Great Explosion at Woolwich, Eng.

In the Chemical Research Department of Arsenal and Cordite Magazines.

Woolwich, Eng., Feb. 12.—A huge hole in the ground is all that marks the site of the chemical research department of the Woolwich Arsenal and the cordite magazine, which exploded early yesterday morning with such terrific force that the concussion was felt in towns forty miles away, and the whole countryside was thrown into a panic, owing to the belief that a violent earthquake had occurred. There was no loss of life, but buildings for miles around were wrecked to a greater or less degree by the explosion.

Within a few minutes after the explosion thousands of terror stricken persons, many of them half clad, thronged towards the arsenal. There were large holes in the walls of neighboring houses and on all sides shattered doors and windows and wrecked roofs testified to the appalling force of the explosion of cordite and chemicals with which the arsenal and magazine were stocked. These buildings were practically swept away, the big blocks of stone of which they were constructed being scattered for hundreds of yards on all sides. Yesterday being Sunday there was no night shift working, hence the absence of casualties.

The people of Blairtree, 40 miles away, were thrown into a panic by the shock of the explosion, while near enough had windows shattered and chimneys demolished.

The cause of the disaster is not known.

To stop a Cold with "Preventics" is safer than to let it run and cure it afterwards. Taken at the "sneeze stage" Preventics will head off all colds and Grippe, and perhaps save you from Pneumonia or Bronchitis. Preventics are little toothsome candy cold cure tablets selling in 5 cent and 25 cent boxes. If you are chilly, if you begin to sneeze, try Preventics. They will surely check the cold, and please you. Sold by J. D. Tully.

Hon. W. S. Fielding—"This is Where Heavy Work is up to Willie."

EDUCATION BOARD HOLD REGULAR MEET.

Tenders for New Collegiate Institute Will Be Let at Once on the Basis of Changed Plans as Submitted by Architect Belcher.

Last night the Board of Education met in regular session there being present Messrs. Chairman Fair, Dr. Morrison, Dumble, Pringle, Dr. Burnham, Robinson, Hill, Ackerman, Crane, and Hayes.

Mr. Pringle, chairman of the King Edward Building Committee brought forward the following resolution, which was adopted, viz.: "That the committee report that in accordance with the resolution passed at the last meeting, the committee after thoroughly considering the heating of the King Edward school, are convinced that the Guerney boiler will be satisfactory. Messrs. McGregor & Reid are to instal the said boiler. Messrs. McGregor & Reid have supplied in writing the consent of their bondsmen."

Mr. Hill gave notice of motion that he would next meeting move that the Board meets hereafter on the 1st Tuesday instead of after the second Monday of each month.

Mr. Pringle noted that Architect Belcher had supplied the amended plans of the Collegiate Institute. He produced these and noted certain specified changes proposed, such as ceilings of metal, maple stairs, etc.

Mr. Pringle moved that the plans as submitted have blue prints made similar, and that contractors be asked to tender on the same for erecting the institute, seconded by Mr. Hayes.

Mr. Dumble noted concerning the tenders on the North Ward school that if new tenders were asked it would mean more expense. He thought that the lowest tender put in already, should be accepted. The only change to be made would be the deepening of the cellar for boiler purposes. He thought materials would soon be dearer. He moved that the Board award the tenders for the North Ward school to the already lowest tenderer.

This was seconded by Mr. Hill and carried.

Chairman Fair thought before action be taken, it should be known whether the funds for this building will be forthcoming. Mr. Hill explained that the 1st had been already given on accepted conditions and the council must give the money.

Mr Robinson agreed with the chairman that the Board before taking action, should ascertain whether the funds would be forthcoming or not.

Chairman Fair, however, thought when the lowest contractor's price was acknowledged and referred to by him, the council would put up the money.

Building Will Be Much Higher

Yesterday in conversation with a leading local contractor regarding the possible increase or otherwise in the cost of building for the coming spring and summer, The Times man was assured that such operations will be much more expensive than was the case last season.

The reason for this is mainly owing to an advance in the prices of wood work materials.

There will possibly be an advance of half a dollar per thousand on brick, but no advance, it was learned, is likely to occur in labor.

The difference, then, is confined mainly to the prices of lumber, lathes, shingles, floorings—all of which have advanced from five to ten per cent.

Hemlock lumber, used in joistings and scantlings, has undergone an equal advance.

Pine doors and sashes, though the prices will vary according to size and pattern, will likely undergo a heavy advance.

Lathes have gone away up the last few years. Most dealers have sufficient to carry them over to the spring but little more.

British Columbia shingles have been used largely in Ontario the past few years. Since the New Year they have advanced 25 cents a thousand. Cedar and pine has become too expensive in Ontario a host of shingles being manufactured here to the extent they once were.

"WHITE BREAD"

Lacks Things the Body Needs.

The valuable food elements required to build up the nerves and brain are found up under the shell of the wheat and these parts the white flour miller discards, because they slightly darken the flour. It makes a big difference in the body whether it is fed the proper food elements or not.

A Mo. woman looked into the matter and found her weak stomach came from too much "nice white bread." She writes:

"About 5 years ago my health was very poor, appetite all gone, my stomach too weak to digest what little I could eat; everything soured, my nerves were weak and my heart skipped beats.

"The doctor treated me for liver trouble without much benefit and finally I had nervous prostration. I was very much discouraged and feared I would never be well again.

"Deciding upon a reform at once, and having heard so much about Grape-Nuts, food for strengthening and building up a broken down system, I began to eat it and left off my white bread. It did not sour on my stomach as the white bread had done.

"My stomach soon got better, my nerves stronger, and I commenced to gain every way right along. It was a boon to me; truly a nerve and brain builder. I have many thanks to give to Grape-Nuts and its originator for good health in my old age.

"I am 70 years old and ever since the first time we placed Grape-Nuts food on our table five years ago, it has always been there. Our family like the rich nutty taste and often eat it dry as well as with cream. But there are many other ways of preparing Grape-Nuts, and we never fail to recommend this food to those with tired and worn out brains and nerves." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

Are You Often Bilious?

Read This and Learn How to Prevent Attacks.

Biliousness is merely a term applied to a condition that exists when the body is over-loaded with bile.

The complexion turns yellow, eyes look dull, pimples, itching and eczema break out, headaches are ever present.

Biliousness has two great causes, constipation and defective liver action.

When Dr. Hamilton's Pills are taken they not only correct the bowels, but act directly on the liver, regulating its bile secretion.

Unlike ordinary medicines which purge and give temporary relief, Dr Hamilton's Pills remove the condition which causes biliousness; thus permanent cures are effected.

Dr. Hamilton's Pills do cure biliousness and liver ills under all circumstances.

We prove this by the statement of Mr. Fenwick Luddington, of New Harbor, N.S., who writes: "Three months ago I had no expectation of ever getting free from periodical bilious attacks. They were preceded by dizziness and dreadful headaches. If I stooped over my head would swim and a nauseous feeling crept into my stomach.

Dr. Hamilton's Pills fixed up my liver, drove all the bile out of my blood and made me a well man in a few months. Today I enjoy a good appetite, excellent digestion, and the best of health. Dr. Hamilton's Pills did it all."

Get Dr. Hamilton's Pills today. Sold by all dealers: 25c per box or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn, U.S.A., and Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

UNION LABEL

PETERBOROUGH, FEBRUARY 9, 1907

A KING'S LIMITATIONS

It is reported that King Edward recently told John Morley that he regretted his inability to attend the debates of Parliament, and, further, that if her were not a King he would dearly love to be a politician.

King Edward should have the courage to break with traditions, at least so far as to hear the real rulers of the country discuss public questions sometimes. It would do him good, and we do not imagine that in these days Parliament would be awed out of voice if he were among the auditors.

The President of the United States can be President and politician too, and the king is supposed to take a hand in international politics now and then, if he does not go on the hustings when domestic issues are being determined. His imperial nephew of Germany is a very active politician.

BROCKVILL'S LIGHT PLANT

For six years past the town of Brockville has owned and operated a light and power plant. It is under a commission of five members, and possesses a manager, Mr. C. T. Wilkinson, who seems to know his business. Both gas and electricity are produced, and since 1901 the prices have been reduced from $3 per thousand feet for gas and 20 cents per kilowatt hour for electricity, to $1.25 and 10 cents respectively. During the six years the net profit to the town has been $7,-000.17. Last year alone the surplus was $4,082.58, in spite of the fact that $3,268.00 was written off for depreciation of plant. The total revenue has been increased from $38,154.19 in 1900-01, to $46,323.07 last year. A system which can make money while cutting the price of light and power in two is undoubtedly a success. Doubtless the record of Brockville's entry into the municipal ownership field will encourage other municipalities in Ontario—particularly at this time.

Not a Saturnine Celt.

London, Feb. 10.—Professor Osler, who was entertained by the Royal Medical Society of Edinburg, in replying to the toast to his health, said that it had been said that he was a Celt, but he was not a saturnine Celt who had no option in this world between Scotch whiskey and some form of Presbyterianism (laughter.) He occasionally thanked Heaven that his Celtic forbears were born under Mercury, thus giving him that most fortunate thing, an optimistic temperament. In proposing the toast to the society he remarked that very many medical men in Canada revered the wise members who took with them Green Edinburgh traditions and associations.

To Stop Overcrowding

Toronto, February 9.—The overcrowding of street cars was discussed again by the Board of Control, and the city solicitor was instructed to ascertain whether the company could be indicted under the criminal code. If a case can be made out against the railway, the legal department will enter a criminal prosecution at once.

GREAT BRITAIN'S SONS.

Illustrious Fame Roll of the Mother Country As Exemplified In Many Men of Note.

Sir Robert Peel—"Bob, you dog, if you're not Prime Minister I'll disinherit you." These words were once jocularly uttered by the father of this eminent English statesman, who was anxious from the first that his heir should make a figure in politics. How Sir Robert, step by step, won his way to the Premiership twenty-three years later cannot be told here. Suffice it to say that England has never possessed a statesman with greater talents for legislative business and finance. Personally Sir Robert was not a popular or sociable man, but he loved his work and the House of Commons, and the country is indebted to him for many reforms and much prosperity.

Sir Titus Salt.

The world admires a successful man, and more so when that man uses his gifts and prosperity to confer benefits upon his fellow-creatures. Sir Titus Salt built up the greatest manufactory of alpaca fabrics in Europe, and he also built around that manufactory a village of 900 employees. A man of thoroughly altruistic principles, Sir Titus treated his hands with great liberality, while he gave princely gifts to Bradford, which town he represented in Parliament and served as mayor.

William Cobbett.

The sturdiness and indomitable energy of Cobbett must arouse the admiration of every Englishman. From the son of a peasant he rose to be one of the most daring and powerful political writers of the early half of the nineteenth century. It is true that Cobbett had a capacity for getting himself into "hot water," but this did not deter him from fighting for any cause he considered to be right. Cobbett loved the poor as much as he loved the country and the fields, and he undoubtedly did much by his trenchant writings—which called the attention of reformers to work which required to be done—towards ameliorating the conditions of those who lived in the poverty corners of England.

Dr. Tait, Archbishop of Canterbury.

Undoubtedly the greatest achievement of this prelate was performed when he succeeded Dr. Bloomfield as Bishop of London. So vigorously did Dr. Tait labor in the metropolis that in a few years he raised no less than £350,000 for the building of churches, schools, and parsonages in the poorer districts of London. His sermons and writings in their day were read with avidity, for people recognized that they emanated from a master-mind. Dr. Tait had many difficulties to overcome, but he grappled with them in a manner which proved him to be thoroughly equal to the duties of the high offices conferred upon him.

Lord Melbourne.

Although this noted statesman never earned fame as a great orator and brilliant politician, he accomplished some solid and valuable work for the country, more especially when he became Prime Minister. He signalized his accession to his office, in 1835, by carrying a great measure of municipal reform, and the following year came the lowering of the stamp duty on newspapers and the Tithe Commutation Act, benefiting landowners and clergy alike. One of the most notable and estimable features of Lord Melbourne's career, by the by, was the delicate tact and friendly and conscientious care with which he initiated Queen Victoria into the duties of Sovereign on her accession to the throne.

Lord Dufferin.

This great Ambassador had one of the most distinguished careers among the most distinguished men of his time. Among the letters which he was entitled to write after his name were P.C., K.P., G.C.B., G.C.S.I., G.C.M.G., G.C.I.E., D.C.L., LL.D., F.R.S. The LL.D., was conferred on him by Oxford, Edinburgh and Harvard, while he was also Doctor of Oriental Learning of the Punjab University. His Lordship acted as Governor-General of Canada as well as of India and was Ambassador to Russia, Italy and France, while early in his career he filled various Under Secretaryships of State. Once, in a moment of facetiousness, he described himself as "Maid-of-all-work to British Governments."

William Charles Macready.

The efforts of this great actor were always directed towards elevating and purifying the drama. He undoubtedly did much good service for the English stage, and brought about many reforms. But Macready did more than this. He proved himself a magnificent and powerful actor and splendid manager. He produced Shakespearean plays in a most worthy fashion, and from Macready's triumphs and achievements the present school of actors have been able to learn much of histrionic value.

Sir George White.

It is fifty-three years since Sir George White entered the army, and he served soon after in the Indian Mutiny with the 27th Royal Inniskilling Fusiliers, winning a medal and clasp, while during the engagement at Charasiah he won the Victoria Cross. He took part in the great march from Kabul to Kandahar, and was at one time military secretary to the Viceroy of India. For his distinguished services in the field he was promoted to be major-general, and that by the Government of India, in which country he served as Commander-in-Chief of the Forces from 1893 to 1898.

Charles Lever.

Apart from his powers as a writer, Lever was one of the most brilliant conversationalists who ever lived, and the life and soul of any company. He was at home everywhere, knowing everybody, and a welcome guest in all societies and in all countries. And no less welcome were his books. Who has not laughed over his amusing stories of Irish life, and the adventures of "Charles O'Malley," "Arthur O'Leary," "Tom Burke of Ours," and "Jack Hinton"? Lever has been accused of giving a false idea of Irish character and life. Be that as it may, the world of literature would have been much poorer without his rollicking and always entertaining stories.

A Unique Suit at Ottawa

Ottawa, February 9.—An unusual action is being heard in the High Court. Mrs. Martha Purvis, of Windsor, has sued John McDonald and Elizabeth for $1,000 damages for supplying intoxicating liquors to her husband, in consequence of which he died. The action is brought under the Liquor License Act, which makes any hotelkeeper liable to damages for the death of any person to whom liquor is supplied, while he is intoxicated.

Have One Doctor

No sense in running from one doctor to another. Select the best one, then stand by him. Do not delay, but consult him in time when you are sick. Ask his opinion of Ayer's Cherry Pectoral for coughs and colds. Then use it or not, just as he says.

We have no secrets! We publish the formulas of all our preparations.

J. C. Ayer Co. Lowell, Mass.

HUMOR

ENOUGH SAID.

How Ben Tillman Was Identified by a Money Order Clerk.

Senator Tillman tells a story on himself as to how he was identified by a postoffice money order clerk when he first arrived at the Capital City.

After being in the city a few days he dropped in at the postoffice to cash a money order.

"Do you know any one here who could identify you?" asked the clerk.

"Well, no," the senator answered. "Is that necessary? I am Ben Tillman of South Carolina."

The clerk smiled, then asked the senator if he didn't have some letters or papers that would make him known to the postoffice authorities.

The senator had put on a new suit that morning and had neglected to transfer his letters, but he had his pocketbook with him. Digging down in his trousers pocket, he drew forth his wallet and proceeded to search for an article of identification, but could find nothing but a small photograph of himself.

"This will do, I suppose," he said, handing it to the money order clerk.

"Why, sure! That's you, all right," remarked the man behind the counter, handing over the cash.—Lippincott's Magazine.

Murder to Order.

Several years ago an affray in a western mining town resulted in murder, but Senator Thurston of Nebraska, believing the man who was accused to have had an innocent intention, took up his case and had the punishment lightened. Six months afterward a man, armed to the teeth, appeared in the senator's office.

"Are you Squire Thurston?" he roared.

"Yes," said the senator.

"And are you the fellow that helped Jack Hurley at court?"

The senator, thinking his time had come, again answered, "Yes."

"Well," said the man with the guns and bowie knives, "I'm Hurley's pardner, an' I've come to pay you. I haven't any money, but I'm a man of honor. Anybody in town you don't like?"

The senator assured him there was not, but the man looked incredulous and said: "Put on your hat, squire, an' take a walk down the street with me. See anybody you don't like just throw up your thumb, an' I'll pop him."—New York Tribune.

When It Failed to Work.

There is at present serving a term in the penitentiary at Moundsville a former official of the postoffice department convicted of "graft" on many counts. The delinquent in question had always been most friendly with the Washington newspaper correspondents, and when he was arrested and lodged in jail at the national capital there was a rush of the newspaper men to the jail, they being confident of securing an interview.

The accused, however, refused to be seen, and his message to them was most characteristic:

"Tell them," said he to the warden, "that I am not in."—Ridgway's.

The Terrors of Indigestion.

A squire of Andover decided to take into his employ a brother of Patrick, one of his hired men. The terms were made with Pat before his brother's arrival, and the following conversation is a specimen of what they agreed upon:

Squire—I'll pay your brother $1.50 a day, Patrick.

Patrick—Yis, sor; yis, sor. And will he ate himself or will ye ate him?

The squire thought Mike had better eat himself.—Harper's Weekly.

Just Like a Woman.

What sex is a motor car? Should it be spoken of as he, she or it? For instance, a man was overheard in a hotel dining room saying to his companion, a woman, "Yes, she's a forty horse-power Walter car." The woman at once protested against his speaking of the Walter as "she." Then he told her that it had a bonnet worth $50, and she quit arguing.—Jervis Auto Letter.

Cries of "Author."

The Author—And do you always attend first nights, Miss Maddison?

The Girl—As often as possible. I think there is always an added interest on a first night. One feels then that one's opinion really carries weight.

The Author—But—er—what is it, may I ask, that you threw?—Pick-Me-Up.

A Sociable Storm.

Puggy—Weren't you rather lonesome on the fence last night in that storm?

Kitty—Not a bit. It rained cats and dogs!—Woman's Home Companion.

The Best Knowledge.

"There's Jenkins, for instance. Now, he knows something about whisky."

"Nonsense! He never drank a drop in his life."

"That's what I mean."—Catholic Standard and Times.

AN OPEN LETTER

From Mr. W. J. Gage, Chairman Executive Committee National Sanitarium Association.

The Trustees carry on this work, having faith in a generous response to their appeals for necessary funds.

NO FATHER, NO MOTHER, NO HOME, WORSE THAN A PRISONER.

GARFIELD BRACEY, BERLIN, ONT.:—Enclosed please find doctor's certificate and examination papers. Hope you will secure me a place in your Sanatorium. You will notice my circumstances is a hard one: no father, no mother, no home—worse than a prisoner. Nobody wants me on account of my disease. Hoping you will have the charity and consider my position and give me a position at once in your Sanatorium, I ever pray.

AN ORPHAN, WITHOUT HOME OR MEANS.

DR. A. E. HANNA, PERTH:—I have a patient here, a young fellow in whom I am greatly interested. He has tuberculosis. He is a poor young fellow, an orphan, out of house, without any means. If we sent him up would you take him in and do the best you can for him? I know how difficult it is to accommodate all who require treatment, but this is a special case.

"I shall pass through this world but once. Any good thing, therefore, that I can do, or any kindness that I can show to any human being, Let me do it now. Let me not defer it or neglect it, for I shall not pass this way again."

TORONTO, CAN., 1907.

DEAR FRIEND,—Out of the several hundred letters received, I reprint on this sheet two that suggest the urgent need and the work of the Muskoka Free Hospital for Consumptives.

The pity of it all is that no letter, or letters, can be written, telling the full story of those who are seeking help.

Because of the contagious nature of the disease, the lot of these poor sufferers has become an increasingly sad and difficult one. To tell the plain truth, relatives and friends often shrink from caring for their afflicted ones through dread of this disease.

The doors of every hospital in Toronto are closed to the consumptive, and this is generally the case elsewhere.

In Canada—the most prosperous country in the world—a country justly proud of its Christian and benevolent institutions—what shall be done?

The doors of the Muskoka Free Hospital for Consumptives stand wide open for these poor sufferers.

All that is now needed to care for double the number of patients in residence, is money. During the past year much has been done to prepare for the extension of the work. A new water supply and sewage system have been installed.

As soon as the work is fully known, all the money needed will be forthcoming. Sir Thomas Barlow, the King's physician, after a visit to the Free Hospital this summer, sent his cheque for five pounds, in appreciative recognition of the work. The Misses Dow of Montreal this month send their cheque for six hundred dollars. All classes and creeds help.

The widow's mite and the rich man's gifts, all come to encourage the trustees to carry on and extend this great national charity.

$50,000 is needed. Will you share in the privilege of helping?

Yours sincerely,

W. J. Gage

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering, decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Vaccinating For Prizes.

In order to encourage vaccination the mayor of Madrid has established a lottery and presents a ticket to every one who submits to the operation.

Chalk.

All chalk is composed of fossils. If you take the tiniest bit and place it under a powerful microscope you will see an infinite number of extremely diminutive shells, and no spectacle on a large scale is more beautiful than the varied forms of these tiny homes of animal life, which are disclosed by powerful glasses.

The Potato.

If there were but one potato in the world a careful cultivator might produce 10,000,000,000 from it in ten years and thus supply the world with seed again.

Iron In Architecture.

The use of iron in architecture is not so new as people are accustomed to think. At Delhi is a forged iron column sixty feet high. It is sixteen inches in diameter at the base and twelve inches at the top. Its weight is estimated at about seventeen tons. From records extant it is reasonably certain that it was already in existence 900 years B. C.

Sikhs of India.

Those former fanatics of India, the Sikhs, when they come to die prefer to expire on the bare ground. Regardless of rank or age, no rug intervenes between their bodies and the earth.

Picking Oakum.

Picking oakum looks very simple, but it is dreadful work. It soon wears the skin off your finger tips, and the monotony of it is perfectly maddening. The usual amount a prisoner in an English jail has to pick in a day is three and a half pounds.

Foxhounds.

The cost of a well bred pack of foxhounds is about $5,000 and the annual bill for keep about as much.

Bessarabia.

One of the most productive sections of the world is the Russian province of Bessarabia, taken from Turkey in 1878. Its vineyards often yield 300 gallons of wine per acre. The average yield of wheat is thirty-five bushels and of maize sixty bushels.

The Cucumber.

The cucumber came from the East Indies.

French Faggot Makers.

Nothing goes to waste in France. Even the smallest twigs are carefully gathered by the fagot makers, whose bunches retail in town and city for 5 cents apiece.

Teeth on Edge.

The teeth "on edge" is a very common and most unpleasant state of affairs. Acid fruits, overindulgence in lemonade, etc., may cause it. Sometimes it is brought about by a chill. Chewing cinnamon bark will give relief.

$30,000,000 TUNNEL.

Plans of the English Channel Company Rapidly Crystalizing.

The channel tunnel scheme is now rapidly approaching the stage of practical discussion, says the London Chronicle. In a few weeks we may expect to hear its merits and demerits echoed from the great sounding board of the House of Commons.

A bill was yesterday deposited in Parliament to incorporate the "Channel Tunnel Co." Powers are sought to execute such works up to the three-mile limit, and it is proposed that a new company shall hereafter be registered for the purpose of carrying out the entire project. The bill empowers the Southeastern and Chatham Railway Companies to avail themselves of the authority given by Parliament in 1874 for the application of their capital towards the cost of the works, and also to take shares in the capital of the company created.

It is estimated that the scheme will involve a total outlay of £16,000,000. Half of that amount is to be raised in this country, and the remainder is promised in France as soon as the scheme shall have received parliamentary sanction in England.

A limited liability company, to be registered in London, with a capital of £8,000,000, will subscribe and consequently hold all the securities of the statutory company and provide the balance of funds necessary to carry the tunnel from the three-mile limit to midchannel, where it will connect with the French portion of the undertaking. Two parallel tunnels will be constructed, the total length of the same under the sea being 24 miles, and, with the land approaches on either side, 30 miles. Calculations (it is claimed by the promoters) show that in the first year after the opening of the railway—the "Caldover Tube, as it has already been named—1,000,000 passengers will be conveyed through the tunnels, and the gross receipts from all sources of traffic in the same period are put at $1,540,000.

The tunnels, each 18 feet in internal diameter, will be driven from Dover to Sandgate throughout the whole distance in the gray Rouen chalk, which, 87 feet thick on the English side and 80 feet on the French side, is a stratum very homogeneous, practically free from and remarkably impervious to water.

Powers for the electric motors which are to be employed in the tunnel traffic will be obtained from large generating stations, which are likewise to supply the current required for lighting, as well as the compressed air necessary for the purposes of ventilation. The trains will be made up of the rolling stock of all British and continental railway systems, excepting those of Spain and Russia, which at present possess gauges differing materially from those of Great Britain. When the trunk line now in course of construction through Greece has been completed the opening of the channel tunnel will shorten the mail route to India by 36 hours. Mr. Balfour Browne, K.C., has been retained as leading counsel for the bill and Messrs. Sherwood & Co. are the parliamentary agents for the promoters.

Kept Pledge to Highwayman.

The fourth Earl Stanhope, when on his homeward way late one dark night, was held up by the most gentlemanly of highwaymen, who preferred his request for money or the nobleman's life in quite the nicest way. It happened that Lord Stanhope had not any money with him and was disinclined to yield the alternative.

"Your watch, then," suggested the gentleman at the opposite end of the pistol. That watch, the earl explained, was dear to him. He valued it at a hundred guineas, and would not surrender it. "What I will do," he said, "is to bring and deposit in this tree the worth of the watch in money, and you can call and get it to-morrow night."

"Done, m' lord," said the highwayman.

The law knew nothing about this arrangement, and the earl did as he had promised. He placed the hundred guineas where the highwayman might at his leisure collect it. And there, so far as he knew, the matter ended.

Years afterward he attended a great banquet in the city, and found himself pleasantly entertained by an extremely well known man, whose signature was good for a sum in several figures. Next day came to Lord Stanhope a letter enclosing the sum of 100 guineas. Accompanying it was a note begging his acceptance of a loan granted some years previously to the man who now forwarded it.

That loan, said the latter, had enabled the sender to gain a new start in life, to make a fortune and to renew acquaintance at dinner on the previous night with his lordship. The city magnate and the highwayman of earlier days were one and the same.—London Evening Standard.

Founder of Modern Surgery.

Unquestionably first among King Edward's medical attendants stands the venerable and distinguished figure of Lord Lister, the founder of modern surgery. He holds the quaintly-named office of Serjeant-Surgeon in Ordinary to his Majesty, and was appointed by the King to be one of the original members of the Order of Merit. Lord Lister, says M. A. P., has always modestly ascribed the glory of his discovery of antiseptic surgery to Pasteur, whose researches on fermentation suggested to him the idea of sterilizing wounds. Lister's elevation to the Peerage by Queen Victoria some ten years ago was celebrated by a unique banquet given to him by over a hundred of his old house surgeons and "clerks," as they were called. One of his old pupils then described Lister's first antiseptic dressing—a paste sterilized with carbolic acid—in the Glasgow Hospital in 1860, and "from that day his wards became the healthiest in the world, while others, separated from his by only the breadth of a passage, remained as insanitary as ever." Yet the new discovery had to encounter much bigoted opposition from conservative members of the profession. Now it may be truly said of Lister that through him more lives are saved every year than Napoleon took in all his wars.

If you are Constipated, dull, or bilious, or have a sallow lifeless complexion, try Lax-ets just once to see what they will do for you. Lax-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Lax-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

Pisa's Leaning Tower.

The Leaning Tower of Pisa is 178 feet in height and leans fourteen feet out of plumb.

Organs.

It appears from the testimony of Gervas, the monk of Canterbury, who flourished about the year 1200, that organs were introduced more than a hundred years before this time.

Cold Blooded.

In 1870 Lord Kaimes presided at the trial of a man named Matthew Hay, with whom he had been in the habit of playing chess. He summed up against the prisoner and when he was convicted exclaimed, "That's checkmate to you, Matthew."

A Costly Badge.

The badge of office worn by the lord mayor of London contains diamonds to the value of $600,000, and the temporary owner of it has to give a bond for it before he is sworn in.

Oyster Cocktail.

An oyster cocktail is made by putting into a glass half a dozen tiny little oysters, to which add a few drops of tabasco, a pinch of salt, a teaspoonful of worcestershire sauce, a teaspoonful of tomato catchup and a tablespoonful of lemon juice.

Eve's Grave.

The supposed grave of Eve is visited by over 40,000 pilgrims in each year. It is to be seen at Jeddah in a cemetery outside the city walls. The tomb is fifty cubits long and twelve wide.

A Prussian Wedding Feast.

A wealthy peasant living in west Prussia invited 1,200 guests to his daughter's wedding. For each he provided one and a quarter pounds of beef, one pound of pork, three-quarters of a pound of veal, half a pound of mutton and half a fowl—goose, duck or turkey—with an unlimited supply of vegetables, bread, wine and beer.

Heine's Jealousy.

When Heine was in love he was so jealous that he poisoned a parrot belonging to his mistress for fear it would claim too much of her affection.

To Remove the Smell of Paint.

Put a pail of fresh, cold water with a slice of lemon in it in your newly painted rooms. The water should be changed every few hours and if this is done will quite take away the odor.

The Cruelest People.

Bedouin warriors are noted for the spirit of their steeds. They are the cruelest people known to civilization.

Witch Superstitions.

In some of the country districts of England the peasants are said to believe that elves and witches steal babies from their cradles and place their own elfin offspring in the place of the robust child. After a child is baptized the witches and fairies have no power over it; hence the peasants have their little ones baptized as soon as possible.

Girls In Men's Clothes.

In French Switzerland the sheperd girls wear men's clothes.

The Largest Islands.

The largest islands in the world are New Guinea, Borneo and Madagascar, in the order named. New Guinea is nearly four times the size of Great Britain.

A Pauper's Treasure.

In some bedding belonging to an old woman who died in an English workhouse the purchaser found a bag containing jewelry and a note for £300 deposited in a Liverpool bank thirty-five years ago. The honest finder informed the woman's relatives in Cardiff of the discovery.

The Pearl Lottery.

An expert tells of an instance where 4,000 pearl shells were taken which yielded less than $50 worth of pearls, while in the same locality over thirty pearls were found in one day, one of which was sold for $10,000.

Greek Fire.

Greek fire, which had several other names—wild fire, liquid fire, wet fire and fire rain—descriptive of its destructiveness, is said to have been the most destructive engine of war previous to gunpowder. Discovered by Callinicus, a Syrian, it was first used in the siege of Constantinople, 673-678, and at Mecca, 690.

Wives In Siam.

In Siam the first wife may be divorced, but not sold. The other wives may be divorced and sold.

Onion Perfume.

The Tartars regard onions, leeks and garlic as perfumes. A lady of Tartary will rub a piece of freshly cut onion on her hands and over her countenance to enhance her attractions.

Vanity That Comes High.

Most of the photographs displayed in the windows of English photographers are exhibited by request of the originals and at their own expense. One London photographer charges $2.50 for putting a carte in a window and $5 for a cabinet.

Dumas.

Alexander Dumas, or Dumas pere, lived from 1803 to 1870. His literary life began with the play "Henry III." in 1829, and his labors continued to his death, a period of forty-one years. The number of novels, plays, poems and literary works of all descriptions produced during this time was enormous, few writers of any country exceeding in quantity the amount credited to this remarkable man.

BIG G CURES in 1 to 5 days. Guaranteed not to stricture. Prevents contagion. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns **FIVE MINING CLAIMS** containing **160 ACRES**, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 3-foot level, show 153 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 600 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of 20 cents per share, Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

A. R. BICKERSTAFF & CO.,

20 King Street East Phone M. 5710 Toronto, Ontario

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 30 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 30 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch niccolite, 12 inch smaltite together with cobaltite. Assays gave 672-1233-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M. E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00) The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

W. H. JACKSON,

261 KING STREET WEST, - TORONTO, CANADA

DAWSON KENNEDY, Local Agent, 600 WATER ST., PETERBORO

THE PETERBOROUGH MORNING TIMES

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 3 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 500 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 21 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shown up fine. This shaft now has 70 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

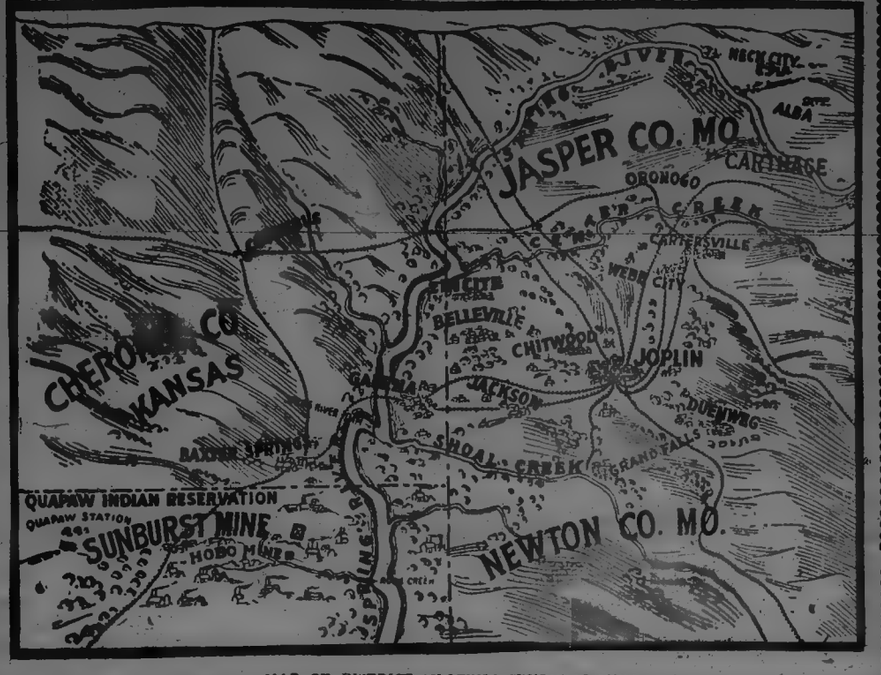
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 71 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magnaka, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 135 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties—mills are erected and extremely rich ore extracted, making great returns for the owners.



MAP OF DISTRICT SHOWING SUNBURST MINE.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this imminently rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the *immense profits* simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

"The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of this Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 3 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 57 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No 1 shaft, 5 1-2 by 9 feet, is down 88 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 5 1-2 by 80 feet, well timbered, with shafthouse, derrick and bailherhouse in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 5 1-2 by 5 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines.

Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Osceola Mining Co.	24 per cent.	Katydid Mining Co.	60 per cent.
Cottonwood Mining Co.	25 per cent.	Mocking Bird Mining Co.	64 per cent.
Waddell Zinc Co.	27 per cent.	John Jackson Mining Co.	80 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	38 per cent.	Dinger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 100 shares and upward, either by cash in full with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $7.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $21.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $21.12 per ton for lead and $16.81 for zinc to $32.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 30 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 367,169.00
A. W. Taylor	180	159,758.00
J. W. Aylor	40	576,571.00
The Burgner Mining Co.	80	195,579.00
Center Creek Mining Co. (production to date)	200	6,932,193.00
Mrs. E. J. Chinn	120	224,799.00
Majestic Consolidated Zinc & Lead Co.	52	234,640.00
Continental Zinc Co. (production to date)	200	1,573,593.00
Consolidated Troup Mining Co.	40	193,613.00
Daughtery-Davy-McMillan Estate	60	455,006.00
The Empire Zinc Co.	441	150,312.00
Fox Heirs	20	120,324.00
Granby Mining & Smelting Co., 1905		1,201,551.00
Granby Mining & Smelting Co., 1904		1,025,650.00
John G. Quinn	640	82,867.00
Pittsburg-Joplin Lead & Zinc Co.	10	98,000.00
Pittsburg-Missouri Zinc & Lead Co.	120	413,204.00
United Zinc Co.	136	390,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and that owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 26 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Blackjacket land to the north of the tract and for purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

PRESENT PRICE OF SHARES NOW 8 CENTS - - - - - PAR VALUE $1.00

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

carried torches. The main gate was open, and a carriage, which had apparently just driven in, was standing at a small door immediately in front of their window. A man wearing a plumed hat and enveloped in a riding coat stepped from the carriage and then, turning round, dragged a second person out after him. There was a scuffle, a cry, a push, and the two figures vanished through the door. As it closed the carriage drove away, the torches and braziers were extinguished, the main gate was closed once more, and all was as quiet as before the sudden interruption.

"Well!" gasped De Catinat. "Is that another king's messenger they've got?"

"There will be lodgings for two more in a short time," said Amos Green. "Give me your bar again. This thing. It won't take us long to have it out." He set to work furiously, trying to deepen the groove in the stone, through which he hoped to draw the staple. Suddenly he ceased and strained his ears.

"By thunder!" said he. "There's one working on the other side."

They both stood listening. There were the thud of hammers, the rasping of a saw and the clatter of wood from the other side of the wall.

"What can they be doing? Can you see them?"

"They are too near the wall."

"I think I can manage," said De Catinat. "I am slighter than you." He put his head and neck and half of his shoulder through the gap between the bars, and there he remained until Green thought that perhaps he had stuck and pulled his legs to extricate him. He writhed back, however, with many difficulty.

"They are building something," he whispered.

"Building?"

"Yes. There are four of them, with a lantern."

"What can they be building, then?"

"It's a shed, I think. I can see four sockets in the ground, and they are fixing four uprights into them."

"Well, we can't get away as long as there are four men just under our window."

"Impossible!"

"But we may as well finish our work for all that."

The gentle scrapings of his iron were drowned amid the noise which swelled ever louder from without. The bar loosened at the end, and he drew it in.

The steady hammering and sawing went forward. It was early morning, and the first cold light was beginning to steal over the courtyard before the work was at last finished and the workmen had left. Then at last the prisoners dared to climb up and to see what it was which had been constructed during the night. It gave them a catch of the breath as they looked at it. It was a scaffold. It was buttressed up against their wall, and in the center stood a headsman's block.

"I think it is time that we left," said Amos Green. "The window is clear. Let us make a rush for it."

"It is useless. I can see a line of armed men along the farther side of the yard. And here come more. See, at the center gate!"

As he spoke the door which faced them opened, and a singular procession filed out. First came two dozen footmen, walking in pairs, all carrying halberds and clad in the same maroon colored liveries. After them a huge bearded man, with his tunic off and the sleeves of his coarse shirt rolled up over his elbows, strode along with a great ax over his left shoulder. Behind him, a priest with an open missal pattered forth prayers, and in his shadow was a woman, clad in black, her neck bared, and a black shawl cast over her head and drooping in front of her bowed face. Within grip of her walked a tall, thin, fierce faced man, with harsh red features and a great jutting nose. He wore a flat velvet cap with a single eagle feather fastened into it by a diamond clasp, which gleamed in the morning light. But bright as was his gem his dark eyes were brighter still and sparkled from under his bushy brows with a mad brilliancy which bore with it something of menace and of terror.

The woman had faltered at the foot of the scaffold, but the man thrust her on, and two of the followers caught her by either wrist and dragged her forward.

"Oh, Maurice! Maurice!" she screamed. "I am not fit to die! Oh, forgive me, Maurice, as you hope for forgiveness yourself! Maurice! Maurice!" She strove to get toward him, to clutch at his wrist, at his sleeve, but he stood with his hand on his sword, gazing at her with a face which was all wreathed and contorted with merriment. She turned away and threw back the mantle which had shrouded her features.

"Ah, sire!" she cried. "Sire! If you could see me now!"

And at the cry and at the sight of that fair pale face De Catinat, looking down from the window, was stricken as though by a dagger, for there, standing beside the headsman's block, was she who had been the most powerful, as well as the wittiest and the fairest, of the women of France—none other than Francoise de Montespan, so lately the favorite of the king.

CHAPTER XVII.

ON the night upon which such strange chances had befallen his messengers the king sat in his cabinet attended only by Louvois, his minister. There was a tap at the door, and Bontems peeped in. "The archbishop has arrived, sire."

"Very well, Bontems. Ask madame to be so good as to step this way. And order the witnesses to assemble in the anteroom."

As the valet hastened away Louis turned to his minister. "I wish you to be one of the witnesses, Louvois."

"To what, sire?"

"To my marriage."

The minister started. "What, sire! Already?"

"Now, Louvois; within five minutes."

"Very good, sire."

There had meanwhile been busy goings on in the small room where the red lamp burned in front of the Virgin. Francoise de Maintenon stood in the center, a little flush of excitement on her cheeks and an unwonted light in her placid gray eyes. She was clad in a dress of shining white brocade, trimmed and slashed with silver serge and fringed at the throat and arms with costly point lace. There came a discreet tap at the door.

"It is Bontems, madame," said Mlle. Nanon. "He says that the king is ready."

"Then we shall not keep him waiting. Come, mademoiselle, and may God shed his blessing upon what we are about to do!"

The little party assembled in the king's anteroom and started from there to the private chapel. In front walked the portly bishop, clad in a green vestment, puffed out with the importance of the function, his missal in his hand and his fingers between the pages at the service de matrimonlis. The king and Mme. de Maintenon walked side by side, she quiet and composed, with gentle bearing and downcast eyes, he with a flush on his dark cheeks and a nervous, furtive look in his eyes, like a man who knows that he is in the midst of one of the great crises of his life. Behind them in solemn silence followed a little group of chosen witnesses, the lean, silent Pere la Chaise, Louvois scowling heavily at the bride, the Marquis de Charmarante, Bontems and Mlle. Nanon.

The torches shed a strong yellow light upon this small band as they advanced slowly through the corridors and salons which led to the chapel. A minute later they were before the altar, and the words were being read which should bind them forever together. As they turned away again her new ring blazing upon her finger, there was a buzz of congratulation around her. The king only said nothing, but he looked at her, and she had no wish that he should say more. She was still calm and pale, but the blood throbbed in her temples.

But a sudden shadow had fallen across her, and a low voice was in her ear. "Remember your promise to the church," it whispered. She started and turned to see the pale, eager face of the Jesuit beside her.

"Your hand has turned cold, Francoise," said Louis. "Let us go, dearest. We have been too long in this dismal church."

Mme. de Montespan had retired to rest, easy in her mind, after receiving the message from her brother. She knew Louis as few others knew him, and she was well aware of that obstinacy in trifles which was one of his characteristics. If he had said that he would be married by the archbishop, then the archbishop it must be. Tonight at least there should be no marriage.

She dressed herself with care in the morning. No news had come to her of the great event of the previous night, although the court already rang with it, for her haughtiness and her bitter tongue had left her without a friend or intimate. She rose, therefore, in the best of spirits.

She was still in her boudoir putting the last touches to her toilet when her page announced to her that the king was waiting in her salon. Mme. de Montespan could hardly believe in such good fortune. She had racked her brain all morning as to how she should win her way to him, and here he was waiting for her.

He had come with every intention of beginning the interview by telling her bluntly of his marriage, but now, as he looked upon her beauty and her love, he felt that it would have been less brutal to strike her down at his feet. Let some one else tell her, then. She would know soon enough. All this ran swiftly through his mind, and she as swiftly read it off in his brown eyes.

"You have something you came to say, and now you have not the heart to say it. God bless the kindly heart which checks the cruel tongue!"

"No, no, madame," said Louis. "I would not be cruel. I cannot forget that my life has been brightened and my court made brilliant during all these years by your wit and your beauty. But times change, madame, and for every reason I think that it is best that we should arrange in the way which we discussed the other day and that you should withdraw yourself from the court."

"Withdraw, sire! For how long?"

"It must be a permanent withdrawal, madame. I need not say that I shall make your retirement a happy

PROPERTIES

MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide" The value of the North claim, he submits is "enhanced by the fact that on the claim next east, on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

MAKING SHOES.

An Industry That Illustrates the Spirit of Specialization.

No other industry displays so forcibly the modern spirit of specialization and organization as the shoe business. The last sixty years have witnessed a casting loose from former methods, with the evolution of marvelous labor saving machinery and the perfection of thoroughly organized business systems.

Thus the reader may experience a shock of surprise in learning that that crude and primitive article, the shoe peg, is still in use. Peg mills are scattered throughout the hardwood belt of the northeastern United States. Three small mills in northern New Hampshire annually convert some 3,500 cords of birch wood into 170,000 bushels of pegs.

The white and yellow birch, the only species used, is delivered at the mills in cord wood form. The sticks are peeled of their bark and then sawed transversely into sections of a thickness equal to the length of the pegs to be. From the saws these disks are carried by endless chains to a workman who operates a swiftly revolving bur that gouges out the small knots and other imperfections of the wood. Then the pieces pass between a pair of heavy roller presses, which score the wood in closely parallel lines. Another pair scores at right angles to the first. The tiny interstices between the checkered lines will be the points of the pegs.

The splitting machine has the next turn. The essential features of this device are a striated cylinder, which catches in the scorings and thus feeds the disks into the machine, and a long horizontal knife which jigs up and down with lightninglike rapidity, hitting the scored lines with unerring accuracy as the disks are shoved along beneath it. It requires two such machines to complete the work, the first splitting the wood into narrow ribbons and the second cutting in the other direction into the single pegs.

The continuous stream of pegs which issue from the machine passes under the sharp scrutiny of women, who deftly cull out the dark colored heart wood and turn the good pegs aside upon an endless chain to carry them through the finishing processes.

They must be bleached by sulphur fumes, dried in hot kilns, polished with powdered soapstone in metal lined revolving drums, screened free from dirt and finally bagged in canvas sacks for shipment.

The bulk of this enormous output goes abroad to furnish cheap footwear for the peasantry of Europe.—Youth's Companion.

Turkeys and Grasshoppers.

Machines for gathering grasshoppers have been invented and tried, but the most successful grasshopper gatherer is the turkey. It has the advantage of being a very profitable one too. A ranchman in western Kansas raised turkeys enough last year to keep eighty acres free from damage by this insect pest. Next year this ranchman intends raising turkeys very extensively for this purpose, and nearly all of his neighbors are planning to do the same. If there were a hundred turkeys to each quarter section in this alfalfa belt there would not be enough grasshoppers left to damage any crops. And without considering the good that turkeys do, turkey raising is a profitable industry where insects are so plentiful. After they attain the age of three or four weeks, says Country Life In America, they can obtain their whole living in the fields and cost the farmers nothing until late fall.

HIS HONOR JUDGE MACTAVISH.

Sketch of the Life and Career of Chairman Insurance Commission.

His Honor Judge MacTavish, as Chairman of the Royal Insurance Commission, has had heavy work and great responsibility. Fortunately his is a temperament on which burdens may rest without perceptible ruffling of temper. Calm and judicial by nature, he faces each difficulty as it arises, and sufficient unto the day is the evil thereof. In numberless instances the right of the commission to demand information was questioned by witnesses, but the Chairman was firm in his insistence on what Parliament and the people should know. His manner in the commission has been that of a dignified gentleman; the order of a court room was maintained without any of the airs or pomposity which some judges assume.

Judge MacTavish is a Canadian by birth, and has lived all his life in this country. His father, the late Alexander MacTavish, was a native of Perthshire, Scotland, but the future judge was born in the township of Osgoode, Carleton county, in 1850. He was educated in Metcalf and Ottawa High Schools, and at Queen's University, graduating B.A., in 1870, and M.A. in 1873. He decided on the profession of law and studied first in Ottawa, and later in Toronto. In this city he was associated with the firm of Mowat, Maclennan & Downey. On being called to the Bar in 1877, he began to practice in Ottawa. He was appointed solicitor for the Corporation of Ottawa in 1882, and held that position until his appointment to the Bench of Carleton county in 1897. In 1890 he was created a Q. C. Judge MacTavish is quiet and domestic in his habits, but he has been President of the County Law Association, President of the St. Andrew's Society, and manages to give some time to the Rideau Club, and to golf on the Aylmer links. He is also a member of the Collegiate Institute Board in Ottawa. Personally, Judge MacTavish is one of the most affable of men, a fact which has contributed not a little to the smooth working of the Insurance Commission during its lengthy inquiry.

Mr. Mackenzie's Pet Scheme.

The Winnipeg Telegram views the linking of Toronto with Parry Sound by the Canadian Northern as an event which means much to the Canadian West. It sees the early linking up of this line with the main line west of the lakes. It says: "The despatches which hint at the ultimate linking up of the Toronto and Parry Sound road with the Canadian Northern system at the head of the lakes are not to be doubted. The genius of William Mackenzie is not likely to be stopped by the formidable aspect of the gap between Parry Sound and Fort William. These points must in the natural order of things be connected, either by a fleet of steamers fitted for both summer and winter traffic or by a stretch of railroad. The former is known to be one of William Mackenzie's pet schemes."

"The Old Man's" Burden.

Briggs—The Highblowers keep sixteen servants.

Griggs—That's a good many people to work for.

The Cross of St. Andrew.

Russia's cross of St. Andrew has a remarkable peculiarity attaching to it. All who are decorated with it have the right once to demand a pardon for a Russian subject condemned to death.

PATENTS PROMPTLY SECURED

To solicit the business of Manufacturers, Engineers and others who realize the advisability of having their Patent business transacted by Experts. Preliminary advice free. Charges moderate. Our Inventor's Advisor, sent free on request, explains Marion & Marion, New York Life Bldg., Montreal; and Washington, D.C.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

Watery Blood

Nerves are Weak
Face is Pallid
You Lack Strength
You Look Sickly.

Until You Ironize and Fortify the Blood There's No Hope of Cure.

Thousands of tired workers need the invigoration, the strength, the nerve-force which Ferrozone can supply.

Ferrozone imparts strength because it nourishes.

Ferrozone is able to nourish because it supplies to the blood the elements it lacks.

Once the blood is vitalized, its tonic influence is circulated to every nook and corner of the blood, carrying new life with it.

Cases on record prove that Ferrozone builds up when else fails. Mr. Alonzo W. Douglas, of Woodbridge, Ont., says: "I desire to state the results I derived from the use of Ferrozone. Two years ago I was stricken with pneumonia. So severe was the attack and so reduced was my strength that my life was despaired of. I had the very best medical attention, but made no progress towards recovery. When reduced to practically a skeleton, a kind friend told me of the remarkable powers of Ferrozone. An improvement began almost at once. I gained steadily in weight and strength until Ferrozone made me a new man. I will gladly answer inquiries from other sufferers if they care to have further particulars about my recovery. Ferrozone deserves its great measure of success."

When a man in Mr. Douglas' low condition can be quickly cured, aren't the chances good for you? Don't fail to try Ferrozone. Price 50c. per box at all dealers.

Boarders Wanted

Good accommodation for boarders in a home with all modern conveniences. Apply at 29 Queen street. 6t

Mr. Mitchell in Liquors Exclusively

Mr. F. J. R. Mitchell, Hunter street, one of the oldest grocers in the city, has decided to go out of the conjoint business. He will devote his time and attention exclusively to the liquor trade. Mr. Mitchell will, as soon as his grocery stock is disposed of, confine himself exclusively to liquors. e.o.d.t.f.

Mr. Knapman in the City

Mr. J. S. Knapman, who has been in Parry Sound, North Bay and New Ontario, on a business trip for the Bell Telephone Co., is in the city. While in New Ontario he made a few enquiries about the mining industry. Everything there he notes is on the boom.

Work Delayed on Southern Hotel

Work on the new addition to the Southern Hotel has temporarily ceased owing to the fact that one roof will cover both the present occupied venerable building and the recently added brick addition. As soon as the weather moderates work will be resumed, the old roof stripped off, and a new and up-to-date roof placed over the whole establishment. Mr. Nixon under present conditions has difficulty in providing for the fast increasing business of the Southern Hotel. McPherson Bros. have the contract for plumbing, heating and lighting of the reorganized building.

The New Term
—AT THE—
PETERBOROUGH
BUSINESS COLLEGE
Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.

You cannot make a better investment.

For particulars, address

W. PRINGLE
Opposite Post Office, Principal.

LOCAL INCIDENTS

By The Times Man on the Street

—Tomorrow is Ash Wednesday.

—Local fish dealers have placed large orders for the Lenten supply.

—A special meeting of the City Council was held yesterday evening.

—Few mosquitos or bare boys along the booms were visible yesterday.

—The Y.M.C.A. cooking lessons given this week are attracting much interest.

—This is the day that will wind up by the Foresters' carnival in Brock street rink.

—A number of the Knights of Columbus left yesterday for Ottawa on business of the Order.

—The boys of St. Peter's school will give another concert this evening. Mr. Harry Bennett will assist.

—Evangelistic services will be continued during the present week at Auburn church by Mr. Mapleselen.

—Yesterday a 52-wire cable was connected with the Bell telephone office to relieve the pressure on the Charlotte street service.

—This is the day that the little ones want to tempt Providence by absorbing unlimited numbers of "pan cakes," on Shrove Tuesday.

—Mr. F. R. J. MacPherson has been awarded the contract of heating the residence of Rev. Father Keilty, of St. Joseph's church, Douro.

—The Fire, Water and Light Committee will meet this evening and the Board of Works on Wednesday evening.

—Mr Dawson Kennedy, who is selling membership tickets for the Peterborough Industrial Exhibition is meeting with great success.

—The annual meeting of the Peterborough Shovel and Tool Company, was held yesterday afternoon in the company's office, where reports were received, showing a very prosperous year.

—The next meeting of St. Paul's church Young Men's Guild will be held on Tuesday evening, next week. Mr. F. D. Kerr will address the members on "A Trip to Great Britain and the Continent."

—In a pool gotten up in a local hotel yesterday on the game for tonight, Midland seemed to be strongly favorite in the betting. Perhaps some of those betting against the locals, will regret this when the pool is paid.

Yesterday afternoon whilst on King street, a horse belonging to Mr. R. A. Elliot, pump dealer, started off for parts unknown. Mr. Elliot had left his horse standing untied. The animal became frightened at a shunting engine at the G.T.R. station, ran away, turning at Aylmer street and as far as Robinson's livery, where it was stopped. No damage of any account was done, but Mr. Elliot lost a good robe.

St. Andrew's Church Notes

The Young People's Society of St. Andrew's church held a special meeting yesterday evening.

The Ladies' Aid Society also held a special meeting at the residence of Mrs. F. L. Robinson, Charlotte street.

The regular prayer meeting will be held this evening.

Midland Scores Given Tonight

As each game is scored in the Peterborough-Midland game at Midland tonight, it will be promptly bulletined at the carnival at Brock street rink. An excellent service has been arranged and prompt returns can be expected.

Mrs. Jas. Martin Laid to Rest

The remains of the late Mrs. Jas. Martin, of Douro township, who died on Thursday last at the residence of her father in Hope township were brought to the city yesterday afternoon on the 5.30 G.T.R. train and interred in Little Lake cemetery.

City Treasury Enriched

—The city treasury has been enriched by $294.98, for which cheques have been received by City Treasurer Frank Adams, as Peterborough's share of the new provincial tax on railways. This amount is what was left after deducting $735 for the care of patients in the different insane asylums in the province. The money came in two cheques, one for $163.32, as being the city's share, and the for $131.76, being the new east ward's share.

Piles get quick relief from Dr. Shoop's Magic Ointment. Remember it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding, or blind piles disappear like magic by its use. Try it and see. J. D. Tully.

St. John's Church Meetings

The Girls' Auxiliary met last night.

The Women's Auxiliary meets this afternoon at 3.30 o'clock.

The Girls' Guild meets tonight at eight o'clock.

A cottage prayer meeting will be held tonight at 7.45 o'clock.

On Ash Wednesday divine service will be held at 11 a.m. Divine service will be held at eight o'clock in the evening at which Rev. H. Ben Olier, of Millbrook, will be the special preacher.

The Brotherhood of St. Andrew meets at nine o'clock tomorrow evening.

The Mission Band meets on Friday afternoon at 4.15.

Croup can positively be stopped in 10 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tully.

SOCIAL AND PERSONAL

—Mr. H. F. Akey, of Campbellford, was in the city yesterday a guest at the Oriental.

—Mr. E. A. Peck was confined to the house yesterday suffering from la grippe.

—Mr. James Fax, of Toronto, the widely known entertainer, is a guest at the Oriental.

—Mr. H. T. Akey, of the Union Bank, Campbellford, was in the city yesterday.

—Mr. and Mrs. John Cavanagh, of Buffalo, are guests at the Cavanagh House.

—Miss Macoun, of Ottawa, is the guest of Mrs. J. H. Larmonth, for a few days.

—Mrs. J. R. Webb will receive on Wednesday afternoon of this week, at her home, 344 Rubidge street.

—Miss Elma Storey, of Peterborough, is visiting her aunt, Mrs. Alex. Walsh, Parrytown.—Port Hope Guide.

—Miss Harper, who has been visiting with friends in Toronto, for the past two weeks, has returned home.

—Mr. Neilson of Belleville, who has been a guest of Mrs. W. H. Bradburn, left yesterday morning for Toronto.

—Mr. Gustava Fenus, manager of Pappas pool room, 337 George street, is spending a few days with friends in Toronto.

—Mr. Dan Devine, who was formerly with Mr. W. Burnton, uptown G.T.R. ticket agent, but now in the Union Station, Toronto, is spending a few days in Peterborough.

—Mr. J. W. Latimer, of this city, who represents Messrs. F. Edwards & Co., the Toronto wholesale liquor dealers, spent Sunday in the city. He left last night on his eastern trip.

—Mrs. T. J. Begley, who has been ill at the home of her parents South Ops, Lindsay, during the past three months, returned to the city Saturday evening, much improved in health.

—Mr. George A. Gillespie and N. G. Somerville, of Brockville, left yesterday morning to attend the annual meetings of the butter factories in Lindsay, Cannington, Lorneville and other places.

—J. J. O'Donnell, Montreal, Sam Lurney, Ottawa; W. H. Fox, Lawrence J. Levy, J. H. Cameron, James Fax, Toronto; S. F. Ridgley, A. Belton, Toronto; D. S. Cunningham, Hamilton; T. E. Price and J. F. Mellier, Montreal, are guests at the Oriental.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

There was quite an audience at yesterday's session of the police court. Before the court formally opened Dr. McNully spoke to the Magistrate regarding the insane man, H. P. Heffernan, who, as noted in yesterday's issue, had escaped from St. Joseph's hospital the preceding day. Heffernan, who will be taken to the asylum this week, was remanded until Thursday for examination and making of the commitment papers. Dr. McNulty laid the official information in this case.

Joseph O'Toole pleaded not guilty to having been found drunk in a public place on Sunday. P. C. Adams, who arrested him, said that he arrested him on the corner of Charlotte and Aylmer streets. O'Toole was not making any disturbance but could hardly walk, and resisted arrest. The city bylaw was consulted. O'Toole then went into the box and said he was walking down Charlotte street when Adams arrested him. He resisted arrest when P. C. McGinty came along. "Where did you get your liquor?" to which O'Toole replied: "I found it behind the C. P. R. station, drank part of it and threw the rest away." To this the Magistrate answered: "Now don't lie to me!" However, the prisoner stuck to the story of finding the bottle of booze. The Magistrate fined him $5, to be paid forthwith or ten days in jail.

A young man was charged with having assaulted a woman, to which he pleaded not guilty. The defendant then swore out an information against the original prosecutor, the woman, of having used grossly insulting language, towards him. Mr. McWilliams appeared for the young man and Mr. Kerr for the lady; however, Mr. Kerr noted he had just found out that his firm could not act in the case, owing to their having had business with its client of opposing counsel in connection with a will case. He noted that Mr. O'Connell would handle the case for the lady. As Mr. O'Connell was in Ottawa and will not be home until tonight, the case was enlarged until Wednesday at 2 o'clock in the afternoon.

Geo. Greatrix was charged with having been drunk on Saturday evening, and pleaded not guilty. P. C. Newhall, who was called from bed to give evidence in the Greatrix case, said he was called by 'phone Saturday night to 289 Park street. The prisoner was drunk and raising a disturbance. Prisoner tried to get into the house. His wife said he had got drunk before and was tired of it. She said she would appear against him if arrested. Prisoner said he paid the rent and had a right to go with the house. Greatrix then went into the box and said he broke a window accidentally and his wife ran out to a neighbor's house. He did not lock his wife out or abuse him in any way. He was in bed undressed when Newhall arrived and arrested him. He had had a few drinks but was not drunk. P. C. Newhall then testified that he went twice to the house, the first time everything was quiet. He then started to go away, when prisoner came out of the house yelling that he would brain any one who interfered with him. $2.00 fine with $3.75 costs.

All Saints' Lenten Services

During Lent services will be held in All Saints' church every Monday, Tuesday, Wednesday and Friday and Tuesday, Wednesday and Friday at five o'clock in the afternoon and on Thursday evening at a quarter to eight o'clock.

The Senior Girls' Guild meeting which was to have been held yesterday evening has been postponed.

On Thursday afternoon at half past two o'clock the Women's Guild will meet for sewing.

This evening the Men's Guild will give an interesting entertainment.

DOCTORS MISTAKES

Are said often to be buried six feet under ground. But many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous prostration, another with pain here and there, and in this way they present alike to themselves and their easy-going or over-busy doctor, separate diseases, for which he, assuming them to be such, prescribes his pills and potions. In reality, they are all only *symptoms* caused by some uterine disease. The physician, ignorant of the *cause* of suffering, keeps up his treatment until large bills are made. The suffering patient gets no better by reason of the wrong treatment, but probably worse. A proper medicine like Dr. Pierce's Favorite Prescription, *directed to the cause* would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery. It has been well said, that "a disease known is half cured."

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is "Fearly Favorite" in its

[illegible] a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out," run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic.

As a soothing and strengthening nervine "Favorite Prescription" is unequaled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, St. Vitus's dance, and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency.

Dr. Pierce's Pleasant Pellets invigorate the stomach, liver and bowels. One to three a dose. Easy to take as candy.

Mr. Simons Won the Turkey

Last week's competition for a 17-pound turkey at Yeates Bros.' shooting gallery resulted as follows:

J. Simons	58
Hugh Mackay	55
Stanley Russell	55
Bert Lang	55
A. Woodover	54
H. Martin	54
A. Davis	54

This was out of a possible score of 60. These competitions are apt to make marksmen for our local regiment.

Household Science at Y.W.C.A.

Children's Class, Monday, 4.15 p.m., 10 lessons $1.00.

Plain Cooking, Monday, 2 p.m., Tuesday, 7.30 p.m., 8 lessons $1.50 members; $2.00 non-members.

Advanced Cooking, Wednesday, 9.15 a.m., Friday, 7.30 p.m., 8 lessons $2.00 members; $2.50 non-members.

SPECIAL. Candy, Saturday, 2 p.m., 6 lessons $1.00.

What's Doing at St. Paul's

The Board of Managers will hold their regular monthly meeting this evening at eight o'clock. A joint meeting of the session and managers will be held at 8.30 o'clock.

The regular weekly prayer meeting will be conducted tomorrow evening by the pastor.

The regular monthly meeting of the Faithful Workers' Mission Band will be held on Thursday afternoon at 4.15 o'clock.

Representatives from the Missionary Society of Queen's University, Kingston, will give illustrated addresses in St. Paul's church S. S. school room on Friday evening next on the work which the Society is carrying on at certain points in the Canadian west and New Ontario. Limelight views will be shown and it is expected there will be a large attendance.

A Gravel Road Prize Fight

News reached the city yesterday of an amateur prize fight that occurred a day or two ago at what used to be the old toll-gate on the gravel road near the corner of Sherbrooke street, between a well-known Cavan man and a Monaghan farmer. It seems that the cause of the fight centered in the old French expression "Cherches la Femme." The trouble arose directly at the corner of Simcoe and George streets, when after a wordy dispute, the principals decided on account of police interference always possible to adjourn to the toll gate as noted. Four cutters, laden with buckers, spongecarriers, etc., accompanied the disputants to the place named. In the fifteenth round, it is rumored that the Cavanville man won out but that since the match the Monaghan man has captured the girl.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

The Foresters Hold a Successful Carnival

Many People Attend---Dusty Wins the Mile Race in 2.40---Fancy and Comic Costumes in Profusion.

Despite the many attractions last night the carnival did not suffer in the least. The rink was well filled, and many people costumed themselves to try for the honors. From the sporty dude with his summer yachting suit to the stalwart form of King Charles I., everyone was working for one end.

The evening's fun began about 8.10, when B. Dusty, Wm. Dartnel, H. Dunsdale, G. Barritt, G. McDonald and A. Allen lined up for the mile race. Mr. Sam Ray was starter, and Mr. Gibson, timekeeper.

The race was fast from the start, Dusty keeping the lead all the way, and finished about ten yards ahead of A. Allen, who was about the last, till the last lap, when he crept up to his finished position, and was followed by G. McDonald, who held third place all the way through. Dusty certainly is a coming racer and at periods he was nearly a lap ahead of his opponents, and finished easily and fresh.

After the race the bell was rung for the carnival to line up.

Mr. and Mrs. Brown, and Mr. and Mrs. Gus. Hayes, acting as judges. The costumes were all good, many appearing as soldiers, Highlanders, Gypsies, and the majority as "coons."

The costumes of the different Queens of May, were very beautiful, as were also those of King Charles, and the Indian. The comic costumes were very hard to choose. The winners were;

Race—B. Dusty, Time 2.40.

FANCY COSTUMES.

Best Dressed Ladies—
Miss Logan—Indian Princess.

M. W. H. Gibbs—Gipsy Fortune Teller.
Amy Houden—Starry Night.
Ruby Martin—Gipsy Queen.
Stella Davies—Union Jack.

SPORTING TOPICS

THE TURF.

Bills are now out for the Harwood races which take place on Rice Lake on Thursday, Feb. 21st. The races includes a "free-for-all" for $50, in $25, $15 and $10; 3 class for $30 in $15, $10 and $5, and the Houedry Pea Company's race for Harwood District farm horses, pace or trot for $25, in $12, $8 and $5. Entrance 5 per cent., and 5 per cent. from winners. Martin Connors of this city is down as starter, but it is possible Mr. Connors may have to go to Orillia on that date. Several local horsemen have signified their intention to attend.

TO CURE A COUGH

A noted authority on lung trouble advises that as soon as a cold is contracted, the following simple treatment should be given. The ingredients can be purchased from any prescription druggist at small cost and easily prepared in your own home. It is said to be so effective that it will break up a cold in twenty-four hours and cure any cough that is curable.

Take a half ounce Virgin Oil of Pine (Pure), two ounces of Glycerine, and eight ounces of good Whisky. Shake well and take in teaspoonful doses every four hours.

Be sure that the Virgin Oil of Pine (Pure) is in the original half-ounce vials, which are put up expressly for druggists to dispense. Each vial is securely sealed in a round wooden case, with engraved wrapper, with the name—Virgin Oil of Pine (Pure), prepared only by Leach Chemical Co., Windsor, Ontario, printed thereon. Only the adulterated oils are sold in bulk; these create nausea and never effect the desired results.

A Night of Boquets at the Opera House

All the Lady Leads in Zephra Presented With Floral Tributes to Their Worth—Last Performance of This Grand Spectacle Greeted by a Crowded House.

The opera house was crowded to a demonstrative audience last night, when the sparkling and merry musical pantomime "Zephra" was presented for the last time this season in Peterborough. The piece has steadily grown in popularity as evidenced by the big houses Monday and last night, and there is no doubt that much regret is felt that Zephra has not been scheduled for a few more nights. The presentation is of a character but seldom offered in a city of this size, and the highest measure of credit is due our local talent for the faithful impersonation of their several parts and the phenomenal excellence of the whole production.

Mr. H. J. Booth's unaided interest in preparing and directing the performances will not be readily forgotten by a grateful amusement loving public, who will be prepared to liberally patronize anything of a like nature he may in the future undertake in Peterborough. The lessees of the Grand, Messrs. J. J. Turner & Sons, are to be congratulated on forwarding the success of the scenic operations of Zephra by their ready co-operation with Mr. Booth in his efforts to leave no stone unturned to insure that smoothness of mechanical operation necessary to the success of so big a spectacular production as the story of Queen Zephra.

Last night might truly be said to have been an evening of boquets at the opera house, all the lady leads being favored with beautiful floral tributes to their undeniable talent. Miss Nellie McOrb and Miss Bertha Purnell received two boquets each, and Misses Mona O'Shea, Florence Butcher, Pearl Morgan, Nellie Graham, and Ruth Dawson, one each. The presentation of each floral offering to operatic worth was the occasion of unbounded applause and enthusiasm.

The presentation of Zephra last night was so perfect that it was hard to realize that those taking part were local amateurs. Miss Nellie Graham was irresistible in her number, "Louisana Lou." The Blackbird dance and flower dance were bewitchingly graceful in every movement. Jessie Spence's step-dancing demanded an encore that the audience would not be denied. The Japanese dance and chorus with Pearl Morgan in solo, was charmingly unique, and a favorite number with one and all; the drill of the White Hussars was astonishingly perfect and picturesque in every movement; in fact every number would have been repeated, had the audience had their way.

Last night concluded one of the most brilliant, sparkling and acceptable productions ever offered in Peterborough, and a better satisfied audience never left the opera house.

Messrs. J. J. Turner & Sons' tasteful decoration of the boxes with the hockey club's colors, blue and white, was much admired, and had an exceedingly dressy effect.

Too much credit cannot be given Messrs McIlroy, Wesley and Lynch for their faithful impersonation of the characters allotted them.

Lindsay Opera House Changes Hands

It is well known to most of our readers that Mr. Rupert Bradburn, formerly the efficient controller of the local opera house's finances, had a large interest in the Lindsay home of the drama.

Mr. Wm. Walker has now acquired the interests in the Lindsay opera house formerly controlled by Mr. Bradburn and will hereafter manage that opera house that, built under inspection of the local architect, Mr. W. Blackwell, is so great a credit to Scugogville. It is said that Mr. Walker has had a lengthy experience in theatrical matters having been connected with the Academy since it was first opened, and he will no doubt make a capable manager.

Good Entertainment by All Saints' Guild

Yesterday evening the long expected mock trial was heard in the All Saints' church Sunday school room, and without undue praise the expectations of the most optimistic were amply fulfilled.

The trial which was for a breach of promise, was heard before "Judge" Green, with Mr. Kerr and Mayor McWilliams as counsel, both of which gentlemen in their appeals to the jury displayed such a fund of humorous oratory, that they had the audience in convulsions of laughter all the time.

"Judge" Green in summing up the case, also displayed much wit.

Altogether the Men's Guild of All Saints' have reason to congratulate themselves on the success of the entertainment, which was brought to a close by the serving of delicious refreshments.

Once a Millionaire's Wife

Winnipeg, Feb. 12.—A coroner's jury last night investigated the death of Nellie Padden, a somewhat notorious character, who died in a cell at the police station Saturday night. They returned a verdict to the effect that death had been due to alcoholism. Nellie Padden was a favorite star here in a stock company at the old Princess theatre was a magnificent singer in her palmy days and the divorced wife of a Minneapolis millionaire.

Another Great Cobalt Opportunity

The general trading public does not require to be reminded that fortunes have been made, and are daily in the making, in Cobalt's silver and gold laden properties—this is an acknowledged fact. Those interested, or likely to be interested, in the immense possibilities of the Cobalt region, however, are open to advice as to how and where to invest their funds to best advantage.

In other columns of this issue appears a large advertisement well worth serious consideration, viz., that of The Cobalt Development Company, Limited. The names of the directorate of this company alone, which may be seen by a glance at the adv., are sufficient guarantee that the proposition presented is well worth consideration. We note that the name of Mr. G. Stevenson, known to many of our local citizens appears among the list of directors. Mr. Stevenson's name alone is sufficient guarantee of the company's credibility.

The Cobalt Development Company owns five claims, containing 160 acres, under active development and heavily mineralized. For a limited time only the company offers a number of shares, fully paid up, at 20 cents per share. It might be noted that those wanting to get in on the ground floor should write at once as the subscription list at above noted prices closes positively on February 21st. Now is the time to get in and take advantage of what raise in price may take place after that date. For full particulars address A. R. Bickerstaff & Co., 20 King street east, Toronto, or 'Phone M. 5710.

BIG SHRINKAGE IN SECURITIES

World Has Seen $2,000,000,000 Fall in Values in Twelve Months.

IN SPITE OF PROSPERITY

Decline Has Been World Wide and No Country Has Escaped.

Montreal, February 11.—It is an ominous fact that, in a year of the greatest industrial activity known to all nations, there should have been such a world-wide shrinkage in values of securities. The depreciation in stocks and bonds listed on the different exchanges of the United States, Canada and Europe, amounts to fully $2,000,000,000. This is five times the year's gold production.

The decline in Americans is put at $500,000,000; in English quoted issues it is from one-half to three-quarters of a billion dollars; in French holdings fully $250,000,000; and about the same amount in Dutch and German investments; with an aggregate in Russian Government and industrials held at home that is incalculable.

Not for many years has there been such a universal shrinkage, and the peculiar aspect of it is the fall in values coincident with trade conditions that have never been equalled.

One naturally wonders if this depreciation, under such circumstances, means the beginning of decay in the investment situation, and inability of capital to withstand the tremendous strain of an industrial revolution.

Is it the first sign of thorough liquidation that will bring the much needed increase in liquid funds?

EARTHQUAKES AND WARS.

It might be said off-hand that the $2,000,000,000 shrinkage in securities equals the destruction of capital in the Russo-Japanese war, in the San Francisco fire, the earthquake in Chili and in other smaller catastrophes, whose full effect was felt during 1906.

A very considerable part of the $250,000,000 contraction in France was due to the heavy fall in all classes of Russian issues, of which the French investor holds $2,500,000,000 worth. Such countries as Germany and Holland were hurt severely in the same decline.

The English holdings of Russians are limited to the last loan, and the loss is, therefore, slight. Where the English security holder suffered was in the enormous fall in the stocks of insurance companies, which were badly hit by the San Francisco disaster.

Peterboro' Defeated

The Peterborough Hockey Club met their second defeat of the season last night, when the Midland bunch won by a score of 13—6 in that town.

Trying to Prove Thaw's Insanity

New York, Feb. 13.—The fact that yesterday was Lincoln's birthday anniversary, and a legal holiday, as well as the centenary of Harry Thaw's birthday, he being 36 years old, had no effect on the Thaw trial, which went ahead at the usual hour. When Thaw was taking his place he seemed to fix District Attorney Jerome with his gaze, and kept his eyes upon the prosecuting officer while removing his glaze coat, and for some moments after taking his seat.

Mr. Jerome was busy with his papers, and did not notice Thaw's somewhat unusual action.

The first witness called by Mr. Delmas was Dr. Britton D. Evans, Superintendent of the State Insane Hospital at Morris Plains, N.J. Dr. Evans said he was born in 1858 and graduated from the Baltimore College of Physicians and Surgeons in 1885 and afterwards did post-graduate work at Johns Hopkins. He was for four years assistant superintendent at the Maryland Hospital for the Insane, and was afterwards superintendent of the Sattle Hospital for the Feebleminded.

Canada Their Mecca

London, Feb. 13.—At a meeting of the Charlton Board of Guardians, it was stated that reports from Canada are so excellent that a majority of the Board were more than ever in favor of emigration. The Guardians has already sent a number of children to Canada.

The emigration boom is in full swing. At one time yesterday there were twenty-two people making enquiries at the Canadian Emigration Office.

There are so many callers at the office that it has been found necessary to considerably lengthen the counter accommodation.

Frozen in New York

New York, Feb. 13.—The wave of bitter cold which swept down on the city Monday night sent the mercury down almost to the zero mark. Following the almost springlike mildness of yesterday, hundreds of thousands of persons were unprepared for the extreme change and intense suffering resulted. A strong wind added to the discomfort. The mercury dropped from 35 degrees above zero at noon Monday to one above at 7 a.m. yesterday. There were many tenement house fires early yesterday, and hundreds of persons were forced to flee into the streets attired only in their night garments. Many had narrow escapes.

Two unidentified men were frozen to death in the streets during the night.

Spirit Monies Stolen

Moscow, Feb. 13.—Another search for bombs at the Moscow Female University has resulted in several unfilled ones being found. It is reported that the eight girl students arrested relative to the threat of the terrorists to execute the death sentence imposed upon Count Ignatieff, General Pavloff, General von der Launitz and Governor Alexandrowsky have been tried by drumhead court-martial.

A messenger belonging to the Government spirit depot here, while on his way to bank yesterday morning, was held up by ten armed men and robbed of $25,000. The highwaymen in their flight dropped a bag containing $3,500, but got away with the balance.

A Sensational Burglary

London, Feb. 13.—The most sensational art burglary since 1876, when Gainsborough's "The Duchess of Devonshire" was stolen, occurred at Charles Wertheimer's residence in Park Lane last night. Several costly canvasses, including pictures by Gainsborough and Reynolds, worth $80,000, were cut from their frames and carried off. So unskillfully were the pictures cut from their frames that they have been irretrievable ruined, even if they are recovered. The thieves also secured a big haul of jewelry. The property stolen is valued at $175,000 in all.

London, Feb. 13.—A special despatch received here from St. Petersburg says an infernal machine was discovered accidentally last night in a chimney of the house occupied by Count Witte, the former premier. The machine was timed to explode after the family had retired for the night.

Japan's Demands Are the Cause of Much Uneasiness

Their First Step Will be to Exclude Yankee Labor.

Washington, February 11.—There is a belief in Washington that as a result of the conference between the Pacific Coast officials and the President and his advisers the Japanese trouble cloud will float away. Mayor Schmitz, the San Francisco Board of Education and Assistant City Attorney Williams probably will be granted just enough of a concession to make the result of their negotiations appear like a compromise—and this country and Japan will get the rest.

The relations between President Roosevelt and Mayor Schmitz are not cordial enough to raise the heat of the room, but the San Franciscan, it is said, has agreed magnanimously for the sake of the nation to forget that Mr. Roosevelt ever referred to him save in terms of distinguished consideration and respect. So much for harmony and the successful pinning of a new clause to the existing commercial treaty between the United States and Japan.

Members of the Senate and House are worried over the report that the Japanese Ambassador, Viscount Aoki, will insist that in return for the imperial edict forbidding Japanese coolies to leave the empire for the United States there shall be added a clause forbidding American workmen to go to Japan. Of course such a regulation would be merely a matter of sentiment and would be issued for the purpose of salving wounded Japanese pride, for practically no American workmen go to Japan. It is this sentimental matter, however, which is worrying the Senators and Representatives. They declare that the United States Senate never will "advise and consent" to a treaty which creates a class in America.

It seems absolute folly to suppose that the President and Secretary of State would think for a moment of proposing a treaty clause which would make one citizen of America "lower" than another citizen of America, and if it should be put into written form and sent to the Senate it probably would bring such a protest from the country as never was heard before.

Of course the House of Representatives has nothing to do with the ratification of treaties, but the members already have received hundreds of letters of vigorous protest against any such "class treaty making." The members have carried the plaints of their constituents over to the Senate, but they have found that the Senate already was well supplied with plaints of the same kind.

The Senators say that if Viscount Aoki insists on his demand that American laborers be forbidden to go to Japan there is no possibility of reaching any agreement. The Senators say that they wouldn't dare return to their States if they had voted for such a treaty.

Nearly 200 Persons Drowned on Steamer

That Was Sunk in a Collision on the Way From Providence to New York---Only Eight Survivors.

Block Island, Feb. 12.—Only 19 out of an estimated totub of from 150 to 200 persons survived in the sinking of the Joy Line steamer Larchmont in Block Island Sound last night, according to an estimate made at two p. m. today. Of the saved, eight were passengers, six men and two women, and the rest were members of the crew, including Captain McVey. The Larchmont, which was bound from Providence, R.I., to New York, went down after colliding with the schooner Harry Knowlton. The survivors reached this island in small boats.

Boston, Feb. 12.—A statement given out at the Joy Line offices here, said that Captain McVey of the Larchmont had told the New York office that "some of the passengers and crew have landed at Block Island, and it is my opinion that others have landed at places along the mainland."

The company's officials here stated that the steamer Kentucky had been rushed from Fall River to Block Island to render assistance.

A wrecking company at New London was requested to send a tug up Long Island Sound to seek any survivors who might have escaped from the sinking steamer, and the Lighthouse Board has been asked to send tenders on a similar errand.

Block Island, Feb. 12.—Captain Geo. McVey of the steamer Larchmont said at noon today that he had on board between 150 and 200 passengers when the collision occurred, and only eight of these escaped with their lives. At the time he made the statement 18 bodies had been washed ashore, making only 26 out of the total passenger list accounted for.

The passengers met their deaths in various ways. Some of them attempted to launch lifeboats, and were frozen to death on the decks of the foundering steamer. Others were drowned in the attempt to escape before the vessel went down. And still others who were successful in launching a life-boat were frozen to death before the small craft reached shore.

Capt. McVey said he could not estimate the exact loss of life. His estimate of the number of those on board agrees with that made by the Joy Line officials at Providence, who said that the Larchmont carried about 150 passengers and a crew of 30.

The north-west gale continued, with zero temperature, throughout the forenoon.

SCHOONER'S BOW CUT OFF.

Block Island, R.I., Feb. 12.—The steamer Larchmont of the Joy Line, with many passengers on board, bound from Providence for New York, sank off the North-west side of Block Island early today, after having collided with the three-masted schooner Harry Knowlton, of Quonochontaug. Passengers and crew from the steamer took to the boats, but lost their lives either by being drowned or freezing, as the temperature was below zero.

The schooner's bow was cut away, and her captain ran her ashore west of Quonochontaug to prevent her sinking. The crew of seven men, including Capt. Hilty, reached shore safely in their own boats.

The cause of the collision is not known. The night was clear, but there was a strong north-west wind. The sea was very rough. It was intensely cold throughout the night, the thermometer hovering about the zero mark early today.

DEAD IN THE BOATS.

When the first boats came ashore from the steamer it was found that some of their occupants were dead. In the first confusion it was not known whether they had been pulled from the water after having been drowned or whether they were frozen to death.

The Knowlton, which hails from Westport, Maine, was bound from South Amboy for Boston with 475 tons of coal. She has on a family bottom, but is full of water, and it is not known whether she can be floated.

SHIP OF 1,605 TONS.

The Larchmont left Providence at about 6.30 last night for New York, in command of Captain McVey, of Providence. The chief engineer was Robt. Gay of Bridgeport, Conn. She carried a crew of about 50, and had on board a number of passengers and a miscellaneous cargo of freight. The Larchmont registered, 896 tons net, 1,605 tons gross. She was 252 feet in length, 37 feet in breadth, and 14 feet in depth. She was built at Bath, Maine, in 1885.

The Harry Knowlton registered 377 tons net, and hailed from Eastport, Maine. She was built in Totenville, N.Y., in 1890. She was 128 feet in length, 33 feet in breadth, and 11 feet in depth.

HAD 200 PASSENGERS ON BOARD.

Providence, R.I., Feb. 12. — The principal Joy Line office here at 10 o'clock was without information concerning the sinking of the steamer Larchmont.

A telegram sent by Captain McVey to his wife stated that he was safe.

The telegram made no mention of loss of life among the passengers or crew, but a private message received here from Block Island stated that fourteen bodies had been washed ashore.

The official passenger list of the steamer was carried by Captain McVey to be delivered by him upon his arrival in New York. The Joy Line officials estimated that there were about 150 passengers on board, and the crew numbered about thirty.

It was stated that the only list of passengers of the Larchmont was on board the sunken steamer.

Two of the eighteen persons who are known to have purchased tickets at Boston yesterday to take passage to New York on the Larchmont are —Hulgreen and R. H. Parkins.

CURIOUS FAMILY

Coffee Ruined Them

A lady writes how coffee treated her family.

"I was born of a sick-headache family" she says; "my father, English by birth, loved his roast beef and plum pudding, and every rich dish that could be brought on the table and always drank coffee.

"Associated with my earliest memories is the picture of my father, at times, walking the floor, his head bandaged, his fine face drawn with pain, and his eyes rolling as in a delirium. He suffered this every few weeks. His brother was similarly afflicted, as was also their sister.

"I have had many ailments, which I can now see were properly chargeable to the coffee I drank. I am 47 years old, and for the last half of my life have been a sufferer from kidney troubles and extreme nervousness, often tossing about till 3 or 4 o'clock in the morning. My general health suffered of course, and along with everything else was the constantly recurring agonies of sick headache.

"Loving to live, yet life only a burden!

"A friend urged me to quit coffee and drink Postum Food Coffee. I was loth to give it up, but at last I made the change, and it soon made a wonderful change in me. For two years now I have used Postum Food Coffee; it has brought me sound and refreshing sleep at night, as when a child. I have had the headache only twice in the last year, the kidney trouble is passing away and my flesh has been renewed. I used to eat little or no breakfast—had no appetite. Now I wake up hungry and enjoy the meal with a relish. I do not tremble or stagger from dizziness, as formerly; my nervousness is gone. The old fits of depression and despondency have given way to the enjoyment of life.

"I conclude from my own experience that coffee is but a subtle and deadly poison, slow but sure in its harmful results, and that it is the cause of many disorders in the human system.

"I find Postum Food Coffee, properly made, a most delicious, invigorating beverage that heals while it nourishes. It has cured me, and I'm sure it has added years to my life." Name given by Postum Co., Battle Creek, Mich.

Look For Blood Humors

They Crop Out Constantly, Showing the System Needs Purifying.

You're not satisfied with your looks. How can you be with such disfiguring pimples, such rough uneven skin?

Blood is full of humors, and it's no wonder you look and feel poorly.

You are languid,
Appetite is miserable,
Sleep is hard to get,
Snap and vim are lacking.

High time to improve matters—but what's the proper remedy?

Experience proves that Dr. Hamilton's give instant effect. They tone the entire system, fortify the blood, and impart a feeling of new life in a few days.

Unlike strong purgatives, Dr. Hamilton's Pills are exceedingly mild. They are made from concentrated vegetable extracts such as Mandrake and Butternut, and can be taken by young or old, with absolute safety.

"I learnt something very valuable after using Dr. Hamilton's Pills," writes Miss Effie Thomson of Meriden. "I used to have ugly pimples that much embarrassed me. The tonic and purifying effect of Dr. Hamilton's Pills completely restored me. My health is splendid and my complexion a great credit to this marvelous medicine."

Let your medicine be Dr. Hamilton's Pills. They do cure so thoroughly. Sold by all dealers, 25c per box, or five boxes for $1, by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

PETERBOROUGH, FEBRUARY 9, 1907

THE PUBLIC SCHOOL POLICY

Premier Whitney's forecast of amendments to the public school legislation of last session will meet with general satisfaction. In the advanced and somewhat radical legislation of last year the Government took a courageous stand to better the condition of the public schools, and to carry out the promises of the Conservative party when in opposition to give greater prominence to the consideration of primary education. Whatever difficulties have been developed in the practical working out of the Government's acts, they will serve as a guide in the amendments to be made during the present session.

The principle of a minimum salary for rural school teachers will be retained, but will not be based on the assessment of the different sections. The minimum of $300 will remain fixed, and 40 per cent. of the amount paid from $300 up to $500 will be returned to the section as a Government grant. This will necessitate a large increase in grants to rural schools; it is estimated that this amount will total $580,000—more than double the grant paid to these schools under the Ross Government. The minimum of $500 as a salary for a teacher is such as will occasion no hardship to trustees and at the same time affirms the principle laid down last session; in the case of a surplus of teachers in the future it will prevent underbidding and the ridiculously low salaries which in times past have been discreditable to teachers and trustees alike.

EDITORIAL COMMENT.

Dr. Kenealy's speech in the English Tichborne trial lasted 110 days, but the longest continuous talk is supposed to have been achieved in the legislature of British Columbia, when a member, who was in a minority of one, succeeded in "talking out" a bill by speaking twenty-six hours without intermission.

The Toronto people are making a dreadful row about the crowded condition of the street cars, perhaps forgetting that they are doing the crowding themselves.

Direction of the anti-footbinding movement in China, which was started by American and English women, has now been handed over to the Chinese themselves, and both men and women have become interested in the work. They have already established several of the societies throughout the empire.

Complaint Against Leopold

Paris, Feb. 12.—Prince Louise of Belgium, the divorced wife of Prince Philip of Saxe-Coburg-Gotha, in an open letter published in the Matin yesterday, complains bitterly of the heartless fashion in which her father, King Leopold, has abandoned her, even allowing the heritage which she derived from the late queen mother to be seized for debt.

MEN WHO LEAD LORDS.

Marquis of Lansdowne Said to Be a Subtle Warrior—Lord Crewe His Chief Opponent.

The striking parliamentary picture of recent days has been the duel in the House of Lords between an aristocratic Unionist and an equally aristocratic Radical.

There are keen thinkers and brilliant speakers on both sides of the House of Lords, men who would give distinction to any legislative gathering, but in the recent debates there have stood out two personalities, clean cut and dominant. They are the generals commanding the forces on each side; men who have not only to fight the Opposition, but to guide and, in some cases, repress their own followers. They have distinguished themselves in striking fashion. Their unceasing patience with platitudes, their skill in the verbal flanking of opponents, their unshakable courtesy, and their sudden deadly swiftness of attack, have seized the attention of the most casual visitors.

The two men are the Marquis of Lansdowne, leader of the Unionist peers, and the Earl of Crewe, the present virtual leader of the Liberal peers.

Rather Bald.

The Marquis of Lansdowne is a famous leader, a tried and subtle warrior, who never flinches, who always goes out to win. He is a slim little man, with a statesman's head. He is rather bald, with iron-grey moustache, curved, powerful nose, and non-committal eyes, and gives the impression of a delicately made aristocrat, with a reserve of iron strength.

He is always perfectly dressed, and his distinguishing mark is a neat dark tie, fastened in a bow. He walks with quick, nervous steps, and it requires but little imagination to understand that behind an impassive face his brain is working continuously and rapidly. As he sits among his colleagues his back is erect with the rigidity of the grenadier, and he stands to address the House with the same stiff, unbending pose. One is aware that in spite of his smooth words nothing on earth would turn him from his purpose.

Illuminating Argument.

A hush always falls on the Lords when Lord Lansdowne rises from his place in the exact middle of the front Opposition bench, and steps forward and lays his hand on the despatch-box on the table. For the House knows it is to have real guidance and illuminating argument.

Lord Lansdowne does not speak very frequently, even though he leads his side. But the peers know that when there have been hours of argumentative tangle, when the desires of Government and Opposition alike have been obscured by amendments, and counter-amendments, and amendments to amendments, it will be Lord Lansdowne who will rise and in two minutes pull the heart out of the argument, and hold it up for the House to see. But that is only one part of his power as leader. He has a modest, penetrating voice, possessing the peculiar property of inspiring confidence. It is almost impossible for a man with any sympathy with Lord Lansdowne to hear him speak and believe him wrong. And he unites to this a masterly skill in the management of men.

Is Sarcastic.

He revels in grave sarcasm. Lord Crewe made a speech on a subject which he desired to leave a matter for open voting among his followers. Lord Lansdowne congratulated his friend on his eloquent speech. "I have followed it," he said, "with earnest attention, not only on account of the importance of the subject, but also on account of the noble lord's judicial attitude. I admired his earnestness and eloquence, but what impressed me most was his impartiality." A pause. "Yes, until the last minute I did not know on which side of the fence his lordship was coming down."

Lord Crewe, the present great opponent of Lord Lansdowne, has added daily to his reputation in his conduct of the bill, and daily impressed his personality more deeply on the House. He is a delightfully romantic figure, slim, extremely tall, with a very winning manner. He is comparatively young, but has the wisdom of seventy. Picture to yourself this slim man, standing up from among the handful of his gray-bearded colleagues, and with smiling eyes and soft, persuasive voice, gently beating arguments into the other side with his silver pencil-case. He looks the typical debonair aristocrat, and goes to his work with a certain serious gayety delightful to behold.

Full of Facts.

But for all this Lord Crewe is a master of debate. More than that, he has conquered the intricacies of a complex subject with a thoroughness which would do credit to the professional chief of a department. Despite his elegance and suavity he is laden to the finger-tips with facts and beneath his courtesy there is an immovable firmness. He will set forth technical details with an enlivening wit, and will express his uncompromising hostility to a suggestion in words of honeyed sweetness.

And so Lord Crewe continues with his hopeless task, trenchant, witty, sometimes gay, and always undismayed, sometimes taking hard knocks, but never failing to return them, a gallant fighter and a clever man.

Heart Strength!

Heart Strength, or Heart Weakness, means Nerve Strength, or Nerve Weakness—nothing more. Positively, not one weak heart in a hundred is, in itself, actually diseased. It is almost always a hidden, tiny little nerve that really is all at fault. This capsule-nerve—the Cardiac, or Heart Nerve—simply needs, and must have, more power, more stability, more controlling, more governing strength. Without that the Heart must continue to fail, and the stomach and kidneys also have these same controlling nerves.

This clearly explains why, as a medicine, Dr. Shoop's Restorative has in the past done so much for weak and ailing Hearts. Dr. Shoop first sought the cause of all this painful, palpitating, suffocating heart distress. Dr. Shoop's Restorative—this popular prescription—is alone directed to these weak and wasting nerve centers. It builds! It strengthens: it offers real, genuine heart help.

If you would have strong Hearts, strong digestion, strengthen these nerves—re-establish them as needed, with

Dr. Shoop's Restorative

HUMOR

SOME PROVERBS.

Back Action Observations as a Cure For the Blues.

Fine feathers ne'er can make fine birds, 'tis true; but what would become of the peacock if he was dressed like a frog?

A stitch in time to save nine is a patch just the same.

Money saved is money made, but you always have to make it first.

Talk may be cheap, but the telephone companies have got mighty rich handling it.

The early bird may catch the worm, but it's not exactly a square deal for the worm.

All things come to him who waits, but it takes a lot of hustling to find the right place to wait.

If it is true that riches have wings it's hardly right to bowl because rich people are high fliers.

If you could convince people that the good die young nine-tenths of the human race would be imitating the devil in an hour.

A soft answer may turn away wrath sometimes, but generally it is poor protection to your face if the other fellow is a good hitter.—A. E. Neal in Judge.

An Understudy.

"Have you got a job, Sam?"
"Yes, sah."
"What are you doing?"
"I'm an understudy, sah."
"An understudy, Sam?"
"Yes, sah. My wife does washin', and I'm her understudy."
"But have you ever been called upon to take her place?"
"No, sah. I hain't got dat far yit, sah."—Yonkers Statesman.

Tests of Strength.

"That butter is all right," said a boarding house keeper. "It is firkin butter and tastes of the wood a little. That's all."

"If that is the case," replied a boarder who is a contractor, "I should like to get some of that wood to make railroad bridges out of." — London Globe.

Slightly Tangled.

The Cow Moose (petulantly)—Why were you so long coming, dear? Didn't you hear my call?

The Bull Moose—My darling, I'd know your sweet voice among a thousand, but—er—you know those pesky hunters put up some mighty close imitations nowadays.—Puck.

Acquired Talent.

"Ma," said the small son of a pugilist, "pa isn't a natural born fighter, is he?"

"Of course he is," replied the mother.

"Why do you think he isn't?"

"Oh," replied the young hopeful, "I heard Mr. Neighbors say he acquired the knack since he married you!"—Boston Transcript.

Sorrow of It.

Miggles—I see by the papers that your new book has made you famous.

Scribbles—Yes, but it's a questionable brand of fame, after all.

Miggles—How's that?

Scribbles—My creditors are constantly soliciting my autograph on a check.—Detroit Tribune.

He Must Have Told Her.

"No," said Miss Goodley, "I've never been introduced to Mr. D'Auber. I've been told, though, that he is an exceedingly clever artist."

"My, I'm shocked!" exclaimed Knox, "if you were never introduced, why did you let him speak to you?"—Philadelphia Press.

A Point in His Favor.

"Nuritch is the most stupid ignoramus I ever met."

"Think so?"

"Of course. Why, what he doesn't know would fill any number of books."

"Well, it seems to have filled one bankbook."—Houston Post.

Flattering.

"How much postage will this require?" asked the young author. "It is one of my manuscripts."

"Two cents an ounce," answered the postoffice clerk. "That's first class matter."

"Oh, thank you!"—Judge.

Right She Was.

"They tell me your husband draws a salary for sleepin'."

"Sure, that's right, Mrs. Clancy. He's a night watchman."—New York World.

Solicitude.

"Do you think the country is safe?"

"Certainly," answered Mr. Dustin Stax. "We big investors are drawing dividends that make it incumbent on us to insure the country as thoroughly as possible."—Washington Star.

AN OPEN LETTER

From Mr. W. J. Gage, Chairman Executive Committee National Sanitarium Association.

The Trustees carry on this work, having faith in a generous response to their appeals for necessary funds.

TORONTO, CAN., 1907.

DEAR FRIEND,—Out of the several hundred letters received, I reprint on this sheet two that suggest the urgent need and the work of the Muskoka Free Hospital for Consumptives.

The pity of it all is that no letter, or letters, can be written, telling the full story of those who are seeking help.

Because of the contagious nature of the disease, the lot of these poor sufferers has become an increasingly sad and difficult one. To tell the plain truth, relatives and friends often shrink from caring for their afflicted ones through dread of this disease.

The doors of every hospital in Toronto are closed to the consumptive, and this is generally the case elsewhere.

In Canada—the most prosperous country in the world—a country justly proud of its Christian and benevolent institutions—what shall be done?

The doors of the Muskoka Free Hospital for Consumptives stand wide open for these poor sufferers.

All that is now needed to care for double the number of patients in residence, is money. During the past year much has been done to prepare for the extension of the work. A new water supply and sewage system have been installed.

As soon as the work is fully known, all the money needed will be forthcoming. Sir Thomas Barlow, the King's physician, after a visit to the Free Hospital this summer, sent his cheque for five pounds, in appreciative recognition of the work. The Misses Dow of Montreal this month send their cheque for six hundred dollars. All classes and creeds help.

The widow's mite and the rich man's gifts, all come to encourage the trustees to carry on and extend this great national charity.

$50,000 is needed. Will you share in the privilege of helping?

Yours sincerely,

W. J. Gage

NO FATHER, NO MOTHER, NO HOME, WORSE THAN A PRISONER.

GARFIELD BRACEY, BERLIN, ONT.: Enclosed please find doctor's certificate and examination papers. Hope you will secure me a place in your Sanatorium. You will notice my circumstances is a hard one: no father, no mother, no home—worse than a prisoner. Nobody wants me on account of my disease. Hoping you will have the charity and consider my position and give me a position at once in your Sanatorium, I ever pray.

AN ORPHAN, WITHOUT HOME OR MEANS.

DR. A. E. HANNA, PERTH:—I have a patient here, a young fellow in whom I am greatly interested. He has tuberculosis. He is a poor young fellow, an orphan, out of home, without any means. If we sent him up would you take him in and do the best you can for him? I know how difficult it is to accommodate all who require treatment, but this is a special case.

"I shall pass through this world but once. Any good thing, therefore, that I can do, or any kindness that I can show to any human being, Let me do it now. Let me not defer it or neglect it, for I shall not pass this way again."

SEWERS AND SIDEWALKS

NOTICE is hereby given that petitions for Sewers and Sidewalks must be received by the City Council on or before May 1st next, and that such work petitioned for after that date will not be done until the work laid out is completed.

S. R. ARMSTRONG,
City Clerk.

February 6th, 1907.

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 3 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 500 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 21 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 3, and it certainly shows up fine. This shaft now has 30 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 71 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magaska, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 355 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 3 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

MAP OF DISTRICT SHOWING SUNBURST MINE.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to bankers—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 8 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 57 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No. 1 shaft, 5 1-2 by 8 feet, is down 58 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 5 1-2 by 50 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 25-foot face of ore.

Shaft No. 3, 5 1-2 by 5 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway. Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Osceola Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	45 per cent.	Mocking Bird Mining Co.	64 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	38 per cent.	Linger Mining Co.	140 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $25.42 per ton for lead and $16.81 for zinc to $32.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 50 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 367,169.00
A. W. Taylor	180	189,758.00
J. W. Aylor	40	576,571.00
The Burgner Mining Co.	80	185,679.00
Center Creek Mining Co. (production to date)	200	6,952,194.00
Mrs. E. J. Chinn	120	224,799.00
Majestic Consolidated Zinc & Lead Co.	52	234,456.00
Continental Zinc Co. (production to date)	200	1,674,593.00
Consolidated Troup Mining Co.	40	197,613.00
Daughtery-Davy-McMillian Estate	60	456,006.00
The Empire Zinc Co.	411	120,319.00
Fox Heirs	20	120,324.00
Granby Mining & Smelting Co., 1906		1,261,561.00
Granby Mining & Smelting Co., 1904		1,025,650.00
John G. Quinn	640	82,887.00
Pittsburg-Joplin Lead & Zinc Co.	10	95,[illegible].00
Pittsburg-Missouri Zinc & Lead Co.	170	41[illegible].00
United Zinc Co.	126	380,[illegible].00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, 1½ less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 25 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

INFORMATION COUPON

Clip and Mail To-Day.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Pearl Ashes.

The first patent was issued to Samuel Hopkins in 1790 for making "pot or pearl ashes."

Cold Ten Miles Up.

A balloon was sent up from Berlin in 1895 equipped with self registering thermometers and barometers. It came down in Bosnia, with the instruments in good condition. The barometer registered an elevation of 53,872 feet and the thermometer a temperature of 52 degrees below zero F.

Old Roman Swords.

The Roman swords before Cannae, B. C. 236, were pointless and sharp on only one side. After Cannae the short Spanish sword for cutting and thrusting was adopted.

The Discovery of Iron.

According to the traditions of the Greeks, the first discovery of iron by the human race was made on Mount Ida by a tribe called Dactyles. It is said that the forest was set on fire by lightning, and so intense was the heat of the great masses of fallen trees that the bed of iron beneath was melted and trickled in small streams down into the valley.

Niagara Ran a Sawmill.

The first use of Niagara's power was made in 1725, a primitive sawmill being operated.

Maid and Widow.

By the old Saxon law a maiden and a widow were of different value. The latter could be bought for one-half the sum which the guardian of the maid was entitled to demand. A man, therefore, who could not afford to buy a maiden might perhaps be able to purchase a widow.

"Book of Sentences."

The first ecclesiastical anthology was the "Book of Sentences," by Pierre Lombard. It was a compilation of the leading arguments of the fathers upon points of divinity, arranged and digested under heads. It is said 244 commentators have written annotations on this book, among others Thomas Aquinas, Guillaume Durand and St. Bonaventure.

Da Vinci's Wheelbarrow.

Leonardo da Vinci, the painter who painted the famous picture of the "Last Supper," is said to have invented the wheelbarrow.

When the Sun Will Burn Up.

That the sun is slowly but surely being consumed by its own fires there is but little doubt. No one can tell, however, to a certainty whether it is or not. Astronomers say that its diameter could be reduced two feet per day for 3,000 years before the finest instruments could detect the fact that any reductions had taken place.

The Venetian Rialto.

The Rialto at Venice is said to have been built from designs of Michael Angelo. It consists of a single marble arch ninety-eight feet long and was completed about 1592.

CHIEF INSPECTOR FOREST.

Scotland Yard's Chief Detective a Terrible Man For the Criminal to Meet—Man of Iron.

Chief-Inspector Forest, the strength of whose iron hands is only matched by his adamantine will and cold physical courage, became the executive chief of Britain's detective force at Scotland Yard on November 1. Inspector Forest is perhaps the most famous detective now living, and by sheer force of intellect, character, and courage has worked his way up from the lowest rung to the foremost position in Britain's detective force.

The Man of Iron.

At the top of his work, Mr. Forest is a terrible man for the criminal to meet—keen, relentless, afraid of nothing and never unsuccessful. And this man, the mention of whose name sends a shiver through every well-known criminal in every country in the world, is a person whom you might meet any day as a man-about-town, a good humored, genial fellow of forty, who can tell a cheery story with the best, can discuss the latest novel or the chances of the favorite for the Derby. Pooh! you would laugh at the idea that this was the man of iron, of quick decision in danger, and sudden, desperate action. This witty, smiling raconteur, who is on good terms with a thousand acquaintances, a great detective! He is merely an amusing companion, fond of gossip! Fancy a detective being fond of gossip! But it will be a wise criminal who distrusts this detective when he gossips. He never gossips in vain. No man ever had more of the gift of being entertaining while he says nothing that matters. He is possessed with a loquacious taciturnity. It has proved a trap for many.

Committed a Theft.

Mr. Forest went to London from Bristol years ago. It was when he was a young detective sergeant that he scored his first big success by committing a theft. An educated young governess had suddenly and mysteriously disappeared, and foul play was suspected by her friends. A thousand efforts were made to ascertain her fate, without success, and then the mystery was placed in the hands of the young detective. He thought over all that had been done, and made inquiries on his own account, but a week went by without the elucidation of the great mystery.

Then one day young Forest had an inspiration. Near where the missing girl had been employed as a governess there was a matrimonial agent's office. Mr. Forest called on the old proprietor, explained that his visit was to exhaust all possible avenues of information. The old man, evidently fearful of being mixed up with anything which had the slightest appearance of shadiness, indignantly denied that he had seen anything of the girl in question. Somehow Mr. Forest's suspicions were aroused, and noticing photographs lying about the room in which he and the agent were seated, he made a pretext about wishing to see various records, and succeeded in obtaining the old man's absence for a few minutes.

Unearthed the Story.

Directly the man was gone, Forest swiftly ran through the photographs, and to his surprise found one of the girl's taken side by side with a young man. When the agent returned the photo was in the detective's pocket. Mr. Forest said good-by without an indication that he had met with any success. By means of that photo Forest found out first the story of the young governess and then the young governess herself. She had embezzled property, and had done it all so cleverly that the world at large looked upon her as the victim of mysterious fate.

Narrow Escape From Death.

Needless to say, Frank Forest has carried his life in his hands scores of times. Here is one of his escapes. A French criminal moved to London, and Forest holding a warrant for his arrest, did not capture him at once, but had him shadowed in order, if possible, to secure his accomplices. All day the Frenchman was kept in sight, and at night there was always a detective in the house where he slept, with others outside. Four days later the time had come, and the inspector took his man on the Embankment, put him in a cab, and drove to the station.

"You've had a narrow escape, Forest," said the friendly Frenchman.

"How's that?"

"Why, I have known all along that you and your men have been shadowing me. I knew I was under observation, and the sensation was terrible. I could not escape. I could walk about, go where I liked, and yet I was pinioned. I could not stand things. I determined to make an end of it all. You remember following me along Piccadilly yesterday? Well, I pulled up in the doorway of the tobacconist's, took a revolver from my pocket, and determined when you came abreast of me to shoot first you and then myself. By some extraordinary chance you did not come right up to me. You turned off a couple of yards before you reached me and went up a passage."

"I was going up to Vine street station," said the detective. "I had another man fifty yards along the pavement to pick you up."

"Well, your turning up that passage saved your life."

"Thanks," said Mr. Forest.

That criminal is now serving a life sentence in a French penal settlement for the subsequent murder of one of his friends in Paris.

Got His Answer.

An Englishman traveling in Ireland complained that he could find none of the famous Irish wits of whom he had heard. He was advised to speak to the next farmer or teamster he met. A little later he encountered a peasant leading a horse with a load of turf. The horse had a blazed face.

"What a white face your horse has, my man!" said the Englishman by way of an opening.

"Sure," replied the Irishman, "your own will be as white when it has been as long in the halter."—Birmingham Post.

If you are Constipated, dull, or bilious, or have a sallow lifeless complexion, try Lax-ets just once to see what they will do for you. Lax-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Lax-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

A NERVY TRIP.

Western Exploring Party Find James Bay Territory Splendid For Development—Excellent Fur Season.

An exploring party to the far north consisting of Leonard H. Nord, Samuel Swanson and H. J. Boe of Minneapolis, Minn., and E. A. Osborne, editor of The Fort Francis Times, have just returned from a three months' expedition to Hudson Bay and the northeast coast of James Bay.

The party entered the Northwest territory at Missanabie, Ont., about the middle of May and with Indian guides canoed up the Mission River to Moose Factory. One hundred and fifty miles north of the point of entry to the wilderness, they crossed the survey of the Grand Trunk Pacific Railway. From Moose Factory post they sailed round the southerly end of James Bay, touching at Rupert House, and then followed the northeastern coast to East Main, where they embarked on a perilous canoe voyage with six Indian guides through the cataracts and rapids of the East main River. In all 14 portages were made, varying in distances, and 62 rapid shoots were indulged in, some of which were exciting to the danger point. One experience while shooting a particularly swift rapids, was for a time harrowing. The Indian in the rear of the big 30-foot canoe accidentally caught the blade of his paddle in a hidden crevice, where it stuck, and in an instant the canoe had swerved on a rocky pivot and, dancing in the tumultuous current, began to pound severely. At once the six Indians set up a panicky hubbub, all commanding and impugning each other simultaneously. Drifting from the first danger the boat was carried out of its course and in immediate jeopardy of being whirled over a cataract. The strength of the crew, however, proved adequate to resist the current and worked it to the shore.

As far north as St. George the party noted big fields of rich timothy and clover hay and prosperous vegetable gardens. The greater territory of land traversed between Missanabie and Moose Factory they found to be of rich soil, thoroughly compatible with agricultural requirements.

Far up the northeast coast of James Bay, 200 miles from Gascoi Shoals, where the Hudson Bay steamer Lady Head was wrecked in 1904, losing her $240,000 cargo of furs, the party found the "figure head" of that ship. It was a beautifully carved, gold-trapped, wooden image of a lady, emblematic of the ship's name. Mr. Osborne brought the figurehead home with him.

At Richmond Gulf the party met with Stephen P. M. Tasker and Mrs. Tasker, who, it is believed, are in the north in the interest of an eastern periodical. The Tasker party had with them as guide Joseph Iserhof, who was one of Mrs. Hubbard's guides during her search for her husband, who met a tragic death in the north while on the famous Hubbard-Wallace Arctic expedition. The Taskers intended going over the Divide, where they would strike the Leaf River, explore that and follow it to Fort Chimo, where they expected to catch a Hudson Bay steamer for some Atlantic port. The captain of the steamer Discovery, the party say, opined that Taskers would not succeed in catching a steamer and would have to winter in the frozen north.

George Elson, one of the Wallace-Hubbard guides, served with the American-Canadian party just returned.

The party say the Hudson Bay officials informed them that this year's supply of furs, which reached the northern factors in June exceeded in quantity and quality any catch for a number of years. Fishing with line and net is reported excellent, while whale, white porpoise, seals, polar bears and other northern game, were seen. The caribou are said to be leaving the East Main country and trekking to Labrador, and the Esquimaux are following them to their new rendezvous.

Two Esquimaux dogs, three months old, were brought back, and also a kayskac (model bark canoe). The party were fully convinced that with the advent of railroad facilities to the southern extremities of James Bay, a wonderful country will be rapidly developed, which will prove productive beyond the most sanguine hopes of the adventurer or capitalist. The climate to James Bay is seasonable to cultivated agricultural products, and the soil and subsoil suitable for all purposes and can be cleared at a minimum cost.

On the north coast, however, the long winter had begun to presage its coming by increasing chilly nights and days, while the gloomy icebergs gave forebodings of growth. The party, while on one of their tours, became imprisoned between two giant icefloes, but fortunately succeeded in escaping before the tide began to flow.

The Anglican Grand Old Man.

Canada is not lacking in her grand old men. There is Archbishop Bond, of Montreal, Primate of the Church of England in Canada, who on Sept. 10 celebrated his ninety-first birthday, in spite of his four score and eleven years Dr. Bond is in appearance much younger, and he has a remarkably strong and resonant voice, one that many men of fifty might envy. His sermon on his ninetieth birthday during the meeting of the General Synod in Quebec last year, was one of the features of the gathering. This year a delegation of the whole of the clergy of Montreal waited upon him, and presented him with an address congratulating him upon his birthday and assuring him of their continued loyalty, esteem and devotion. Telegrams and letters were received from all over Canada. He is one of Canada's remarkable men, and he occupies a secure position in the hearts of Church people in Canada.

Born In Canada.

William Diller Matthew, palaeontologist, although a resident of New York, was born at St. John, N. B., Feb. 19, 1871. He was educated at the public schools of Brooklyn and St. John, the University of New Brunswick and Columbia University, from which institution he graduated in 1893. He is associate curator of the American Museum of National History, a fellow of the New York Academy of Sciences and of other scientific organizations. In religion he is an Episcopalian; in politics a Democrat.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

SOLICITORS—Messrs. Bicknell, Morine, Bain and Strathy.
TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns **FIVE MINING CLAIMS** containing **160 ACRES**, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 9-foot level, show 133 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 600 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 30 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 80 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch nicolite, 18 inch smaltite together with cobaltite. Assays gave 672-1283-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00). The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

one as far as in me lies. Your allowance shall be fixed by yourself. A palace shall be erected for you in whatever part of France you may prefer, provided that it is twenty miles from Paris. An estate also"—

"Oh, sire, how can your think that such things as these would compensate me for the loss of your love?" Her heart had turned to lead within her breast. Had he spoken hotly and angrily she might have hoped to turn him as she had done before, but this gentle and yet firm bearing was new to him, and she felt that all her arts were vain against it.

"Madame," said he, "I have thought well over this matter, and it must be as I say. There is no other way at all. I have ordered your brother to have his carriage at the postern at 9 o'clock, for I thought that perhaps you would wish to retire after nightfall."

"To hide my shame from a laughing court! It was thoughtful of you, sire. And yet perhaps this, too, was a duty, since we hear so much of duties nowadays, for who was it but you"—

"I know, madame, I know. I confess it. I have wronged you deeply. Believe me that every atonement which is in my power shall be made. Nay, do not look so angrily at me, I beg. Let our last sight of each other be one which may leave a pleasant memory behind it."

"A pleasant memory!" All the gentleness and humility had fallen from her now, and her voice had the hard ring of contempt and of anger. "A pleasant memory! It may well be pleasant to you, who are released from the woman whom you ruined, who can turn now to another without any pale face to be seen within the salons of your court to remind you of your perfidy. But to me, pining in some lonely country house, spurned by my husband, despised by my family, the scorn and jest of France, far from all which gave a charm to life, far from the man for whose love I have sacrificed everything—this will be a very pleasant memory to me, you may be sure."

The king's eyes had caught the angry gleam which shot from hers, and yet he strove hard to set a curb upon his temper. He felt that it was for him to do so, and yet it did not come kindly to his imperious nature.

"There is nothing to be gained, madame," said he, "by using words which are neither seemly for your tongue nor for my ears. You will do me the justice to confess that where I might command I am now entreating."

"Oh, you show too much consideration, sire! Our relations of twenty years or so can scarce suffice to explain such forbearance from you."

"Your words are bitter, madame. Francoise, be reasonable, I implore you. We have both left our youth behind."

"The allusion to my years comes gracefully from your lips."

"Ah, you distort my words. Then I shall say no more. You may not see me again, madame. Is there no question which you would wish to ask me before I go?"

"Good God," she cried, "is this a man? Has it a heart? Are these the lips which have told me so often that he loved me? Are these the eyes which have looked so fondly into mine? Can you then thrust away a woman whose life has been yours as you put away the St. Germain palace when a more showy one was ready for you? And this is the end of all those vows, those sweet whispers, those persuasions, those promises—this!"

"Nay, madame, this is painful to both of us."

"Pain! Where is the pain in your face? I see anger in it because I have dared to speak truth. I see joy in it because you feel that your vile task is done."

"My patience can bear no more!" cried the king furiously. "I leave you, madame, and forever!"

But her fury had swept all fear and discretion from her mind. She stepped between the door and him, her face flushed, her eyes blazing, her face thrust a little forward, one small white satin slipper tapping upon the carpet.

"You are in haste, sire? She is waiting for you doubtless. But it was a disappointment last night, was it not, my poor sire? Ah, and for the governess, what a blow! Great heaven, what a blow! No archbishop, no marriage, all the pretty plan gone wrong! Was it not cruel?"

Louis gazed at the beautiful, furious face in bewilderment, and it flashed across his mind that perhaps her grief had turned her brain. What else could be the meaning of this wild talk of the archbishop and the disappointment? It would be unworthy of him to speak harshly to one who was so afflicted. He must soothe her, and, above all, he must get away from her.

"You have had the keeping of a good many of my family jewels," said he. "I beg that you will still retain them as a small sign of my regard."

He had hoped to please her and to calm her, but in an instant she was over at her treasure cupboard hurling double handfuls of precious stones down at his feet. They clinked and rattled, the little pellets of red and yellow and green, rolling, glinting over the floor and rapping up against the oak panels at the base of the walls.

"They will do for the governess if the archbishop comes at last!" she cried.

He was more convinced than ever that she had lost her wits. A thought struck him by which he might appeal to all that was softer and more gentle in her nature. He stepped swiftly to the door, pushed it half open and gave a whispered order. A youth with long golden hair waving down over his black velvet doublet entered the room. It was her youngest son, the Count of Toulouse.

"I thought that you would wish to bid him farewell," said Louis.

She stood staring as though unable to realize the significance of his words. Then it was borne suddenly in upon her that her children as well as her lover were to be taken from her, that this other woman should see them and speak with them and win their love while she was far away. All that was evil and bitter in the woman flushed suddenly up in her until for the instant she was what the king had thought her. If her son was not for her then he should be for none. A jeweled knife lay among her treasures ready to her hand. She caught it up and rushed at the cowering lad.

Louis screamed and ran forward to stop her, but another had been swifter than he. A woman had darted through the open door and had caught the upraised wrist. There was a moment's struggle, two queenly figures swayed and strained, and the knife dropped between their feet. The frightened Louis caught it up, and, seizing his little son by the wrist, he rushed from the apartment. Francoise de Montespan staggered back against the ottoman to find herself confronted by the steady eyes and set face of that other Francoise, the woman whose presence fell like a shadow at every turn of her life.

"I have saved you, madame, from doing that which you would have been the first to bewail."

"Saved me! It is you who have driven me to this—you, whom I picked

A woman had darted through the open door.

up when you were hard pressed for a crust of bread or a cup of sour wine. What had you? You had nothing—nothing, except a name which was a laughingstock. And what did I give you? I gave you everything. You know that I gave you everything—money, position, the entrance to the court. You had them all from me. And now you mock me!"

"Madame, I do not mock you. I pity you from the bottom of my heart."

"Pity? Ha, ha! A Mortemart is pitied by the widow Scarron! Your pity may go where your gratitude is, and where your character is. We shall be troubled with it no longer then."

"Your words do not pain me. I have never had an evil thought toward you."

"None toward me? Oh, woman, woman!"

"What have I done, then? The king came to my room to see the children taught. He stayed. He talked. He asked my opinion on this and that. Could I be silent, or could I say other than what I thought?"

"And so, by your own confession, you stole the king's love from me, most virtuous of widows!"

"I had all gratitude and kindly thought for you. You have, as you have so often reminded me, been my benefactress. It was not necessary for you to say it, for I had never for an instant forgotten it."

"Pah! Your hypocrisy sickens me! If you pretend to be a nun, why are you not where the nuns are? I was honest, and what I did I did before the world. You, behind your priests and your directors and your pretenses and your missals, do you think that you deceive me as you deceive others?"

Her antagonist's gray eyes sparkled for the first time, and she took a quick step forward, with one white hand half lifted in rebuke.

"You may speak as you will of me," she said. "To me it is no more than the foolish parrakeet that chatters in your anteroom. But do not touch upon things which are sacred. Ah, if you would but raise your own thoughts to such things—if you would but turn them inward and see. Before it is too

PROPERTIES

MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 41 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east, on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

THE LOVING LEAVES.

Brown is the hill where the maples grow,
So brown, so calm, so cold and still;
But the loving leaves creep snug and close,
And warm the feet of my dear old hill.

And they don't forget the violets small,
Shivering and cold in the damp and wet;
They cover them up in blankets brown,
Whispering, "Darlings, we love you yet!"

Down in the hollow amid the ferns,
Their billowy wraps they wreath and roll;
And they spread a carpet, rich and warm,
To keep the snow from the mouse's hole.

And the lady-slipper—so shy and weak—
They wrap a muffler about her throat;
And the maiden's-hair they cover deep
And furnish the moss with an overcoat.

—The Khan.

MRS. PAGET'S MISSION.

Studied Ancient Lore of the Indians For the Government.

After a three months' trip through Saskatchewan, which included twelve hundred miles of driving by themselves, Mrs. F. H. Paget and Miss Mabel Ferguson returned recently to Winnipeg from a summer spent among the Indians of the Cree, Saulteaux and Assiniboine tribes.

Mrs. Paget is a resident of Ottawa, but was, before her marriage, Miss McLean, of Winnipeg, and has been heartily welcomed by her many friends in the city.

Her father, Mr. W. J. McLean, was for many years in charge of the Hudson Bay Post at Fort Qu'Appelle. Accompanied by Miss Mabel Ferguson, of Ottawa, Mrs. Paget went up to the File Hills on July 19, and made that district her headquarters. The Indians there are Crees, occupying three reserves.

She undertook the journey at the instance of the Dominion Government, as owing to the fact that she speaks the Cree and Saulteaux languages, she was thoroughly qualified for the work of research, which was that of studying the Indian folk-lore and obtaining records of the early history and customs of these tribes. She traveled over familiar ground, as in her childhood every aspect of the country was familiar to her, and it will be remembered that she with the other members of Mr. McLean's family were taken prisoners by the Indians during the Rebellion. Miss Ferguson accompanied her and acted as her secretary.

Mrs. Paget found the space of time all too short in which to gather the material, there was so much that had never been touched on, and her interviews with the Indians were full of possibilities in the way of historical matter, giving many interesting lines, though those to which she confined herself.

The Indians would not talk freely in the presence of a third person, so Mrs. Paget took her notes alone, while the story-teller (like all Redmen very good in narrative)—told her what she wanted to know. Sometimes three or four women were called in and asked to corroborate some date, but as a rule the one Indian took up the burden of the tale. An Indian is never interrupted once he begins his story. When he is done, there is a pause and then another may speak, but to break into a monologue by asking questions would at once place a rash person in great disfavor.

It was necessary to talk with a great many Indians to get all the facts. Mrs. Paget endeavored to find out whether they had any idea where their people came from originally; with what other Indians they had at any time been at war; and what had been their early customs. The one thing found impossible to secure was the telling of any of their fairy stories, owing to an amusing superstition. They never tell these stories except in winter, saying that if they were to take time to tell them in warm weather a lizard would come and suck their blood, meaning by this that the summer is no time for loafing. The Indians have a series of such stories dating back to the flood. Mrs. Paget used to hear them in her childhood, and she is able to write many of them from memory, but it would be necessary for her to visit the people in the winter to get them to tell the old tales over again.

London Postoffice at Christmas.

People who profess to believe that the state could never manage this or that monopoly well have only to look at the postoffice. Around Christmas the work goes up by leaps and bounds, and yet it is handled certainly as smoothly as any private corporation could handle its Christmas trade. What this increase means in a great city like London is seen when it is stated that between seven and eight thousand extra men were taken on to assist. On the Saturday and Monday preceding Christmas 55,000,000 letters and newspapers were delivered within the metropolitan area, that is to say about eleven letters or papers to every man, woman and child in London. Besides this the postoffice handled all the outgoing mail and all the incoming parcels not counted in the above.

New York's Cab Drivers.

A driver has to have a license. That mysterious official, the mayor's marshal, grants one upon the payment of 25 cents and two written testimonials of honesty. A man may come out of Sing Sing, whither he has been sent for highway robbery or stoning the minister's cat or any other crime, if he presents two greasy letters—one of any Jones and the other of any Smith—stating that he is an honest fellow he will get a license. No inquiry is made. His references are never looked up. Indeed, if you are a desperate criminal—guilty of murder or failure to pay alimony—you can do no better than take out a license and hide on top of a cab. So into the business drift all sorts and conditions of rogues. Under the aegis of the law (the aegis being a twenty-five cent badge) they rob you and me.—Vance Thompson in Outing Magazine.

The Hessians Played.

It is a matter of record that upon the first official celebration of Independence day by the Continental congress music was secured for the occasion by forcing the Hessian band, which had been captured by George Washington at Trenton in the previous December, to play in the public square all day, to the great delight and amusement of the people. It is also stated that these involuntary celebrants were obliged to practice appropriate airs for three weeks previously in order that they could not plead ignorance as an excuse.

Book Muslin.

Book muslin gets its name from Buke, the district in India where it was first manufactured.

PATENTS

Engineers and others who realize the economy of having their Patent business transacted by Experts. Books, chart advice free. Charges moderate. Our Inventor's Advisor sent upon request. Marion & Marion, New York Life Bldg., Montreal; and Washington, D.C., U.S.A.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

Lax-ets 5 Cents Sweet to Eat A Candy Bowel Laxative.

Nerves Uustrung

You Feel Limp
Loaded With Worry
Unable to Sleep
Tired and Excitable.

You'll Grow Steadily Worse Unless the System is Better Nourished.

Nothing will build you up with the certainty of Ferrozone. Thousands it has cured who never hoped to be well—and here is ample proof—substantiated by one of Nova Scotia's prominent clerics.

"Before taking the first box of Ferrozone," writes Mrs. Annie Jeffry, of Sandy Cove, N. S., "my condition was deplorable. Though I employed the most skilful medical aid, I grew steadily weaker. In fact, I was in such a low condition that it was impossible for me to walk across the room. My heart was very weak, and I suffered from terrible palpitations, which the doctors said were from troubles peculiar to women. Friends urged me to try Ferrozone, and I bought six boxes. When I had used the third box my old-time vigor and strength returned. The palpitation ceased, my appetite increased, and I got a good rosy color in my cheeks. It would be impossible to speak too highly of Ferrozone. All weak women should use it. I hope many suffering sisters will use Ferrozone for it will surely cure them."

Rev. J. C. Morse, D.D., pastor of the Baptist Church, Sandy Cove, bears witness to the recovery of Mrs. Jeffry, and writes: "This is to certify that Mrs. Annie Jeffry is a lady upon whose word you can depend. I have known her since childhood, and believe her to be a truthful, honest woman." This adds additional force to the testimony of Mrs. Jeffry, and gives assurance to other sufferers that Ferrozone does what is claimed for it. Three weeks' treatment costs 50c., or six boxes for $2.50 at all druggists.

DASHES HERE AND THERE BY TIMES' REPORTERS.

Boarders Wanted

Good accommodation for boarders in a home with all modern conveniences. Apply at 29 Queen street. tf

Five Inmates in House of Refuge

Mr. E. M. Elliott the popular County treasurer and clerk reports that at present there are five inmates of the House—one from Dummer, one from the village of Norwood and the other two from Smith. The latter two just entered Monday.

The Coates Company Will Come

If you have a shilling or two to wager put it on the fact that the Coates Company will locate in this city. The deputation appointed by the City Council will go to Toronto for the purpose of interviewing Mr. Dunwoodie, who has arrived in that city from Scotland, where he went with Mr. Coates to make arrangements to open the Canadian branch factory.

Mr. Kennedy's Bunch of Cattle

Yesterday morning there was some difficulty in corralling the large bunch of fat cattle brought to the market square for Mr. H. P. Kennedy. Horses and cutters were requisitioned into service to control the large number of country raised cattle startled by the sights and sounds of the city, when perhaps telepathy sounded in their ears the knell of soon parting days into porterhouse steaks and sirloin roasts.

Changes in Local G.T.R. Firemen

Included in recent changes of the G.T.R. firemen are the following: Mr. James Wilson has been promoted from the Lakefield train to the Flyer, the latter leaving here at 7.20 in the morning for Toronto. Mr. Elliott who has been working in the local yards will replace him and a new man has taken the vacant position on the shunter.

LOCAL INCIDENTS

By The Times Man on the Street

—Charlotte street church guild met last night.

—The Board of Works Committee of the City Council will meet tonight as usual.

—The Fire, Water and Light Committee of the City Council met last night.

—The Debating Club of St. Peter's T.A.S will hold its first meeting this evening at 8.30 o'clock, after the services at the Cathedral.

—Now that the city is going to purchase another fire team, it will not benefit those owning animated boneyards to prop such up, and chase them to the fire hall for approval.

—The "Arrah-be-Aisy," and "Labor Loathing" clubs deserted their respected snug corners and bars yesterday morning to no purpose. Nothing doing at that jasmine bouquet scented sanctuary of the police court.

—T. A. Edison, the wizard, is going to rest, and has given up the commercial side of electrical experiments to experiment "for fun." Mr. Edison should try newspaper work for a while if he wants complete rest and absence from all chance of abuse. Thus, the world would, in 18 hours get the advantage of his efforts once more, as he flew to his old easygoing ways.

The McNamara Lots Are Booming

Great Opportunity for Obtaining Good Gardening Lots Adjoining the City.

Our readers will remember that some weeks ago Mr. M. A. McNamara, the local contractor very generously offered to contribute gratis to the city a large tract of land to the south of the city for manufacturing purposes. As this offer was not accepted, Mr. McNamara since lavided up that desirable property known as the Kincaid farm into lots. He has completed already the sale of seven lots at $1000 each, said lots each containing ten acres. These lots are particularly adapted to gardening purposes and suitable for raising celery and other garden truck. Mr. McNamara has still 37 lots left at the same price, a registered plan of which can be seen at the office of Mr. Fred Cameron, P.L.S.

The property noted as still for sale, it might be said has special facilities for transportation as Mr. McNamara has reserved a large amount of land to the west of this property for such purposes, so that owners of lots are assured of immediate access to both G.T.R., C.P.R., and Trent Valley canal.

It seems that with the natural and already remarkable growth of the city southwards, that these lots must of necessity within a very few years be worth many times the prices asked now. There seems to be an almost unreasonable exodus of people towards the North-West. By purchasing the lots in question, people are assured of a home in their own part of the country where a good living is assured, with ultimate security for advance in the value of the property instead of plunging into the unknown where many have failed. It is an open secret that the rapidly increasing manufacturing interests of Peterborough are compelled by exigencies existing in Peterborough's natural formation to seek location to the south part of the city. Again those acquainted with Peterborough's progress know that with the past few years the population has almost doubled, so that within a very few years, people must seek land for residential as well as factory purposes. Now that those buying Mr. McNamara's land may be assured that coming factories will be able to get required location, it might be noted that Mr. McNamara has retained a certain amount of the property for just such purposes.

Charity Board Officers Elected

At the Charity Board's regular meeting in the city clerk's office, the officers for the coming year were elected as follows:

Chairman—H. Rush.
Vice-Chairman—Wm. Fowler.
Treasurer—Wm. Yelland.
Secretary—S. R. Armstrong.

Coming Creamery Meetings

During the Victoria Creamery meeting attended by Mr. G. A. Gillespie, Peterborough's leading authority on creameries arrangements were made for a series of meetings as follows; Cavanagton, Tuesday, 12th; Victoria Road, Wednesday, 13th; Lorneville, Thursday, 14th; Perfelaw, Friday, 15th, Beaverton, Saturday, 16th.

New Feeder for the Bell Co.

The Lindsay Post says; The Townships of Emily, Ops, Verulam and Harvey have something good coming to them in the form of telephone connections, not only with each other, but also with all the Bell Telephone Company's numerous subscribers. A company known as the Dunsford Telephone, Light and Power Co-operative Association, Limited, has been formed, with headquarters at Dunsford. They will run lines as far as Hobeygeon.

Miss Mabel Bradburn Entertains

Miss Mabel Bradburn, one of Peterborough's most popular belles, had a progressive euchre party at the family homestead, London street, yesterday afternoon. Miss Lizzie Irwin won the first prize. There were twenty-four of her guests present, thus filling six tables. Most recherc refreshments were daintily served, and a most enjoyable afternoon spent. This social function followed upon a party given by Miss Bradburn the preceding evening, when some sixty guests were present.

SOCIAL AND PERSONAL

—Mrs. J. A. Frost, Oridlia, is visiting her son, Mr. C. E. Frost.

—Mrs. Charles E. Frost is visiting in Toronto, and will not receive again this month.

—Rev. W. J. Crothers and Mrs. E. Budge, Ridout street. — Port Hope Guide.

—Miss McGiverern and Miss Lafleur leave today for Toronto and New York.

—Miss Bonisteel, Belleville, is in the city visiting Miss Manning at the Charlotte street Methodist parsonage.

—Miss Laura Bellegham has returned home after a four months' visit with friends in Owen Sound and other Western towns.

—Rev. W. L. Armitage, of Picton, arrived in the city yesterday afternoon and gave an address last night at St. Luke's pancake social.

—Miss Nellie Sych, of Pontypool, a pupil of Miss Wilhelmine Gumpricht, was successful in passing her first year piano examination with honors at the Toronto Conservatory of Music last week.

Peterborough Known Man Wins the Medal

Mr. W. J Francis Gets the Gzowski Gold Medal.

It will be of great interest to the many friends in this city and county of Mr. W. J. Francis, formerly on the local staff of the Trent Valley canal engineers, to learn that Mr. Francis at the annual meeting of the Canadian Society of Civil Engineers recently held in Montreal was awarded the Gzowski Gold Medal for 1906.

Mr. Francis is now connected with the Dominion Engineering and Construction Company, Limited, of Montreal.

The Gzowski Gold Medal is awarded annually by the Canadian Society of Civil Engineers for the best paper read before the Society during the preceding twelve months, and the medal for 1906 was won by Mr. Francis for his masterly paper on "Hydraulic Lift Locks in Canada."

The paper deals with the construction of the famous hydraulic lift locks on the Trent Canal at Peterborough, Ont., in the building of which Mr. Francis played a most prominent part, not only in the actual construction work, but also in the designing and planning of the scheme.

The building of the hydraulic lift locks at Kirkfield, Ont., is also dealt with.

The Indian's Suit Is Withdrawn

It will be remembered by The Times readers that the non-Indian-non-qualified to participate in the ghost-dance Indian, Cornelius, recently entered action for $60 damages against Mr. Kelly, proprietor of the Royal Hotel, Hunter street, for alleged damages sustained when he got into a mix-up in that caravansery.

As an evidence that this seeming renegade to his nationality had no real case against the hotel proprietor, it might be noted that yesterday Cornelius signed a paper withdrawing entirely his claim for damages, so that the case will be entirely withdrawn from the county court docket.

Shovel and Tool Co. Have Good Success

By request of several shareholders of the Peterborough Shovel and Tool Co. we note again that this progressive local industry held their first annual meeting on Monday last, with the president, Hon. J. R. Stratton in the chair, and Mr. R. H. Fortye as secretary.

The statement submitted by the directors showed the company to be in a flourishing condition.

The directors predicted that a dividend from the earnings for the ensuing year would be available. The net profits for the year were about $2,000. This is a good showing for the first year's operations, considering the great and necessary incidental expenses. The number of directors is to be reduced.

A Long Walk on the Mississippi

Chicago, Feb. 12.—A despatch to the Tribune from New Orleans says; Capt. Chas. W. Oldrieve yesterday completed the feat of walking on water from Cincinnati to New Orleans, 1,600 miles, in 40 days, lacking 45 minutes, thereby winning the world's championship and a bet of $5,000. Oldrieve met with an accident just before reaching the goal at the head of Canal street, that nearly cost him his life. The big wooden shoes suddenly slid outward, and the water-walker turned turtle. His wife, who accompanied him all the way in a rowboat, rescued the captain.

Oldrieve left Cincinnati January 1 at noon on a wager that he would walk to New Orleans in 40 days. How in motion only during daylight, staying over every night at various landings, and was equipped with shoes made of cedar wood, four feet, five inches long, five inches broad, and seven inches deep.

In a gasoline boat preceding the water-walker were Capt. J. W. Featherington of Dallas, Texas, who backed Oldrieve, and Arthur Jones, representing Edward Williams of Boston, who laid the wager.

The Knock-out Blow.

The blow which knocked out Corbett was a revelation to the prize fighters. From the earliest days of the ring the knock-out blow was aimed for the jaw, the temple or the jugular vein. Stomach punches were thrown in to worry and weary the fighter, but if a scientific man had told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing home to the public a parallel fact; that the stomach is the most vulnerable organ out of the prize ring as well as in it. We protect our heads, throats, feet and lungs, but the stomach we are utterly indifferent to, until disease finds the solar plexus and knocks us out. Make your stomach sound and strong by the use of Doctor Pierce's Golden Medical Discovery, and you protect yourself in your most vulnerable spot. "Golden Medical Discovery" cures "weak stomach," indigestion, or dyspepsia, torpid liver, bad, thin and impure blood and other diseases of the organs of digestion and nutrition.

The "Golden Medical Discovery" has a specific curative affect upon all mucous surfaces and hence cures catarrh, no matter where located or what stage it may have reached. In Nasal Catarrh it is well to cleanse the passages with Dr. Sage's Catarrh Remedy fluid while using the "Discovery" as a constitutional remedy. Why the "Golden Medical Discovery" cures catarrhal diseases, as of the stomach, bowels, bladder and other pelvic organs will be plain to you if you will read a booklet of extracts from the writings of eminent medical authorities, endorsing its ingredients and explaining their curative properties. It is mailed free on request. Address Dr. R. V. Pierce, Buffalo, N. Y. This booklet gives all the ingredients entering into Dr. Pierce's medicines from which it will be seen that they contain not a drop of alcohol, pure, triple-refined glycerine being used instead.

Dr. Pierce's great thousand-page illustrated Common Sense Medical Adviser will be sent free, paper-bound, for 31 one-cent stamps, or cloth-bound for 50 stamps. Address Dr. Pierce as above.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

A special session of the police court was held yesterday afternoon to enquire into conditions appertaining to the recent removal of John Dunsford's children from their former home on Water street to the Children's Shelter.

It has already been noted in a former issue of The Times that, a few days ago Mr. George Cochrane with P.C. Newhall entered Dunsford's residence and discovered that the two poor little ones were housed amidst most unsanitary and uncongenial environments, so placed them under care of Mr. W. Henry the efficient superintendent of the Shelter.

At yesterday afternoon's session of the court both Mr. Cochrane and Mr. F. Miller testified to the conditions existing. Owing to the absence of certain required witnesses, the case was enlarged until 3 p.m. today.

Peterboro Man's Narrow Escape

Referring to a man who lived for some years in Peterborough, the Port Hope Guide says; Mr. Edward Rowland narrowly escaped suffocation at the Standard Ideal on Saturday evening. A fire of coke had been started and the gas and smoke from this gradually found its way into the enamelling room. It soon took effect upon all the men and they left the room, but Mr. Rowland endeavoring to finish his tub and was overcome. Fortunately the other men were near at hand and brought him out doors, or in a very few minutes he would have been suffocated. Drs. Aldrich and McKinley were summoned and were busy all night administering to the patient. He did not regain consciousness until Sunday morning, but today is feeling fairly well.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment, Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

City to Pay Coughlin's Claim for Sum of $8.00

Plumbing Inspector's Report on Flushing Gilmour Street Sewer Characterized as Misleading---He Was Present Several Times Before Reporting the Blocking of Said Sewer---Data of Sewer Flushing Must in Future be Recorded in Detail.

The City Board of Works met last ...ht, members present were; Ald. ...ean, chairman; Aldermen Wilson, ...nston and McIntyre, and Mayor ... Williams, City Engineer T. A. S. ..., Plumbing Inspector Thompson ...d Mr. M. Coughlin were also pres...t.

...LMOUR STREET SEWER.

...s all the interested parties con...ted with the Gilmour street sewer ...re present, that question was ... up first. The chairman read ... plumbing inspector's report for ... Coughlin's benefit.

Mr. Coughlin then gave his views ... the matter. He said that for about ...onth he noticed water in his cel... in the morning and in the even... it was gone. It became worse ...d he went to see the plumber. He ...mined the cellar and said the de... tion was evidently outside, and ...commended that the plumbing in... tor be interned. The plumbing in... tor was notified, and Mr. Thomp... went up, and said the stoppage ...t have been inside the house. ...t day Mr. Thompson went up ..., and he and the man who was ...ging, argued for some time. Mr. ...pson stayed around for a long ... and watched the man working. ... Coughlin and Mr. Thompson then ...ked down to Park street together. When Mr. Coughlin got home ...t night, his wife told him that ... Thompson would be down in the ...rning with drone. He evidently ... done, but in the afternoon the ...er was relieved entirely. Mr. ...mpson did not notify the people ... the house what to do and the ...er might have been frozen.

...r. Thompson said he happened to ...e from another job and he saw ... men working down to the trap. ... asked what was doing and the ... said the sewer was blocked. He ... went on and next day he saw ...hbors and their sewers were all ...t. He then went to the man ...le and saw where the trouble ..., and notified the city engi... who had the sewer flushed. ...Ald. McIntyre said the committee ...d to take Mr. Thompson's report, ...ich would lead anyone to believe ...t the matter was looked into im...diately, which was not the case, ...d he and Ald. Johnston wanted to ... by Mr. Thompson made such ... report.

...Ald. Wilson thought enough had ... said, and moved that Mr. Coughlin ... be refunded his money. Ald. McIntyre seconded it; and it carried.

...OSING GILCHRIST STREET.

Messrs. G. Walter Green and Wm. ...inlan were present in connection ...th the proposed closing of Gilchrist ...reet, and on motion were heard.

Mr. Quinlan was present to make ... objection to Mr. G. Walter Green ...sing up Gilchrist street. He owns ... property on both sides of the ...reet, and he made a reasonable ...ion to Mr. Green and wanted ... keep at least part of the street ...ed the land on the south side ... the street is fit only for factory ...es, and he was now in communi...tion with a furniture factory in ...bury, and a very large shoe fac... in the United States, about a ...e here. He had nothing definite ... say about it just now, but he ...ld not under the present circum...ances consent to closing up The ...reet. He wanted to sell the property ... was not going to put up a fac...ry. He owned all the property per...ally from Donegal to Park St., in...luding the dam and water power. ... had offered 36 feet of the street ... Mr Green or even more, but Mr. ...reen wanted all or nothing. He ...ught the property last fall.

Mr. Green said the 36 feet would be ... no use to him as he wanted to ...ild as soon as the frost was out ... the ground, and his building would ...xtend right across the street onto ...is own land. Mr. Green said if the ...ard of Works thought the street ...ould be opened in any reasonable ...me he did not want the property. ... did not blame Mr. Quinlan for ... stand, and yet he could not see ... way clear to buy the property. ...He saw his solicitor today, and found that Mr. O'Connell owned the property in question, and not Mr. Quinlan. Mr. Quinlan never did own the property Mr. Green had the option for the property for $900 and refused it.

Mr. Quinlan said he did own the property and bought and paid for it last fall, and the deeds were in Mr. A. E. Dixon's office. It may not be registered.

Mr. Green said he wanted a decision of the board at a very early date. If he could not get a little piece of property of no use to anyone he would have to make other calculations He would not leave Peterborough however.

Mr. Quinlan and Mr. Green had a dispute over the ownership of the property.

A letter was received from the city solicitor outlining the course to be pursued to close Gilchrist street. The principal features were that a by-law would have to be prepared, and a notice published in a paper for four weeks, and notices be posted in conspicuous places for four weeks. The bylaw would then have to be passed.

The committee did not put much faith in the objection made last night and were very much inclined to go ahead and let Mr. Green have the street if it was at all possible.

Ald. Johnston and Ald. Wilson were strongly in favor of Mr. Green getting the property.

Ald. Johnston and Ald. Wilson then moved that the proper proceedings be gone on with, and it carried.

SIGN BYLAW AMENDED.

Messrs. J. J. Turner & Sons, applied for permission to erect a sign on a post opposite Caverley's restaurant on George street, at which premises Mr. Porter will establish a branch of his Delicatessen. An old sign is already at this spot, and Mr. Turner wishes to replace it with an illuminated one, suiting Mr. Porter's business.

Ald. McIntyre moved, seconded by the Mayor, — That the draft bylaw governing signs be amended, to permit of existing signs on posts to be replaced until such time as the city council by resolution orders to remove all posts.

Aldermen Johnston and Wilson opposed this measure which, however, was passed by the chairman's casting vote, Ald. Wilson is opposed to all overhead and post signs, while Ald. Johnston contended that the bylaw should not be amended to suit any particular purpose, which act would be establishing a precedent likely to cause considerable trouble in future.

The Mayor, Ald. Duncan and Ald. McIntyre argued that as the bylaw provided for existing signs on posts to remain, although no new ones may be erected, it would seem a hardship not to allow a person having such an existing sign to replace it with an improved and up-to-date illuminated one.

The above question arose during the reading of a draft bylaw governing signs, the text of which has already been published. The committee will recommend council to pass this measure.

The Mayor moved, seconded by Ald. McIntyre,—That the city engineer examine all existing signs and see that the provisions of the bylaw are carried out after the bylaw comes into force.—Carried.

EXTENSION OF ALBERT ST.

The Board concluded that as the opening of Albert street would cost too much for the need of such an act, especially as Chamberlain street, is so near.

BLOCKING SIDEWALKS.

Ald. Johnston raised the question of stopping the blocking of sidewalks with material by manufacturers, to the inconvenience of the general public and traffic. Mr. Green has material out to the edge of the pavement on Donegal street. The civic officials should be instructed to put a stop to this.

Aldermen Duncan, McIntyre and Wilson acquiesced in this. The latter knew of instances where rigs are continually driving over and standing on sidewalks, and blocking the same with material. Such act not only inconveniences the public, but destroys the pavement.

Ald. McIntyre moved, seconded by Ald. Wilson,—That the city engineer be instructed to order the cessation of such nuisances, and if his mandate is not complied with, then he to notify the police to take proceedings against all such offenders.

FLUSHING OF SEWERS.

Ald. Johnston said that with regard to the outcome of the second enquiry into Mr. Coughlin's matter, in connecting with the blocking of Gilmour street sewer, he was much disappointed in Mr. Thompson, the plumbing inspector, who in future must be held down in his actions. He also was not satisfied that the sewer have been flushed frequently enough This is Mr. Wainwright's duty and the engineer should see that this work is satisfactorily done.

Ald. Johnston moved, seconded by Ald. McIntyre.—That the engineer keep a record of the days and dates on which sewers are flushed, with the names of sewers flushed.—Carried.

Ald. Wilson offered that some sewers require more frequent flushing than others, especially in such localities as Smith Town Hill and Gilmour street. He thought to meet some sewer requirements, three or four flushing tanks furnished, so that in localities as above mentioned the sewers could have a flush every 24 hours.

The city engineer thought that each flushing tank of 500 gallons capacity would cost in the neighborhood of $100.

Ald. Wilson moved, seconded by Ald. Johnston,—That the engineer report on the cost and construction of such flushing tanks.—Carried.

The Board then adjourned.

A Madoc Deal In Deer-Hounds

Yesterday in Pappas cigar store several gentlemen of this city interested in hunting deer were having a chat concerning hounds, etc. A gentleman from Madoc told a tale of a sale of hounds that is worth repeating. It seems that the Madoc man who was selling out his business there, incidentally about the beginning of the deer hunting season had two hounds he did not know what to do with or how to dispose of. A certain Madoc man, noted for his parsimonious dealings, wanting to go a-hunting, called on the now local man and asked: "Do you want to sell your two hounds?" "Well," replied the then Madoc merchant, "I don't care whether I do or not, but if you want those hounds, the price is $10 each." "Do you guarantee them to run?" was asked by the would-be buyer. "Sure thing," answered the merchant.

To make a long story short, the would-be buyer made a deal whereby he offered $8 each and had the merchant sign a paper guaranteeing that the hounds would "run."

The proud new owner of the hounds, at $16 per pair, went hunting, but the dogs would not follow a deer trail. On his return to Madoc after his outing the buyer went to the seller, a few days before the latter left Madoc for Peterborough, and demanded his money back, saying "Here, you guaranteed those dogs would run and they won't, so I want my money back according to written contract."

Upon this the seller gave each of the dogs a good swift kick, and each dog, with a yelp, started off on the full gallop. The seller then turned to the buyer and said, "What's the matter with you, don't you see that these dogs can 'run'?" The money was not repaid.

IT'S UP TO ROOSEVELT

Solution of the Jap-San Francisco Trouble in His Hands.

Washington, February 14.—As a result of an hour's conference at the White House yesterday, at which President Roosevelt, Secretary of State Root, Mayor Schmitz, of San Francisco, and the members of the School Board of that city participated, Mayor Schmitz last night made a statement summarizing the situation. When asked whether the proposals submitted by the San Francisco delegation involved the exclusion of Japanese coolie labor from the United States, Mayor Schmitz replied; "We are not making a treaty and have not discussed with the President the question of excluding the Japanese from this country by treaty. On Saturday we heard the President's views, and yesterday we presented our side of the questions at issue.

"It now remains for us to modify our views in order to reach an agreement with the President, or for Mr. Roosevelt to modify his views to reach an agreement with us. Yesterday's conference adjourned subject to the call of the President."

Soo Is a River Uncle Sam Is Told

United States Again Loses Boundary Line Dispute.

Cincinnati, February 14.—The attempt of the United States to secure possession of Islands No. 1 and 2, in the Straits of St. Mary at Sault Ste Marie by suit to quit title, has failed, a decision of the United States circuit court of appeals, sustaining the district court of Western Michigan in favor of the Chandler-Dunbar Water Company.

The islands are in the line of the boundary between the United States and Canada, and combined have an area of only two acres, but improvements valued at $100,000 have been made by the water company, which claimed to have a good title from the Government since 1855. Because of the location of the islands on the boundary line and the treaty requirements, the United States must keep that line clear. It is understood that international complications may arise as a result of this decision.

The Government set up that the Soo was a strait in which there were no riparian rights, and the water company argued that it was a river on which riparian rights hold. By the decision it is held that the stream is a river.

BIG CELEBRATION FOR OLD QUEBEC

Government Asked to Help---Want France and U. S. Represented.

A NATIONAL HOLIDAY

Is the Proposal for Quebec City Anniversary Day.

Ottawa, Feb. 14.—With a view to obtaining the aid of the Dominion Government in the national demonstration in July, 1908, of Quebec's 300th anniversary, a large deputation from that city, headed by Mayor Garneau, waited on the Premier, and other members of the Cabinet yesterday. It was suggested that a bill granting a subsidy be passed, and the Governments of the Province of Quebec and Quebec city are expected to help bear the cost of the festivities.

The Executive Committee propose that the day of the celebration be a national holiday. They also propose to have a great open-air meeting, presided over by the Governor-General on Monday, June 29.—Tuesday would be devoted to the inauguration of the monument to Quebec's first bishop, and Wednesday, July 1, to celebrating the anniversary of Confederation, Thursday would be a day of thanksgiving, on Friday the anniversary of Champlain's landing would be celebrated, and Saturday would be devoted to public amusements.

COSTLY UNDERTAKING.

The week would be filled up with many attractions, and the promoters hope to obtain the participation of all the Provinces of Canada, and of the Imperial Parliament, and to associate France and the United States with the celebration. The cost of the celebrations would be $630,000.

The Prime Minister, while noting that the proposed expenditure would be large, said that it was his pleasure and that of his colleagues, more their pleasures than their duty, to put their petition in the hands of the Governor-General and the Council.

Peterborough Man Injured In Galt

Was Thrown 20 Feet by a Factory Boiler Explosion.

Galt, Feb. 14.—The old knitting factory building, formerly occupied by the C. Turnbull Co., was yesterday morning the scene of a terrific boiler explosion, which badly wrecked the building, besides scalding R. A. Johnston of Peterborough, who had charge of the boiler, so severely that he may die. The accident occurred shortly after firing up, Johnston was standing close to the boiler after coaling up, when it exploded, with a shock which was felt for blocks around, the 60 gallons of boiling water pouring out, and deluging the floor. One-half of the boiler was thrown the length of the big shop, and the force of the escaping water hurled the man 20 feet. He was picked up in a shocking condition, the skin peeling off his body in great strips. The sufferer was taken to the hospital.

The boiler was of 10 horse-power, and rated at 200 pounds, but only 80 pounds of steam was ever used. It is supposed the valves were not working, and the gauge failed to register the pressure. The wrecked premises were occupied temporarily by a feather cleaning company, of whom Mr. R. R. Robinson is manager.

Miss Minnie Smith Now Mrs. Kennedy

Yesterday afternoon, in the George street Methodist church, with Rev. Dr. Crothers officiating, Miss Minnie Smith, daughter of Mr. John Smith, became the bride of Mr. John William Wellington Kennedy, son of Mr. John Kennedy, all of Bewdley. The bride was assisted by her sister, Miss Ada Smith, while Mr. Frederick Kennedy, of Frobisher, Sask., supported his brother, the groom. After the ceremony the happy young couple left for Bewdley, where they will reside in future.

A Successful Year In Insurance

The Independent Cash-Mutual Fire Insurance Company has good reason for congratulation over the successful result of their business transactions during the year ending December 31st, 1906. This company, although not boasting as large a capitalization as some of the older companies, or showing inflated lists of assets, is rapidly gaining the confidence of the insuring public by their honest, progressive and conservative system of both pushing the company's business and, at the same time, protecting their policyholders.

During last year the company, after paying a six per cent. dividend to the shareholders and making a deduction for depreciation of office furniture, were able out of profits to carry the handsome sum of $13,81.26 to reserve account. Mr. Charles C. VanNorman, the President and Manager, who, by the way, is well known in this city and county, has made a most efficient and capable administrator.

Confession From Canada

London, Feb. 13.—Over a decade ago a gentleman holding a responsible position in the North Fleet was discharged in consequence of being unable to explain a deficiency in his accounts. A letter has now been received from a man in Canada converted by the Salvation Army, confessing he was responsible and offering compensation.

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tully.

95 Still Missing From the Larchmont Wreck

Terrible Scenes on the Sinking Boat, Many Were Drowned Like Rats in a Trap---Cold and High Seas Completed Destruction.

Block Island, Feb. 14.—Captain McVey and Purser Young, of the steamer Larchmont, which was sunk last Monday night in collision with the schooner Harry Knowlton, late night, said the dead would number at least 150. Both men are suffering physical pain and mental anguish following their terrible experience.

Block Island, R.I., Feb. 14.—The harvesting of the bodies of the victims of the steamer Larchmont, which sunk in collision with the three-masted schooner Harry Knowlton late Monday night off Block Island Sound, proceeded slowly and with difficulty along the icy shores of this island during the night, owing to the darkness.

Sixty-one bodies have been gathered in by coast patrols and vessels sent to scour the Sound. The list of survivors still stood at 19.

CAUGHT BY RISING WATER.

Rock Island, Feb. 13.—When the shock came, passengers rushed out of their staterooms half-dressed or with only their night clothes on. The water was rising rapidly and soon the beds on the saloon deck were afloat. The rising water caught many of the passengers who were unable to force their way up the already crowded stairs. Some who could swim survived until the water reached the ceiling. Others perished with the first torrush of water.

HARD TO GET STORY.

Newspapermen rarely rarely have encountered such difficulty in getting a connected story of the horror. The minds of the survivors were affected by the privations and terrible scenes. Their strength was not equal to forming words or gathering ideas to express the extent of the tragedy. Their own peril obliterated all perspective of the scene.

ONLY TWO WOMEN SAVED.

The survivors number only two women—Mrs. Harris Feldman, New York, and Miss Sadie Gallup, of Groton.

In nearly every instance the corpses were tumbled among the breakers encased in a coffin of ice several inches thick. In this way they were placed on the shore awaiting identification.

A life raft with seven bodies was picked up yesterday by the schooner Clara E., of this port, after a cruise along the Sound.

On a piece of the after deck of the steamer was picked up Mr. and Mrs. Feldman and a dead man, all that remained of sixteen who had sought refuge on the frail support. Little hope was felt that occupants of the missing life boats and rafts had survived the fearful cold which had moderated but slightly during the night.

CREW BEHAVED WELL.

Nearly all the surviving passengers interviewed agree that the crew and officers behaved well. With the first shock and the in-rush of water and escape of steam from the broken main steam pipe, Capt. McVey realized the scope of the accident. The crew was called to quarters, each man springing to his station as the call to desert the ship was given.

FIGHTING FOR LIFE.

Panic stricken passengers aroused from sound sleep rushed wildly on deck and mobbed the boats and rafts, men and women fighting each other forgetful of all but the primal instinct to save one's self. The crew fought off the crowd resolutely though hard pressed, and provided for the women and children first. Some of the male passengers recovered from their first fright and assisted in the work. Many never reached the deck. They were suffocated below in their quarters by the steam, or drowned like rats in a trap beneath the deck.

SURVIVAL OF FITTEST.

Within ten minutes the boats were away from the ship's side just as she settled low in the water with the waves dashing over her and flooding every available foothold. Cold and high seas completed the work of destruction, and the little band of persons who got away from the Larchmont was decimated in groups and in the helpless drift in the bitter cold it became the old story of the "survival of the fittest."

Knights of Pythias Hold a Big Smoker

Large Number Present—An Excellent Program Furnished.

Last night in the Foresters' Hall, Simcoe street, some 200 members and friends of the Knights of Pythias, gathered to enjoy the first smoker of this society. Mayor McWilliams occupied the chair in his usual pleasing manner.

The first part of the evening was mainly devoted to card playing, and this was followed later by the following excellent program;

Piano selection—Mr. G. Schneider.
Address—Mayor McWilliams.
Instrumental—Messrs. Cranfield and Holland.
Song—A. E. Wilson.
Cursory remarks—Mr. F. Dobbin.
Song—G. K. Martin.
Recitation—E. Desautel.
Instrumental—Messrs. Cranfield and Holland.
Address—Mr. McDonald, Past Grand Chancellor, of Toronto.
Song—A. E. Wilson.
Reading—G. K. Martin.
Song—Mr. Greenside.
Recitation—H. Morgan.
Song—Mr. Vandewater.

The chairman opened with a few remarks and told of his visit to Toronto.

Great credit must be bestowed upon the committee, Mr. T. W. Wilson, chairman; and Messrs. Patterson, Comstock, Armstrong, Blewitt, Sheridan and Dr. Middleton, for the excellent arrangements made.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

Final Arrangements Made, Coates Co. to Locate Here

Those who attended the Knights of Pythias' smoker in Foresters' Hall last night had the pleasure of being the first to hear of the success which attended the civic deputation on their errand to Toronto yesterday. His Worship Mayor McWilliams said that all arrangements have been completed for the construction of the large works of the Coates carpet factory in Peterborough. Building operations will be begun at once, and it is expected that the buildings will be completed about June 1st, 1908. The buildings will be situated in the north end of the city, and will be a great boon to Peterborough, as a great many hands will be employed with this large concern.

Lily Lake Tracks Taken Up

Mr. Geo. Aiken who has been in charge of a gang of men at Lily Lake, engaged in tearing up and removing the railway switch used by the Lakefield Cement Co., there, has completed the job and has gone to Drummond to lay the tracks to their new clay bed. It might be added that the clay bed at Drummond's Station contains an almost inexhaustible amount of the clay required by the Cement Company, as they have other 75 acres available, for the information of those not in the know" Drummond's Station, is some six miles out of the city on the Belleville branch of the G.T.R.

Savignac in Prison

Kingston, Feb. 13.—Dr. Joseph Savignac, sentenced at Ottawa to seven years in the penitentiary for shooting his wife and his mother-in-law, has reached here. Deputy Sheriff Friend and Constable McLaughlin were in charge of the prisoner. Savignac enters the penitentiary with the promise of release on parole if his conduct warrants it at the end of two years. It is feared that his confinement in the penitentiary will drive him insane.

Sporting Notes

Two fast games are billed for tonight, in their weekly city league contest. The Strathconas and Auburns will clash in the first game. In the second contest the speedy Lakefield bunch will meet the High Lifers.

* * * *

Marlboros will not be here tomorrow night as scheduled. The local club received word yesterday morning that the Marlboros would be unable to play here Friday night owing to the illness of several of their players. The game will likely be played early next week.

BEWARE OF "DIGESTIVES"

The Only Way to Cure Stomach Disorders is by Strengthening the Digestive Organs.

The ordinary pepsin tablet has ruined more stomachs than all other causes combined. While it gives temporary relief, it leaves the digestive system weaker than ever, and the tablets must be continued with increased frequency.

The only way to permanently cure stomach troubles is by strengthening the digestive organs with a Mi-o-na stomach tablet taken before meals. In this way the remedy prepares the stomach for the food and excites the secretion of gastric juices so that, when the food is eaten, the stomach is prepared to digest it.

If Mi-o-na was a mere digestive, it would be taken after eating, so as to mix with the food, but then permanent relief would not be gained.

Mi-o-na stomach tablets are sold only in a neat metal box, convenient for the purse or vest pocket, and cost but 50c.

We absolutely agree that your money will be refunded should you buy a 50c box of Mi-o-na stomach tablets and not be satisfied with the results. Mi-o-na is sold by druggists everywhere, or will be sent by mail on receipt of price, 50c.

Write today for a free sample package, and also give us your symptoms, and one of the best known stomach specialists will give your case his careful and personal attention without charge. Booth's Mions Company, Buffalo, N. Y.

Goldfield, Nevada

The Greatest Gold Camp in the World Today

Mohawk Mine the Greatest Mine in the World has produced $5,000,000 in 105 days

We Have 35 Acres

of Rich Mineral Land only a few hundred feet from this great mine right in the trend of its rich veins; surrounded by good properties in none of which stocks can be bought for less than 40 cents and up to $18 a share. Stock in the Mohawk sold for 14 cents one year ago, today it is worth $18 a share. All we need is money for development, this we are now getting by sale of block of

Treasury Stock at 15 cents

when this allotment is sold no more will be offered as we expect any day to open up a body of ore that will make our stock worth dollars instead of cents. Write for prospectus and map with order reserving what stock you want, then send draft when you get map and prospectus showing it alright. Address

The Sandstorm Annex Gold Mining Co., Colorado Springs, Colorado

Sin Against Health

Why the Usefulness of All Organs is Destroyed by Costiveness.

Most important to health and comfort is the proper action of the bowels.

By nature those organs are intended for the removal of the waste particles of matter which accumulate in the system.

Retain these wastes and you poison the blood, ruin digestion, bring on nervousness and anaemia.

Habitual costiveness is best overcome by Dr. Hamilton's Pills, which establish regularity that is exactly consistent with nature.

Not a drastic purgative—not even a pain or sensation of grip, because Dr. Hamilton's Pills are vegetable and free from irritating widely advertised remedies.

In every case Dr. Hamilton's Pills do cure and bring sure relief from headache, biliousness and other manifestations of constipation.

Jas. McConnell, of Walkerton, writes; "Since I was comparatively a young man I have not enjoyed real good health.

"My appetite was good and strength kept up, yet I knew something was wrong.

"Frequently I took bilious attacks and violent headaches. My stomach was disordered, skin was murky, under my eyes were heavy dark rings.

"Last winter I read through the Poison's almanac and decided my trouble was constipation. I used Dr. Hamilton's Pills, and can hardly tell the help they have been. I am now as fresh, strong and well as a boy."

Just try the wonderful magic of Dr. Hamilton's Pills. Sold by all dealers. 25c. per box, or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn. U.S.A., or Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

GIVE THE CHILDREN A CHANCE

If all the children in the country from their earliest years to young manhood and womanhood, can be given proper food and clothing, and good hygienic, mental and moral training, special reform causes could be pretty much dropped, and in two or three generations we should witness more genuine progress than has been accomplished in as many centuries. If all the effort that is being wasted on reform could be turned to making the conditions, opportunities and training of the children of the country what they should be we should see speedy and gratifying results.

As things are today tens of thousands of children are being robbed of their childhood. There are for them no happy hours of careless play, and very little instruction, nothing but grinding toil and inadequate nourishment, dwarfing and stunting them body and soul and making it impossible that they should develop into healthy, moral, cheerful, self-respecting men and women. The first step to be taken is to stop working children under 16 years of age. The first seven or eight years of their lives they ought to be trained like plants to a vigorous physical growth, and from then to 16 is the feast time that should be allowed for mental, moral and manual education, which, to get the best results, should go on together.

USES OF SKIMMED MILK

What will be the next discovery to benefit the farmers? inquires the Atchison Globe. Besides making fat pigs, healthy calves, "Dutch" cheese and being used as a substitute for cream in most boarding houses, another and a very important use has been found for skim milk. An Austrian concern caused a great deal of comment recently by cornering the skim milk market. The employes of the concern, numbering 267 people, could not possibly drink all of it, and the people's curiosity was aroused, until it was discovered that "milk stone," or "galalith," which is a composition of skim milk and formaline, makes an excellent substitute for ivory and celluloid.

Mixed with other chemicals, it forms a substitute for hard rubber and amber. Piano keys, billiard balls, doll heads, fancy glove and handkerchief boxes, door knobs, mantelpieces, checks, and, in fact, anything made from ivory or celluloid can be made from galalith. It is the best substitute for ivory that has been discovered because it is smooth to the touch, retains its soft, creamy tinting for years, is not marred by soap and water, and, unlike celluloid, is proof against fire. It does not chip and crack like bone, and it can be cut into the most delicate shapes, being tough and not easily broken. In Austria something like 100,000 gallons of skimmed milk are used daily for the manufacture of galalith, and the industry is largely on the increase. Its great strength and durability even allow it to be used in the place of stone and marble. The equipment for its manufacture is very simple. In a large tank the milk is mixed with certain chemicals, and threshed about by a glass paddle for fifteen minutes. When it leaves this tank it is forced out by air pressure in the form of a yellowish powder. In a second tank it is mixed with the formaline and poured out on marble slabs to dry.

EDMUND KEAN.

To See Him Act Was Like Reading Shakespeare by Lightning.

Before the third century after the birth of Shakespeare had reached its first quarter there was born in England to a stage carpenter and a strolling actress a child destined to grapple with the poet's highest thought and interpret it with a vividness that to this day stands unrivaled. Coleridge's terse comment, that to see him act was reading Shakespeare by lightning, reveals him with the fullness of a volume. Edmund Kean, along with most people early trained to an art, had little if any education of the schools. He was when a boy provided with instruction by some benevolent people whom his smartness and beauty attracted, but he rebelled against the tasks of study and went to sea. But life there was too rough for his fine nature. He returned to England and at the age of seven began the study of Shakespeare's characters with his Uncle Moses. This he continued with an actress named Tidswell, who taught him, besides, as well as she knew, the principles of her art.

At an early age he had the credit of originality so surprising as even then to challenge the supremacy of Philip Kemble. At fourteen he played Hamlet. King George had him recite at Windsor castle, and it is said this incident led some gentlemen to send him to Eton, but there is no record of it. At twenty he was in a provincial troop, a member of which he married, and for six years thereafter, until his glorious night at Drury Lane, his life was one of hardship, struggle, obscurity, but, thanks to the faith in himself, not hopeless. His London debut was made at twenty-eight. He had fought for it hard and long and would then have missed it but for the falling reputation of the theater. London debuts in first roles are not easy for provincial actors, and none knew better how hard they are to get than Henry Irving. Kean seems to have been at his full splendor and made a hit. After that his habits were altogether prejudicial to the refinement of taste or the acquisition of knowledge.

A TREE OF ILL REPUTE.

The Fresh Juice of the Upas Acts as a Deadly Poison.

An evil reputation has long been borne by the upas tree, Antiaris toxicaria, which grows in Borneo and other East Indian islands. It is still a common belief that birds flying within the influence of its poisonous vapors instantly perish and that it is fatal for animals or men to rest beneath its shade. It resembles certain rhus plants (like the poison ivy) in emitting a volatile substance which affects the skins of certain susceptible persons, though others are unaffected. The sap is very poisonous and is the chief substance used by the Dyaks of Borneo for poisoning the tips of their darts.

In this process an incision is made in the bark of the tree and the milky exudation collected on a palm leaf and dried first in the sun and then over a fire until a thick brown mass is left. In this state it can be kept without deteriorating, and when required for use it is made into a thin paste with the juice of "tuba" root, which is used to stupefy fish, or with tobacco or lemon juice, and the ends of the darts dipped into the mixture and dried. These darts are made from the middle stem of the palm leaf and are about six or eight inches in length and of about the thickness of a knitting needle.

They are used with a wooden sumpitan, or blowpipe, which is about seven or eight feet in length and has an internal diameter of about one-quarter inch. A bird struck by one of these little darts is instantly killed, and a pig dies in about twenty minutes. The fresh juice of the upas tree, whether swallowed or injected into the blood, acts as a violent poison, causing convulsions and death.

Larvae Nests.

By breaking open rotten logs one can find in midwinter the grubs or larvae of many of the wood boring beetles, and beneath logs and stones near the margins of ponds and brooks hordes of the maggots or larvae of certain kinds of flies may often be found huddled together in great masses. The larvae of a few butterflies also live over winter beneath chips or bunches of leaves near the roots of their food plant or in webs of their own construction, which are woven on the stems close to the buds whose expanding leaves will furnish them their first meal in spring.

He Didn't Hush.

"Mamma," queried little Willie, "what is 'hush?'"

"Why do you ask, dear?" said his mother.

"Because," explained the observing urchin, "when I asked sister what made her hair all mussed after her beau was here this afternoon she said, 'Hush, dear.'"

To stop a Cold with "Preventics" is safer than to let it run and cure it afterwards. Taken at the "sneeze stage" Preventics will head off all colds and Grippe, and perhaps save you from Pneumonia or Bronchitis. Preventics are little toothsome candy cold cure tablets selling in 5 cent and 25 cent boxes. If you are chilly, if you begin to sneeze, try Preventics. They will surely check the cold, and please you. Sold by J. D. Tully.

A Mild Laxative

Ask your doctor to name some of the results of constipation. His long list will begin with sick-headache, biliousness, dyspepsia, thin blood, bad skin. Then ask him if he would recommend your using Ayer's Pills for constipation. Just one pill at bedtime, a few times, that's all.

We have no secrets! We publish the formulas of all our preparations. J. C. Ayer Co., Lowell, Mass.

BUSINESS DIPLOMACY.

Ees fat Dootch barber gotta shop
Tree door from deesa bootblack stan',
An' w'en he see da trade I gat
He try for bust me oef he can,
An' so he greeve outside hees shop
A chair for neegger bootblack man.

You theenk dat I am feela bad
For see heem gat som' trade I had?
Ah, no, my frand;
I mak' pretand
To smile an' seeng, I am so glad!

Firs' theeng you knew ees Meester Smeeth,
Dat use' for gat hees shine from me,
He stop for shine from neegger man,
I mak' pretand I do not see,
But neegger man he mak' da face
An' ees so glad as he can be.

You theenk dat I am feela bad
For see heem gat deesa trade I had?
Ah, no, my frand;
I mak' pretand
To smile an' seeng, I am so glad!

Nex' day w'en comesa Meester Smeeth
I say "Good morna" justa same.
So jus' baycause I am polite
Eet mak'es Meester Smeeth ashame',
So he com' back; so eyra wan
Ees com' back where dey always came.

Da neegger man ees gatta mad
An' growl an' swear he feel so bad,
But, oh, my frand,
I mak' pretand
I do not see, but I am glad!

—T. A. Daly in Catholic Standard and Times.

Hard Lines.

"Just my luck! This sort of thing always happens just when I'm invited to a party!"—Punch.

A Dollar Too Much.

Hannibal Hamlin, the war vice president, was responsible for the following story on himself:

A man named Pearson walking along the main street in Bangor stepped into a hole and broke his leg. He engaged Hamlin as counsel and brought suit against the city for $1,000.

Hamlin won his case, but the city appealed. Again the decision was for the plaintiff. After settling up the claim Hamlin sent for his client and handed him a dollar.

"What's this?" asked Pearson.

"Why," said Hamlin, "after taking out my fee, the cost of the appeal and several other expenses that's your damage."

Pearson gazed at the dollar and then at Hamlin. "What's the matter with it?" he asked finally. "Is it bad?"—Ridgway's.

Not the Weather.

Tom—Why don't you call on Miss Hautton?

Dick—Too cold.

Tom—What are you talking about? Why, the weather has nothing to—

Dick—You misunderstand me. She invited me not to.—New Orleans Times-Democrat.

Heavy Frost.

Knight—How did your new comedy go?

Wright—Oh, you mean my tragedy?

Knight—But I thought it was a comedy.

Wright—I thought so, too, until I saw the box office receipts.—Chicago News.

Not Sentiment.

He—Oh, please, Miss Jeanne, do not call me Mr. Durand!

She (coyly)—Oh, but our acquaintance is so short. Why should I not call you that?

He—Well, chiefly because my name is Dupont.—Nos Loisirs.

Safety in Silence.

Mrs. Gaymon—Yes, auntie, now that I am Herbert's wife, he is another man.

Aunt Martha—Well, don't you go telling people you're another man's wife or you'll be getting tried for bigamy.—New York Life.

Limited View.

Deacon Sunflower—So you doan' think de routs to de happy land will be obehcrowded?

Deacon Primrose — No, deacon. I doan' think 'twill be necessary to cling to a strap.—Cleveland Plain Dealer.

It Would Be Novel.

"Thackeray probably thought himself original when he produced a novel without a hero."

"Well, can you beat him?"

"Easy; a novel without a conservatory?"—Washington Herald.

The Passion For Matching.

"Todd, your wife has a voice like velvet."

"Gracious! Don't talk so loud. If she heard you I should have to get her a new dress to match it."—Tit-Bits.

Unusual.

She—She is always talking about her mince pies. Did you ever see anything unusual in them?

He—Yes. I saw a shoe button in one once!—Yonkers Statesman.

The Consequence.

"Is it true that Waldorf died poor?"

"Yes. You see, he lost his health chasing after fortune and then lost his fortune chasing after health."—Lippincott's Magazine.

AN OPEN LETTER

From Mr. W. J. Gage, Chairman Executive Committee National Sanitarium Association.

The Trustees carry on this work, having faith in a generous response to their appeals for necessary funds.

NO FATHER, NO MOTHER, NO HOME, WORSE THAN A PRISONER.

GARFIELD BRACEY, BERLIN, ONT.:—Enclosed please find doctor's certificate and examination papers. Hope you will secure me a place in your Sanatorium. You will notice my circumstances is a hard one: no father, no mother, no home—worse than a prisoner. Nobody wants me on account of my disease. Hoping you will have the charity and consider my position and give me a position at once in your Sanatorium. I ever pray.

AN ORPHAN, WITHOUT HOME OR MEANS.

DR. A. E. HANNA, PERTH:—I have a patient here, a young fellow in whom I am greatly interested. He has tuberculosis. He is a poor young fellow, an orphan, out of home, without any means. If we sent him up would you take him in and do the best you can for him? I know how difficult it is to accommodate all who require treatment, but this is a special case.

"I shall pass through this world but once. Any good thing, therefore, that I can do, or any kindness that I can show to any human being, Let me do it now. Let me not defer it or neglect it, for I shall not pass this way again."

TORONTO, CAN., 1907.

DEAR FRIEND,—Out of the several hundred letters received, I reprint on this sheet two that suggest the urgent need and the work of the Muskoka Free Hospital for Consumptives.

The pity of it all is that no letter, or letters, can be written, telling the full story of those who are seeking help.

Because of the contagious nature of the disease, the lot of these poor sufferers has become an increasingly sad and difficult one. To tell the plain truth, relatives and friends often shrink from caring for their afflicted ones through dread of this disease.

The doors of every hospital in Toronto are closed to the consumptive, and this is generally the case elsewhere.

In Canada—the most prosperous country in the world—a country justly proud of its Christian and benevolent institutions—what shall be done?

The doors of the Muskoka Free Hospital for Consumptives stand wide open for these poor sufferers.

All that is now needed to care for double the number of patients in residence, is money. During the past year much has been done to prepare for the extension of the work. A new water supply and sewage system have been installed.

As soon as the work is fully known, all the money needed will be forthcoming. Sir Thomas Barlow, the King's physician, after a visit to the Free Hospital this summer, sent his cheque for five pounds, in appreciative recognition of the work. The Misses Dow of Montreal this month send their cheque for six hundred dollars. All classes and creeds help.

The widow's mite and the rich man's gifts, all come to encourage the trustees to carry on and extend this great national charity.

$50,000 is needed. Will you share in the privilege of helping?

Yours sincerely,

H. J. Gage

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The Homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Not Finding Fault.

"So you never find fault with your wife's cooking?"

"I should say not," answered Mr. Meekton. "When my wife condescends to cook I say everything I can to encourage her!"—Washington Star.

Her Preference.

Edyth—That cousin of yours from Arizona is terribly awkward.

Mayme—Yes, but he is what one might call a diamond in the rough.

Edyth—Perhaps so, but I prefer cut diamonds.—Detroit Tribune.

A Possible Explanation.

"They say Billamy's wife was a palmist before he married her."

"I wonder if that accounts for the fact that she has him so completely under her thumb now?"—Chicago Record-Herald.

Beehives.

Germany has 1,910,000 beehives, which furnish 20,000 tons of honey in a year, while Spain comes second as a producer of honey among European countries, with 1,600,000 hives and 19,000 tons of honey.

Wheat.

The wheat of southern countries contains more albuminoids than that grown in temperate or northern zones, and hence is better suited for the manufacture of macaroni.

Naval Enlistment.

The term of enlistment in the United States navy is four years. Minors over the age of eighteen may be enlisted without consent of parent or guardian. Only such as can reasonably be expected to remain in the service are enlisted.

Rhinoceros Horn.

The horn of the rhinoceros does not grow from the bone, but is a mere excrescence of the skin, like the hair and nails. It can be separated from the skin by the use of a sharp knife.

Drum Calls.

About the year 1708 the beats and calls of the drum used in the service were put into a permanent shape. The tattoo, or beat of the drum calling soldiers to their quarters at night, was once called "tap too," from the Dutch word signifying, "No more drink to be tapped or sold."

The Hawk of Palestine.

The blessing of Palestine is a small falcon, or hawk, which destroys the field mice. Were the hawks exterminated the human population would be obliged to abandon the country.

Cats and Birds.

Cats, if they have an opportunity to hunt birds and rabbits, will give no time to the hunting of rats and mice. Thus many cats are good mousers in the city and bad mousers in the country.

Luxury of the Ancients.

Twenty-seven hundredweight, or nearly one and a half tons, of gold plate was often placed on the tables of ancient Roman epicures.

THE LAUREATE'S LATEST.

Mr. Alfred Austin, the Poet Laureate, contributes a poem, entitled, "Christmas Bells," to The Manchester Daily Dispatch, from which the following stanzas are taken:

The envious nations and their rulers keep
Armed watch upon each other all the while
They prate of friendship, lulling fear to sleep
With treacherous smile.

O finer souls, of penetrating ken,
Poets and preachers, in our hearts instil
Humility afresh, and bring to men
Peace and good-will.

So that our Christmas be no pagan feast,
But we again may grow more like to them,
The revarent kings who journeyed from the East
To Bethlehem.

THE BRITISH SQUARE.

Probably Its Greatest Test and Triumph Are Found In Waterloo.

So many of our great battles have been fought and won with the troops formed into square that the British square has become a famous phrase in the history of war. Such a formation is almost obsolete nowadays, so much have modern rifles and artillery changed the whole face of military tactics. In the days when it was used it was employed mainly in pitched battles where it was a question of resisting the charges of an enemy on an open plain, and presenting a solid front in whatever direction he attacked. In certain circumstances it could still be employed against savages.

It was a British square, for example, that finally broke the power of the Zulus under their King Cetewayo. Our troops learned some lessons in savage warfare from that dusky monarch, especially when the ill-fated 24th regiment were caught unawares by overwhelming hordes of savages at Isandula and practically "wiped out." But when at last a little British army in "square" met the whole of the Zulu forces at Ulundi the war was ended. In yelling myriads the savages charged and charged again, but the square stood firm, and, under a ceaseless and withering fire, the foe at last melted, broke and fled.

Again, in the Soudan the British square proved its mettle although in some cases the frenzied dervishes, absolutely careless of their lives, charged right up to the muzzles of our rifles, and even once broke through the British ranks. The few who did were speedily despatched, but they had done what no civilized troops had ever been able to accomplish—they had "broken a "British square."

Probably the greatest test to which the "square" was ever submitted was, when Napolean, finding artillery and rifle fire in vain, sent the flower of his troops—the Cuirassiers and the Cavalry of the Guard—and finally, the famous "Old Guard" itself—against the stubborn British ranks. In the Victoria and Albert Museum, South Kensington, is a splendid painting, by Felix Philippoteaux, showing the Cuirassiers charging our own gallant Highlanders in this fashion. In those days the square was composed of three lines; the outer line of soldiers lay prone, behind them the men knelt on one knee and behind these, in turn, stood men on foot, so that their volleys were delivered, so to speak, in three tiers—a triple line of fire—the bayonets, in resisting a charge, striking upwards and forwards. Nowadays, as already mentioned, the "square" is practically an obsolete formation, and may never be seen again—in civilized warfare, at least.

Wireless Electric Light.

Before an audience of some of the best known scientific men of the day, Mr. Valdemar Poulsen the other night at the Queen's Hall, London, demonstrated some of the wonders of his new system of ethereal electricity, to Sir William Preece, the chairman, described it.

Sir William said that the lecturer's discovery sounded the death knell of the old "spark" telegraph, and Mr. Poulsen in his paper explained that his form of electricity was capable of no fewer than a million vibrations per second, thus giving a practically continuous wave of energy. The "spark" form of electricity might be likened to a series of explosions, and the Poulsen system to a continuously vibrating tuning-fork.

Some wonderful demonstrations, illustrating the capabilities of the new electricity, were given. A set of six electric incandescent lamps were lighted "wirelessly" by its energy, a lamp was lit through Mr. Poulsen's body, copper wire was melted in mid-air, but the most beautiful sight of all was the swinging copper wire fixed to the top of an induction coil, which, in the darkened hall, seemed like a waving scimitar of violet flame when the ethereal energy was applied to it.

In addition to its advantages in wireless telegraphy (which include absolutely perfect "tuning" and the impossibility of tapping), the inventor expressed himself confident that it would be found to solve the problem of a wireless telephone.

Coal Dust Valuable.

Great are the uses of coal dust in Belgium. A system for compressing coal dust into briquettes and oval forms is successfully dealing with the large masses of coal dust of Belgium's mines and sheds. The briquette industry of Liege has become important, the exportation reaching almost all the coal-consuming countries of the world, amounting for the first seven months of the past year to 253,911 tons. The Belgium state railways alone consumed about 250,000 tons in one year. The domestic use of briquettes is increasing yearly. Many persons use them for kitchen stoves as well as for furnaces.

If you are Constipated, dull, or bilious, or have a sallow lifeless complexion, try Lax-ets. Just once to see what they will do for you. Lax-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Lax-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

CATCHING BIRDS IN NETS.

Method Employed Along the Coast Lands of England.

In various parts of the country flight nets are used on certain parts of the coast for taking birds during the nighttime, but those at Friskney, on the Wash, in Lincolnshire, have become famous on account of their size and the quantity of birds that are taken in them.

On this particular portion of the coast, says The London Daily Graphic, the tide goes out for a very long way. Next to the big sea bank, which prevents the surrounding country from being flooded, there is a large marsh intersected with dykes, and covered with gluss wort, which is locally known as samphire; next to this is a big stretch of sand, and following this a vast mud flat, famous for its cockles. There are several men there who work flight nets—George Braw, the old wildfowler, has four of the longest, consisting of eleven lengths, each length of net being 36 yards long and about six feet deep, made of fine, strong black cotton twine, with a mash six inches square. Along the top and bottom of the net runs a thin strong cord, to attach it to a strong ash pole, which is placed at every 37 yards distance. The lower running cord is attached to the pole about two feet from the ground, so that there is plenty of slack. If it were placed at its full stretch the birds in striking would often be thrown back and escape, instead of being curled up in a hopeless tangle. The best time to catch the wildfowl is on what are known as the "darks," that is, dark, stormy nights with high tides, and the wind blowing north and northeast. Quiet moonlight nights are bad, as the birds flying low, see the net and avoid the snare by rising over the top of it. Of course with so large a mesh many small birds pass through without being caught, and, being of thin twine, often when a large bunch of ducks or geese strike it, they go clean through it, leaving nothing but a big rent in the net and a few feathers to tell the tale. The writer has seen various ducks and gulls, woodcock, snipe, plover, owls, and many different species, both large and small, caught in the toils. One has to visit the net at daybreak to take out the spoil, otherwise the gulls and the grey-backed crows make very short work of the poor captives.

In netting the ubiquitous and destructive sparrow all that is needed is a special sparrow net, pocketed on two long, thin poles. The ivy on the house sides and walls and the stacks in the farmyards are worked all over by raising the net as high as possible, clapping it on to the wall or stack, and then drawing it gradually downward. The birds, as they are disturbed, fly out into the toils. Several scores of birds may be captured in an evening.

21,797 Die of Snake Bite.

The number of persons killed in India in 1905 by wild beasts was 2,054, as against 2,157 in the previous year, and the number of deaths reported from snake bite (21,797) is also a little smaller than that of 1904.

A feature of the 1905 returns is the increase in the number of deaths, both of human beings and cattle, attributed to leopards. It is suggested by a writer in Baily's Magazine that these beasts seek their prey more readily than they used to do in the neighborhood of villages. The fact that more licenses to possess firearms were held in 1905 than in the previous year may be noticed; but it has long been recognized that it is impossible to discover any relation between the number of firearms in native hands and the number of deaths from wild beasts.

During 1905 more dangerous wild beasts were killed than in 1904. The official figures are: Tigers, 1,365; leopards, 4,811; bears, 2,226; wolves, 2,016; and hyenas, 554. Well known man-eating tigers were killed in several districts. A regular crusade against wolves has been carried on in parts of the Central Provinces where these brutes are most numerous and most troublesome.

To the success of the campaign no doubt may be attributed the great decrease in the number of persons killed by wolves—in 1904 244, in 1905 only 153. Before dismissing this subject it is worth noting that the Bengal Government in September last offered a special reward of Rs. 200 for a man-eating tiger which killed seven persons last year in Goilkera Forest, Singbhum district. The ordinary reward for a tiger is Rs. 40.

Story of Dr. Guthrie.

The keenness of the Scotsman's grip on siller says the Glasgow Evening News, is seldom used as a text upon which to base a few remarks, as was done in an exceedingly pawky manner by Mr. Guthrie at the opening of the Springbank U. F. Church bazaar. This well-known banker possesses much of the charming humor that was characteristic of his father, the late Rev. Dr. Guthrie. On one occasion, he related, he was sitting at a coroner's inquest at Liverpool, where an enquiry was taking place into the circumstances attending the death by drowning of a man in the Mersey. The body had been recovered by a Scotsman, and the judge asked him if he did nothing to resuscitate the body. Being a Scotsman (Mr. Guthrie said) the witness at once emitted a stentorian "Eh." The question was repeated, and then its purport seemed to dawn on the exile, as he instantly responded, "Aye, I searched his pockets."

Poison In Fodder Plants.

Mysterious poisonings that occur occasionally in farm stock have been traced recently to the development of prussic acid in fodder plants. Dr. J. W. Leather in India has found that green jowari (Andropogum sorghum), flax, the Rangun and certain other beans and the tapioca plant contain glucosides that produce prussic acid when acted upon by a particular enzyme and that this ferment becomes active only under rare conditions, when the ordinarily wholesome plants become suddenly poisonous.

BIG G CURES in 1 to 5 days Guaranteed not to stricture. Prevents contagion. Does not astringe. U.S.A.

MEN AND WOMEN. The Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

ADVERTISE IN THE TIMES.

SOLICITORS—Messrs. Bicknell, Morine, Bain and Strathy.
TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns **FIVE MINING CLAIMS** containing **160 ACRES**, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Hucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet,
1 claim, 20 acres, Portage Bay District, showing 3 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 3-foot level, show 133 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 600 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

A. R. BICKERSTAFF & CO.,

20 King Street East Phone M. 5710 Toronto, Ontario

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 20 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 20 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch niccolite, 18 inch smaltite together with cobaltite. Assays gave 673-1283-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 60 feet depth, to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00) The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

W. H. JACKSON,

261 KING STREET WEST, - TORONTO, CANADA

DAWSON KENNEDY, Local Agent, 600 WATER ST., PETERBORO

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 2.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 2 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 31 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 90 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.) Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run in to and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 67 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 67 feet under the surface. The water is only sufficient, to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magarka, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 18 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 195 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 3 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize his opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

MAP OF DISTRICT SHOWING SUNBURST MINE.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip this plant with modern machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this supply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 8 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 57 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No 1 shaft, 5 1-2 by 8 feet, is down 85 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 8 1-2 by 90 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 30-foot face of ore.

Shaft No. 3, 5 1-2 by 8 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground as universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Osceola Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	75 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	28 per cent.	Dinger Mining Co.	120 per cent.
B. & B. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$40.00 buys 400 shares of stock; $4.00 down, $3.70 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $31.62 per ton for lead and $36.51 for zinc to $82.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 60 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1906 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 967,160.00
A. W. Taylor	120	169,758.00
J. W. Aylor	10	676,571.00
The Burgner Mining Co.	20	196,579.00
Center Creek Mining Co. (production to date)	200	6,062,194.00
Mrs. E. J. Chinn	120	221,799.00
Majestic Consolidated Zinc & Lead Co.	52	274,490.00
Continental Zinc Co. (production to date)	200	1,573,563.00
Consolidated Troup Mining Co.	40	193,618.00
Daughtery-Davy-McMillan Estate	60	455,006.00
The Empire Zinc Co.	411	126,319.00
Fox Holm	20	129,124.00
Granby Mining & Smelting Co., 1905		1,261,551.00
Granby Mining & Smelting Co., 1904		1,026,650.00
John G. Quinn	640	82,567.00
Pittsburg-Joplin Lead & Zinc Co.	10	98,000.00
Pittsburg-Missouri Zinc & Lead Co.	120	413,204.00
United Zinc Co.	136	290,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 240 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

PRESENT PRICE OF SHARES NOW 8 CENTS - - - - - PAR VALUE $1.00

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

Humphrey & Company

160 St. James Street, Montreal

THE REFUGEES

By A. CONAN DOYLE,

Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

late how vile and foul is this life which you have led! What might you not have done? His soul was in your hands like clay for the potter. If you had raised him up, if you had led him on the higher path, if you had brought out all that was noble and good within him, how your name would have been loved and blessed from the chateau to the cottage! But no. You dragged him down, you wasted his youth, you drew him from his wife, you marred his manhood. Take heed, madame, for God's sake take heed ere it be too late! For all your beauty there can be for you, as for me, a few short years of life. Then, when that brown hair is white, when that white cheek is sunken, when that bright eye is dimmed—Then God pity the sin stained soul of Francoise de Montespan!"

Her rival had sunk her head for the moment before the solemn words and the artful eyes. For an instant she stood silent, cowed for the first time in all her life, but then the mocking, defiant spirit came back to her, and she tossed up with a curling lip.

"I am already provided with a spiritual director thank you," said she.

"Oh madame, you must not think to throw dust in my eyes! I know you and I know you well!"

"On the contrary, you seem to know less than I had expected. If you know me so well, pray what am I?"

All her rival's bitterness and hatred rang in the tones of her answer. "You are," said she, "the governess of my children and the secret mistress of the king."

"You are mistaken," answered Mme. de Maintenon serenely. "I am the governess of your children and I am the king's wife."

CHAPTER XIV.

OFTEN had De Montespan feigned a faint in the days when she wished to disarm the anger of the king. But now she knew what it was to have the senses struck out of her by a word. She could not doubt the truth of what she heard. There was that in her rival's face, in her steady eye, in her quiet voice, which carried absolute conviction with it. She stood stunned for an instant, panting, her outstretched hands feeling at the air, her defiant eyes dulling and glazing. Then with a short sharp cry, the wail of one who has fought hard and yet knows that she can fight no more, her proud head drooped and she fell forward senseless.

Mme. de Maintenon stooped and raised her up in her strong white arms. There were true grief and pity in her eyes as she looked down at the snow-pale face which lay against her bosom, all the bitterness and pride gone out of it and nothing left save the tear which sparkled under the dark lashes and the petulant droop of the lip, like that of a child which has wept itself to sleep. She laid her on the ottoman and placed a silken cushion under her head. Then she gathered together and put back into the open cupboard all the jewels which were scattered about the carpet. Having locked it and placed the key on a table where its owner's eye would readily fall upon it, she struck a gong which summoned the page.

"Your mistress is indisposed," said she. "Go and bring her maids to her." And so, having done all that lay with her to do, she turned away from the great silent room where, amid the velvet and the gilding, her beautiful rival lay like a crushed flower, helpless and hopeless.

Helpless enough, for what could she do? And hopeless, too, for how could fortune aid her? The instant that her senses had come back to her she had sent away her waiting women and lay with clasped hands and a drawn face planning out her own weary future. She must go, that was certain. Her spirit was broken at last. She must accept defeat, and she must go.

She rose from the couch feeling that she had aged ten years in an hour. There was much to be done and little time in which to do it. She had cast down her jewels when the king had spoken as though they would atone for the loss of his love. But now that the love was gone there was no reason why the jewels should be lost too. If she had ceased to be the most powerful, she might still be the richest woman in France. There was her pension, of course. That would be a munificent one, for Louis was always generous. And then there was all the spoil which she had collected during these long years, the jewels, the pearls, the gold, the vases, the pictures, the crucifixes, the watches, the trinkets—together they represented many millions of livres. With her own hands she packed away the most precious and portable of them, while she arranged with her brother for the safe keeping of the others. By evening all was ready, and she had arranged that her property should be sent after her to Petit Bourg, to which castle she intended to retire.

It wanted half an hour of the time fixed for her departure when a young cavalier whose face was strange to her was ushered into her room.

He came with a message from her brother.

"M. de Vivonne regrets, madame, that the rumor of your departure has got abroad among the court."

"What do I care for that, monsieur?" she retorted.

"He says, madame, that the courtiers may assemble at the west gate to see you go; that Mme. de Neuilly will be there, and the Duchesse de Chambord and"—

The lady shrunk with horror at the thought of such an ordeal. To drive away from the palace where she had been more than queen under the scornful eyes and bitter gibes of personal enemies!

"Tell my brother, monsieur, that I should be obliged if he would make fresh arrangements."

"He bade me say that he had done so, madame."

"Ah! At what hour, then?"

"Now. As soon as possible."

"I am ready. At the west gate, then?"

"No. At the east. The carriage waits."

"And where is my brother?"

"We are to pick him up at the park gate. He is watched, and were he seen beside the carriage all would be known."

"Very good. Then, monsieur, if you will take my cloak and this casket we may start at once."

They made their way by a circuitous route through the less used corridors, she hurrying on like a guilty creature, a hood drawn over her face and her heart in a flutter at every stray footfall. But fortune stood her friend. She met no one and soon found herself at the eastern postern gate. A couple of phlegmatic Swiss guardsmen leaned upon their muskets upon either side, and the lamp above shone upon the carriage which awaited her. The door was open, and a tall cavalier swathed in a black cloak handed her into it. He then took the seat opposite to her, slammed the door, and the caleche rattled away down the main drive.

It had not surprised her that this man should join her inside the coach, for it was usual to have a guard there, and he was doubtless taking the place which her brother would afterward occupy. That was all natural enough. But when ten minutes passed by and he had neither moved nor spoken she peered at him through the gloom with some curiosity. At last the silence impressed her with a vague uneasiness. It was time to bring it to an end.

A thrill ran through her nerves. Who or what could he be, this silent man? Then suddenly it struck her that he might be dumb.

"Perhaps monsieur is afflicted," she said. "Perhaps monsieur cannot speak. If that be the cause of your silence, will you raise your hand, and I shall understand." He sat rigid and silent.

Then a sudden mad fear came upon her, shut up in the dark with this dreadful, voiceless thing. She screamed in her terror and strove to pull down the window and open the door. But a grip of steel closed suddenly round her wrist and forced her back into her seat. They were already out on the country roads far beyond Versailles. It was darker than before, heavy clouds had banked over the heavens, and the rumbling of thunder was heard low down on the horizon.

The lady lay back panting upon the leather cushions of the carriage. She was a brave woman, and yet this sudden, strange horror coming upon her at the moment when she was weakest had shaken her to the soul. She crouched in the corner, staring across with eyes which were dilated with terror at the figure on the other side. If he would but say something. Any revelation, any menace, was better than this silence.

"Sir," said she, "there is some mistake here. I do not know by what right you prevent me from pulling down the window and giving my directions to the coachman."

He said nothing.

"I repeat, sir, that there is some mistake. This is the carriage of my brother, M. de Vivonne, and he is not a man who will allow his sister to be treated uncourteously."

A few heavy drops of rain splashed against one window. The clouds were lower and denser. She had quite lost sight of that motionless figure, but it was all the more terrible to her now that it was unseen. She screamed with sheer terror.

"Sir," she cried, clutching forward with her hands and grasping his sleeve, "you frighten me. You terrify me. I have never harmed you. Why should you wish to hurt an unfortunate woman? Oh, speak to me, for God's sake, speak!"

Still the patter of rain upon the window and no other sound save her own sharp breathing.

"Perhaps you do not know who I am?" she continued, endeavoring to assume her usual tone of command, and talking now to an absolute and impenetrable darkness. "You may learn when it is too late that you have chosen the wrong person for this pleasantry. I am the Marquise de Montespan, and I am not one who forgets a slight. If you know anything of the court you must know that my word has some weight with the king. If you would— O Jesus! Have mercy!"

A livid flash of lightning had burst from the heart of the cloud and for an instant the whole countryside and the interior of the caleche were as light as day. The man's face was within a hand breadth of her own, his mouth wide open, his eyes mere shining slits, convulsed with silent merriment. Every

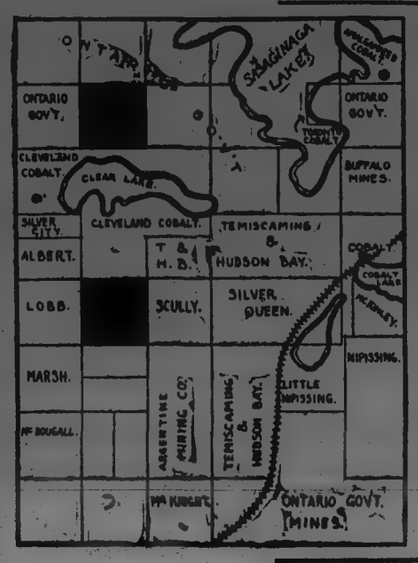
LAKE GEORGE COBALT SILVER MINING COMPANY, LIMITED

affords conservative mining men and others an inveatment of greatest merit by reason of the immense profits that will most surely be forthcoming.



Authorized Capital Only $600,000

Divided into 600,000 Shares

Par value $1.00 each—fully paid and non-assessable Only 300,000 shares for sale at par.

PROPERTIES

MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

SELECTIONS

THE HUMAN BODY.

It Is a Mass of Tiny Soapy Globules Called "Myelins."

Man is made of soap and not of dust, according to a statement recently delivered before the Harvey society at the Academy of Medicine in New York city by Professor J. G. Adami.

Man is not entirely made of soap, of course, but there are scattered through his body an unknown number of tiny globules called "myelins," which are now believed to be a primitive form of true soap. It is the only pure type of soap on earth, and scientists say it may be that man was originally constructed on a self cleansing principle. All he had to do was to exercise his will power—think hard—and set his myriads of soap globules in motion.

The soapy nature of human beings has been discovered by means of the polarizing microscope. Professor Adami gave a history of the curious researches which led up to the great "find." Fifty years ago Virchow stumbled on the presence of myelin globules in nearly every tissue of the body. They were plentiful in the brain. They dissolved in hot alcohol. Strong alkalis caused them to shrink. Virchow thought the myelins were albumens.

It was not until 1898 it was discovered they possessed peculiar refractive power. Finally Professor Lohlein of Carlsruhe made an elaborate study of the globules and showed under the polarizing microscope they had queer cross markings and were in reality "liquid crystals," showing precisely the same markings as soap globules. This was considered sufficient to demonstrate their identity with soap.

The myelins, or soap globules, seem to contain a remarkable substance intermediate between fluids and crystals.—New York World.

The Three Peanut States.

Virginia, Tennessee and Georgia are the leading peanut states. In Virginia the white peanut and the small red peanut are the varieties chiefly produced, while Georgia also largely produces this small red nut. In Tennessee the white nut, which is larger than the red, and the larger variety of the red nut are raised. The chief peanut counties are Humphreys, Perry, Hickman and Dickson, but the area of peanut cultivation has been enlarged in more recent years. Few peanuts are produced in east or west Tennessee, but in the counties named they are the chief money crop of a large per cent of the farmers. The peanut has many names—goober, pindar, earth nut, ground nut, ground pea. Northern soldiers called them goobers, and there was a well known song entitled "Grabbing Goober Peas," which was a favorite with troops marching through Georgia."—Nashville American.

Bancroft's Answer.

I have just heard a good mot—it is not more than a mot—of Bancroft, the American historian, who is now United States minister at Berlin. Loftus, our ambassador there, thought, I suppose, that the Yankee was a fair and would be an easy butt for the shafts of his peculiarly refined wit, so attacks him before a hundred listeners on some public occasion with "In God's name, Mr. Bancroft, why don't you Yankees send your representatives to court like Christians, in a proper uniform, instead of turning them out all dressed in black, like so many undertakers?"

Whereto Bancroft replies: "Really, Lord Augustus, I am surprised that you, as ambassador of the queen of England and with those keen powers of penetration for which you are so generally distinguished, should have failed to perceive that we could not be more appropriately dressed than we are at European courts, where what we represent is the burial of monarchy."—From Letters of Lord Lytton.

The Leafless Acacia.

There are forests of leafless trees in some parts of Australia. They respire, so to say, through a little stem, apparently answering the purpose of a leaf. The trees are known as "the leafless acacias."

To Get Fat.

Some individuals are constitutionally thin, but it is an exceptional case that will not respond to proper "get fat" treatment, which consists in moderate exercise, good things to eat and plenty of refreshing sleep. Raw eggs are fattening. Drink plenty of water. Blue pencil the fretting habit. Get out of doors every day and sleep at least eight or nine hours every night.

To the Manner Born.

Shakespeare wrote "native and to the manner born." "To the manor born" is believed to be an American innovation. There is not a single editor of Shakespeare who admits that reading, but there is a wide belief in it, absolutely ungrounded.

Wild Peafowl.

The peacock is found in a wild state in India, Ceylon, Madagascar and many other parts of Asia and Africa.

A Very Old Proverb.

The proverb "Necessity is the mother of invention" can hardly be traced to one independent source. The idea was expressed by Persius, the Roman satirist, about 60 A. D., and is found in the precise form now quoted in Richard Franck's "Northern Memoirs" (printed in London, 1694) and in various later English writers.

Meat Extracts.

A medical expert points out that meat juice and meat extracts have a value quite separate from their actual nutritive constituents, inasmuch as they have a direct stimulating action on the gastric juice.

Hail In South Africa.

Summer showers in South Africa are remarkable for terrific showers of hail, hailstones as large as pigeons' eggs having been frequently observed.

Cocos Island Treasure.

It is said that there are two great treasure hoards on Cocos island—one a pirate's plunder, estimated at anything between $30,000,000 and $60,000,000; another called "Keating's treasure," said to be worth $15,000,000.

Ivory Black.

In ivory manufacture nothing is lost. The scraps and dust are burned to charcoal and form the ivory black of the painter.

PATENTS PROMPTLY SECURED

Engineers and others who realize the advisability of having their Patent business transacted by Experts. Prelim. inary advice free. Charges Moderate. Our Inventor's Advisor sent upon request. Marion & Marion, New York Life Bldg., Montreal; and Washington, D.C. U.S.A.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

Lax-ets 5c Sweet to Eat A Candy Bowel Laxative.

Are You a Woman Needing Strength?

Not long ago you were able to enjoy life.

You had vigor, strength, ambition—did everything with zest and pleasure. Upon you cheeks was the hue of health, in your eyes the sparkle of vim and animation.

Today—all is a drudge.

Not actually sick, but if your work were less imperative, how gladly you would rest.

You are breaking down.

Nervous system is *out of* gear.

Digestive powers are weak.

Blood lacks nourishment.

Just one thing to do—Build up—Win back your health with Ferrozone.

No remedy restores so fast, builds up so permanently, instills such vigor or surplus strength like Ferrozone.

A case showing how Ferrozone acts is illustrated by the following from Mrs. H. Wright, of Enfield, N.S.

"Six months ago I experienced a serious illness. It commenced with splitting headaches, dull pains through my chest and shoulders. I found it hard to get satisfying sleep—would roll and toss and in the morning felt tired all over. Then I grew nervous, lost flesh, got pale and had heavy dark circles under my eyes. My strength got so low I couldn't do housework. I was worried and unable to eat and feared I would not get well. Ferrozone braced me up in a few weeks. It seemed to supply wonderful strength. I gained in flesh, looked better and was able to sleep. In all I took twelve boxes of Ferrozone and my cure was complete."

If Ferrozone doesn't help and cure you—then nothing ever will; your druggist sells it in 50c. boxes—Better try Ferrozone.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS.

Boarders Wanted

Good accommodation for boarders in a home with all modern conveniences. Apply at 39 Queen street. tf

Mr. Mitchell to Sell Grocery

Mr. F. J. R. Mitchell, who has decided to confine his attention to the liquor trade exclusively, is now offering his old established and successful grocery business for sale. This is a splendid opportunity for any wanting to obtain a good business at a reasonable price e.o.d.t.f.

Mr. Thos. G. Foster Passes Away

Mr. Thos. G. Foster of this city passed away yesterday morning in Nicholls Hospital at the age of 62 years, the result of a broken leg. The funeral will take place this afternoon at two o'clock, from the residence of Mr. W. H. Lytle, 344 Charlotte street, to Little Lake cemetery.

Successful Keene Ball

The Keene masquerade ball was a great success. The prizes, two handsome clocks, were awarded to Mrs. J. R. McIntyre and Mr. Charles Fife. Mr. David Moore acted as floor manager and Messrs. McFarlane and Miller supplied the music.

Valentine Ball in Lakefield

Last night the bachelors of Lakefield gave a Valentine ball in the town hall. The committee in charge of the affair were Messrs. Crawford, Hurl, Kidd and Leonard. Mr. Archie Moore, of Peterborough, acted most efficiently as master of ceremonies. Wilson's orchestra from Peterborough provided the music.

FOR SALE

Forty shares of Peterborough Cordage Co. Stock at par if taken at once, or will exchange for Foster Stock at market quotation.

Begins Wednesday, Jan. 3, 1907

A very large number of applications for admission at the beginning of the terms have been received, and it is advisable that all who purpose attending should enter as near the commencement of the term as possible.

You cannot make a better investment

For particulars, address

W. PRINGLE,
Opposite Post Office, Principal.

LOCAL INCIDENTS

By The Times Man on the Street

—The Board of Works met last night.

—Norwood is to spend $40,000 in cement walks.

—The choir of George street church will drive to Cavanville tonight.

—The local Board of Works is now busily engaged in drawing stone for future city use.

—A lady's hand satchel found last Thursday awaits a claimant at the police station.

—The annual meeting of the Knox church congregation was held yesterday evening.

—Local fish dealers report that yesterday's orders for fish exceeded those of any previous year.

—The Knights of Pythias smoking concert in Foresters' Hall last night was a pronounced success.

—The township council of North Monaghan, has made a substantial grant towards Nicholls Hospital.

—The 14th Regt. Hockey team of Kingston, defeated the Argonauts at Toronto last night by a score of 8—6.

—The Men's Debating Club of St. Peter's T.A.S. held their first debate yesterday evening after the services at the cathedral.

—Yesterday was Ash Wednesday, and as such greatly reduced the sale of butchers' meat, being the first day of the Lenten season.

—Ice is being cut at Stony Lake for the cottagers who reside there in the summer. The bulk of it ranges from 18 to 20 inches in thickness.

—The teller of a New Britain, Conn., Savings Bank, named W. Walker has skipped with $500,000. Latest advices show that he left both the building and the vault.

—Surveyors for both the C.P.R. and C.N.R. are numerous about this town just at present. They are running lines in every direction, but neither party is very communicative as to the object.—Cobourg Post.

—A couple of young gentlemen from Peterborough drove to town last Sunday. On the road back home, owing probably to the small blizzard, they lost their way and had considerable difficulty in regaining the right direction.—Lindsay Post.

—A special committee from the council, composed of Mayor McWilliams, Ald. Morrow, City Solictor E. H. D. Hall and Mr. T. F. Matthews, went to Toronto yesterday morning to interview Mr. Dunwoodie, of the Coates Co., Limited.

—General regret was expressed throughout the city yesterday, that Peterborough's successful scenic production Zephra had come to an end. However, Messrs. Turner & Sons have many good shows already secured for the local opera house.

—Yesterday morning a near-by farmer whilst climbing down by a ladder he brought with him, from a load of hay on the market square, had a case of "Molly slipped her trolley," and fell to the ground, with the result of a carmine tinted nose.

—The Times is in receipt of a large photograph of the Independent Elevator at Omaha, Neb. This elevator, which is one of the largest in the world, is managed by an old Peterborough boy, Mr. James Ellis, formerly of the C. P. R. local offices. Mr. Ellis is a brother-in-law of Mr. William Buller, of this city.

—The fire hall will be used notwithstanding rumors to the contrary, we are in a position to note officially that the new city building on Aylmer street, (started many months ago for a fire hall) is not to be fenced in and shown as an antique curiosity. There are still hopes that the building will, before many years pass by be turned over to and used by the city as a fire hall. Such absurd rumors are unjustifiable and should be corrected at once.

This is St. Valentine's Day

This is St. Valentine's Day, when you can either please your best girl by sending her a $2.17 ornamental valentine with the address written in your well known caligraphy, or get even with the other fellow by sending her a scurrilous one-cent valentine with the address handwriting disguised.

Mr. A R. Jackson in New Business

Mr. W. F. Babcock, of Brantford, who as noted in a former issue has made arrangements to start a carpet cleaning establishment in Peterborough, was in the city yesterday. Mr. Babcock has sold out his interest to Mr. A. R. Jackson, 320 Charlotte St., who will run the Peterborough establishment. Mr. Jackson has leased the building at the south-east corner of Charlotte and Aylmer streets.

S. A. Band for Omemee

Capt. Gibbons of the Omemee Salvation Army Corps, is in the city and completed arrangements to have the band visit Omemee on Saturday and Sunday, Feb. 23rd and 24th. There is no doubt the citizens of Omemee will appreciate the captains efforts in this direction and avail themselves of this opportunity of hearing the music and songs of this, Peterborough's unrivalled band belonging to the Salvation Army.

Toronto Lady Hurt at the Slide

Miss Marsh, who has been visiting her uncle, Mr. C. E. Frost, has returned to her home at 139 Rose avenue, Rosedale, after an unpleasant accident. It seems that on Monday night as this lady was on the toboggan slide, she fell off, and was unable to get out of the way fast enough. The toboggan coming behind, struck her in the face and injured her seriously. Her nose was broken in two places and her face and eyes were badly bruised and swollen.

St. Petersburg, February 14.—Miles, Kilmova and Terentiava implicated in the plot to blow up Premier Stolypin on August 25, 1906, were yesterday sentenced to hard labor for life.

The Modesty of Women

Naturally makes them shrink from the indelicate questions, the obnoxious examinations, and unpleasant local treatments, which some physicians consider essential in the treatment of diseases of women. Yet, if help can be had, it is better to submit to this ordeal than let the disease grow and spread. The trouble is that so often the woman undergoes all the annoyance and shame for nothing. Thousands of women who have been cured by Dr. Pierce's Favorite Prescription write in appreciation of the cure which dispenses with the examinations and local treatments. "There is no other medicine so sure and safe for delicate women as "Favorite Prescription." It cures debilitating drains, irregularity and female weakness. It always helps. It almost always cures. It is strictly non-alcoholic, non-secret, all its ingredients being printed on its bottle-wrapper; contains no deleterious or habit-forming drugs, and every native medicinal root entering into its composition has the full endorsement of those most eminent in the several schools of medical practice. Some of these numerous and strongest of professional endorsements of its ingredients, will be found in a pamphlet wrapped around the bottle, also in a booklet mailed *free* on request, by Dr. R. V. Pierce, of Buffalo, N. Y. These professional endorsements should have far more weight than any amount of the ordinary lay, or non-professional testimonials.

The most intelligent women now-a-days insist on knowing what they take as medicine instead of opening their mouths like a lot of young birds and gulping down whatever is offered them. "Favorite Prescription" is of KNOWN COMPOSITION. It makes weak women strong and sick women well.

Dr. Pierce's Medical Adviser is sent *free* on receipt of stamps to pay expense of mailing *only*. Send to Dr. R. V. Pierce, Buffalo, N. Y., 21 one-cent stamps for paper-covered, or 50 stamps for cloth-bound.

If sick consult the Doctor, free of charge by letter. All such communications are held sacredly confidential.

Dr. Pierce's Pleasant Pellets invigorate and regulate stomach, liver and bowels.

SOCIAL AND PERSONAL

—Mr. J. E. Belcher, C.E., has returned from Toronto.

—Mrs. Frost of Orillia, is the guest of her son, Mr. C. E. Frost.

—Mr. J. A. Wilson and Mr. J. A. Tough, of Orillia, were in the city yesterday.

—Mrs. E. F. Musson and Miss Nina Davidson are in Toronto, delegates of the Y.M.C.A. Ladies' Auxiliary.

—Mr. Wm. Thompson, proprietor of the Mount Julian hotel, was in the city yesterday.

—Rev. J. G. Potter, who has been laid up with an attack of la grippe, was able to be out yesterday.

—Mr. J. E. Kavanagh, of New York, is in the city visiting his father-in-law, Mr. Benjamin Shortly.

—Mr. Bemoliel, curate of St. Thomas church, Millbrook, preached a strong sermon at St. John's church last night.

—Mr. and Mrs. Geo. P. Smith and family, Calgary, Alta., are visiting Mrs. Smith's sister, Mrs. C. E. Gunsolus, 20 Queen street.

—Lindsay Post: Mr. and Mrs. James Jackson and Mr. Stanley Kennedy, of Peterborough, spent Sunday with Mr. and Mrs. John Richards, Duke street. Mr. G. A. Gillespie, of Peterborough, was in town yesterday attending the annual meeting of the Victoria Creamery Association.

Grand Concert in St. Peter's Hall

The concert in St. Peter's Hall, in the new Catholic school, given by the boy sopranos of St. Peter's school, assisted by Mr. Harry M. Bennet, humorous vocalist, of Toronto, and other talent, was a great success. the hall being crowded. The program was most excellent, and the applause was frequent. Among those participating and specially deserving of record, were Mrs. W. J. Morrow, Mr. John King, the baritone, Master J. Clancy, Joseph Tuckert Miss B. Hucket, Harry Bennett, Miss G. Rudkins, C. Bain, C. Dreman, D. O'Connell, G. Kehoe, H. Galvin, G. Donohue, C. Talbot, E. Tooley, A. Costello, W. Galvin, M. Murty, E. Malone, E. O'Shea, P. Creedon, K. Donoghue E. Murty, A. O'Brien, J. Rutherford and Miss E. O'Connor, accompanist.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

Francis Holly, was charged at yesterday's police court with being drunk in a public place, as was Arthur Sullivan, each was assed $2.00, which they both paid. By a singular coincidence each prisoner had a $2 bill ready, which looked as though each prisoner had by a telepathic warning anticipated the result of their respective slips from sobriety.

Foresters to Meet in Peterborough

There was a large attendance at the regular meeting of Court Stanley, Ancient Order of Foresters, held in S.O.E. hall, C.R., Bro. T. Hendry, presided. Six candidates were initiated, and three applications were received for membership. The secretary, Bro. R. J. McWilliams, who was delegate to the district meeting held in the city of Belleville on Feb. 5th, gave an interesting report. Court Stanley has now the largest membership.

Bro. McWilliams was elected D.S. C.R., and Peterborough was chosen as the next meeting place of District Court on the first Tuesday in Feb. 1908.

Typos to Hold a Banquet

The fifth annual banquet of the Peterborough Typographical Union No. 248 will be held on Saturday night next in the Foresters' hall, Simcoe street. The dinner promises to be a great success. The presidents of all the local labor union are invited, and a most interesting toast list is being prepared.

A Well Watched Dog Fight

Much excitement was caused on George, near Hunter street, yesterday morning, by an old-time scrap between a collie dog and a bull dog. It seems that the collie was hitched to a sleigh when the bull attacked him, and at once the two were engaged in a catch-as-catch-can contest. A crowd gathered and everybody tried to separate the dogs. It took a large amount of force before they were pulled apart.

THE TIMES BOOKSTORE

Fancy Valentines Comic

The time-honored custom of friends and lovers exchanging gifts on St Valentine's Day will be exceedingly popular this season.

We have an almost unlimited variety of dainty "favors" to choose from.

Blank Books and Office Supplies

Property Committee in Session Last Night

Bylaw to be Prepared to Provide for all Persons Desiring to Build, Within or Outside the Fire Limits, Taking Out Permits---Must File Specifications as to Size, Class and Cost of New Work.

The Property Committee of the City Council met last night, when there were present, Mayor McWilliams, Chairman Ald. McIntyre, Aldermen Stevenson, Bradburn, Elliott and Morgan.

The question of furnishing shelter accommodation for city carters was gone into. The chairman offered that the property on Water street, to the east of the National Hotel, could be rented, taxes included, for $50 a year from the Chamberlain estate. There are two sheds on this lot, one of which could be fitted up at an expense of $60 to furnish a comfortable shelter for the men. The carters themselves would pay for their own heat and telephone services. Some 13 carters signed a petition for shelter accommodation last year; they also asked for telephone service at the city's expense.

Under existing conditions the fact of the carters standing on the corner of George and Simcoe streets, is somewhat of a nuisance to the public, especially so to the Kingan Hardware Co., who are continually called up by phone to call a carter's services into requisition for some customer. The providing of a shelter would be a relief in this connection, and also remove the carters' stand from off a main thoroughfare.

On motion of Ald. Stevenson this matter was left in abeyance until such time as the carters sign a paper showing how many carters would use the proposed shelter, and pledging themselves to contribute to a telephone service and necessary heat, and signifying their willingness to conform with any reasonable rules and regulations the city may impose.

The committee decided to have prepared a bylaw governing all building operations. Under the provisions of this measure, every one desiring to build, or alter any structure, either within or outside the fire limits, will have to apply for a permit and file specifications as to the class, style, size and contract and value of such building. This will enable the city to keep in touch with all building operations, and keep the municipal authorities acquainted with the exact amount of building operations undertaken year by year. These permits will be issued by the chairman of the Property Committee, Ald. McIntyre. This bylaw will not conflict with the present fire limits bylaws, which will have to be lived up to by parties desiring to build within the fire limits.

The question of changing the fire limits was next discussed. The committee considered the advisability of diminishing the zone for 14-inch walls and creating an area in which 9-inch walls may be erected to the exclusion of frame structures. The mayor considered the present limits too irrational and over severe on some parties.

It was agreed that the mercantile district, calling for 14-inch walls, should include both sides of Water street on the east; both sides of Aylmer street on the west; and from King to Murray street, both sides north and south.

The question of carving out an area for 9-inch walls, to the exclusion of frame buildings, was a more difficulty problem, and on the suggestion of Ald. Johnston, the committee went home to dream on the matter in preparation for next meeting.

Swettenham Case May be Re-Opened

Governor's Official Report of the Admiral Davis Incident.

New York, February 15.—A special cablegram from London to the New York World says Governor Swettenham's report of his clash with Admiral Davis, in Jamaica, will be laid before Parliament within a few days of its opening. The report is the official one sent to the British Colonial Office.

The World's correspondent professes to have some knowledge of the text of the report, and says:

"The Governor's account of the facts will undoubtedly cause a powerful reaction of feeling in his favor in this country, and stir the Jingo press to such demonstrations that the question of Swettenham's resignation may have to be deferred if not dropped entirely.

"His explanation is held by those acquainted with it in detail, to justify his demand that the American bluejackets be withdrawn, leaving only the point against him to be that the demand was not couched in the language of propriety.

"Gov. Swettenham's defence of the wording and tone of his letter is said to be weak. He alleged that he saw nothing wrong or improper in discussing the reasons which Admiral Davis had given for his actions. In fact, the Governor contends that he would have been more discourteous if he had ignored these reasons and had simply sent a note bluntly demanding the withdrawal of the troops.

"Gov. Swettenham refers to President Roosevelt's refusal of foreign aid at the time of the San Francisco earthquake calamity as a justification of his own attitude in Kingston.

"It is believed that Admiral Davis will not allow the statements to go unchallenged."

Mrs. Benj. Clute Has Passed Away

Yesterday morning we regret to say that Nancy Robson, the wife of Mr. Benjamin Clute, passed away at Nicholls' hospital, from heart failure. The late Mrs. Clute, who was 76 years of age, was born in Northumberland County. She married Benj. Clute 54 years ago. The deceased lived in Northumberland until last July, then moving to this city, and since lived with her son, Mr. Chas. Clute, 505 Rubidge street.

She leaves to mourn her loss, her children: Mrs. Rose Emlaw, Campbellford; Mr. Boyd Clute, Campbellford; Mrs. Henrich, of Rochester; Mrs. Prentice, of Brinley, Mich. Three sisters and a brother are living at present in Campbellford.

The deceased was a member of the Anglican Church. No funeral arrangements have as yet been made.

Boy Terribly Frozen

Owen Sound, February 15.—John Campbell, aged 13 years, lies at the General and Marine Hospital here in a precarious condition, as a result of terrible exposure, which will cost him both feet if not his life. The little fellow had been working for a farmer in the Township of Sydenham, and came home last week to spend a few days with his widowed mother.

On Monday afternoon the farmer called for him and together the two started for home. The boy alleges the man forced him to drink some liquor. He became very sick and fell from the sleigh. Wandering into a farm yard he lay down beside a barn, remaining there all night exposed to a temperature of 20 degrees below zero.

Improvements on the Trent Valley Canal

As is well known the Dominion Government Public Works Department, with Mr. W. Quinn as their local representative in the Trent Valley canal has done good work. The local staff is drilling and blasting the rock which forms the bed of the river, above the Hunter street bridge. This work is being done now because it can be carried out much easier during the winter, with the water in the river at normal height, than in the spring when the floods are on.

The department will resume dredging as soon as possible, and at the present time the dredge is being taken up the river, a channel being cut through the ice for this purpose.

Japan Strengthens Her Army and Navy

Tokio, Feb. 14.—The national budget for 1907-8 passed the House of Representatives yesterday without the slightest curtailment. Such an occurrence is without precedent since the opening of the Japanese Diet. The powerlessness of the Opposition is regarded by many persons here as a bad sign for the progress of constitutional government in Japan.

The budget for 1907-8 provides for the expenditure of $405,000,000. $60,000,000 more than last year, and is twice as much as was required to cover all expenses prior to the Russo-Japanese war. There are large appropriations for naval and military increases, and new undertakings in the department of communications are to be met by an internal loan of $15,000,000.

SPORTING TOPICS

CURLING.

A real live game was played in the Charlotte street rink yesterday afternoon when the local club did up the players from Cannington. In the first eight ends, Hall made ten points. After Cannington became acquainted with the ice, they reduced the lead to five, and were gradually pulling up. The rinks were Rollis Waddell vs. A. E. Marks, manager of the Home Bank. The score stood 17 for Peterborough, and 10 for Cannington. These scores were supplied The Times by a Cannington player.

• • • •

HOCKEY.

A special train will be run from Belleville to Lindsay tonight for the return game between the Belleville and Lindsay junior hockey teams. The train will pass through Peterborough between 6.15 and 6.30 and an opportunity will be afforded any Peterborough enthusiasts to attend the game at $1 for return trip.

• • • •

Possibly in no town or city of the population of Peterborough can there be found as many enthusiasts over hockey as right here in Canada's leading industrial center. The lovers of the battle between the clocks on the ice in this city, will see the the fastest amateur hockey team in the United States here on Friday, Feb. 22nd. The secretary of the local club has received a wire from the Crescents of New York, the champions of New York and Brooklyn asking for a game here on the date mentioned.

"WHISKY" COLD CURE

Danger of Using Alcoholic Mixtures of Coal Tar Tablets.

The most dangerous thing that one can do when affected with a cough or cold is to use a medicine that contains whisky or a tablet that is made of some coal tar product. Putting aside all moral objections to filling up with whisky or drugs because one has a cold, the injurious physical effect should be sufficient to keep one from using these strong medicines.

The most sensible as well as the only scientific way to treat a cough or cold is by inhaling medication that will kill the germs and give relief to the irritated mucous membrane in the nose, throat and lungs.

Among the few remedies that are used in this way, Hyomei stands preeminent. It is breathed through a neat pocket inhaler that comes with every outfit, and the first breath of its healing air relieves the irritation, and its continued use soon effects a thorough cure.

The best people in Peterborough always keep Hyomei at hand in the winter months, and at the first symptoms of a cold or bronchial trouble, use the remedy and prevent serious and lasting illness.

The complete Hyomei outfit costs but $1.00, extra bottles, if needed, 50 cents. We do not want anyone's money unless Hyomei gives relief and cure, and we absolutely agree that money will be refunded unless the remedy gives satisfaction.

All druggists should be able to supply you with Hyomei, or we will send it by mail on receipt of price, and every package is sold with the distinct understanding that it costs nothing unless it cures. Write us today for a symptom blank, which we will send you free, together with a treatise on Catarrh and how to cure it. When you fill in and return to us the symptom blank, our consulting physician will give your case the best care and attention, and write you a letter of advice without charge. Booth's Hyomei Company, Buffalo, N. Y.

CLYDE CANAL TO BENEFIT CANADA

Development of the Pacific and Adriatic to Mark This Century.

EARL GREY'S NEW PROJECT

Starts a Public Trust in Middlesex to Discourage Use of Alcoholics.

London, Feb. 15. — Vice-Admiral Sir Charles Campbell said the Firth of Clyde Canal will be of enormous benefit to the commerce of Canada.

William Sims and Emily Russell, charged with attempted pickpocketing, asked to be allowed to go to Canada. They are awaiting letters from the Dominion. The woman got three months; the man was remanded.

A petition against the Canadian Railway Finance Company was adjourned in order that a scheme of reconstruction may be attempted.

Influential representation is again being made to Sir Wilfrid Laurier on behalf of the Chignecto Railway for compensation.

Lecturing at the London Chamber of Commerce, Sir A. Rollitt expressed the belief that the two great commercial events of the twentieth century will be the development of the Pacific and the regeneration of the Adriatic.

EARL GREY'S SCHEME.

It has transpired that the licensing application on behalf of the Middlesex Public Trust Company has Earl Grey at the head of the movement. It is explained that the manager is to be paid by commission on all food and mineral drinks sold, so as to encourage of non-alcoholic side of the business.

At Rome, Cascini declared that the birth rate in many districts did not equal the emigration losses. The question of emigration must claim the urgent attention of the Government, he said.

FREE TRIPS TO CANADA.

W. Ledroy, proprietor of the Canada, will for the next seven weeks, give a cash prize and free passages to Canada to the seven readers who answer most correctly, three questions given each week. The Canada is the first newspaper in Great Britain to offer such prizes.

T. A. S. 17th March Concert

St. Peter's T.A.S. will hold their annual 17th of March concert on Monday, March 18th. The committee is composed of the following gentlemen:—Messrs. L. Bolin, J. Hanrahan, Jas. Hickey, Fred Denocher, James O'Brien, and E. Doherty.

Burned Two Towns

Manila, Feb. 15.—Pulajanes attacked and burned two towns in the Province of Occidental Negros yesterday and killed six members of the constabulary. Two American teachers, W. J. Busselter and Walter J. L. Lea, are reported to be missing. No cause is known for the uprising. Raids were made within a radius of ten miles, and schools were first attacked and burned in both instances.

The Province of Occidental Negros has been free from disturbances for four years. It is believed that the raiders were mountaineers venting their hereditary enmity against the coast towns.

Brother and Sister Freeze Near Port Hope

Aged Couple Were Without Fuel and Froze to Death—Cattle and Dog Starving.

Port Hope, Feb. 15.—Kate and James McMullen, brother and sister each about 60 years of age, were found on Tuesday night, frozen to death in their house, situated a mile south-east of Garden Hill Station.

No smoke having been seen for some days, neighbors went to investigate. The woman was found dead in a bed on the floor beside the kitchen stove. The man, fully dressed, was also found lying dead on the kitchen floor. A cat, also dead, lay in the woman's bed. A living dog was asleep in the room. Shavings were in the kitchen stove. There was no fuel in the house.

Cattle and horses, in a half-starved condition, were found in the stable. Dr. McKinley, the coroner, was summoned from Port Hope, but there will be no inquest.

Will Rosebery Leave His Party?

Irish Secretary's Home Rule Speech Much Discussed.

London, Feb. 15.—The first business day of the present session of Parliament has given evidence of important legislative matters in hand, and the promise of vigorous political fighting. Augustine Birrell's maiden speech as Chief Secretary for Ireland highly pleased the Nationalists, and supplies the text for strong attacks by Opposition newspapers. Mr. Birrell has frankly avowed himself a Home Ruler, and confessed that the Government's devolution bills would be a stepping-stone to Home Rule.

The Daily Telegraph, in an editorial article yesterday morning, says that truth, like murder, will out, and Mr. Birrell, with child-like simplicity, has disclosed the real Irish policy of the Government. His magic wand has awakened Home Rule from its slumber; the surrender is complete, and Mr. Redmond has no ask for nothing more.

In the lobby of the House of Commons last night, Mr. Birrell's speech was the subject of much gossip, and there was curiosity as to what attitude Lord Rosebery and other prominent anti-Home Rule Liberals would take on it.

Another matter of importance is the statement made by Herbert H. Asquith, Chancellor of the Exchequer, concerning old-age pensions. This is regarded as meaning that the Government intends to propose some practical scheme, and that Mr. Asquith meditates "earmarking" a portion of the expected large surplus in the next budget as a nucleus for a pension fund.

A LEGISLATIVE COUNCIL.

London, Feb. 15.—The first official information of the lines on which the Irish bill will be framed was contained in yesterday's parliamentary papers, in which appear a notice by Augustin Birrell, Chief Secretary for Ireland, of the intention of the Government to introduce at an early date a bill to provide "an Irish Council and for other purposes connected therewith." This seems to confirm the forecasts to the effect that Ireland will be given a Legislative Council similar to that of the Crown colonies, partly elected and partly nominated.

The Press Indicted

Lebanon, Ky., Feb. 15.—The county grand jury last night returned indictments against the Cincinnati Enquirer, Louisville Herald, Louisville Times, and Evening Post, for printing and circulating in this county the "offensive and indecent" proceedings of the Thaw trial.

Naval Experts Say U.S. Must Plan for Trouble With Japan

Would Abandon Philipine Islands by Having Warships Run From There, and Recapture Them From the Japs Later.

Washington, February 14.—The Japanese situation is discussed at the Capitol almost solely with reference to Mayor Schmitz, of San Francisco, and the politics in his announcement that he will yield to the President on the school question for the sake of international amity and coolie exclusion.

But at the navy department there were evidences that its officers will not be outdone. The general board is ready with a plan for the defence of the Pacific. In brief, it is that at the firing of the first gun our fleet ships at Manila will lift anchor and plough eastward under full steam, leaving the Philippines for the time being at the mercy of Japanese invaders.

A principal feature of the plans calls for the immediate, though temporary, abandonment of the Philippine Islands. Naval officers agree that Japan's first move would be the seizure of the Philippines, and that until the Japanese navy had been beaten on the high seas we could not hope to hold the islands.

With the first over act, Admiral Bronson's fleet of four vessels, the armored cruisers West Virginia, Colorado, Pennsylvania and Maryland, would be ordered from Manila. They are thoroughly modern vessels, capable of a high, sustained speed, and could get away from any of Japan's battleships, the only Japanese vessels that could do them any damage.

The general board concedes the necessity for Admiral Bronson to "run away," in order to fight another day.

The retention of Hawaii and the utilization of Honolulu as a base of supplies and coaling station for our Pacific fleet is a part of the war plan. Details, of course, are guarded with great secrecy.

A "counting of noses," as one officer expressed it, is now going on in the navy department. Officers are being listed as to availability. Stores are being overhauled, and all the necessary steps taken to place the United States in a condition of thorough preparedness. This, of course, does not mean that the administration expects war.

The plan of campaign of war with Japan has not only been worked out by the general board, and submitted to the President, but a large number of officers of the navy are thoroughly familiar with it. The course of study last year at the naval war college at Newport, R. I., consisted of work on this same plan.

Navy officers say the United States can muster twice as many battleships as Japan, and many privately express the opinion that the United States had better have war with Japan now, when she is weakened from her struggle with Russia.

While this information is allowed to leak out from the navy department, navy officers are renewing thier efforts to get the navy personnel bill enacted into law. The President's aide, Capt. Key, spends nearly every afternoon in the Capitol corridors working for the bill.

It's possible coffee hurts you.

Says That Crew Acted in a Cowardly Way

But Captain Gives an Explanation---Blowing Up of Steamer Likely to Lengthen List of Identified Dead.

Providence, R.I., Feb. 15.—A new element was injected into the horror attending the loss of the steamer Larchmont in Block Island sound Monday night through a collision with the coal-laden schooner Harry Knowlton, when Captain McVey of the steamer yesterday admitted that his life boat was "one of the first, if not the first to leave the sinking ship."

This statement was made in reply to charges by Fred Hiergsell, an 18-year-old lad of Brooklyn, one of the survivors. Hiergsell alleged that the passengers were left to shift for themselves, that the ship's crew crowded the boats without attempting to provide for the passengers, and that Capt. McVey was the first to desert the ship.

20 PER CENT. OF CREW SAVED.

The statement of young Hiergsell created a sensation in view of the fact that 10 of the 19 survivors were employes on the ship, or in other words that while approximately 50 per cent. of the vessel's crew was saved only eight per cent. of the passengers survived.

CAPTAIN'S EXPLANATION.

Capt. McVey explained that, while his boat may have been the first in the water, it was because he had a good crew and despite the fact that he was among the first off the deck he remained by his ship until she went down. He said that he had made no move to get into the boat until he had given orders to his men to lower all the boats and clear away the rafts.

While his boat was in the water it was fastened to the ship by a rope in the running gear that had become caught and this was cut by Boatswain Andrew Tobeson who saw that, with the ship settling rapidly, the boat and its occupants would be caught in the whirlpool and sucked beneath the surface.

GALE PREVENTED RESCUE.

The captain's boat was on the windward side and he said he called to the passengers to jump into his boat which would hold about 22 persons in all, but the electric lights had been extinguished in the collision and in the darkness and confusion no one heeded his summons. Everybody was on the leeward side of the ship and he ordered his men to row around there, he says, but the gale balked this plan and as the boat was driven away from the steamer his men had to give up their task and crouch down in the bottom of the boat to escape the piercing wind.

KNOWN DEAD NUMBER 138.

Yesterday morning the number of known dead in the frightful calamity stood at 138. At least 157 persons were known to be on the steamer and there is every indication that the number was nearer 200. Seventy-one bodies had been recovered up to eight o'clock and 49 of these lie in the morgue here awaiting identification. The stream of anxious relatives and friends that passed through the chamber of death to seek some missing loved one did not cease until after midnight this morning.

WORK OF IDENTIFICATION.

The work of identification proceeded more rapidly than when the corpses lay in their caskets of ice on Block Island, from which place they were brought yesterday afternoon by the steamer Kentucky, and when the doors of the morgue closed, the list of identified dead numbered 38. A number of persons were early on hand to file once more through the lines of the dead and every train brought more persons on the mournful quest.

LIFE GUARDS OBTAIN REST.

Block Island yesterday was given a chance to rest from the high tension of tragedy of the past two days. Life guards patrolled the coast as usual but the sea cast up no more of its dead. For the first time in 40 hours they obtained some physical relief and rest. The weather had moderated rapidly and this morning calm, clear and mild.

RECOVERING BODIES.

Passing ships may pick up bodies and at other shore points along the Sound a few corpses may be cast up, but the life-savers here do not anticipate that the list of recognized bodies will be much lengthened until the hull of the Larchmont is blown up, for it is known that many passengers and some of the crew perished below decks.

56 Women Who Welcome Prison

Suffragettes Decline to Pay Fines—General French Has No Sympathy for Sister.

London, Feb. 15.—The Tribune and other papers complain that the police were needlessly brutal in dispersing the women suffragists yesterday. It is asserted that over 500 police were employed to restrain the women, that many innocent persons suffered by the charges of the mounted men, and that the suffragists themselves were badly mauled.

Among the women arrested are Mrs. Despard, a sister of General French, who had been the incapturd heroine of many previous demonstrations, and who led in the agitation of yesterday, and two Miss Parkhursts, who also were prominent in the scuffling, and who were arrested during the second attack upon the police, which was fully as violent as the first.

In an interview, General French said he was sorry to hear his sister had been roughly handled. "We tried to dissuade her from mixing in this business, but if she will join this foolish agitation, she must expect to suffer. It is my own opinion that the police have been far too lenient with the women."

Fifty-six women suffragists, arrested yesterday for disorderly conduct and resisting the police, when they attempted to force their way into the House of Commons, elected to go to prison rather than pay fines assessed against them.

The Thaw Trial Has Been Postponed

New York, Feb. 15.—Owing to the death of the wife of one of the jurors, the trial of Harry K. Thaw was yesterday afternoon postponed until Monday morning.

The dead woman is Mrs. Joseph D. Bolton, the wife of Juror No. 11. Mrs. Bolton had been ill for several days with double pneumonia. Her husband, who had been locked up with the eleven other jurors for more than three weeks, was allowed to visit his home twice Wednesday and again yesterday.

Mr. Bolton was in his place when court convened yesterday, but before the session had lasted 15 minutes a summons came for him to go to his home in the Bronx. He arrived just before his wife died.

U. S. Army Bill Passed.

Washington, February 14.—The Senate yesterday passed the Army Appropriation Bill, carrying $83,600,000. The amendment to permit the Government to accept reduced rates on army supplies and to permit officers and enlisted men to accept reduced transportation was defeated on a point of order by Senator McCumber, after the day had been spent in its discussion.

Lost His Way

Winnipeg, Feb. 13.—W. Beach, Hudson's Bay officer at Port Churchill, arrived in the city last night after a terrible overland trip from the bay, occupying 39 days. He brings the first intelligence of the sad death of Dr. Flood, a surgeon in the Northwest Mounted Police detachment at Fort Churchill, under command of Colonel Moodie. Dr. Flood was frozen to death about 12 miles from the fort on November 30 last. He was a young man who had only arrived shortly before that time on the Adventure and lost his way while out hunting. Mr. Beach was one of the search party which found the body, and brings the official intelligence for the Government.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

Stop That Headache!

Foolish to Suffer When a Simple Remedy Will Prevent and Cure.

Ever stop to think what caused your headaches?

Promptly not. Then look to the bowels and stomach, and you'll find plenty of cause. Chances are you'll find constipation, liver is sluggish, stomach overburdened with half-digested food.

No wonder you are dull, tired, restless day and night.

You need the cleansing influence of Dr. Hamilton's Pills which cure your condition in short order.

Being composed of natural vegetable remedies Dr. Hamilton's Pills possess great power, yet they are harmless. They aid all organs connected with the stomach, liver and bowels. In consequence food is properly digested, the blood is pure and nourishing, the body is kept strong and resists disease.

Headaches never come to those who use Dr. Hamilton's Pills, and this fact is vouched for by the Assistant Manager of the Poultry Success Magazine, of Springfield, O., Mr. J. B. Callender, who writes: "No better medicine than Dr. Hamilton's Pills. We use them regularly and know of marvelous cures that resisted everything else. They cleanse the whole system, act as a tonic on the blood, enliven digestion, help the stomach, and make you feel strong and well. For headaches, indigestion, and stomach disorders I am confident that the one prescription is Dr. Hamilton's Pills.

You can rely on Dr. Hamilton's Pills with implicit confidence; their effect is wonderful. Sold by all dealers. Price 25c. per box, five boxes for $1.00, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U.S.A.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 15, 1907

AMERICA'S FORCES AND JAPAN'S

Talk of the remotest possibility of war with a formidable power naturally brings up the question of armaments. There is nothing so interesting as the balance of military force, on land and sea. It is so now with Japan.

Few believe that there is really any chance of war with the nation which beat Russia in every important action on sea and land, but every one wants to know what the outcome would be if a test of strength should come. There is a general awakening of interest in the army and navy of the Mikado's Empire and in comparisons between Japan and the American Republic.

The first and most vital test would come on the sea. There the balance is heavily on the side of the United States. That country has eighteen first-class battleships built and nine building. It has twelve battleships of the second class completed. There are eight armored cruisers built and four in process of construction.

Against these fighting ships Japan is able to oppose eleven first-class battleships built and two monsters building. There are three battleships of the second class completed. The armored cruisers in service number nine, with four under way.

Other vessels count comparatively little except, perhaps, torpedo craft. In torpedo boat destroyers and torpedo boats of smaller size Japan is ahead of the United States. In submarines the two countries are about even. As to the personnel of the American and Japanese navies there is little difference. This country leads by about 2,000 men—32,000 to 30,000.

In any comparison of naval power it must be remembered, of course, that the Japanese navy is all in one place. It is at home. The United States must necessarily divide its forces between two oceans. The navy is expected to guard the Philippines, 7,000 miles from the Pacific coast.

That fact, of the utmost strategic importance, goes far towards offsetting the difference in favor of the United States in total tonnage. The figures stand 525,970 tons—or did last November, by the official calculations of the United States Navy Department—against 343,141 tons of Japan.

On the land the power is all Japan's, as far as trained and ready professional soldiers go. The active army and reserves of the Japanese Empire number about 353,000 men, with 401,000 more in the first reserve. On a war footing the Mikado's Government can put 1,165,000 trained soldiers in the field, with 2,900 guns and 45,000 horses. There were about 1,100,000 actually under arms when the Russian war ended.

The United States has about 65,000 men in the regular army. It can be filled out easily to 100,000. Back of the regulars are 107,000 national guardsmen. That is the end of the story as far as drilled and disciplined soldiers go. In raw material for making armies the United States can beat Japan, of course. But it would take a long time to develop such untrained men into soldiers fit to face the Japanese.

A Mystery Solved

Essen, Germany, Feb. 13. — The mystery of the murder of Miss Madeleine Lake, daughter of a British army officer, whose mutilated body was found at Busk, October 1 last, in the City Park, has been solved. Edward Land, 20 years old, surrendered himself at the police station here Saturday charging himself with being the murderer of Miss Lake. He informed the police that he formerly was an employe of the Rhine-Westphalian Coal Syndicate and fled to Liege, Belgium, after the murder. His conscience tormenting him and being without money he returned to Essen determined to confess and take the punishment for his crime.

A CRUEL ENDING

The Lonely Death and Desecrated Grave of Laurence Sterne.

Laurence Sterne, the great writer, was left alone in his rooms on Bond street, London, in those last bitter days, with a servant of the lodging house for his only attendant. As he lay dying a knock was heard at the door and a footman entered, come from a house near by to inquire as to his health.

The footman waited till the end, saw the thin arm raised as if to ward off a blow and heard the almost inarticulate murmur from white lips, "Now it is come!"

Then he went back to the house, where a large party was gathered, and told the news to the feasters, most of whom were Sterne's friends. For the space of half an hour they lamented him, and then the talk turned on other things—so soon are we forgotten in this workaday world.

"Alas, poor Yorick!" His publisher and a single friend followed him to the tomb, while ghouls watched outside and marked the spot where he was laid. Two nights afterward the body was stolen, shipped to Cambridge and placed, strangely enough, upon the dissecting table at his own university. A friend recognized his features and fainted away when it was too late to stop the desecration.—Myrtle Reed in Book News Monthly.

The Typewriter.

Although he was not the first to devise a machine for typewriting, John Pratt won the distinction of inventing the first working typewriter that secured a sale. He was born in Unionville, S. C., on April 14, 1831, and in 1864, with his wife, he went to England, Pratt devoting his time to the invention of a mechanism which he designated the "pterotype," the first practical typewriter. Provisional protection to the invention was granted by the British government in February, 1864, and on Dec. 1, 1866, letters patent No. 3168 were granted to Pratt. On returning to the United States, in 1868, he secured letters patent in this country. Mr. Pratt was the first inventor of a machine in which a type wheel was moved by key levers, and he was the first man to make and sell typewriters, having sold several in London in 1867.

Mexican Musicians.

We were listening to the playing of a military band the other night when my friend said: "Do you know that, although I have heard just about all of the best orchestras and bands in this country at different times, I have not discovered a single one that can hold a candle to Mexican musicians? Those fellows are something wonderful, all full of music, and, although half of them cannot read the language of their country, they read the music and get notes from their instruments that would really astonish you."—Columbus Dispatch.

A Little Sarcastic.

An old woman went into a grocer's and ordered a pennyworth of carrots. After being served she inquired, "D'ye not thraw something in wi' them?" "Oh, yis," replied the greengrocer; "if ye wait a minute I'll thraw in a sack o' tatties an' a barrel o' apples an' a hundredweight o' turnips an' a box o' oranges! An'," he shouted as the old woman flounced out of the shop, "when I'm busy I'll thraw in the horse an' cairt! If yor not satisfied then, come back for the shop!"—London Mail.

A Half Length Picture.

A countryman bargained with a California photographer for a half length picture of himself at half price, and when the artist delivered a fine view of the subject from the waistband down the victimised sitter indulged in remarks more forcible than polite.—Philadelphia Inquirer.

All Wrong.

New Curate—Your husband is a confirmed invalid, is he not? Mrs F— yes—Confirmed, sir? No, sir; he is a Church of England. New Curate—I mean, is he a permanent invalid? Mrs Billyns—Permanent? I—I—I don't know; he says he can't last a month.

Weak Women

To weak and ailing women, there is at least one way to help. But with that way, two treatments must be combined. One is local, one is constitutional, but both are important, both essential.

Dr. Shoop's Night Cure is the Local.

Dr. Shoop's Restorative, the Constitutional.

The former—Dr. Shoop's Night Cure—is a topical mucous membrane suppository remedy, while Dr. Shoop's Restorative is wholly an internal treatment. The Restorative reaches throughout the entire system, seeking the repair of all nerve, all tissue, and all blood ailments.

The "Night Cure", as its name implies, does its work while you sleep. It soothes sore and inflamed mucous surfaces, heals local weaknesses and discharges, while the Restorative, eases nervous excitement, gives renewed vigor and ambition, builds up wasted tissues, bringing about renewed strength, vigor, and energy. Take Dr. Shoop's Restorative—Tablets or Liquid—as a general tonic to the system. For positive local help, use as well

Dr. Shoop's Night Cure

F. D. TULLY.

Throat Coughs

Ask your doctor about these throat coughs. He will tell you how deceptive they are. A tickling in the throat often means serious trouble ahead. Better explain your case carefully to your doctor, and ask him about your taking Ayer's Cherry Pectoral. Then do as he says. Get the best medicine, always.

We have no secrets! We publish the formulas of all our preparations.

J. C. Ayer Co., Lowell, Mass.

PERILS OF BALLOONING.

An Exciting Trip In the Midst of a Wild Thunderstorm.

On one occasion, rising suddenly through a stratum of clouds 10,000 feet in the air into brilliant sunshine, the gas dilated. I let out a little. Down we dropped into a cold air current. The immediate condensation of the gas dropped us back into the cloud layer, which condensed the gas still more and accelerated the drop. We came out directly above a stretch of woods over which lay another cool belt. By this time we were falling like a rock. We were going so fast that the bagfuls of sand we threw out went up instead of down. Hastily we threw out the drag rope, the anchor, the lunch basket—to little purpose. We struck the trees with a terrific crash, but escaped, however, with nothing worse than a shaking up and a few bruises.

The most exciting trip I ever made was a record breaking voyage that began one Sunday evening. The weather was not propitious, but we cast off. We sailed across the Hudson river to New Jersey and plunged into a cloud. After traveling twenty miles I descended to drop a note to my wife, assuring her of our safety. Again we shot into a cloud. Presently we drifted over a village and, with that exaltation that accompanies the sensation of floating in the air, enjoyed to a strange degree the music of church bells drifting up from below. Before we were aware we plunged into the midst of a huge approaching thunder cloud. It seemed to open and swallow us into a pit of gloom and simultaneously into the heart of the wildest thunderstorm I think I have ever seen. The clouds rolled and tossed and twisted. The balloon would now be forced down, then tossed up and again spun swiftly about like a top. We lost all sense of direction. Thunder was crashing and rolling and cracking all around us. Lightning flashed, not in forked zigzags, but in great flashes of fire. It was frightful. We did not want to descend, but presently we heard the unmistakable sound of water not far away. Letting out a little gas, we shot downward. Faster we dropped and faster. Land was below us. The problem was to land in the high wind without damage. I let out more gas. We landed in a treetop with a jar that fixed the basket so firmly in a crotch that it could not be dislodged by the wind, for now we had dropped below the storm.

POINTED PARAGRAPHS.

Carelessness is the great sin of most people.

If a man doesn't acquire a little sense with age he cheats himself.

If a man owns a pocketknife it is hard for him to pass a grindstone.

Say what you please about moral courage, the man who has a lot of it is mighty unpopular.

Make the stories you tell on a rainy day as short as possible, especially if you tell them under an umbrella.

There is very little use trying to convince a man who meets your statement with this argument: "I'll bet you," etc.

No matter how highly you may value your own opinion, remember it does not go with other people unless they think exactly as you do, which, by the way, they seldom do.

Chinese Hotels.

The hotels are usually grouped within a square or two of one another. Each one seeks to attract guests by high sounding titles. For example, in Canton are hotels which flaunt the signs of the Fortunate Star, the Golden Profits (an unusually frank confession for a landlord to make), the Hank Conferring and the Happiness. The food is not so bad, but the traveler who goes to one of these houses to sleep will wish that he had gone to another. The bedrooms are small, thin walled boxes in which you may hear the breathing of your next neighbor or be kept awake half the night by the conversation of people at the other end of the hall or, worse still, be almost stifled by the smoke from an opium pipe which is being indulged in by the man across the passageway.

Naturally Puzzled.

Among the interested visitors of the marine barracks at Washington on one occasion there was a party of young girls from a Maryland town, friends of one of the officers of the barracks. They proved much interested in everything pertaining to the life and discipline of the post.

"What do you mean by 'taps?'" asked one young woman.

"Taps are played every night on the bugle," answered the officer. "It means 'lights out.' They play it over the bodies of dead soldiers."

A puzzled look came to the face of the questioner. Then she asked:

"What do you do if you haven't a dead soldier?"

Hell Gate.

Hell Gate, at the entrance of Long Island sound, in the East river, was not so named because of its dangers and turbulance, as is generally supposed, but quite the contrary. The early Dutch settlers called it "Hell Gate" because it was a pleasant, beautiful passageway, in allusion to its picturesque scenery, "hell" conveying the idea of pleasantness.

In His Own Coin.

To mark his gratitude a man who was acquitted on a charge of counterfeiting coins in India added $10 to his lawyer's fee of $50, but the lawyer afterward found that the whole sum consisted of counterfeit rupees.—Allahabad Pioneer.

AN OPEN LETTER

From Mr. W. J. Gage, Chairman Executive Committee National Sanitarium Association.

The Trustees carry on this work, having faith in a generous response to their appeals for necessary funds.

NO FATHER, NO MOTHER, NO HOME, WORSE THAN A PRISONER.

GARFIELD BRACEY, BERLIN, ONT.:—Enclosed please find doctor's certificate and examination papers. Hope you will secure me a place in your Sanatorium. You will notice my circumstances is a hard one: no father, no mother, no home—worse than a prisoner. Nobody wants me on account of my disease. Hoping you will have the charity and consider my position and give me a position at once in your Sanatorium, I ever pray.

AN ORPHAN, WITHOUT HOME OR MEANS.

DR. A. E. HANNA, PERTH:—I have a patient here, a young fellow in whom I am greatly interested. He has tuberculosis. He is a poor young fellow, an orphan, out of home, without any means. If we sent him up would you take him in and do the best you can for him? I know how difficult it is to accommodate all who require treatment, but this is a special case.

"I shall pass through this world but once. Any good thing, therefore, that I can do, or any kindness that I can show to any human being, let me do it now. Let me not defer it or neglect it, for I shall not pass this way again."

TORONTO, CAN., 1907.

DEAR FRIEND,—Out of the several hundred letters received, I reprint on this sheet two that suggest the urgent need and the work of the Muskoka Free Hospital for Consumptives.

The pity of it all is that no letter, or letters, can be written, telling the full story of those who are seeking help.

Because of the contagious nature of the disease, the lot of these poor sufferers has become an increasingly sad and difficult one. To tell the plain truth, relatives and friends often shrink from caring for their afflicted ones through dread of this disease.

The doors of every hospital in Toronto are closed to the consumptive, and this is generally the case elsewhere.

In Canada—the most prosperous country in the world—a country justly proud of its Christian and benevolent institutions—what shall be done?

The doors of the Muskoka Free Hospital for Consumptives stand wide open for these poor sufferers.

All that is now needed to care for double the number of patients in residence, is money. During the past year much has been done to prepare for the extension of the work. A new water supply and sewage system have been installed.

As soon as the work is fully known, all the money needed will be forthcoming. Sir Thomas Barlow, the King's physician, after a visit to the Free Hospital this summer, sent his cheque for five pounds, in appreciative recognition of the work. The Misses Dow of Montreal this month send their cheque for six hundred dollars. All classes and creeds help.

The widow's mite and the rich man's gifts, all come to encourage the trustees to carry on and extend this great national charity.

$50,000 is needed. Will you share in the privilege of helping?

Yours sincerely,

W. J. Gage

COMING

Monday, Feb. 25th

ORIENTAL HOTEL, PETERBORO

TO IMPROVE YOUR APPEARANCE

Retain your youthful freshness so that no one can remark, "she is past her prime." To appear younger and more attractive than the average woman, you must be particular that your Hair shows no sign of being thin, short or scraggy. A DORENWEND TRANSFORMATION, POMPADOUR, WAVE, CURL or SWITCH will substitute nature's defects. Even if you have plenty of your own hair, these light and airy artifices may be worn over it, saving you the worry of arranging your hair in the prevailing style. Your hair can be perfectly matched in color and texture, so that detection is out of the question.

Now, if you have in your mind any prejudice regarding artificial hair, it will forever be dispelled after making an unbiased and discerning examination of our productions will prove in your case.

CONSULT PROFESSOR DORENWEND

DURING THIS VISIT

Advice regarding your hair and how you can make the most of it, also a personal demonstration of the newest styles in transformations, will be given the same as at our establishment in Toronto. Bear in mind that our styles are originated and designed by Professor Dorenwend, and they cannot be procured from any other makers. Their equal have yet to be produced.

MAN TO MAN—ABOUT BALDNESS

If you are bald, or partially so, you must realize that it makes you look old. Notwithstanding the desire to have back your one time bushy head of hair, you hesitate before wearing a natural hair covering simply because you imagine it is going to be noticed by others. Now you never made a greater mistake. Thousands of men, who thought the same as you do, are to-day wearing a

DORENWEND PATENT TOUPEE

and instead of carrying the handicap, that baldness proved to them, they are now enjoying the advantage of "looking young"—and that is what counts to-day in business and social life. Our Patent Toupee is a featherweight fac-simile of your own natural hair and may be worn without fear of detection—impossible to remove from the head unless at will—nor the least clumsy or uncomfortable. They act as a protection, preventing colds and catarrh, so common to bald men.

Now do not neglect this opportunity—come and see for yourself. A few minutes' demonstration will convince you that a Dorenwend Patent Toupee is not like the clumsy, wiggy affair that are claimed to be "just as natural."

The Dorenwend Co. of Toronto, Limited, 103 and 105 Yonge Street

REMEMBER PLACE, DAY AND DATE

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 200 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 3 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 24 to 130 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 39 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

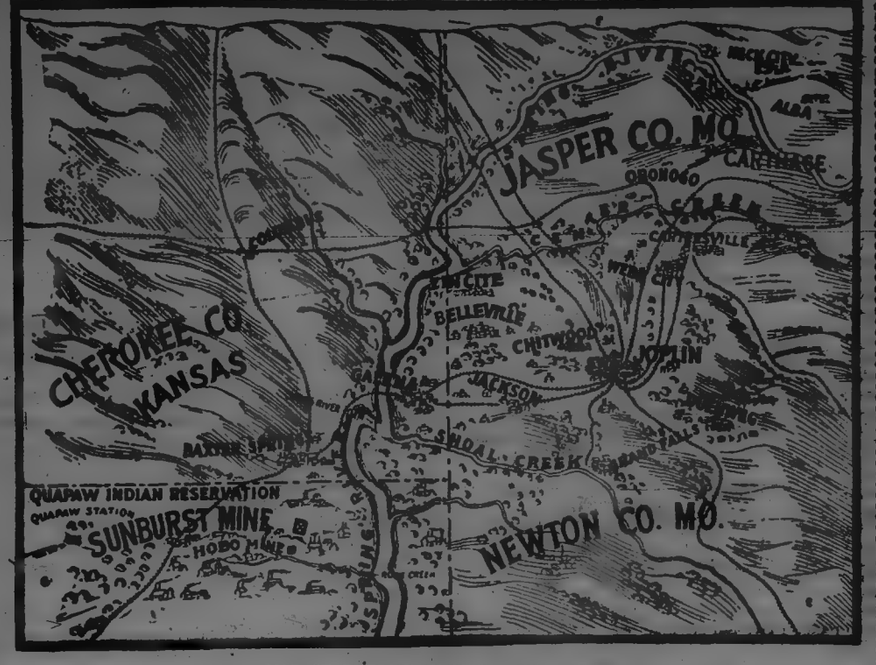
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run in to and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magarita, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 195 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and in into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.



MAP OF DISTRICT SHOWING SUNBURST MINE.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $21.12 per ton for lead and $26.61 for zinc to $32.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 30 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 467,160.00
A. W. Taylor	160	169,768.00
J. W. Aylor	40	576,571.00
The Burgner Mining Co.	80	190,579.00
Center Creek Mining Co. (production to date)	200	6,062,194.00
Mrs. E. J. Chinn	170	235,399.00
Majestic Consolidated Zinc & Lead Co.	52	231,460.00
Continental Zinc Co. (production to date)	200	1,573,000.00
Consolidated Troup Mining Co.	40	193,613.00
Daughtery-Davy-McMillan Estate	80	454,006.00
The Empire Zinc Co.	411	128,319.00
Fox Heirs	80	120,324.00
Granby Mining & Smelting Co., 1905		1,261,561.00
Granby Mining & Smelting Co., 1904		1,025,650.00
John G. Guinn	640	82,857.00
Pittsburg-Joplin Lead & Zinc Co.	10	98,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	412,304.00
United Zinc Co.	186	200,270.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

SHAFT NO. THREE.

BIRD'S-EYE VIEW OF PROPERTY.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

OFFICERS.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 80 feet in diameter. The shaft of the Hobo Mine was sunk within 3 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 57 feet depth, and the shaft is still in the ore at 76 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No. 1 shaft, 5 1-2 by 9 feet, is down 98 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 9 1-2 by 90 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 70 feet, then west 60 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 70-foot face of ore.

Shaft No. 3, 5 1-2 by 9 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oronogo Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	25 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	35 per cent.	Dinger Mining Co.	120 per cent.
B. & H Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 2, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 240 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ores produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering declines to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Fakirs.

Fakirs is the name given to a celebrated class of fanatics found in many parts of the east, but more particularly in India. Some of them will make a vow to continue all their lives in one posture and adhere to it strictly. Others never lie down, but remain in a standing position all their lives, upheld only by sticks or ropes under the armpits. They pretend to have subdued every passion of mortality.

Cipher Price Marks.

"The cipher price mark, the tag not marked '1.75,' but 'P17CDG,' is getting to be a thing of the past," said a jeweler. "The public mistrusts it. There is nothing that wins the confidence of the public like a price mark in big, plain figures. Most cipher price marks are easily read. They have for their key, as a rule, the sentence 'I push trade.' The 'I' is 1, the 'p' 2, the 'u' 3, and so on down to the 'e,' which stands for 0. Thus '$2.75' in cipher would be 'Sp r. b.' Ciphers are useful for firms that give long credit, for such firms must naturally ask more from a six months' customer than a spot cash one. But they are very unpopular things. They arouse universal mistrust."—New Orleans Times-Democrat.

Comforts in Hotels.

One of New York city's newest hotels offers its patrons a number of attractive little touches which make it very different from the bare hostelry of other days. Each room has a closet in which are found hangers for coats, skirts and trousers. Each dressing table has a pincushion, tray and powder box. Each room has a desk already provided with ink, pens, stationery and blotters. The tables have spreads, and the chairs have tidies. Surely the modern hotel keeper knows all the secrets of the house comfortable.—New York Press.

France's Battle Line.

In case of war with Germany the matter would be decided along the line of the Vosges. Throwing into the sea 200,000,000 francs every year under the pretext of protecting Nancy, Lille and Paris is serving the interests of MM. Schneider and consorts. It is no less going against those of France and the republic.—Paris Action.

Barbarous Paris Water.

We are far from blaming the prefecture of the Seine for warning us that it is dangerous to drink the water that it supplies us without boiling it. The system, in spite of the millions wasted, is absolutely barbarous. When it does not rain we have no water, and when it does rain the water is not drinkable. —Paris Eclair.

Burning Meteors.

It is supposed that meteors begin to burn when they are within about 125 miles of the earth and that combustion is completed and they disappear at from thirty-five to fifty miles above the earth. When we see a falling star, therefore, we may consider that we have watched it through a flight of about a hundred miles before it finally burns out and disappears from view.

A MYSTERIOUS CARD.

Mark Twain's Odd Request and How Mrs. Cleveland Received It.

When I was leaving Hartford for Washington upon one occasion my wife said: "I have written a small warning and put it in a pocket of your dress vest. When you are dressing to go to the authors' reception at the White House you will naturally put your fingers in your vest pocket, according to your custom, and you will find that little note there. Read it carefully and do as it tells you. I cannot be with you, and so I relegate my sentry duties to this little note. If I should give you the warning by word of mouth now it would pass from your head and be forgotten in a few minutes."

It was President Cleveland's first term. I had never seen his wife, the young, the beautiful, the good hearted, the sympathetic, the fascinating. Sure enough, just as I had finished dressing to go to the White House, I found that little note, which I had long ago forgotten. It was a grave little note, a serious little note, like its writer, but it made me laugh. Livy's gentle gravities often produced that effect upon me where the expert humorist's best joke would have failed, for I do not laugh easily.

When we reached the White House and I was shaking hands with the president he started to say something, but I interrupted him and said:

"If your excellency will excuse me I will come back in a moment, but now I have a very important matter to attend to, and it must be attended to at once."

I turned to Mrs. Cleveland, the young, the beautiful, the fascinating, and gave her my card, on the back of which I had written "He didn't," and I asked her to sign her name below those words.

She said: "He didn't? He didn't what?"

"Oh," I said, "never mind! We cannot stop to discuss that now. This is urgent. Won't you please sign your name?" I handed her a fountain pen.

"Why," she said, "I cannot commit myself in that way. Who is it that didn't? And what is it that he didn't?"

"Oh," I said, "time is flying, flying, flying! Won't you take me out of my distress and sign your name to it? It's all right. I give you my word it's all right."

She looked nonplussed, but hesitatingly and mechanically she took the pen and said:

"I will sign it. I will take the risk. But you must tell me all about it right afterward, so that you can be arrested before you get out of the house in case there should be anything criminal about this."

Then she signed, and I handed her Mrs. Clemens' note, which was very brief, very simple and to the point. It said, "Don't wear your arctics in the White House." It made her shout, and at my request she summoned a messenger, and we sent that card at once to the mail on its way to Mrs. Clemens in Hartford.—Mark Twain's Autobiography in North American Review.

Water in Old London.

London's original water supply, says the Chicago Daily News, was the river Thames, and every apprentice was supplied with a water tankard for transporting liquid to the house. As early as 1479 there were "water thieves," "for in this yere a wex chandler in Fleet street had bi craft perced a pipe of the condit withynne the ground, and so conveied the water into his selar; wherefore he was jugid to ride thrugh the citee with a condit upon his hedde." The first official water supply for London was made in Germany. In 1582 Peter Maurice, a German, made an engine at London bridge by which water was conveyed in lead pipes to the citizens' houses, and he and his descendants became rich on the proceeds.

Christmas Island.

"I spent last Christmas on Christmas island," said a globe trotter. "In the morning I bathed in the sea and in the afternoon, dressed in white flannel, I played tennis. Christmas island is in the Indian ocean. It is always summer there. The thermometer never falls below 70 and never rises above 90 in the shade. There's always a cool, pure wind from the southeast. Fresh fruit and flowers and vegetables are as plentiful in January as in July. This little paradise is nine miles long and ten miles wide."

Treating the Insane.

In 1796 William Tuke, a Quaker, opened the first national asylum for the insane in York, England. A few years earlier a Frenchman named Pinel had made a similar effort to restore the mentally deficient to the rank of human beings. Pinel's plan was that of nonrestraint, a system then unheard of and, of course, to be ridiculed as a preposterous heresy. It is now being followed everywhere.

Her Plan.

He—Do you believe in long engagements? She—It all depends. He—I don't understand. She—If he has plenty of money and is inclined to be liberal a long engagement is the thing, but if he cannot afford boxes at the opera and such things I always make his regime very short.

Countering a Touch.

"Don't you think you're wasting your time talking the value of economy to Blank? He hasn't any money."

"I know, but I have."

There are stars so distant that a flying machine moving at the rate of 600 miles an hour would require 500,000,000 years to reach them.

If you are Constipated, dull, or bilious, or have a sallow lifeless complexion, try Lax-ets just once to see what they will do for you. Lax-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Lax-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

A PATRIOT'S PRAYER.

Though we must die, let me not die
In ignominious strife,
With fate invincible, and sigh
To linger out my life;
With powers decayed, enfeebled mind
And slowly slackening breath,
Burden of pity to my kind
And dead before my death.

No, let me perish, sword in hand,
At honor's sudden call,
Guarding my menaced motherland
And for her safety fall.
Or mount the scaffold with firm gaze,
Martyr to some great cause,
And end my not inglorious days
For freedom's outraged laws.

What is this life except a trust
For nobleness and right,
The torch which, while we may, we must
Still bear and keep alight;
And when, from our exhausted will
It flickers, hand it on,
That it may burn and beckon still,
Till time itself be gone.

But if, in unheroic days,
No great deed may be done,
Let me at least deserve this praise:
"He lived and died as one
Who looked on life with fearless eyes,
And with intrepid mind;
So leaves, where now he silent lies,
An honored name behind."
—Alfred Austin.

RENOVATING THE ABBEY.

Westminster Abbey Begins to Show Effects of Time's Hand.

Like others of England's historic cathedrals—Westminster and Exeter, for instance—Westminster Abbey has begun to show the effects of the hand of time, and the ravages of London's atmosphere.

Repairs upon the Abbey have now been begun, under the direction of the architects of the Ecclesiastical Commissioners, and for several years there will be work going on behind unsightly palisades and scaffolding, much to the disappointment of French and American visitors to London.

Motor omnibuses are held to be partly responsible for making repairs necessary, and residents in Dean's Yard, adjoining the Abbey, are outspoken in their complaints against the vibration which accompanies the motor omnibus traffic to Victoria. A new line has recently greatly augmented the number now passing the north front of the Abbey.

North Front Damaged.

It is to the north front that the greatest amount of damage has been done. Scaling of the stone has become general, and spread along the entire front, seriously affecting the effigies of several bishops and martyrs. A few days ago a large section of stone fell just after the passing of a motor omnibus.

A policeman on point duty near the Abbey front said that the jarring is plainly felt inside the Abbey. The Victoria bound motors are worst, he said, and the amount of vibration appears to depend upon the manner in which they take the curve into Victoria street.

The architects admit that in every case where appreciable portions of stone have fallen flaws have been discovered, due to the encroachments of time and weather.

$100,000 For Repairs.

Lack of means has delayed the work of renovation during recent years, but as there is now available some £20,000 a year, the north front is to be re-faced, practically in entirety.

The vibration is distinctly perceptible to worshippers.

How advisable it is to look to the repairs of our historic abbeys and cathedrals is well illustrated in the case of Exeter Cathedral, where the dean has just made the disquieting discovery that the south tower is resting on falling foundations. In the thirteenth century Bishop Quivil removed the fourth wall in order to throw the chapels at the base of the tower into the transepts—a fact which may have helped considerably to bring about the present condition of things. It is all the more serious in the case of Exeter, as the tower contains one of the heaviest peals of bells in the country.

Rothschilds Never Prosecute.

While the Bank of England makes it a point never under any circumstances to relinquish the prosecution or to refrain from the punishment of those who have defrauded it in the slightest degree, being willing, if need be, to spend thousands of pounds to capture and prosecute people who have robbed it of even a few shillings, the Rothschilds make it a rule never to appeal to the courts or to the police in such matters. Of course, they are, like every other banker, the victims of dishonesty, but neither the police nor the public ever hear about the matter. This has always been a principle of the heads of the house, who take the ground that it is better to bear the loss in silence than to disturb popular confidence in the safety of the concern by allowing it to be seen that its treasures are not adequately safeguarded.

Du Maurier Heroines.

When Mrs. Frances Hodgson Burnett was first presented to Du Maurier, who was, in point of fact, rather an undersized man, she exclaimed:

"Oh, I am so glad that you are not six feet tall!"

"But why?" asked Du Maurier.

"Because for these many months," replied Mrs. Burnett, who is considerably below the medium height, "you have simply denied us the right to live. You have made us feel that a woman who is not six feet tall has not the right to exist."

"Oh, that is only a trick of mine!" laughed Du Maurier. "I have started again and again to make my heroine a little woman, but before I know it she has somehow grown way beyond my own recognition."

TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns **FIVE MINING CLAIMS** containing **160 ACRES**, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 2-foot level, show. 153 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 600 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 22. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 20 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 80 acres of J. B. 22 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch nickelite, 18 inch smaltite together with cobaltite. Assays gave 672-1283-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c) par value One Dollar ($1.00) The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

COPYRIGHT, 1893, BY HARPER & BROTHERS

detail flashed out clear in that vivid light: his red quivering tongue, the lighter pink beneath it, the broad white teeth, the short brown beard cut into a peak and bristling forward.

But it was not the sudden flash; it was not the laughing, cruel face, which

Maurice!" she screamed. "Maurice! It is you?"

sent an ice cold shudder through Francoise de Montespan. It was that, of all on this earth, this was he whom she most dreaded and whom she had least thought to see.

"Maurice!" she screamed. "Maurice! It is you?"

"Yes, little wife, it is I. We are restored to each other's arms, you see, after this interval."

"Oh, Maurice, how you have frightened me! How could you be so cruel? Why would you not speak to me?"

"Because it was so sweet to sit in silence and to think that I really had you to myself after all these years, with none to come between. Ah, little wife, I have often longed for this hour."

"I have wronged you, Maurice; I have wronged you! Forgive me!"

"We do not forgive in our family, my darling Francoise."

"You may kill me if you will," she moaned.

"I will," said he simply.

Still the carriage flew along, jolting and staggering in the deeply rutted country roads. The storm had passed, but the growl of the thunder and the faroff glint of a lightning flash were to be heard and seen on the other side of the heavens.

"Where are you taking me?" she asked at last.

"To Portillac, my little wife."

"And why there? What would you do to me?"

"I would silence that little lying tongue forever. It shall deceive no more men."

"You would murder me? You have a stone for a heart."

"It is true. My other was given to a woman."

"Oh, my sins are indeed punished. Can I do nothing to atone?"

"I will see that you atone."

"You have a sword by your side, Maurice. Why do you not kill me, then, if you are so bitter against me? Why do you not pass it through my heart?"

"Rest assured that I would have done so had I not an excellent reason."

"Why, then?"

"I will tell you. At Portillac I have the right of the high justice, the middle and the low. I am seigneur there, and can try, condemn and execute. It is my lawful privilege. This pitiful king will not even know how to avenge you, for the right is mine and he cannot gainsay it without making an enemy of every seigneur in France."

He opened his mouth again and laughed at his own device, while she, shivering in every limb, turned away from his cruel face and glowing eyes and buried her face in her hands. Once more she prayed God to forgive her for her poor sinful life. So they whirled through the night behind the clattering horses, the husband and wife saying nothing, but with hatred and fear raging in their hearts, until a brazier fire shone down upon them from the angle of a keep and the shadow of the huge pile loomed vaguely up in front of them in the darkness. It was the castle of Portillac.

CHAPTER XV.

AND thus it was that Amory de Catinat and Amos Green saw from their dungeon window the midnight carriage which discharged its prisoner before their eyes; hence, too, came that ominous planking and that strange procession in the early morning. And thus it also happened that they found themselves looking down at Francoise de Montespan as she was led to her death, and that they heard that last piteous cry for aid at the instant when the heavy hand of the ruffian with the ax fell upon her shoulder and she was forced down upon her knees beside the block. She shrank screaming from the dreadful red stained, greasy billet of wood, but the butcher heaved up his weapon and the seigneur had taken a step forward with hand outstretched to seize the long auburn hair and to drag the dainty head down with it when suddenly he was struck motionless with astonishment and stood with his foot advanced and his hand still out, his mouth half open and his eyes fixed in front of him.

And, indeed, what he had seen was enough to fill any man with amazement. Out of the small square window which faced him a man had suddenly shot headforemost, pitching on to his outstretched hands and then bounding to his feet. Within a foot of his heels came the head of a second one, who fell more heavily than the first, and yet recovered himself as quickly. The one wore the blue coat and silver facings of the king's guard; the second had the dark coat and clean shaven face of a man of peace, but each carried a short rusty iron bar in his hand. Not a word did either of them say, but the soldier took two quick steps forward and struck at the headsman while he was still poising himself for a blow at the victim. There was a thud, with a crackle like a breaking egg, and the bar flew into pieces. The headsman gave a dreadful cry, dropped his ax, clapped his two hands to his head and, running zigzag across the scaffold, fell over, a dead man, into the courtyard beneath.

Quick as a flash De Catinat had caught up the ax and faced De Montespan.

"Now!" said he.

The seigneur had for the instant been too astounded to speak. Now he understood at least that these strangers had come between him and his prey.

"Seize these men!" he shrieked, turning to his followers.

"One moment!" cried De Catinat, with a voice and manner which commanded attention. "You see by my coat what I am. I am the body servant of the king. Who touches me touches him."

"On, you cowards!" roared De Montespan.

But the men at arms hesitated, for the fear of the king was as a great shadow which hung over all France. De Catinat saw their indecision.

"This woman," he cried, "is the king's own favorite, and if any harm come to a lock of her hair I tell you that there is not a living soul within this portalice who will not die a death of torture."

"Who are these men, Marceau?" cried the seigneur furiously.

"They are prisoners, your excellency."

"Who ordered you to detain them?"

"You did. The escort brought your signet ring."

"I never saw the men: There is devilry in this. But they shall not board me in my own castle, nor stand between me and my own wife. No, pardieu! They shall not and live! You men, Marceau, Etienne, Gilbert, Jean, Pierre, all you who have eaten my bread, on to them, I say!"

He glanced round with furious eyes, but they fell only upon hung heads and averted faces. With a hideous curse he flashed out his sword and rushed at his wife, who still knelt half insensible beside the block. De Catinat sprang between them to protect her, but Marceau, the bearded seneschal, had already seized his master round the waist. With the strength of a maniac, his teeth clinched and the foam churning from the corners of his lips, De Montespan writhed round in the man's grasp, and, shortening his sword, he thrust it through the brown beard and deep into the throat behind it. Marceau fell back with a choking cry, the blood bubbling from his mouth and his wound; but before his mur-

Shortening the sword, he thrust it deep into the throat.

derer could disengage his weapon De Catinat and the American, aided by a dozen of the retainers, had dragged him down on to the scaffold, and Amos Green had pinioned him so securely that he could but move his eyes and his lips, with which he lay glaring and spitting at them. So savage were his own followers against him—for Marceau was well loved among them—that, with ax and block so ready, jus-

PROPERTIES
MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east, on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

DANCE OF THE LAMAS.

Adventures of a British Agent In Bhutan and Thibet.

Mr. Claude White, the British political agent at Sikkim, made two expeditions into Bhutan last year and during the late summer, details of which are now published for the first time, says The London Daily Express.

During the first journey, which was undertaken to invest the Tongsa Penlop, the ruler of Bhutah, as a Knight Commander of the Indian Empire, for the services he rendered during the Thibet campaign, the entire country was crossed, and portions of Thibet which had not been visited by white men were traversed. Everywhere Mr. White was received with absolute friendliness.

The Tongsa Penlop himself undertook a difficult and dangerous journey of over ten days from his residence at Biaga to meet Mr. White at Lhakhang. At Lhalong Monastery, one of the most noted in Bhutan, the chief incarnate lama is the nephew of the Tongsa Penlop. Here a great reception was organized in honor of the British political officer.

As the caravan approached up the gorge towards the ancient monastery it was met by masses of lamas, all wearing dark red robes. When Mr. White and the Tongsa Penlop had been escorted up to the monastery an extraordinary lama dance was organized in their honor. This took place in the courtyard of the monastery, the various dancers wearing grotesque masks of animals' heads.

During the summer mission Mr. White was beyond the limits of Bhutan proper, and traveled for a prolonged period through hitherto unknown parts of Thibet.

Mr. White came across the takin (Budocas axicolor), an exceptionally rare animal, which, so far as is known, had never been previously seen alive or shot by a European. Mr. White was presented with a very fine specimen by the Tangse Penlop, but it died in the Chumbi Valley on its way home.

Its habitat is just below the snow line. This extremely rare animal, which in appearance is half-ox, half-antelope, is stated by the natives to exist only in three places in Bhutan.

The foothills of Bhutan are admirably adapted for the cultivation of rubber, etc., and the people are extremely anxious to trade with us. Eventually, it is stated, they will form a valuable market for Manchester cotton goods.

Mr. White discovered a shorter route to Lhasa than the one now known.

British Soldier and Religion.

At the first meeting of the committee recently appointed by the British Secretary of State for War to advise the Army Council in all matters affecting the spiritual and moral welfare of the army met at the War Office Mr. Haldane, War Secretary, made a brief address, in the course of which he said: "No soldier fights his best who is not an idealist, and touched with idealism about his duties. Every man has in him a latent spark which can be kindled and which can fan and through him that idealism which raises him to a different level of personality. There are times when the history of our race has shown that it is so."

After alluding to the stimulus of religion on the body and the fact still that the British soldier, simple as he is, is capable of being profoundly stirred by the broad features of religious life, which brings home to him the consciousness that he has a side of his nature in which he is more than a mere finite being, a side in which God is imminent in him.

In conclusion, he said: "I am very glad of the evidences which pour in on me from all sides of the fact that the increase in the education and the intelligence of the men of to-day, as compared with those of a generation ago, are telling on the condition of the soldier in the army, and are beginning to raise him to a higher level.

"But we want to stimulate this advance, and we feel that we can best stimulate it under the supervision and by the advice of those who are concerned with religion—with religion in its broadest sense. And it seems to us that in the army is a field in which those who are concerned may find abundant opportunity of working together, as indeed they are already doing to a considerable degree."

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfill all expectations if given ample time for completion.

Nerveless Women

No Animation
Lack Endurance
Weak, Unstrung, Tired.

Ferrozone Will Cure.

For sick women no remedy exists that uplifts like Ferrozone.

No remedy exerts so profound an influence upon the functions that supply clearness of the skin, brightness of eye, elasticity of spirit, abundance of strength.

Ferrozone is a marvelous former of blood—rich, red nutritious blood, the kind that circulates life and activity to every organ in the body.

Buoyancy, vigor and vim are restored—to the nerves is given vitality, to weak places is strength sent.

Wonderful power in Ferrozone, and any weak, pallid woman can be quickly nourished back to joyous health if Ferrozone is used.

Won't you try Ferrozone?

It will cure you just as it did Mrs. Abram Carpy, of Strange P. O., Ont. —who says: "I consider that I should recommend this preparation because I have proved it is simply wonderful in building up. I was all run down, suffered from an extremely nervous and unstrung condition. My sleep was broken and didn't rest me as it should. My appetite was fickle and on certain food appealed to me. My color was dull and I looked sick. Ferrozone gave me a splendid appetite —I grew stronger day by day. My nervousness and apprehension disappeared. Ferrozone has given me absolute, strong health and I recommend it highly."

No tonic is more effective. Absolutely safe for women girls and even children, good wherever there is weakness, debility, nervousness or ill-health. Try Ferrozone, 50c. per box at all druggists.

A Good Lecture

Mr. M. D. Smart, an old Peterborough boy, after spending twelve years as a missionary in South America, told in graphic language the story of his work in the "Neglected Continent" at eight o'clock last night before a good audience in the auditorium of Bethany Tabernacle.

Prof. Dorenwend Coming

Prof. Dorenwend will be at the Oriental Hotel on Monday, February 25. Ladies and Gentlemen, see Prof. Dorenwend's beautiful Wigs, Toupees, Bangs, Wavy and Plain Fronts, Switches in every length and shade, etc. His Hair Goods Styles when properly adjusted protect and ornament the head, soften and beautify the expression of the face and consequently tone up aged appearance. Prof. Dorenwend has for this season many new and pretty Designs. He has added a number of New York, London and Paris patterns. Be sure to see them and not forget day and date.

FOR SALE

Forty shares of Peterborough Cordage Co. Stock at par if taken at once, or will exchange for Foster Stock at market quotation.

ADVERTISE IN THE TIMES.

LOCAL INCIDENTS

By The Times Man on the Street

—Cannington Can't Curl with Peterborough.

—The Property Committee of the City Council met last night.

—St. John's church choir practiced last night, in the church.

—The German Club will meet on Saturday night at eight o'clock, at St. Luke's rectory.

—The annual banquet of the members of the Eko Camp Club will be held on Monday night next.

—Last night in All Saints' church, the first evening service in Lent was held when the rector preached.

—The regular monthly meeting of the Home Circle was held in the Foresters' Hall, George street, last night.

—Some twenty young people of the city drove to Young's Point, Wednesday night and had a thoroughly good time.

—Just in: A very fine lot of souvenir postal cards of all public places of interest. See them at Times Bookstore.

—The initial meeting of the T.A.S. Debating Club was a great success, Rev. Dr. O'Brien acting as critic.

—Nothing doing at the police court yesterday morning, except the appearance of P. Heffernan on a charge of insanity. This was enlarged.

—"Sleeping Beauty and the Beast," is the next attraction at the Opera House, and Messrs. Turner & Sons will have everything O.K.

—The drive given the "Hello" girls of the Bell Telephone Co., by kindness of Messrs. McCollum Bros., was a great success and a most pleasant evening was enjoyed at Lakefield.

—It now looks as though the local hockey club will cross sticks with the New York players on Friday, Feb. 22d. If this deal is consummated the Brock street rink will be crowded.

—The Teachers' Training Class, which was to have been held on Friday evening, has been cancelled for this week, and will be held on Friday night of next week.

The Great Larder Lake Gold Region

It has been known for some time that gold ore existed in the Larder Lake District, in Northern Ontario, rich fields being discovered by prospectors in 1906. It might be noted that Larder Lake is in unsurvey territory some 70 miles north of Cobalt between the T. & N. O. Railway, and the Quebec line.

A wagon road is now being constructed which will greatly facilitate transportation to the lake and the T. & N.O. Railway Commission is now considering the construction of a branch line to the lake district. There is also transportation available by water route.

This district is covered by gold deposits for some eight by four miles. The Larder Lake Gold Mining Co., which has some 120 acres of gold bearing lands which are registered at the Government Mining Office at Haileybury, is capitalized at $500,000, with a similar number of shares of a par value of $1 each. 134,995 shares are held in trust as treasury stock.

As the company has so comparitively low a capitalization, and retains 25 per cent. of the shares as treasury stock, the advantage of getting in on the ground floor, before the stock rises in prices, is patent. The estimated preliminary expenses payable by the company will not exceed $500 and not more than ten per cent. commission will be paid.

A limited number of treasury shares is now offered at 25 cents per share par value $1 each. For particulars write to the secretary, Mr. G. M. Petrie, 57 Avenue road, Toronto.

Good Work Done on the T. V. Canal

Several important improvements will be in evidence when the Trent Valley canal opens for business this spring. During the winter much work has been done on the Balsam Lake and Kirkfield district, including removing all the stumps from the section flooded. During the last few months the water has been lowered to permit of the work being carried out, and when the water is let in again in the spring, instead of the stumps projecting above the water, the lake will be clear.

The new gates on the lock at Burleigh, will be completed in a few days, and these locks will be ready for operation when navigation opens.

La ontractor Got Left

A labor contractor who has been in the city for the past two weeks trying to hire men for the G.T.P. Road, left the city yesterday morning with the parting remark, "——— those Peterborough skinners!" It seems that this man, with more too good judgment, went among the various barroom hangers on, making a good fellow of himself and spending many shekels. Most of those he treated signified their intention of going to work and meantime taking all the drinks the contractor paid for. He left alone yesterday for other scenes.

New Secretary of Children's Aid

Mr. E. L. Goodwill, of the firm of Roger & Bennet, has been formally elected to the position of secretary and solicitor of the Children's Aid Society, in succession to Mr. R. M. Dennistoun, who resigned. A resolution of thanks to Mr. Dennistoun was passed and will be forwarded to him.

SOCIAL AND PERSONAL

—Mr A. H. Stratton was in Toronto yesterday on a business trip.

—Miss Hazel Chown has returned from a four weeks' visit in Toronto.

—Rev. J. C. Davidson is in Toronto attending Synod Committee meetings.

—Messrs. J. J. Howden and G. H. Williamson left yesterday for Toronto to attend the convention of the Y.M.C.A.

—Mr. A. G. Kelly, business manager of the "Girl Patsey" Company, is in town arranging for the appearance of this company next week.

—Mr. G. L. Main of the Bank of Montreal staff, Fenelon Falls, is spending a few days in the city on his way back from Galt.

—We regret to say that Mr. W. Snowdon, the popular proprietor of the Snowden House is seriously ill with la grippe and other complications.

—The many friends of Mrs. Canning will regret to learn of her serious illness at the residence of her son-in-law, Mr. Percy Hounsell, Auburn.

—Mr. G. F. Wardle is attending the meeting of the Synod Mission Board.

—Mr. and Mrs. Alf. Gaskins, of Toronto, are visiting Mr. Gaskins' mother, at Auburn.

—Mr. Dickson Jewett, an old Peterborough boy, but now the leading hotel proprietor in Cannington, Ont., was in the city yesterday with the curlers of that burg a guest at the Snowden House.

—Messrs. L. Cliffe, W. D. Jewett, W. A. Mullan, John Purvis, C. E. Stone, Jas. McLean, C. G. Cowan, S. E. Moore, members of the Cannington Curling Club were guests at the Snowden House yesterday.

—Mr. W. R. Aylesworth has been appointed by the Dominion Government to inquire into the claims for damages against the Government for drowned lands along the line of the Trent Canal, and has joined the staff of the superintendent's office. Mr. Aylesworth will make his headquarters here.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

At yesterday's session of the police court the young man Heffernan, charged with being insane was on trial. The chief magistrate his worship that Dr. McNulty had gotten the papers all drawn up for his commital to the asylum, but that the Toronto end of the deal was not yet ready. The magistrate enlarged the case until next Monday when Heffernan will be taken to the asylum. It might be added that Heffernan among other hallucinations thinks people are following him all the time.

There will be certainly something doing at Saturday's session of the police court. A man named Fowler, yesterday swore out an information against a local hotel man for assault. This was sworn out before regular session of the police court opened officially. After the regular session had adjourned, the hotelman swore out a similar charge against Fowler, the former claiming that Fowler hit him first. It seems, as far as The Times could learn, that Fowler had been boarding at the hotel for some weeks and on the preceding evening had sent an expressman his baggage. It seems further that Fowler's score at the hotel had not been altogether obliterated, and that, after an altercation blows were struck. In view of the law, it does not become us to say which struck the first blow, but we have, judging by general report and the several injured physiognomies come to a certain conclusion, which will, if verified, not place the hotelman in Kingston penitentiary for more than seventeen years.

Yesterday afternoon a special, but really a twice enlarged session of the police court was held at 2.30 o'clock. This session was called for two o'clock but the magistrate was somewhat what late.

The case in question was a legal duel between Mr. Robt. Cox and Mrs. Emily Westlake, in which counter charges were preferred for insulting language.

In the first instance Mrs. Westlake charged Cox with assault, and Mr. Cox charged, in counter defence possibly, that Mrs. Westlake had used grossely insulting language towards him. Several important local citizens were subpoenaed as witnesses, to wit, Dr. Holliday, Peterborough's leading medical man was subpoenaed, and other witnesses of almost equal social and professional standing were present.

Before the trial came to court Rev. E. A. Langfeldt used his influence to try and attain a settlement of the case. When those interested came to court, the magistrate remarked somewhat as follows: "Now you lawyers for both sides, can't you arrange for a settlement of this case? I have looked into the already presented evidence and I find that, should this case be tried, that there will be much washing of family linen exposed and, as far as I can find, either side will have as dirty linen to wash as the other."

Upon this, both Mr. McWilliams for Mr. Cox and Mr. Gordon of Messrs. O'Connell & Gordon, for Mrs. Westlake, had a short conference. The result was that an agreement was attached, but not before several family matters were mentioned. Mr. McWilliams was agreeable to a compromise provided that the magistrate issue an injunction prohibiting Mrs. Westlake from bothering Mr. or Mrs. Cox. In reply Mr. Gordon said that Mrs. Westlake had taken a watch and other goods from Mrs. Cox's premises to which she was not entitled. The magistrate, evidently looking towards an amicable settlement, suggested that an emmisary of Mrs. Westlake's should go to Mr. Cox's and get her goods. Upon this basis the case was discharged without costs, except as whispered by an irrevalent Philistine present, to the lawyers engaged.

Coates Co. Absolutely Secured

Telegraphic despatches received by The Times yesterday demonstrated beyond dispute, that our report of yesterday's issue concerning the Coates Company locating here is absolutely correct and that this great industry will settle within our borders.

Peterboro Was Well Represented

A Toronto despatch of yesterday says that at the opening session of the Young Men's Christian Association of yesterday, the Peterborough Association was well represented, Mrs. E. F Mason and Miss N. Davidson being present from the Ladies' Auxiliary, and Messrs. G. M. Roger, F. W. Simpson and E. Dingman from the Association. The meeting was held in the Friends' Church, Carlton street, and was presided over by Dr. George J. Fisher, New York, of the International Committee. He said that the world-wide reputation of the Y.M.C.A., has become so great that applications for physical instructors had been received this year from China, Japan and two from Australia.

The Badge of Honesty

Is on every wrapper of Doctor Pierce's Golden Medical Discovery because a full list of the ingredients composing it is printed there in plain English. Forty years of experience has proven its superior worth as a blood purifier and invigorating tonic for the cure of stomach disorders and all liver ills. It builds up the run-down system as no other tonic can in which alcohol is used. The active medicinal principles of native roots such as Golden Seal and Queen's root, Stone and Mandrake root, Bloodroot and Black Cherrybark are extracted and preserved by the use of chemically pure, triple-refined glycerine. Send to Dr. R. V. Pierce at Buffalo, N. Y., for *free* booklet which quotes extracts from well-recognized medical authorities such as Drs. Bartholow, King, Scudder, Coe, Ellingwood and a host of others, showing that these roots can be depended upon for their curative action in all weak states of the stomach, accompanied by indigestion or dyspepsia as well as in all bilious or liver complaints and in all "wasting diseases" where there is loss of flesh and gradual running down of the strength and system.

The "Golden Medical Discovery" makes rich, pure blood and so invigorates and regulates the stomach, liver and bowels, and, through them, the whole system, thus all skin affections, blotches, pimples and eruptions as well as scrofulous swellings and old open running sores or ulcers are cured and healed. In treating old running sores, or ulcers, it is well to insure their healing to apply to them Dr. Pierce's All-Healing Salve. If your druggist don't happen to have this Salve in stock, send fifty-four cents in postage stamps to Dr. R. V. Pierce, Invalids' Hotel and Surgical Institute, Buffalo, N. Y., and a large box of the "All-Healing Salve" will reach you by return post.

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic, medicine of KNOWN COMPOSITION, not even though the urgent dealer may thereby make a little bigger profit.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

BUSINESS CHANCES

Scathing Criticisms in Kuropatkin's Book

His Story of the War, Confiscated by Russian Government, is Published Abroad in Spite of Precautions.

St. Petersburg, Feb. 16.— General Kuropatkin's history of the Russo-Japanese war, which was confiscated by the Russian Government, has at last become accessible, despite the most extreme precautions to prevent this galling official indictment from reaching the public.

Kuropatkin's reasons for the failure of the war are based chiefly on a comparison of the warlike spirit of the Japanese, their preparedness and valor, which, he says, has never been seen in any previous war, and their ability to maintain the numerical superiority and to assume the offensive, with the disadvantage of Russia, owing to the inadequacy of the single track railway leading from Europe in feeding her fighting strength, with commanding officers disobeying orders, and in a hopeless state of confusion and cross purposes with a low state of morale and confidence among the troops, and continuous news from home of internal troubles and of insults and reproaches against the army.

The general closes his survey of the cause of the defeat of the Russians with a pathetic reflection that if Russia had been united and ready to make the sacrifices necessary to safeguard her dignity and integrity, the "valiant Russian army would have striven till the foe was subdued."

DIVIDED COUNSELS.

The Mukden volume opens with a sketch of the early events of the war, showing that there were divided councils from the outset over the defences of Port Arthur.

In 1904 Kuropatkin presented two memorandums to the Emperor concerning the plans of operations. In the first he wrote;

"During the earlier period of the campaign our chief task must be, not to permit our troops to be beaten in detail, but to gradually strengthen them, and prepare ourselves for an advance. We must begin it with sufficient forces and not until we have all the necessaries for an uninterrupted advance during a comparatively long time."

On the margin of this memorandum the Emperor wrote the ironic comment, "Just so."

Kuropatkin goes on to show how his efforts to realize this program were checkmated in numerous ways by the deficiencies of the army and the lack of transport and artillery horses, dwelling upon the details given in order to show the utter inadequacy of the Manchurian army to cope with the situation. Indeed, after tracing the events down to the end of May, Kuropatkin admits that had General Kuroki grasped a critical position on the Russian east front, which, "fortunately for us, he did not," he could have seized Liaoyang as easily in the beginning of June.

The whole narrative is a dismal retrospect of unpreparedness and disorganization.

Kuropatkin says of the famous Tenth Corps that "little energy was shown by its commander, and that there was "insufficient firmness in the case of certain regiments, especially among the reservists, rank and file, who, under various pretexts, went to the rear."

General Bilderling's tactics at Liaoyang are severely criticized. His troops are described as being raw, inexperienced and untrustworthy, and they met with constant failure. General Oruff's force of 12,000 men simply bolted from the field in wild disorder, with the result that a splendid position was lacking.

TROOPS LOST THEIR HEADS.

What was lacking throughout the fighting at Liaoyang, Kuropatkin says, was "greater effort on the part of the troops," and more capable handling on the part of the leaders. The dangers and disadvantages of the retreat from Liaoyang to Mukden are pointed out. When the troops got among the high hills they lost their heads, and gave way to panic. The previous appearances of the advance had not inspired them with confidence.

For the indecisive results of the battle of the Sha River several reasons are given, the first of which is the lack of skill displayed by the chief of the eastern army in handling the large force entrusted to him.

After the fall of Port Arthur, Kuropatkin describes his plan for a great turning movement and the blame for its failure is thrown upon Gen. Grippenberg.

"It is regrettable," says Kuropatkin, "that a fortnight before the commencement of our advance the chances of success were overturned by certain orders of Grippenberg, which revealed to the enemy the nature of our intended movement."

France Hails the Prospect of Peace

Hopes the Almost Interminable Strife Over the Separation Law Will Soon Cease.

Paris, Feb. 15.—M. Pringd, the Minister of Education, is silent relative to the negotiations between Mgr. Amiette, the coadjutor Archbishop of Paris, and the prefect of the Seine, M. de Selves, on the subject of the modified contract for the lease of the churches, but it is known that drafts of contracts, practically identical in substance, have already been exchanged, with only differences in words separating the negotiators, and it is possible that the parish priests of Paris and M. de Selves may exchange signatures before the week end. The draft drawn up by Mgr. Amiette requires a priest who replaces another priest at the head of a parish to present to the mayor of the district, or to the prefect, a notification bearing his bishop's seal, whereupon the mayor would accept the new priest's signature as a legal successor to the old contract.

Some advanced Socialist organs are announcing a withdrawal of M. Briand's "subservient" attitude, but as a whole, the press of all grades of opinion is expressing the heartiest satisfaction at the prospect of an end to the religious dispute.

The Petit Parisien claims to have authority to state that if the Vatican authorities do not sanction the result of the present effort to effect conciliation, the Government will not do anything further in that direction.

Formal denials were issued yesterday of the reports that Premier Clemenceau intends resigning his office.

Mr. John Elliott Has Returned to the City

Mr. John Elliott has returned to the city after spending the winter in the Cavendish Lumber Company's camps in Anstruther.

Mr. Elliott was clerk at the camp which has about 80 men engaged. He says that the Company are taking out an unusually large number of logs and the big mill at Lakefield will be run to its fullest capicity next summer.

Mr. Robert Cresswell is superintendent for the Cavendish Lumber Company. Mr. Elliott stated to a Times representative that the cut of this winter beats all records.

Novel Competition to Name a Boat

Free Transportation for Best Name for the New Steamer.

Now that the Otonabee Navigation Company has been fully organized, and obtained its charter from the Provincial Government, one point to be considered by them is by what name the palatial, twin screw steamer in course of construction, shall be known.

The company has decided in selecting a name to consult the general public from whom the steamers of this line shall draw their patronage. A public competition, dating from date of this issue and closing March 15th, proximo, will be held, entry to which is absolutely free and open to all. To the party suggesting such name as shall be selected by the Directors, a season family ticket will be given, which will be available on all boats of the company. The only restriction in the use of such ticket is that it is to be used only by the immediate members of the family of the man or woman, boy or girl, suggesting the name ultimately chosen.

Those desiring to enter the contest must mail the name suggested with street number and address or ordinary post office address, to the Otonabee Navigation Co., Peterborough. Only one name can be submitted by each contestant. In case of more than one contestant submitting the name selected, the season ticket will be given to the party from whom the name was first received.

Furious Runaway Yesterday Afternoon

Yesterday afternoon a runaway occurred about half past three. Foster's big stallion attached to an express sleigh was coming down George street when the horse ran away. The sleigh was upset near the Y.M.C.A. and the driver was thrown out, but he pluckily held to the ribbons, vainly trying to stop the horse. He was dragged along the road until he reached the Toronto Savings and Loan Co's office, when he let go. The horse then took the pavement narrowly missing several glass windows. The horse ran east on Hunter street. The sleigh struck the Bank of Toronto doorway but no damage was done. The horse in its wild career turned to Water street, and then north to Brock street. Another turn towards George street was made till it turned into Fitzgerald's alley way, and quickly raced to Water street, in front of Donnistoun, Peck & Kerr's office. From there it dashed into the yards of the Crown Lace, where it was stopped. As the outfit passed the gate the box was torn off the bobs, but the horse got off without a scratch.

If you are Constipated, dull, or billious, or have a sallow lifeless complexion, try Lax-ets just once to see what they will do for you. Lax-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Lax-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

The Peterborough man, who is alleged to have used abusive language to a Lakefield resident, and for which the latter brought an action against him will come up for trial before County Police Magistrate Edmison on Monday morning at eleven o'clock at the local court house.

Yesterday afternoon P. C. McGinty and P. C. Newhall went to the residence of Mrs. Louise Howells and placed her and a woman in the house, who travels under the name of Jessie Harris, but who is really a Mrs. Ames under arrest. There are two charges against Mrs. Howells, one of selling liquor without a license and another for keeping a house of ill-repute.

According to the story told by the women, (who vigorously deny both charges), the trouble arose through the man Cecil Shanahan, tried in court the preceding day as a "vag," and, whose case was enlarged, without bail, until Tuesday next, making a disturbance at the house. The Howell woman claims to have ordered him out when he came to the place but he would not leave. Mrs. Howells claimed to be ill, and under the doctor's care, her lawyer Mr. Gordon went to see the magistrate to get bail, as the trial of the two will not take place until Tuesday. The Harris woman was arrested as an inmate. Later on bail was granted. Mrs. Howells went on the same bond for both for $200 in each case.

At yesterday's session of the police court, Joseph Rickerby pleaded not guilty to the charge of being d. & d. on a public place. The case was enlarged until this morning.

George Watkins was charged with being a vagrant, and having no place of abode or means of support. He said he had a place to go but did not like to "impose" upon his parents. "I should think not, a big husky man like you!"

Val Lois who is only out of Central prison, was accommodated with a month in Gaol. Nisbitt, the chief noting that there was a lot of wood to be sawed there.

Cecil Shannahan was also charged as a "vag." His case was enlarged until Tuesday morning. Shannahan asked leave to have his liberty until the trial but this was denied him.

Mr. Albert Junkin Has Passed Away

The Bobcaygeon Independent contains intelligence that, by a telegram from Revelstoke, B.C., that paper had been notified that Mr. Albert Junkin, son of Mr. Thos. Junkin of Bethel, North Verulam, had passed away. His brother Wesley sent the message, and arrived on Tuesday at [illegible] the remains, and the funeral took place on Wednesday. Deceased was [illegible] years of age, and for some years taught school in Eldon township, afterwards teaching in his new home and ultimately entering the C.P.R. employment.

Lumbermen Approve of an Investigation

Ottawa Government Commended for Its Action.

Winnipeg, Feb. 15.—The Manitoba Lumbermen's Association yesterday commended the Federal Government for appointing a commission to investigate the lumber industry of the West. The feeling that a lumber monopoly exists, especially in the new Provinces, is very keen, since the price of rough lumber is now thirty dollars a thousand at the railways. With the tremendous demand for lumber in the North West, the lumbermen say the price has necessarily advanced. Several years ago, when the same situation existed, Wm. Whyte, vice-president of the C.P.R., busted the combine by declaring officially that if prices didn't come down the company would put in mills and saws along the line. They came down.

The Bank of Scotland loan of a million and a quarter was yesterday renewed for three months. Mayor Ashdowne said the reason the city had petitioned the government not to attempt to enforce the provisions of the plebiscite in Winnipeg, at once is because the city wants the option of constructing its phone system, and that it should not be required to make the selection as a matter of business under a year. He denies any serious financial condition of city finances.

Havelock Merchant Makes an Assignment

That bright little country contemporary, the Havelock Standard says; On Wednesday last the firm of W. A. McMaster & Co., Havelock, assigned to H. Barber, of Toronto.

Mr. McMaster attributes the failure to the credit system, and the habit of the people of Havelock in dealing with city departmental stores, a habit, which is bound to seriously injure the industrial expansion and prosperity of any village or town. This business of buying goods out of town has grown to big proportions in Havelock and is indulged in by citizens who gain their substance and livelihood from this place, and people, too, whose incomes or salaries depend on the prosperity of the village to a large extent. In reference to the cash system, if every business man in our town could do business on a strictly cash system, it would be a blessing to all. If we all had to pay cash we would learn to live within our means. It would save business men the expense of bookkeepers and the loss of bad debts, all of which some one has to pay for. If our town could gradually work into a strictly cash system it would be better for everyone. Mr. McMaster's many friends feel his misfortune very much. He does not yet know just what line of business he will enter.

Paris, Feb. 16.—The members of the household of the Archbishop of Paris, Cardinal Ricard, take exception to the idea that an agreement relating to the churches will in any sense constitute a solution of the religious issue. In this connection a prelate who is close to the Archbishop said: "We wished primarily to save public worship from shipwreck, and upon that point we are succeeding, but beyond that the religious question has not advanced a foot."

Mother to Contradict Evelyn Thaw's Story

Persists in Her View That Stanford White Never Treated Her Daughter With Anything But Respect and Kindness.

New York, Feb. 16.—Mrs. Charles J. Holman, mother of Evelyn Nesbit Thaw, will be called as a witness for the State by District Attorney Jerome. Further than this, Mrs. Holman since the revelations made by Evelyn Nesbit Thaw as a witness, has demanded that she be given an opportunity to publicly refute the insinuation made in the testimony against her and to contradict the story told by Mrs. Thaw as to the proposal of marriage by Harry Thaw in Europe and the reason for her refusal.

Mrs Holman, in a statement given to a representative of the District Attorney in her home in Pittsburg, stated that Harry Thaw not only did not propose marriage, but she is ready to testify that when she urged him, in view of the gossip which attended their travels in Europe, to marry her daughter, Thaw became enraged and forcibly ejected her from his apartments.

DID NOT LEAVE EVELYN.

Mrs. Holman in her statement alleges that Stanford White never sought an opportunity to harm Evelyn Nesbit, and Mrs. Holman will deny that she was ever persuaded to go to Pittsburg and give her daughter in charge of White, as Evelyn Nesbit Thaw testified. Mrs. Holman has denied to the District Attorney and will testify to it, if called as a witness, that she ever connived in any way to imperil her daughter with Stanford White, and will swear that the first she ever heard of the matter was when she read the testimony given by her daughter.

Mrs. Holman has given to District Attorney Jerome all of the letters which Stanford White sent to her from the time he first became acquainted with Evelyn Nesbit until the latter's marriage, and also the letters which Evelyn Nesbit wrote to her mother concerning Thaw and his alleged cruel treatment. Jerome also has the letters written by Evelyn Nesbit about the relations with Stanford White.

ADMIRATION OF WHITE.

There is not a line in any of these letters containing the slightest suggestions that White had ever treated her in a shameful way, and the burden of the letters is admiration and gratitude for the kindness and consideration of White, shown in many ways, which she recounts.

The District Attorney has been informed by Mrs. Holman that she is ready to aid him in any way that may be suggested to make clear the real relations between Stanford White and Evelyn Nesbit as she knows them, and to attack the credibility of her daughter.

More important, perhaps, than any of the documents which Mrs. Holman has given to the District Attorney is another bundle of letters which were given to Mr. Jerome yesterday. They are the letters which were written by Evelyn Nesbit to Stanford White, and most of these are written after the time fixed by Mrs. Thaw in her testimony for the happenings in the White studio.

WRITTEN AFTER CONFESSION.

Quite a few of the letters are dated after the alleged confession made to Harry Thaw, which gives the reasons for her refusal to marry him. Not the slightest reference is made in any of the letters to any wrong done by White, but there are pages of reference to the cruel treatment which she received at the hands of Thaw while associated with him on the trip abroad and in this city.

White requested his secretary, E. V. Hartnett, to destroy all personal correspondence in case of his sudden death. Mr. Hartnett carried out these orders after Mr. White was dead, but the bundle of letters written by Evelyn Nesbit to White was overlooked, and will be used by the District Attorney in his cross-examination of Mrs. Thaw to show the difference between the written expression of her regard for White and the story she told as a witness.

MAZIE'S DENIALS.

Mazie Follette, former associate with Evelyn Nesbit in the chorus, is arrayed against the defence, and, in a sworn statement given to Assistant District Attorney Garvan, recites a number of incidents within her alleged personal knowledge showing the kindness of Stanford White in his treatment of Evelyn Nesbit and the cruel treatment of Harry Thaw.

Miss Follette alleges that on one casion, at a private dinner in an upper Broadway restaurant, Evelyn Nesbit was sitting at a table talking with friends, and Thaw seized her by the hair and dragged her out of the room.

SPORTING TOPICS

ATHLETICS.

Mr. Benj. Dusty, Peterborough's champion mile skater, left yesterday on the noon train for Midoc. We venture to note that before long this same Ben. Dusty, will give not only the locals but the Provincial skating experts a run for their money.

• • • •

HOCKEY.

A New York despatch of yesterday says; The Crescent Athletic Club today made the final arrangements for its Canadian trip. According to the schedule, the local team, accompanied by a band of faithful rooters, will leave New York on February 21, and go direct to Toronto. Late Friday afternoon the Crescents will take the train to Peterborough, where they will play on Washington's birthday.

MANY CHILDREN IN CONGESTED DISTRICTS VICTIMS OF CONSUMPTION

S. Goodfrend, a specialist from New York, declares that ten per cent. of the children in the congested districts of Cleveland are victims of tuberculosis.

The same deplorable conditions have been found to exist in other cities, and the eradication of the white plague among children has been started in earnest. Sanitary conditions are being improved, roof treatment, affording fresh air, is given, and nourishing food is being supplied.

Children with weak lungs are susceptible to colds, which cause the lungs to become sore. The tubercular germ settles in the sore places and sets up what is called a "mixed infection," the starting point of consumption.

Parents are warned against giving children cough or cold remedies containing opiates, as narcotics only stultify the lungs and render them more susceptible to the deadly tubercular germ. The following simple formula, the ingredients of which can be obtained from any good prescription druggists at small cost, will break up a cold in twenty-four hours, and cure any cough that is curable. Virgin Oil of Pine (Pure), one-half ounce; Glycerine, two ounces; good Whisky, a half pint. Use in teaspoonful doses every four hours.

An eminent authority on lung trouble says if this simple and effective formula was known and generally used, throat, lung and bronchial affections would seldom reach an acute stage. Care should be used in selecting pure ingredients, and to avoid substitution, it is best that they be purchased separately and mixed in your own home.

The Virgin Oil of Pine (Pure) should be purchased in the original half-ounce vials, put up expressly for druggists to dispense. Each vial is securely sealed in a round wooden case, with engraved wrapper, with the name—Virgin Oil of Pine (Pure), prepared only by Leach Chemical Co., Windsor, Ontario—plainly printed thereon. There are many rank imitations of Virgin Oil of Pine (Pure), which are put up under similar names and style of package. Never accept these as a substitute for the Pure Virgin Oil of Pine, as they will invariably produce nausea and never effect the desired result.

What's the Use

To break down your vigor

With Coffee?

Most people need all the vitality they can secure. Some have an excess and proceed to destroy it with one or more of the sedative drugs —Tobacco, Coffee, Whiskey or Morphine. All belong to the same family. They could use that excess vigor to improve business, or whatever pursuit they may be engaged in, but they seem to prefer to nullify it with drugs.

However, each one must make choice and pay the bill. The one who can let out coffee when it is known to be slowly setting up disease of some of the organs is worthy of praise.

The change from coffee and its aches and ails to well-made Postum with its comfort and health is really quite easy, for the deep seal brown of Postum changes to the rich golden brown when cream is added and the flavor (when made according to directions) is very like the mild high grades of Java coffee. But the change drives out the coffee troubles and the old condition of comfortable health returns.

"There's a Reason" for

POSTUM

Ever read one of these genuine letters?

INSOMNIA

Leads to Madness, if not Remedied in Time.

"Experiments satisfied me, some 5 years ago," writes a Topeka woman, "that coffee was the direct cause of the insomnia from which I suffered terribly, as well as the extreme nervousness and acute dyspepsia which made life a most painful thing for me.

"I had been a coffee drinker since childhood, and did not like to think that the beverage was doing me all this harm. But it was, and the time came when I had to face the fact, and protect myself. I therefore gave it up abruptly and absolutely, and adopted Postum Food Coffee for my hot drink at meals.

"I began to note improvement in my condition very soon after I took on Postum. The changes proceeded gradually, but surely, and it was a matter of only a few weeks before I found myself entirely relieved—the nervousness passed away, my digestive apparatus was restored to normal efficiency, and I began to sleep restfully and peacefully.

"These happy conditions have continued during all of the five years, and I am safe in saying that I owe them entirely to Postum Food Coffee, for when I began to drink it I ceased to use medicines." Name given by Postum Co., Battle Creek, Mich.

"There's a reason." Read the little book, "The Road to Wellville," in pkgs.

Proper Medicine For The Blood

Drives Away That Tired Feeling; Makes You Feel Brisk.

To every one is sure to come that tired, exhausted feeling.

When the blood is weak, thin and debilitated, circulation is slow, and in consequence the system is congested with poisons and wastes that should be driven off.

The sensible person sets on the teachings of experience and cleanses his system with a course of Dr. Hamilton's Pills of Mandrake and Butternut.

No medicine can be more certain to quickly cure. Convenient to take, just one pill at bedtime; safe, because entirely vegetable; unfailing, because proved by thousands that Dr. Hamilton's Pills set you up in a few days.

From Chebogue Pt., N. S., comes the following from Mrs. W. A. Reynolds: "A year ago my health began to fail, I lost appetite, became nervous and sleepless. My weight ran down, I became thin, hollow-cheeked, and had black rings under my eyes. I really felt as if the charm of life had left me and when spring time arrived I was in the "Blues." I read of Dr. Hamilton's Pills, and got five boxes at once.

"Within a month my appetite and color were good. I gained strength and felt like a new woman. New life and vigor returned, and my friends scarcely knew me. A medicine that will do this should be in every home."

Good health means much to you. Success and happiness depend upon it. The maintenance and source of health is found in Dr. Hamilton's Pills. 25c. per box, or five boxes for $1.00, at all dealers, or by mail from N. C. Polson and Co., Hartford, Conn., U. S. A., and Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

NO CHANNEL TUNNEL YET

England is apparently not ready to be deprived of any of its insularity. The prevailing impression in England just now seems to be that all hope of a Channel tunnel must be abandoned. There seems to be no doubt that the majority of the responsible military authorities, including the secretary of war, are unalterably opposed to it. The most potent argument against it seems to be that if it once existed and Great Britain was successfully invaded the surrender of it would be exacted as one of the inevitable conditions of peace. This seems to be taking a good deal for granted, and many writers express the view that it could be irremediably destroyed in many ways long before it came to any question of surrender. As to the attitude of the French on the matter, there is much diversity of opinion. Some Paris correspondents declare that they are greatly hurt by the disinclination of the English to establish this new bond of connection between the two countries, while other writers maintain that the French exhibit very little interest in the matter either one way or the other. But, of course, they are not willing to admit the likelihood of the French end of the tunnel ever falling into the hands of the Germans, which is one of the eventualities dwelt upon by the opponents of the scheme. Some Frenchmen think Great Britain attaches too much importance to the inviolability of her "silver streak," but at the same time admit that they would be very pleased to have something of the same kind on their own eastern frontier.

It is better to be safe than sorry, and England thinks she is safe without the tunnel.

THE STIR IN INDIA

The political situation in India is not all smooth. It was the subject of part of an address which was delivered before the Punjab University the other day by Sir Charles Rivaz, who has been Lieutenant governor of the Punjab for the last five years. He said that the present time in India was characterized by a spirit of political activity among the educated classes, by yearnings on their part for the creation of a nationality, and a desire to take an increased share in the administration of the Indian Empire. Those responsible for the good government of the dependency could sympathize with those aims and aspirations, he said, so long as they were pursued in a proper spirit; but they had also to consider the wishes of the voiceless millions whose welfare and interests they held in sacred trust. Consequently, they were bound to proceed with deliberate caution in making any material changes in a system of administration which, whatever its detractors might assert to the contrary, was undoubtedly gratefully accepted and appreciated by the vast majority of the people, as giving them a larger measure of peace, security and material prosperity than India had experienced for generations. Nor could it be denied that considerable steps had already been taken towards the association of Indians with Englishmen in the highest ranks of the public service. He earnestly advised young graduates who would be taking an interest in public affairs to follow the lead of those of their fellow countrymen—and he believed that happily they were in a large majority—who were actuated by a spirit of moderation and honorable fairness, and to avoid the misguided examples of those who lost no opportunity of maliciously misrepresenting and vilifying everything connected with the British administration of the country, and of exciting racial ill feeling and strife between Indians and Englishmen.

The Alien Head Tax Will be Increased

Washington, Feb. 15.—The exclusion of foreigners who use their passports to secure admission to the United States to the detriment of labor conditions in the United States is provided for by amendment to the immigration bill agreed upon at a conference of the Senate and House yesterday and reported to Congress. The amendment is the result of the demand from the Pacific Coast States for the exclusion of Japanese coolies, and it is understood that it will aid in securing an understanding between the administration and the San Francisco delegation now in Washington conferring with President Roosevelt.

The proposed educational test for immigrants and the provision that persons coming to the United States solely to avoid persecution or punishment on religious or political grounds shall not be deported because of want of means or the probability of being unable to earn a livelihood were eliminated. The head tax on aliens was fixed at $4, and the Senate provision exempting persons who have resided in Canada, Newfoundland, Cuba or Mexico for one year retained, as was the House provision exempting persons arriving in Guam, Porto Rico or the Hawaiian Islands.

A Successful Year in Insurance

The Independent Cash-Mutual Fire Insurance Company has good reason for congratulation over the successful result of their business transactions during the year ending December 31st, 1906. This company, although not boasting as large a capitalization as some of the older companies, or showing inflated lists of assets, is rapidly gaining the confidence of the insuring public by their honest, progressive and conservative system of both pushing the company's business and, at the same time, protecting their policyholders.

During last year the company, after paying a six per cent. dividend to the shareholders and making a deduction for depreciation of office furniture, were able out of profits to carry the handsome sum of $12,811.24 to reserve account. Mr. Charles C. VanNorman, the President and Manager, who, by the way, is well known in this city and county, has made a most efficient and capable administrator.

Mr. W. H. Hill is Local Agent for Peterborough.

Wild Cats in Finch

Cornwall, Feb. 15.—The township of Finch, Stormont county, has been famous for many things, but its latest attempt at becoming conspicuous is in attaining notoriety as the home of wild cats—loup cervier felis Canadensis, not the two-legged variety, that indulges in whiskey and rough and tumble scraps. Several very large lynx have lately been killed by the Finch farmers and it is reported that there are others prowling about in the woods. The successful hunters have been Dougald McGillivray and Finlay McRae of the ninth concession, and Archie McMillan of the fourth concession. Mr. McGillivray has killed two, one of which measured five feet in length.

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tully.

A Mystery Solved

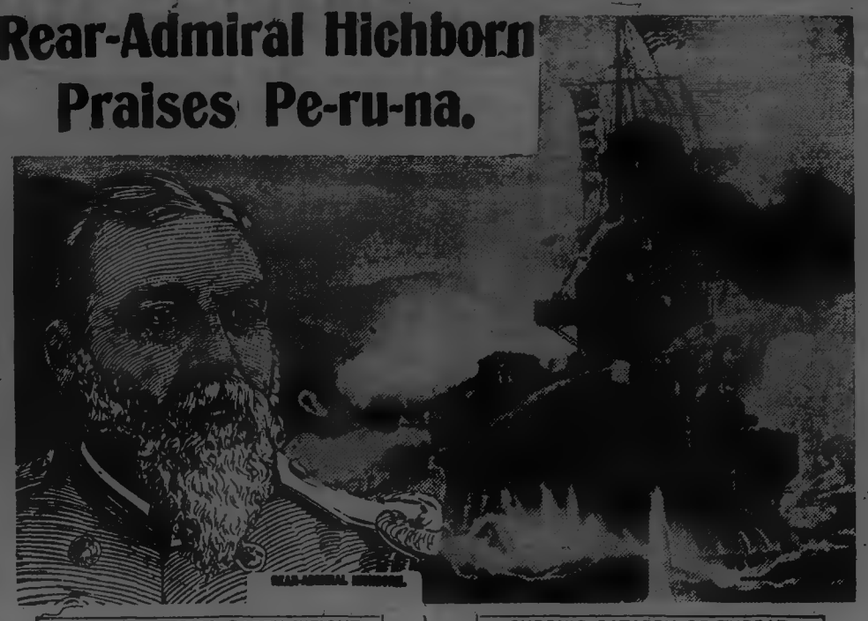
Essen, Germany, Feb. 13. — The mystery of the murder of Miss Madeleine Lake, daughter of a British army officer, whose mutilated body was found at Busk, October 1 last, in the City Park, has been solved. Edward Lond, 20 years old, surrendered himself at the police station here Saturday charging himself with being the murderer of Miss Lake. He informed the police that he formerly was an employe of the Rhine-Westphalian Coal Syndicate and fled to Liege, Belgium, after the murder. His conscience tormenting him and being without money he returned to Essen determined to confess and take the punishment for his crime.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

Rear-Admiral Hichborn Praises Pe-ru-na.



REAR-ADMIRAL HICHBORN.

ADMIRAL'S WORDS CARRY WEIGHT.

REAR-ADMIRAL HICHBORN is one of the best known admirals of our navy.

His statement concerning Peruna will have much weight as it goes out into the world.

What he says is echoed by many other naval officers of high standing.

WHAT THE ADMIRAL SAYS.

Philip Hichborn, Rear-Admiral United States Navy, writes from Washington, D. C., as follows:

"After the use of Peruna for a short period, I can now cheerfully recommend your valuable remedy to any one who is in need of an invigorating tonic."—Philip Hichborn.

AN EVERPRESENT FOE.

The soldier and the sailor are especially subject to catarrh in some form or phase.

Exposed as they are to constant changes, subject as they are to various vicissitudes, and all kinds of climate, wet and dry, night and day, they find catarrh to be their most insidious and everpresent foe.

In the barracks and on the field, Peruna is equally efficacious.

Taken at once after exposure, it should prevent catching cold.

PE-RU-NA A RELIABLE REMEDY.

After a cold has become established, Peruna will break it up as quickly as any other remedy known.

Even after a cold has become settled in some organ of the body, Peruna can be relied upon to promptly dispel it.

Peruna will relieve catarrh, whether acute or chronic, but a few doses taken in the first stages of the disease will be more effective than when the disease has become chronic.

If you suffer from catarrh in any form, do not neglect it. Take Peruna at once. Delays in such matters are dangerous.

CHRONIC CATARRH OF THROAT.

"I was troubled with catarrh of the throat particularly, and suffered considerably as a result thereof for a period of about five years, and my general health was affected.

SOUGHT CHANGE OF CLIMATE.

"Three years ago I was forced to give up business, and took up my residence in the Western country, looking for relief in change of climate as well as a change in the method of treatment for my ailment.

RELIEF IN PE-RU-NA.

"After much expense, both here and in the West, I was induced by a friend to try Peruna. I continued the use of it for about five weeks, at the end of which time I returned to New York, both well and happy."—Wm. H. Switzer, 326 E. 33rd street, New York City.

USED PE-RU-NA IN HIS FAMILY.

"I have used Peruna in my family with very satisfactory results for the last two years. Besides I have recommended it to all whom I think are in need of it.

"I urge all who are afflicted to buy a bottle and begin its use at once. I have never heard of any who have used it to be dissatisfied with the results."—Frank W. Harris, box 22, Basic City, Va., member A. F. & A. M.

A TYPICAL TESTIMONIAL.

Mr. J. H. Galbraith, 390 West Second Ave., Columbus, Ohio, writes:

"I have been a sufferer of catarrh of the stomach and kidneys for seven years. Doctors did me no good, and after taking Peruna for six months, at intervals, I believe I am cured. My appetite returned, I sleep well and work every day. I always have it in the house."

No remedy ever yet devised has received such unstinted eulogy from so many renowned statesmen and military men as Peruna.

We have on file thousands of testimonials like those given above. We can give our readers only a glimpse of the vast array of endorsements Dr. Hartman is receiving.

COMING

Monday, Feb. 25th
ORIENTAL HOTEL, PETERBORO

TO IMPROVE YOUR APPEARANCE

Retain your youthful freshness so that no one can remark, "she is past her prime." To appear younger and more attractive than the average woman, you must be particular that your Hair shows no sign of being thin, short or scrawny. A DORENWEND TRANSFORMATION, POMPADOUR, WAVE, CURL or SWITCH will substitute nature's defects. Even if you have plenty of your own hair, these light and airy artifices may be worn over it, saving you the worry of arranging your hair in the prevailing style. Your hair can be perfectly matched in color and texture, so that detection is out of the question.

Now, if you have in your mind any prejudice regarding artificial hair, it will forever be dispelled after seeing how natural and becoming our productions will prove in your case.

CONSULT PROFESSOR DORENWEND

DURING THIS VISIT

Advice regarding your hair and how you can make the most of it. Also a personal demonstration of the newest styles in transformations, will be given the same as at our establishment in Toronto. Bear in mind that our styles are originated and designed by Professor Dorenwend, and they cannot be procured from any other makers. Their equal have yet to be produced.

MAN TO MAN—ABOUT BALDNESS

If you are bald, or partially so, you must realize that it makes you look old. Notwithstanding the desire to have back your one time bushy head of hair, you hesitate before wearing a natural hair covering simply because you imagine it is going to be noticed by others. Now you never made a greater mistake. Thousands of men, who thought the same as you do, are to-day wearing a

DORENWEND PATENT TOUPEE

and instead of carrying the handicap, that baldness proved to them, they are now enjoying the advantage of "looking young"—and that is what counts to-day in business and social life. Our Patent Toupee is a featherweight fac-simile of your own natural hair and may be worn without fear of detection—impossible to remove from the head unless at will—not the least clumsy or uncomfortable. They act as a protection, preventing colds and catarrh, so common to bald men.

Now do not neglect this opportunity—come and see for yourself. A few minutes' demonstration will convince you that a Dorenwend Patent Toupee is not like the clumsy, wiggy affairs that are claimed to be "just as natural."

The Dorenwend Co. of Toronto, Limited, 103 and 105 Yonge Street
REMEMBER PLACE, DAY AND DATE

SALE OF PEDIGREED CATTLE

Messrs. G. J. Jopling & Sons, of Bridgenorth, will hold a sale of pedigreed Shorthorn Cattle on Thursday, March 7th, at their barns at Bridgenorth. The cattle for sale include 18 young bulls and 17 cows and heifers. These cattle are of the deep milking strain, and the sale will doubtless attract much attention.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post-Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfill all expectations if given ample time for completion.

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior,

N.B.—Unauthorized publication of this advertisement will not be paid for.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Public Building, Owen Sound, Ont.," will be received at this office until Monday, February 25, 1907, inclusively, for the construction of a Public Building, Owen Sound, Ont.

Plans and specification can be seen and forms of tender obtained at this Department and at the office of Messrs. Forster and Clark, Architects, Owen Sound, Ont.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the party tendering declines to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GELINAS,
Secretary.

Department of Public Works,
Ottawa, January 31, 1907.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

No Sound of R.

Many languages are devoid of certain sounds quite familiar to us. The Chinese, for instance, has no sound equivalent to our "r." For America a Chinaman says "Yamelika." The Society Islanders could not pronounce either "c" or "k," and the nearest approach they could make to the name of the celebrated navigator Cook, who visited their shores, was "Tut."

The Dardanelles.

The strait of the Dardanelles is less than fifty miles long, but, diplomatically speaking, it reaches to all the capitals of Europe and even to the state department at Washington.

London Streets.

Miles lane is a corruption of St. Michael's lane; Mark lane for Mort (market) lane; Sermon lane for Shermonlet lane, the locality of the "sheremoneyers," who sheared or clipped bullion into shape for coining at the exchange near by; Sise lane for St. Osyth's lane; Gutter lane for Guthrun lane, from a Dane who owned the property there.

Dress Trimmings.

It does not seem very wise to put much money into perishable dress trimmings or decorations which are likely to go out of fashion before they are worn out. Much more sensible is it to accumulate, little by little, good pieces of lace. Real valenciennes is not prohibitive and lasts a lifetime. Point and duchess are expensive at first, but a little goes a long way and makes the plainest gown elegant.

Woman at Her Best.

A woman's character and powers are finest about forty. A woman has gained everything at forty and lost nothing; she is at the full vigor of her intellectual powers, she has acquired experience and judgment and is not far enough away from youth to have become unsympathetic even to its wildest vagaries.—Bystander.

The Carpet Sweeper.

Exact that your carpet sweeper shall be cleaned thoroughly on every sweeping day and never put away dirty. Unlock it over a newspaper and take out every bit of dust, lint and dirt, then rinse the brush in soapsuds and dry before setting aside.

"Don't settle down to a state of big feet even if yours happen to be large," says a dealer. "Select shoes with low vamps, wear your heels high and broad and don't forget that pointed toes are always good."

Large pillows are not good to sleep on, because the head is too high when it rests on them and this prevents that deep, regular breathing that gives good lungs.

Clean velvet by rubbing with a cloth dipped in powdered magnesia. Shake well occasionally and when entirely gone over brush with a clean brush.

Don't form the habit of running up bills; they only lead to overcharges and accumulative debts.

A MILITARY DESPOT.

The Experience of One Private in the German Army.

The following is the experience of a German army private:

During the second maneuvers I was sent on ahead to select quarters for my company. The police supply the names of householders who are expected to shelter the soldiery, and I had to decide on the number of men who should be assigned to each place.

It seems that our major dispatched a courier with a message for our captain. For some reason or other the message was not delivered. The next day the captain called me out and in the presence of the whole company rebuked me for not delivering the message.

"I did not receive any message," I ventured.

"Shut up your mouth, you liar!" he thundered. And again he bellowed, "Why didn't you deliver that message, you"—

I told him a second time that I had not received any message. The captain's temper broke all bounds. With an oath he rode his horse at me full tilt, hurling filthy names at me the while.

When he had ridden right up to me—I fully expected he would run me over, but I dared not move—he suddenly reined in his horse and, drawing a long dagger from his belt, shouted, livid with passion, "I have half a mind to stick this through your vile body, you schweinhund!"

Once more he asked me about the message, and once more I answered him.

"Then five days' confinement and bread and water be your punishment, you liar!" he retorted.

He repeated the question several times and increased my term of imprisonment each time I answered in the negative until my term of imprisonment equaled fourteen days. I was placed under arrest. Next day I was released.

I afterward found that the captain had discovered his mistake, but he never referred to it.

BIRTH OF A "GASSER."

Noise of a Blowing Well Drowned All Other Sounds.

In the Broadway Magazine is a story by Rupert Hughes concerning the oil wells of Texas. He tells of the birth of a "gasser."

"It screamed like the death cry of a thousand panthers." He says: "The long steel cable has been sent flying like a twine string. A great length of pipe has been hurled against a tree and wrapped around it. The derrick was almost hidden in a white haze. A geyser of fine sand was streaming upward and eating away the lofty crown block.

"Seth knew what it was. He found Tom, and they gesticulated at each other. They made faces, but no audible sound. Their voices were vain as candles in the full sunlight. Each was trying to yell the same thing.

"'She's a gasser, blowing her head off.'

"Men gathered from everywhere and acted like crazy folk, working their jaws and delivering no message.

"They were soaked, drowned, obliterated in a sea of intolerable noise.

"A mile away at the railroad station the passengers were equally made dumb by the uproar. If a man wanted a ticket he had to write out the name of the station. An engine rolled in with a bell that rocked without sound and a whistle emitting puffs of white steam that no one heard.

"The animals of the region were greatly disturbed. There was much breaking of harness on the part of horses, and one or two galloped about under empty saddles. Their riders were doubtless stuck in the mud somewhere, head first.

"A few pigs wandering here and there had sniffed at the noise and returned to their luxurious wallows in the oily muck."

Pretty Crooked.

People who have seen cottonwood lumber warp when it came from the saw can appreciate a story about the first sawmill erected at Fort Scott. After the first day's sawing the owner of the mill came down from town, where he had been celebrating the "opening" with the boys. He looked over the crooked boards scattered about the yard for a moment and then inquired with drunken gravity:

"Boysh (hic), has that lumber been measured yet?"

"It has not," replied the foreman of the mill.

"Well, when it gets still, take a (hic) corkscrew and measure it."

Essential to Biography.

Some years ago Norman Hapgood was arranging the data for his "Life of Lincoln." When he sat down to write the opening chapter, he was confronted with a puzzle. Hurrying to an adjoining room of the paper, on the staff of which he was a shining light, he asked the editor, "By the way, what was Lincoln's first name, Abram or Abraham?"

Avoiding Trouble.

"Those candidates are telling some terrible lies about one another."

"Yes. But, you see, it would mean shooting on sight if they were to tell the truth about one another."

Always After Us.

"No matter what we do, there is one class of people who will always be after us."

"Who are they?"

"Posterity."

Although the world is full of suffering, it is full of the overcoming of it.—Keller.

If you are Constipated, dull, or bilious, or have a sallow lifeless complexion, try Lax-ets just once to see what they will do for you. Lax-ets are little toothsome Candy tablets—nice to eat, nice in effect. No griping, no pain. Just a gentle laxative effect that is pleasingly desirable. Handy for the vest pocket or purse. Lax-ets come to you in beautifully lithographed boxes at 5 cents and 25 cents. Sold by J. D. Tully.

Discovery of Iron in America.

One historical authority states that the earliest discovery of iron within the present limits of the country was in the mountain range of western North Carolina, and the first effort to manufacture it into merchantable form was made in the state of Virginia in 1619. The foundry was destroyed by the Indians in 1622.

Honeyed Butter.

Parisian restaurant keepers mix a little honey with their butter. This gives it an agreeable taste and flavor and makes the inferior butter more palatable.

Indian Pearls.

Pearls imported from Australia and Panama are all of medium and large size. Generally speaking, the Indian pearls command the highest price because of their superior form and their brilliant luster.

Curtains.

Curtains were employed for bedsteads in the eleventh century. They were afterward transferred to windows.

The Streets of Paris.

Many of the streets of Paris are lined with trees. If a tree dies another one of the same kind, age and size is brought from the state forests and put in its place. The cost is something tremendous, but Paris is the most beautiful of modern cities.

Tallest Lighthouse.

The tallest lighthouse on British coasts is the Skerryvore, off Argyllshire. It is 140 feet high. It contains 4,308 tons of masonry and cost £90,308.

Weddings in Italy.

In Italy, Sunday is usually selected for the marriage of those persons who have never been married before. Widows, however, in accordance with an old custom, usually choose Saturday.

Norwegian Honesty.

As an example of Norwegian honesty Lord Edward Spencer-Churchill in a lecture told a story of how he and his friends left a silver spoon in one of the little station houses by mistake. Two years afterward when they passed by the house again the silver spoon was brought to them.

Sour Grapes.

Waller wrote his most pleasing poetry of Saccharissa. After she rejected him he in a letter to a friend said, "She is only a redheaded drab anyhow."

An Incentive to Suicide.

A London coroner remarked the other day that on no account should a weapon with which a suicide had been committed be returned. "People," he said, "brood over such weapons, and the fascination drives them to imitate the suicide." Such, he said, had been the experience of other coroners.

The Sidesaddle.

A correspondent of the London Mail says that women always rode astride till Queen Elizabeth in order to show a magnificent dress upon a certain state occasion rode sidewise and so set the fashion.

Silk Stockings.

In 1570 Queen Elizabeth was presented with a pair of silk stockings by her tire woman and afterward never wore any other kind.

Sand Drifts.

Between Carthage and Stislingville, in Jefferson county, N. Y., there is a stretch of country where the sand drifts like snow, making great banks and blinding the eyes of those who look up wind. It is a desolate, barren region, where the soil is only as deep as the roots of the grass.

Umbrellas.

An umbrella dealer cautions against the double use for sun and rain of a rain umbrella. Silk wears, he says, as long as its oil lasts, then it splits and cracks and is gone. The sun dries out the oil; hence its harm.

The Quaternary Period.

Our geologists rarely use the term quaternary. By European writers it is understood to mean the period which followed the tertiary and includes the present time. Archaeologically it is divided into two epochs, the older including the pregiacial, the glacial and the postglacial ages, all characterized by a chipped stone industry, the latter beginning with the neolithic culture and continuing till now.

Skates.

Skates originally were made of bone. In and around London men skated on the thigh bones of cows, helping themselves along with pointed sticks. Steel skates were invented by the Hollanders in the seventeenth century.

The Instep's Curve.

A high instep is supposed to be a mark of aristocratic descent, and possessors of the Andalusian mark believe it a sign that their ancestors never bore burdens.

The Sacredness of Prayer Rugs.

Verses from the Koran and other passages considered sacred are generally stamped on the fabrics used as prayer rugs by the Mohammedans, and it is criminal in oriental law to export such pieces. This is doubtless because use by the occidentals means the treading of the sacred words under infidel feet.

Salt For Cattle.

The only way in which salt should be given to cattle is in lumps, big enough for them to lick handily, with no danger of their swallowing them.

BIG G CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. The Evans Chemical Co. CINCINNATI, U.S.A.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns **FIVE MINING CLAIMS** containing **160 ACRES**, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 2-foot level, show 132 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 600 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession, of Coleman. Lease has been granted.

The claim is a 39 acre one and about 50 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 80 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch niccolite, 18 inch smaltite together with cobaltite. Assays gave 872-1283-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00) The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

W. H. JACKSON,
261 KING STREET WEST, - TORONTO, CANADA
DAWSON KENNEDY, Local Agent, 600 WATER ST., PETERBORO

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 3 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 500 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 31 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906 says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 90 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run in and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 50 feet in thickness, lying at a depth of from 57 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking has demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers, whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magaska, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 504,000 pounds of rich ore was taken out by the Hobo. This mine is 1½ feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $25.12 per ton for lead and $26.41 for zinc to $42.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 40 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 967,160.00
A. W. Taylor	180	160,768.00
J. W. Aylor	40	576,571.00
The Burgner Mining Co.	80	193,579.00
Center Creek Mining Co. (production to date)	200	6,953,484.00
Mrs. E. J. Chinn	120	223,709.00
Majestic Consolidated Zinc & Lead Co.	52	234,190.00
Continental Zinc Co. (production to date)	200	1,574,583.00
Consolidated Troup Mining Co.	40	199,613.00
Daughtery-Davy-McMillan Estate	80	456,006.00
The Empire Zinc Co.	451	120,212.00
Fox Heirs	20	120,124.00
Granby Mining & Smelting Co., 1905		1,261,551.00
Granby Mining & Smelting Co., 1904		1,825,650.00
John G. Guinn	640	83,387.00
Pittsburg-Joplin Lead & Zinc Co.	10	58,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	413,294.00
United Zinc Co.	120	890,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 130 per cent., the Omega 117 per cent., and many others yield enormous returns.

SHAFT NO. THREE.

BIRD'S-EYE VIEW OF PROPERTY.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize his opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $10.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $10.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 80 feet in diameter. The shaft of the Hobo Mine was sunk within 5 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 2 at 57 feet depth, and the shaft is still in the ore at 76 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No 1 shaft, 5 1-2 by 8 feet, is down 88 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 8 feet, well timbered, with shafthouse, derrick and boilerhouse, in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 5 1-2 by 7½ feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 16 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Scarcely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscoola Mining Co.	34 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	45 per cent.	Mocking Bird Mining Co.	64 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	25 per cent.	Dinger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	130 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it. Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 1 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and so purchased by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

Manhattan Gold Field

If you never invest you never make

The millionaires of today are the investors of yesterday.

In choosing your investment these things should be considered: the ability, responsibility and integrity of those in charge of the company; that the property is in a proven district, and is owned by the company, and that gold has been found upon the property; that the money is being used for the interests of the company; that the company has no debts or obligations.

We have all these essentials, and own four claims, located in the heart of the Wonderful Manhattan District, from all of which we have taken rich ore, OUR AVERAGE ASSAY BEING OVER $400.00 TO THE TON.

We have so thoroughly tested our claims that WE KNOW WHAT WE HAVE. THE TIME TO BUY IS NOW! Stock selling at 10 cents a share, par value One Dollar, fully paid and non-assessable.

REPORT OF OFFICERS

"To the Directors of the Manhattan Independent Mining Co.:

"We have been in Manhattan, Nevada, and thoroughly tested our four claims, namely, 'American Flag,' 'Anglo Celtic,' 'Peerless' and 'Independent,' and personally took 100 or more samples of ore from different places along the 5200 feet of main ledge crossing our claims, and across the width of same, together with numerous samples from the cross-ledges, and had the same assayed, and the result of the assay was an average of $400.00 to the ton. We also had some of the samples panned, and the pannings bore out the assays. These samples were in no way selected, but were taken from all the ledges with no regard to value. Our property is all we could ask and is easy of access. Throughout our entire 80 acres we have an unlimited rich deposit of free milling gold, as good as the best in this wonderful camp.

"Respectfully submitted,
"WM. R. PAYNE, President.
"J. ROGER BROWN, Secretary."

tice might very swiftly have had her way had not a long, clear bugle call, rising and falling in a thousand little twirls and flourishes, clanged out suddenly in the still morning air. De Catinat pricked up his ears at the sound of it like a hound at the huntsman's call.

"Did you hear, Amos?"

"It was a trumpet."

"It was the guards' bugle call. You, there, hasten to the gate! Throw up the portcullis and drop the drawbridge! Stir yourselves, or even now you may suffer for your master's sins! It has been a narrow escape, Amos."

"You may say so, friend. I saw him put out his hand to her hair even as we sprang from the window. Another instant and he would have had her [illegible]. But she is a fair woman—the [illegible] that ever my eyes rested upon—I [illegible] it that she should kneel [illegible] on these boards." He dragged [illegible]'s long black cloak from [illegible] and made a pillow for the sense[illegible] woman with a tenderness and delicacy which came strangely from a man [illegible] his build and bearing.

He was still stooping over her when there came the clang of the falling [illegible], and an instant later the clatter of the hoofs of a troop of cavalry, who swept, with wave of plumes, toss of manes and jingle of steel, into the courtyard. At the head was a tall horseman in the full dress of the [illegible], with a curling feather in his [illegible] high buff gloves and his sword gleaming in the sunlight. De Catinat's face brightened at the sight of him, and he was down in an instant beside his stirrup.

"De Brissac!" he cried.

"De Catinat! Now where in the name of wonder did you come from?"

"I have been a prisoner. Tell me, De Brissac, did you leave the message in Paris? And the archbishop came? And the marriage?"

"Took place as arranged. That is why this poor woman whom I see yonder has had to leave the palace."

"I thought as much."

"I trust that no harm has come to her?"

"My friend and I were just in time to save her. Her husband lies there. He is a fiend, De Brissac."

"Very likely. But an angel might have grown bitter had he had the same treatment."

"We have him pinioned here. He has slain a man, and I have slain another."

"On my word, you have been busy."

"How did you know that we were here?"

"Nay, that is an unexpected pleasure."

"You did not come for us, then?"

"No; we came for the lady. Her brother was to have taken her in his carriage. Her husband learned it, and by a lying message he coaxed her into his own, which was at another door. When De Vivonne found that she did not come and that her rooms were empty he made inquiries and soon learned how she had gone. De Montespan's arms had been seen on the panel, and so the king sent me here with my troop as fast as we could gallop."

"Ah, and you would have come too late had a strange chance not brought us here. I know not who it was who waylaid us, for this man seemed to know nothing of the matter. However, all that will be clearer afterward. What is to be done now?"

"I have my own orders. Madame is to be sent to Petit Bourg, and any who are concerned in offering her violence are to be kept until the king's pleasure is known. The castle, too, must be held for the king. But you, De Catinat, you have nothing to do now."

"Nothing save that I would like well to ride into Paris to see that all is right with my uncle and his daughter."

"Ah, that sweet little cousin of thine! By my soul, I do not wonder that the folk know you well in the Rue St. Martin. Well, I have carried a message for you once, and you shall do as much for me now."

"With all my heart. And whither?"

"To Versailles. The king will be on fire to know how we have fared. You have the best right to tell him, since without you and your friend yonder it would have been but a sorry tale."

"I will be there in two hours."

"Have you horses?"

"Ours were slain."

"You will find some in the stables here. Pick the best, since you have lost your own in the king's service."

The advice was too good to be overlooked. De Catinat, beckoning to Amos Green, hurried away with him to the stables, while De Brissac, with a few short, sharp orders, disarmed the retainers, stationed his guardsmen all over the castle and arranged for the removal of the lady and for the custody of her husband. An hour later the two friends were riding swiftly down the country road, inhaling the sweet air, which seemed the fresher for their late experience of the dank, foul vapors of their dungeon.

CHAPTER XVI.

TWO days after Mme. de Maintenon's marriage to the king there was held within the humble walls of her little room a meeting which was destined to cause untold misery to many hundreds of thousands of people.

The time had come when the church was to claim her promise from madame, and her pale cheeks and sad eyes showed how vain it had been for her to try to drown the pleadings of her tender heart by the arguments of the bigots around her. She knew the Huguenots of France. Who could know them better, seeing that she was herself from their stock and had been brought up in their faith? She knew their patience, their nobility, their independence, their tenacity. What chance was there that they would conform to the king's wish? A few great nobles might, but the others would laugh at the galleys, the jail, or even the gallows, when the faith of their fathers was at stake. If their creed were no longer tolerated, then, and if they remained true to it, they must either fly from the country or spend a living death tugging at an oar or working in a chain gang upon the roads.

The eloquent Bishop Bossuet was there, with Louvois, the minister of war, and the thin, pale Jesuit, Father la Chaise, each piling argument upon argument to overcome the reluctance of the king. Madame bent over her tapestry and weaved her colored silks in silence, while the king leaned upon his hand and listened with the face of a man who knows that he is driven and yet can hardly turn against the goads. On the low table lay a paper, with pen and ink beside it. It was the order for the revocation, and it only needed the king's signature to make it the law.

"And so, father, you are of opinion that if I stamp out heresy in this fashion I shall assure my own salvation in the next world?" he asked.

"You will have merited a reward."

"And you think so, too, M. Bishop?"

"Assuredly, sire."

"Besides, sire," said Pere la Chaise softly, "there would be little need for stronger measures. As I have already remarked to you, you are so beloved in your kingdom that the mere assurance that you had expressed your will upon the subject would be enough to turn them all to the true faith."

"I wish that I could think so, father; I wish that I could think so. But what is this?"

It was his valet who had half opened the door.

"Captain de Catinat is here, sire."

"Ask the captain to enter. Ah!" A happy thought seemed to have struck him. "We shall see what love for me will do in such a matter, for if it is anywhere to be found it must be among my own body servants."

The guardsman had arrived that instant from his long ride, and, leaving Amos Green with the horses, he had come on at once, all dusty and travel stained, to carry his message to the king. He entered now and stood with the quiet ease of a man who is used to such scenes.

"What news, captain?"

"Major de Brissac bade me tell you, sire, that he held the castle of Fortilac, that the lady is safe and that her husband is a prisoner."

Louis and his wife exchanged a quick glance of relief.

"That is well," said he. "By the way, captain, you have served me in many ways of late and always with success. I hear, Louvois, that De la Salle is dead of the smallpox."

"He died yesterday, sire."

"Then I desire that you make out the vacant commission of major to M. de Catinat. Let me be the first to congratulate you, major, upon your promotion."

De Catinat kissed the hand which the monarch held out to him.

"May I be worthy of your kindness, sire!"

"You would do what you could to serve me, would you not? Then I shall put your fidelity to the proof."

"I am ready for any proof."

"It is not a very severe one. You see this paper upon the table. It is an order that all the Huguenots in my dominions shall give up their errors, under pain of banishment or captivity. Now I have hopes that there are many of my faithful subjects who are at fault in this matter, but who will abjure it when they learn that it is my clearly expressed wish that they should do so. Do you follow me?"

"Yes, sire." The young man had turned deadly pale, and he shifted his feet and opened and clasped his hands.

"You are yourself a Huguenot, I understand. I would gladly have you, then, as a first fruit of this great measure. Let us hear from your own lips that you, for one, are ready to follow the lead of your king."

The young guardsman still hesitated, though his doubts were rather as to how he should frame his reply than as to what its substance should be. He

Authorized Capital Only $600,000

Divided into 600,000 Shares

Par value $1.00 each—fully paid and non-assessable
Only 300,000 shares for sale at par

PROPERTIES

MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east, on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

Provincial Securities Company, Limited

U. S. Army Bill Passed

Washington, February 14.—The Senate yesterday passed the Army Appropriation Bill, carrying $81,000,000. The amendment to permit the Government to accept reduced rates on army supplies and to permit officers and enlisted men to accept reduced transportation was defeated on a point of order by Senator McCumber, after the day had been spent in its discussion.

Died for His Belief

Kansas City, Feb. 15. — Bradford Hibbard Cox, a Sunday school worker and evangelist, who is well known in Boston and other cities, died yesterday from ptomaine poisoning after eating oysters. His wife also is ill. He refused medical attendance on the grounds of belief.

Life's Pleasures Rest on Nourishing Blood

Is Yours Rich, or Weak?

If your color is poor, your blood is poor.

If you lack strength, can't get fat, can't do your work, it's because your blood is too thin to nourish the body.

Your condition is like an expiring fire. Fuel must be added or the fire goes out.

Nutriment, new building material must be instantly infused into the blood—the vital stream must be quickened and enriched. Do this and your health is assured.

Simply take Ferrozone.

Its marvellously stimulating influence upon the appetite upon the formation of rich, red blood makes available for building up of the system the very nutriment it requires.

The heart, strengthened by the increased nutrition Ferrozone supplies, is more regular in its action, and imparts an impetus to the circulation that ensures the proper discharge of all the functions of the body.

There very quickly sweeps through the whole body a stream of vitalized, strength-giving blood.

Quickly color is restored to the cheeks.

Elasticity, endurance and vigor come to the muscular system.

In brief, the old time strength and vigor are restored, and those inestimable charms that spring from good health, high spirits and endurance, are gained by even a short use of Ferrozone.

A true, uplifting tonic, a medicine that goes to the root of things—one that makes the weak strong, makes the sick well—makes the despondent ones happy—that is Ferrozone. Truly a wonderful remedy, try it, 50c. per box at all druggists.

LOCAL INCIDENTS

By The Times-Man on the Street

—Elco Camp will hold its annual banquet on Monday night next.

—Dr J. N. Johnston, who has been practicing in Lindsay, has returned to Lakefield to practise.

—A great many membership tickets to the Peterborough Agricultural Society are being sold.

—The concert to provide an instrument for the House of Refuge has been fixed for a date in the second week in March.

—Mr. C. O. Northey, who has been conducting a livery in Lakefield for the past year, has sold out to Messrs. Charles and Albert Graham.

—A number of Peterborough dentists will attend the Dentists' Association convention to be held in Toronto on the 25th to the 27th.

—The Bell Telephone Co., have a gang of men at work engaged in putting in a line from Lakefield to Mr A. L. Davis' cottage at Stony Lake.

—The Finance Committee are working hard on the estimates for 1907, and it is expected that finance minister Ald. Tovey will deliver his budget speech at an early date.

—It was neither mosquitos or a torn paper hare and hounds chase yesterday, but a regular old fashioned snow-storm such as the oldest inhabitant loves to lie about.

—Mr. James Robertson who bought Mr. C. Curtis' business in Fenelon Falls, about fifteen months ago, has sold his stock to W. Burgoyne & Son.

—The water commissioners met yesterday afternoon and considered the advisability of giving land to the Coutes Co., Ltd., and also the extension of the water works to the company's works.

—R. A. Johnston, of Peterborough, the man who was so painfully scalded in the boiler explosion at the Feather Company's Works on West Main street is much better, and his recovery is assured.—Gazette Reporter.

—A meeting of the directors of the Peterborough Agricultural Society will be held on Thursday afternoon next to receive reports from the sub-committees in charge of the revision of the prize lists.

—The directors of the Otonabee Power Co., will meet on Saturday night when the resolution the city council has prepared re the 500 horse power arrangement with the company will be considered.

—Mr. R. M. Donnistoun, of Peterborough, will deliver his interesting lecture on "Jean Valjean," in the town hall, Lakefield, on Monday evening, March 4th, under auspices of the King's Daughters' Mission Band of the Presbyterian church.

—Rev. G. W. Henderson, of Port Hope Methodist church, who preached Sunday school anniversary sermons in George Street Methodist church in Peterborough on Sunday last, has been invited to remain for a fourth year in Port Hope.

—At the regular meeting of the Young Men's Guild of St. Paul's church next Tuesday night, Mr. F. D. Kerr will give an address on his recent trip to Great Britain and the continent. There will also be several musical numbers on the program.

—Mr. W. D. Loomis, president of the Cavendish Lumber Co., in company with Mr. H. J. Birrell, of Orillia, and Mr. D. Davidson, of Peterborough, have left up visit a number of the timber limits of the company in the northern section of the county.

Scheming School to be Ended

Mr. George Cochrane, truant officer, is after several children who have been playing truant. The inspector has had several names handed to him. He has served notices at 21 different homes to the effect that children had been "scheming school," and will positively prevent a continuation of this breach of the of the law.

Mr. W. Toole Has Returned

Mr. Wm. Toole, son of the late ex-Mayor Toole of this city, left for Winnipeg yesterday, after a three weeks' visit here, the guest of Lieut. Graham, Mr. Will Metherall, Aylmer street. It is about 25 years since Mr. Toole left for Winnipeg, where he now conducts an extensive plumbing business. He was much pleased with the great progress visible every where in his old town.

FOOD QUESTION

Settled With Perfect Satisfaction by a Dyspeptic.

It's not an easy matter to satisfy all the members of the family at meal time as every housewife knows.

And when the husband has dyspepsia and can't eat the simplest ordinary food without causing trouble, the food question becomes doubly annoying.

An Ill. woman writes:

"My husband's health was poor, he had no appetite for anything I could get for him, it seemed.

"He was hardly able to work, was taking medicine continually, and as soon as he would feel better would go to work again only to give up in a few weeks. He suffered severely with stomach trouble.

"Tired of everything I had been able to get for him to eat, one day seeing an advertisement about Grape-Nuts, I got some for him to try for breakfast the next morning.

"We all thought it was pretty good although we had no idea of using it regularly. But when my husband came home at night he asked for Grape-Nuts.

"It was the same next day and I had to get it right along, because when we would get to the table the question, 'Have you any Grape-Nuts' was a regular thing. So I began to buy it by the dozen pkgs.

"My husband's health began to improve right along. I sometimes felt offended when I'd make something I thought he would like for a change, and still hear the same old question, 'Have you any Grape-Nuts?'

"He got so well that for the last two years he has hardly lost a day from his work, and we are still using Grape-Nuts." Name given by Postum Co., Battle Creek, Mich. Read the book "The Road to Wellville," in pkgs. "There's a Reason."

SOCIAL AND PERSONAL

—Mr. Wm. Snowden is much improved in health.

—Mr. J. A. McLean, of Lindsay, was in the city yesterday.

—Mr W. K. Hasp, of Hastings, was in the city yesterday.

—Mr. E. C. McMurty, of Galt, is a guest at the National.

—Miss Mazel Thowen has returned from visiting friends in Toronto.

—Mr. C. R. Corbin, of Los Angeles, Cal., is registered at the Oriental.

—Mr. John Curtis, of Port Hope, was in the city yesterday.

—Mr. A. T. Green, merchant of Campbellford, was in the city yesterday.

—Mr C. S. Wallis, who has been spending a few days in Toronto, has returned to the city.

—Mr. G. L. Main of the Bank of Montreal staff, Fenelon Falls, is spending a few days in the city.

—Hastings Star: Mr. H. P. Lindsay, of Peterborough, was in town on Tuesday.—Miss D. Welsh of Peterborough, is the guest of Mrs. J. Graham.

—Mr. Rudolphe Otto, of Winnipeg, is the guest of his sister, Mrs. R. Gliddon, of the Peterborough Conservatory of Music.

—Mr. Harris, of the "Thorns and Orange Blossoms Company," which is to appear in the local opera house next week, is in town.

—Rev. J. G. Potter, of St. Andrew's church, Peterborough, will preach special anniversary sermons in the Presbyterian church, Norwood, Sunday, Feb. 24th.

—Mr. Robert G. Ritchie, of Peterborough, was in town on Thursday last. Mr. Ritchie is in the employ of the Mann Lumber and Cheese Box Co.—Norwood Register.

Piles get quick relief from Dr. Shoop's Magic Ointment. Remember it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding, or blind piles disappear like magic by its use. Try it and see. J. D. Tully.

Smooth Stranger Works an Old "Con" Game

An Indian River despatch of yesterday says:

Richard Graham, a young man from Toronto, whose father is reported to be wealthy, is wanted in this vicinity on the charge of obtaining $40 under false pretences from John Smith, a farmer.

Graham has been staying with farmers for some months past, and has made many friends. It seems that he bought a horse from Mr. Smith, for $140, giving in payment a cheque for $180 on the Bank of Montreal, Peterborough, alleged to be signed by his father, George Graham of Toronto. He received the horse and $40 in bills. When Mr. Smith presented the cheque at the bank he was told there were no funds. Graham, is believed to have taken the train to Toronto, and efforts are now being made to effect his arrest. He left the horse, but Mr. Smith is out $40 in good money on the deal.

Mr. Hollingshead on Sad Mission

The Times begs to express its most sincere sympathy with Mr. A. A. Hollingshead, manager of the local branch of the Ottawa Bank, on his recent sad bereavement. It seems that this popular local banker has for some days been at the bedside of his stricken father at Newmarket. We regret to note that Mr. Hollingshead's father has passed away. Mr. A. A. Hollingshead will in a day or so be able to attend to his duties after his recent sad bereavement.

A Pretty Otonabee Wedding

One of the most interesting ceremonies celebrated for some time in Otonabee, was the wedding held at the popular township Reeve's residence when, on Wednesday evening, his daughter, Miss Louisa Fife, was united in the holy bonds of matrimony to Mr. Thos. A. Robertson, of Pipestone, Man. The ceremony was performed in the presence of the immediate relatives, by Rev. W. D. Harrison pastor of Keene Methodist church. Mr. Robertson and bride are spending a few days in Peterborough previous to leaving for their future home in Pipestone, Man.

Local Sports Go off Fishing

Ex-alderman Stewart, the well-known roofing contractor of Toronto, Arthur Blade, Jas. Bogue, the well-known local stone and masonry contractor, and M. C. Tooley, the popular proprietor of the Queen's Hotel, corner of Charlotte and Aylmer streets, yesterday drove out to Lemoine Lake to engage in that cold, generally unsatisfactory but still legitimate sport of fishing through the ice on Chemong Lack. It might be noted that ex-Ald. Stewart had the contract for roofing the King Edward school as well as many Toronto public and private structures.

Police Will Arrest Bees

Judging by rumors heard yesterday a south-end resident of Hamplates suing the city because his bees, be-fooled by electric lamps worked overtime. These industrious examples of work got busy both night and day under the (without and/or ice), electric light. It was rumored that the city officials in charge of such matters advocated a supply of blue goggles for the industrious bees. This, however, is incorrect. We learn that an official will be appointed to run a phonograph in front of the hives, which will play, "Boys and girls DON'T come out to play, the moon is not shining nor is it day!" If this does not settle case for damages an officer will be placed at the hives to arrest every fool bee wanting to work 24 hours a day on a charge of vagrancy.

Of Interest To Women.

To such women as are not seriously out of health, but who have exacting duties to perform, either in the way of household cares or in social duties and functions which seriously tax their strength, as well as to nursing mothers, Dr. Pierce's Favorite Prescription has proved a most valuable supporting tonic and invigorating nervine. By its timely use, much serious sickness and suffering may be avoided. The operating table and the surgeons' knife, would, it is believed, seldom have to be employed if this most valuable woman's remedy were resorted to in good time. The "Favorite Prescription" has proven a great boon to expectant mothers by preparing the system for the coming of baby, thereby rendering childbirth safe, easy, and almost painless.

Bear in mind, please that Dr. Pierce's Favorite Prescription is not a secret or patent medicine, against which the most intelligent people are quite naturally averse, because of the uncertainty as to their composition and harmless character, but is a MEDICINE OF KNOWN COMPOSITION, a full list of all its ingredients being printed, in plain English, on every bottle-wrapper. An examination of this list of ingredients will disclose the fact that it is non-alcoholic in its composition, chemically pure, triple-refined glycerine taking the place of the commonly used alcohol, in its make-up. In this connection it may not be out of place to state that the "Favorite Prescription" of Dr. Pierce is the only medicine put up for the cure of woman's peculiar weaknesses and ailments, and sold through druggists, all the ingredients of which have the unanimous endorsement of all the leading medical writers and teachers of all the several schools of practice, and that too as remedies for the ailments for which "Favorite Prescription" is recommended.

A little book of these endorsements will be sent to any address, post-paid, and absolutely free if you request same by postal card, or letter, of Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. Easy to take as candy.

Bob. Ind. on House of Refuge

The Bobcaygeon Independent says; This g. j. has always declined to refer to the County Home as a House of Refuge. It is pleasing to this g. j. to notice that several of its esteemed contemporaries are catching on to the vast difference there is in the terms and are adopting and advocating the word Home in place of Refuge. The difference consists in a spirit of Christian brotherhood. That is all. Strange is it not, how generally this spirit is ignored.

To stop a Cold with "Preventics" is safer than to let it run and cure it afterwards. Taken at the "sneeze stage" Preventics will head off all colds and Grippe, and perhaps save you from Pneumonia or Bronchitis. Preventics are little toothsome candy cold cure tablets selling in 5 cent and 25 cent boxes. If you are chilly, if you begin to sneeze, try Preventics. They will surely check the cold, and please you. Sold by J. D. Tully.

Park Street Church Notes

The third quarterly business meeting of the year, was held last night in Park street church, with the pastor in the chair. Minutes of the quarter were read by Church Clerk Geo. Sloan. The church granted licenses to two young men as lay preachers. Arrangements were made for the revival services by Evangelist Rev. Alexander Torrie, B.A.

No Fear of a Mistrial in Thaw Murder Case

Prisoner Does Not Want His Sanity Tested---Doctors Watched Thaw While Asleep in Prison.

New York, Feb. 17.—Funeral services for Mrs. Joseph B. Bolton, wife of one of the jurymen in the Thaw trial, was held yesterday. Arrangements had been made for the presence of police reserves about the Bolton home to guard against the intrusion. Junor Bolton is bearing up well under his bereavement. Ad Dr. H. H. Tinker, his family physician, telephoned the District Attorney last evening that Mr. Bolton would be able to take his place with the other eleven jurors on Monday. All doubt as to whether the trial was to continue or was to end in a mistrial was thus practically dispelled.

Thaw had a long conference yesterday with A. Rushell Peabody, of his counsel, regarding the reports that District Attorney Jerome was paving the way to apply for a commission in lunacy.

Mr. Peabody said Thaw expressed a wist that his counsel should make every possible effort to prevent the appointment of a commission. This, Mr. Peabody said, would be done.

TWO NEW WITNESSES.

The names of two new witnesses who may be called have been made public. One is Dr. Francis L. Patton, former president of Princeton university, and now president of Princeton Theological Seminary; the other is Dr. Frank P. McGuire, the Tombs physician. The former will appear for the defence, while McGuire, it is said, will appear for the prosecution.

Through Dr. Patton the defence hopes to get in evidence a letter written by Thaw soon after his arrest. It is the contention that if this letter is admitted in evidence it will have a great bearing on showing the condition of Thaw's mind right after his arrest in regard to the killing of Stanford White.

A PECULIAR LETTER.

Delphin M. Delmas, of Thaw's counsel feels that the letter will be competent testimony to corroborate Dr. B. D. Evans' testimony that Thaw was out of sound mind in August, about two months after the shooting. It is recalled that Dr. Patton called on Thaw in the Tombs in the summer.

Through Dr. McGuire, it is stated, the district attorney expects to lay the foundation for the opinion of alienists that Thaw was sane on the night of June 25, when he killed Stanford White. The Tombs' physician is said to be of the opinion that Thaw when he killed White knew the quality of the act and knew the distinction between right and wrong.

WATCHED THAW ASLEEP.

The physician, it is said, has kept a careful record of Thaw's appearance, words, actions, and moods, and is prepared to give every day's detail of the prisoner's life since June 26.

Even during the night, it is said, while Thaw has been asleep, he has at times been under the observation of the doctor, who found that the prisoner slept quietly, and never had any nightmare disturbances of sleep, such as are noticed in well-defined cases of insanity.

An interview was published yesterday with Mrs. J. J. Caine, the intimate friend of Evelyn Nesbit Thaw, who is to be a witness for the defence to combat the testimony favorable to Stanford White, which it is anticipated Howard Nesbit will give if sworn as a witness for the State.

Mrs. Caine is quoted as saying that she had heard Harry Thaw ask Evelyn Nesbit's mother for her hand at the time the girl was at school at Pompton, N.J., accompanying the proposal of marriage with a promise that if Evelyn became his wife he would, on the wedding day, settle on Mrs. Holman, then Mrs. Nesbit, $100,000 or more. The mother's answer to this, she said, was that she would try her best to persuade Evelyn Evelyn to accept Thaw.

Mrs. Caine says she was hidden in Mrs. Holman's bathroom, where she was hurried when Thaw's coming was announced, when the proposal was made.

Peterboro' Boy in Important Position

Capt. H. C. Rogers is Surveyor of Prisons for England and Wales.

The Times respectfully joins with the many friends of Lieut.-Col. H. C. Rogers in tendering that gentleman hearty congratulations on the recent important position to which his son Capt. H. S. Rogers, C.E., a old Peterborough boy has been appointed.

Capt. Rogers, who graduated at the R.M.C., Kingston, has been in the English army, India, for the past thirteen years, and for the past two years been on the War Office staff, London, England.

This gallant young soldier has accepted the important position of surveyor of Prisons for England and Wales offered him by the Home Government. The position is only in connection with the buildings, and is always filled with a Royal Engineer, and it not only reflects great credit on Capt. Rogers' recognized ability but honor upon the Canadian college where he graduated.

Lieut.-Col. Rogers has obtained a month's leave of absence from his official duties as postmaster, and on Saturday left for North [illegible] to meet the captain, who is on a visit to Canada, previous to entering on his new duties in England on April 1st. They will journey to British Columbia, where Capt. Rogers will join his mother, who has been there for some time.

Lenten Services in St, John's Church

Last night in St. John's church, Rev. Canon Davidson, the rector, began his special series of sermons, which will be continued during the Lenten season. His subject last night was "Jesus the Good Shepherd." His subsequent Sunday evening sermons will be,—"Jesus, the Great Physician," "Jesus, the Light of the World," "Jesus, the Bread of Life," "Jesus, the True Vine," "Jesus, the Saviour King."

Yesterday the first Sunday in Lent, a fellowship tea was held at 5:30 p.m.

The Wednesday evening addresses will be as follows;—

February 20—Rev. A. J. Fidler, M. A., Grace church, Toronto.

February 27.— Rev. A. J. F. Cobb, M.A., St. Mark's, Port Hope.

March 6—Rev. C. Ensor Sharp, M. A., St. Thomas, Toronto.

March 13.— Rev. C. H. Brooks, B. A., St George's, Grafton.

March 20—Rev. A. G. Hamilton, Dicerk, A.K.C., St. Luke's, Toronto.

Third Y.M.C.A. Pop Most Successful

The third Y.M.C.A. "Pop" held Saturday evening with Mr. R. E. Harding in the chair was well attended and thoroughly enjoyed by all present. A most interesting program was presented as follows;

Instrumental, Mr. J. W. Bennett.
Song, Mr. D. Campbell.
Song, Miss Marguerite Fanning.
Recitation, Miss Bell.
Song, "Because I'se Always Laffin'" Mr. W. J. Coleman.
Song, Miss Mabel Rickey.
Chalk Sekteh, Mr. F. H. Dobbin.
Duet (humorous), "Why of Course," Coleman Bros.
Song, "The Flight of Ages," Mr. A. G. Hall.
Banjo Solo, "Southern Echoes," Mr. Will Dundas.
Song, (humorous) selected, Mr. W. MacLaren.
Recitation, Mr. Barnett.
Song, Miss Marion Elliott.
Song, "My Impressive Kiddies," M. C. E. Coleman.

Coal Bank Burning Over Hundred Years

Seam Twenty Miles in Length Has Been On Fire Since Mackenzie Saw It in 1789.

Ottawa, Feb. 16.—Before the special committee of the Senate on the Hudson's Bay route and the resources of Canada's hinterland, Professor Von Hammerstein gave evidence yesterday as to his explorations in North-Western Canada. He stated that on the lower part of the Athbaska River there was a seam from which gases could be made and natural gas with which to melt it. The greatest gas well in the world was located at Pelican Portage. Eleven years ago, when a Government well was being sunk there, in searching for oil, boring was stopped by a rush of gas. This gas has been blowing out and burning ever since. There were indications, said Professor Von Hammerstein, that the greatest petroleum field in the world would be developed in the country lying between the Athabaska and Peace Rivers.

Mr. Elihu Stewart, Dominion Superintendent of Forestry, said that the growth of vegetation in the Mackenzie Basin was surprising, the sun in the summer being visible for about twenty hours out of the twenty-four. On July 15 at Fort Providence, near Slave Lake, on the Mackenzie River, about 550 miles north of Edmonton, Mr. Stewart said he saw wheat in the milk, potatoes in flower, peas fit to use, tomatoes, turnips, rhubarb, beets, cabbage, onions, and other garden vegetables. The strawberries had been ripe there for some time, and the people had currants and gooseberries. To illustrate the heat, he said at Fort Chipewayan it had been 100 degrees in the shade for several days and nights. Indians coming from the Alaska boundary to meet the steamer Wrigley had lost two dogs from heat in the Arctic Circle. He thought systematic exploration would show a surprising amount of good country, extending down from Slave Lake to Peace River. Along the Mackenzie River spruce grew clear to the shores of the Arctic Ocean. There were aspen, white poplar, balm of gilead, and birch growing as far north as Fort Macpherson.

Mr. Stewart said that on Slave River he had passed a bank of burning coal about twenty miles in length near Fort Norman, which Mackenzie had reported burning in 1789, and which has been burning ever since.

Mr. Culverwell to Talk Power Here

Referring to former notices given in these columns regarding Peterborough's future source of power, it might be noted that Mr. J. A. Culverwell, of Colbourg has rent the following letter to his Worship Mayor McWilliams;

Dear Sir,—Unforeseen and urgent business has deprived me from interviewing you this week and re the Burleigh Falls electric proposition, as intimated to you by mytelegram of the 11th which you no doubt received.

And as a previously arranged business engagement demands my presence at a distance the early part of this week, it will be impossible to reach Peterborough until the middle of the week.

However, as the council in the meantime is no doubt securing further information and increasingly better proposals from the several Peterborough lighting and power companies, your will be better able to arrive at a decision in this momentous question. One thing can be depended on and that is, we are able to satisfy the true needs of the city of Peterborough, better than others.

Yours very truly.
J. ALEX. CULVERWELL,
Managing Director.

SPORTING TOPICS

CURLING.

This will be curlers' week in Peterborough. The great local annual bonspiel of the Peterborough Curling Club opens tomorrow and will continue throughout the week. It is expected that it will be the most successful event of its kind ever held in Peterborough, and the committee in charge are leaving nothing undone to ensure a grand success. All the clubs in the district will be represented and curlers will be probably present from places, hitherto unrepresented at the Peterborough bonspiel. Hamilton is sending a rink, and in all probability Perth will be represented. Among the other clubs that will take part in the bonspiel are —Lindsay, Fenelon Falls, Bobcaygeon, Orillia, Beaverton, Oshawa, Port Hope, Cobourg, Keene, Norwood, Lakefield, etc. In addition to the above over a dozen local rinks will play, so that several hundred knights of the besom and stone will be in the city.

The committee in charge has secured the Brock street rink for the first two or three days of the spiel. Four rinks will be marked out there, which with the six rinks at the Charlotte street building will give a total of ten rinks. This means that eighty curlers can be at play at the same. Many of the outside rinks will arrive this afternoon and evening, and the draw will be made tomorrow morning. The ice is in excellent shape as Mr. Angus McIntosh is an expert in the line of ice making. Handsome and attractive prizes are offered for competition. There will no doubt be many interesting games during the week.

• • • •

HOCKEY.

Judging by Lindsay despatches regarding the game in that town between the Scugog Midgets and the Belleville Juniors, the game which Lindsay claims by a score of five points to the good must have been been a corker, as at one period so many had been penalized that only three players on each side were in the game. As it is the result of the game will have to be decided by the O.H.A Executive as play stopped three minutes before time was up. Wagborne who refereed, gave general satisfaction.

Checked Their Baby

New York, Feb. 17.—Being anxious to hear Mme. Melba in "Rigoletto," at the Manhattan Opera House on Thursday night, Mr. and Mrs. Robert Lewis, of Winnipeg, Manitoba, asked if their eighteen-months-old baby could be checked in the cloak room. The maid asked the manager, he consented, and the baby slept on a pile of coats throughout the performance.

NORTHERN CANADA LAND OF SURPRISES

Important Information Regarding Recources of the North-West.

VEGETATION IN FAR NORTH

Valuable Minerals, Timber and Other Products Abound in Vast Mackenzie Basin.

Ottawa, February 18.—Some interesting evidence was given before the Senate Committee on the Hudson Bay route and resouces of the north by Professor von Hammerstein, who has made extensive exploration trips through North-Western Canada.

Among the resources he mentioned was hematite iron, of which there is a large and extensive deposit between Athabasca Landing and the mouth of the Great Slave River. On the lower part of the Athabasca there was stone suitabel for building, clay suitable for making brick, sand from which glass could be made, and natural gas, with which to melt it. The greatest gas well in the world is located at Pelican Portage. The Government sunk a hole 350 feet deep there when searching for oil eleven years ago. Boring was stopped by a rush of gas, and it has been blowing out and burning ever since. Near the mouth of the Peace River is a deposit of gypsum. There are indications that the greatest petroleum field in the world will be developed in the country lying between the Athabasca River and the Peace River.

VEGETATION IN FAR NORTH.

Mr. Elihu Stuart, Superintendent of Forestry, showed the committee samples of wheat and barley grown at the Catholic Mission on Lesser Slave Lake. Between this lake and the Peace River he said there were stretches of spruce suitable for sawing into lumber and a great quantity of spruce and poplar suitable for fencing and fuel. Mr. Stuart stated that the MacKenzie Basin has an area of 161,000 square miles, which is 100,000 square miles larger than the St. Lawrence and Great Lakes basin. Though lying well to the north, the growth of vegetation in this basin was surprising. This was owing to the great length of the day in summer, the sun being visible for about twenty hours out of the twenty-four. On July 15, at Fort Providence, near Slave Lake, but on the MacKenzie River, in latitude 61.26, about 550 miles north of Edmonton, Mr. Stuart said he saw wheat in the milk, potatoes in flower, peas fit to use, tomatoes, turnips, rhubarb, beets, cabbage, onions and other garden vegetables. The strawberries had been ripe there for some time and the people had currants, gooseberries and saskatoons.

TROPIC WEATHER IN ARCTIC ZONE

The wheat he saw had been sown on May 20th, so its development had been very fast. To illustrate the heat, he said at Fort Chipewayan it had been 100 degrees in the shade for several days and nights. Indians coming from the Alaskan boundary to meet the steamer Wrigley had lost two dogs from heat in the Arctic circle.

Mr. Stuart stated that travellers got an exaggerated impression of the amount of muskeag in Northern Canada, owing to the fact that they travelled by streams and lakes in summer and in winter the dog routes followed the water courses. He thought systematic exploration would show a surprising amount of good country extending down from Slave Lake to Peace River.

Along the MacKenzie River, spruce grew clear to the shores of the Arctic Ocean. There was aspen, white poplar, balm of gilead and birch growing as far north as Fort MacPherson. At the junction of the Peace and Slave Rivers timber grows as large as 14 inches in diameter, diminishing in size to the north. He had been greatly surprised to find how far to the north the limit of tree growth extended. It was probably 10 degrees further north in this district than in Labrador.

ABUNDANCE OF FISH.

In the MacKenzie and the lakes in the MacKenzie Basin, there are white fish, pike, fresh water herring, the Arctic trout, and a large fish which Alexander MacKenzie, the explorer, called the "Incommu," and which has been shortened to "Conny." They weight 50 or 60 pounds.

Large quantities of fish can be obtained from Great Slave Lake and Athabasca Lake.

Mr. Stuart said that on the Slave River he had passed a bank of burning coal about twenty miles in length, near Fort Norman, which MacKenzie had reported burning in 1789, which has been burning ever since.

Children Slept in A Hole Under Floor

Were Brought From Near Tweed to the Shelter for Children in Toronto.

Toronto, Feb. 18.—There have arrived at the Children's Shelter in Toronto seven children, ranging from 2 to 13 years of age, who werefound living under terrible conditions by J. J. Kelso, Superintendent of Neglected and Dependent Children.

The discovery was made within a few miles of Tweed, where the family of Richard Lindsay, Jr., were found in a state of extreme wretchedness and neglect, living in a shack unfit for habitation. Their only bed was a hole in the ground under the floor, their clothing was of the scantiest, and they did not even have shoes to protect them during the winter. The children were brought before the magistrate at Tweed, and committed to the care of the society.

They will remain at the Shelter here until suitable homes can be secured for them.

Army of Troops to Guard Vatican

Rome, Feb. 17.—The government has taken the most energetic measures to prevent disorders during the anti-clerical demonstration tomorrow in favor of France on the occasion of the three hundred and seventh anniversary of the martyrdom of Giordano Bruno, the Italian philosopher, who was burned at the stake as a heretic on the campo Dei Fiori, here by order of the inquisition. The whole garrison of Rome will be kept in readiness, and two thousand soldiers will guard the Vatican.

It is expected that the death yesterday of Bologna of Giosue Garducci, the poet, will further inflame the anti-clericals, who will hold a monster meeting tonight and march in procession tomorrow.

Boiler Exploding Causes Fatality

Seven Killed and Three Injured in Catastrophe on Steamer.

New York, Feb. 17.—Six men and the stewardess were killed, and three men were injured, and considerable damage was sustained by the vessel, by an explosion of the donkey engine boiler on the German steamer Valdivia at sea last Wednesday. The accident was reported when the steamer arrived here yesterday. The explosion threw the steamer's funnel over and ripped open the upper deck.

All of the lifeboats were damaged, one being thrown overboard. The smoke stack fell down to the deck, but was secured. All of the inner structures abaft the bridge were completely torn out. The dead were so mangled that it was with difficulty that the bodies were secured. The dead were buried at sea.

The vessel came in under her own steam, as the general machinery was not affected, except that the loss of the smokestack interfered with the draft.

The Valdivia is a passenger and freight steamer belonging to the Hamburg-American Line, and plying in the Atlas Line service to Hayti and other ports in the West Indies.

Paris, Feb. 17.—In the Chamber of Deputies yesterday M. Lefebvre complained that the people of the Department of the Meuse, who would have to sustain the first shock in a war with Germany, were greatly exercised by the activity of the Germans on the frontier between Longwy and Montmedy. General Picquart, Minister of War, raised a storm of applause when he replied that if the Germans were violating the neutral territory of the Grand Duchy of Luxemberg France would take measures to meet the situation.

Wire Tappers From Canada Are Arrested in the States

Two Operators Who Had Worked on This Side Are Caught —Had a Get-Rich-Quick Scheme Person With $500 Capital.

Cincinnati, O., Feb. 17.—Under arrest at police headquarters are two men, giving the names of Harry F. Meyers and Frank E. Robinson, alias E. A. Bearson. Both are expert telegraph operators. Detectives Callahan and Jackson, who arrested them, say that they were ready to launch a scheme as soon as an opportunity presented.

Their arrest was accomplished through an advertisement which appeared in one of the local papers. The "ad." stated that a proposition was open for any person with $500 to make easy money. They were taken to headquarters and searched.

In the pocket of Robinson was a letter written on the official note paper of the House of Commons, Ottawa, Canada. Launching into detail the writer of the letter explained how wires could be cut so as toget the results of a race without the tapping being noticed by the operators at either end of the wire. The letter also implied that the recipient of the letter had been mixed up in such schemes before. The writer signed himself "Wilbur," and claimed that he had a broker's office in Ottawa, Canada.

The detectives went into the rooms occupied by Meyers and Robinson, and in a suit case they found a complete wire-tapping outfit — climbers, wires, rheostats, and sending and receiving instruments. The outfit was taken to police headquarters. Several letters were found in the possession of the men answering their advertisement. One was from an investment broker on Main street, and others from several prominent business men.

Robinson admitted that he was employed at the postal telegraph office. He admitted that the scheme they had been attempting to work was wire-tapping. Robinson and Meyers told the police that they originally came from Detroit and that they came to this city from Columbus. They said that they had worked in Canadian cities.

Empire is Not Being Run as a Syndicate

Says Mr. Churchill---As Opportunity Offered They Should String Their Resources of Defence League.

London, Feb. 17.—In the House of Commons, Harold Cox (Liberal) moved an amendment affirming that the first question to be laid before the Colonial Conference should be the importance of fuller participation by the colonies in the cost of Imperial defence.

Mr. Cox urged the Government to enter into negotiations with the colonies for a partnership on strictly defined equitable terms, similar to those embodied in the treaty with Japan.

Mr. Balfour said there ranged through Mr. Cox's speech a desire to treat the question of national defence rather in a strictly bargaining spirit than of interchange of services between different parts of the Empire, which ought to be the greatest link between the colonies and ourselves. If the colonies provided for their own defence we could not reduce the strength of the navy. He did not think it reasonable to ask a colonial parliament to vote money which somebody else was to spend. Better to trust to the patriotic enthusiasm of the colonies than a hard and fast organization.

Winston Churchill, speaking for the Government, thought it would be very wrong to measure in money the value of the services rendered by the colonies. The view of the Government was that the British Empire was not a business proposition, and was not to be looked upon in that light. It was framed on the principle of a family, not on the principle of a syndicate.

Continuing, he said the British armaments were not due in a great measure to association with the colonies, but he quite agreed that as the opportunity occurred the colonies should contribute to the common resources of what Lord Rosebery had called "our defensive league."

At the Colonial Conference, among the subjects found on the agenda would be the constitution of a committee on the Imperial defence question, and the colonial representation thereon. The strategic principal governing Imperial naval and military defence was the practicability of the colonies organizing forces for defence in time of war on the principles laid down in this country in regard to interchange of units and officers in the colonies, India, and the Mother Country.

He concluded that the government hoped to reduce the expenditure on armaments by peaceful negotiation and recourse to arbitration.

H. C. Fraser Bourdon pointed to the fact that Canada's contribution to Imperial defence has risen from $30,000, which Dominion has constructed the Canadian Pacific Railway, which is an alternative route to India that was a contribution to Imperial defence.

Sir Gilbert Parker said that Mr. Churchill's speech would be accepted not merely in the colonies, but throughout the whole Empire with great satisfaction.

Mr. Cox withdrew his amendment.

Boy Was Drugged With Strong Wine

Edmonton, Feb. 18.—Reeling home drunk from the effects of a glass of strong wine, singing and shouting at the top of his childish voice, and at last falling on the floor in terrible agony and screaming with pain, some little George Hayes, the 11-year-old son of Joseph Hayes, proprietor of the Dominion Dining Hall on Queen's avenue. One of the boarders at the Dominion, not feeling well, sent a note by the boy to the St. Elmo Hotel on Fraser avenue, almost directly at the rear of the restaurant, asking for a bottle of ginger beer. According to the boy's story some one at the hotel had given him a glass of wine, and not knowing the dire effects of the liquor, he drank the whole of it.

After the first hilarious feeling had passed away, intense pains racked the little fellow's body, and the family, in alarm, summoned a physician. Dr. Hyslop attended the boy, and at once saw that it was a case of alcoholic poisoning. Everything possible was done to alleviate the suffering of the lad, and gradually the pain became less intense. After an illness of three days the child recovered.

Citizens are demanding an investigation.

Commons May Caaa Women's Suffrage Bill

London, Feb. 18.—The precise terms of Mr. Dickinson's woman's suffrage bill, which will be introduced in the Commons, have not yet been settled, but it lays down the principle that all married women and all ratepaying women shall be granted the franchise. Sir Charles Dilke, who annually introduces a woman's suffrage bill, describes Mr. Dickinson's measure as doubling as the number of occupier voters.

It is stated that the Unionists will not oppose the bill, but will submit an amendment giving both sexes equal franchise right on the present basis.

According to one estimate 400 members of parliament will support the bill, which will ensure its passage by the House of Commons. The Government's attitude on the bill is unknown.

It is reported that the suffragettes will suspend their demonstrations until after March 8.

Moldy Butter Sent to Japan

Ottawa, Feb. 16.—Alexander MacLean, Canadian Commercial Agent in Japan, reports that Canadian butter has reached that market in a moldy condition, which is calculated to seriously injure the reputation of this commodity in the Japanese market.

Mr. MacLean says also that Japanese manufacturers are destined to control the important trade of North China, and that if other manufacturers wish a share of this business they should adapt themselves to the markets which demands goods of the very cheapest class.

Champion Lady Shaver Dies in Her Youth

London, Feb. 18.—Miss Nellie Wick the champion lady shaver of the world is dead. Miss Wick, who was the daughter of Prof. Teddy Wick, the "lightning shaver," was only twenty-one years of age.

She was taught to use the razor by her father almost before she could stand, her first appearance in public being at the Forresters' Music Hall, when she was only four years old. Little Miss Wick then accomplished the remarkable performance of shaving twelve men in fifteen minutes.

The title of "champion lady shaver of the world" was won at the old Royal Aquarium, where Nelly succeeded in shaving twenty-one men inside of twenty-one minutes. Twenty other lady shavers competed, but Miss Wick, who was then only eight years old, won with the greatest of ease.

No Japanese School

Washington, Feb. 17.—The San Francisco school controversy, growing out of the segregation of the Japanese school children in that city, has been settled.

The basis of the agreement reached at the White House conference yesterday is that Mayor Schmitz and the members of the School Board shall immediately favor the passage of the immigration bill, as reported by the conferees in Congress, to bar the Oriental schools and again admit Japanese children into the white schools. President Roosevelt and Secretary of State Root gave the San Francisco assurance that if the bill is not passed at this session of Congress an extra session will be called immediately after the adjournment March 4.

A BIG RAISE

San Francisco, Feb. 18.—A private detective agency and the police departments of Oakland and San Francisco, are endeavoring to locate in China an American born Mongolian, Woo Ang by name, who recently raised a draft from $8 to $8,000, secured a bill of exchange for the latter sum from an Oakland bank, sailed across the Pacific, and cashed the draft in Hong Kong. The police theory is that the Chinese worked with a confederate in the person of a man named Woods.

The job began in the State of Kentucky, where Woods bought a draft for $8 on the Hanover National Bank of New York. The draft was transferred to Woo Ang from all appearances. Whether Woods or the Chinese did the raising is not known. But Woo cashed his bill of Exchange in Hong Kong before the fraud was discovered, and beyond the fact that he is in China the detectives have no clue to his whereabouts.

BEWARE OF "DIGESTIVES"

The Only Way to Cure Stomach Disorders is by Strengthening the Digestive Organs.

The ordinary pepsin tablet has ruined more stomachs than all other causes combined. While it gives temporary relief, it leaves the digestive system weaker than ever, and the tablets must be continued with increased frequency.

The only way to permanently cure stomach troubles is by strengthening the digestive organs with a Mi-o-na stomach tablet taken before meals. In this way the remedy prepares the stomach for the food and excites the secretion of gastric juices so that, when the food is eaten, the stomach is prepared to digest it.

If Mi-o-na was a mere digestive, it would be taken after eating, so as to mix with the food, but then permanent relief would not be gained.

Mi-o-na stomach tablets are sold only in a neat metal box, convenient for the purse or vest pocket, and cost but 50c.

We absolutely agree that your money will be refunded should you buy a 50c box of Mi-o-na stomach tablets and not be satisfied with the results. Mi-o-na is sold by druggists everywhere, or will be sent by mail on receipt of price, 50c.

Write today for a free sample package, and also give us your symptoms, and one of the best known stomach specialists will give your case his careful and personal attention without charge. Booth's Mona Company, Buffalo, N. Y.

House Clean Your System!

Keep it Pure and Clean if You Desire Good Health.

The inside of your body requires attention just the same as the outside.

A great accumulation of effete matter is clinging to the various organs, and must be moved off.

Some gentle laxative and tonic should be used.

The system must be relieved of its burden, if you are to enjoy a happy, healthy summer.

Physicians who have examined the formula of Dr. Hamilton's Mandrake and Butternut Pills say no medicine could be better.

Whether ill or not, thousands rely on Dr Hamilton's Pills which are truly marvelous in preventing debility and sickness.

Begin Dr. Hamilton's Pills without delay. You'll feel stronger, eat better, digest better, sleep sounder, and gain more in weight.

Mr. Ed. Maynard, an old resident of New Westminster, B.C., writes: "I don't say Dr. Hamilton's Pills will cure everything, but they made a quick job of building up my run-down system. I had kidney disease and constipation and was wholly unfitted for work. Pains shot through my limbs and lodged in my back. Headaches often made me desperate. I had no appetite, an awful color, and felt despondent sometimes I was a little rheumatic. After a few days I began to mend, and kept up Dr. Hamilton's Pills till I was restored to my present tip-top condition."

Can you afford to miss the benefit of this marvel-working medicine. Think of it. All dealers sell Dr. Hamilton's Pills, 25c. per box, or five boxes for $1.00, By mail from N. C. Polson and Co., Hartford, Conn., U. S.A., and Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

THE "BOOZE" HANDICAP

Many railroad companies and other large corporations refuse to take men into their service who drink intoxicating liquors. They cannot afford, they say, to have their business depending on men who are unreliable, and men who habitually or occasionally drink too much are properly regarded as unreliable. The only safe way is to employ men who are sober all the time, and to discharge them when they cease to be so, and this is the basis upon which the world's important business is now being conducted. The man who has the alcoholic habit may keep sober for weeks or perhaps months, but his employer never knows, and usually he never knows himself, what day he may fail to show up at the shop or office on account of being in an unfit condition to appear there. The victim of such habits is deserving of pity or sympathy, perhaps, but he is an unsatisfactory employe and few business concerns nowadays will tolerate him.

In the case of public servants the rule is not so strict, though the drunken government clerk is speedily dropped, as a rule, and the officeholder who neglects his duties from too much drinking usually finds when he asks for re-appointment that the voters prefer someone who can keep "straight" and keep their official business straight.

The time has passed when the man who befuddles his brains with liquor and neglects his work for conviviality can hope to retain employment in the service of any important business concern, or attain a position of public trust and usefulness.

THE HOUSE OF LORDS

The House of Lords has been so often threatened with curtailment or extinction, notably in recent times when the British Upper Chamber rejected Gladstone's Home Rule Bill for Ireland, that menacing talk of this nature has been largely regarded as in the bugaboo class. However there seems at present to be a definite clash because of their emasculation of the Education Bill, and the King in his speech from the throne recently was called upon to utter these words:

"Serious questions affecting the working of our Parliamentary system have arisen from the unfortunate differences between the two Houses. My Ministers have this important subject under consideration with a view to finding a solution of the difficulty."

A full assembly of the Lords would consist of 618, as follows:

Princes of Blood Royal	5
Archbishops	2
Dukes	22
Marquesses	23
Earls	124
Viscounts	45
Bishops	24
Barons	320
Scotch Representative Peers	16
Irish Representative Peers	28
	613

No peer can take his seat if under age, of unsound mind, or bankrupt. The Upper Chamber can refuse to co-operate with measures passed by the Commons, and the resentment towards them consists of the circumstance that men elected by the people can thus have their legislation blocked by other men who get into Parliament on the hereditary basis—enter the Chamber through the tombs of their fathers as one writer once put it. If the Lords should be abolished that circumstance would without doubt get rid of some undesirable timber and at the same time make many good men available for the Commons. Men like Salisbury, Rosebery, the Duke of Devonshire and a number of others who might be mentioned could do far more effective and congenial work in the Commons and very many peers have passed with keen regret from the activities of the Lower Chamber because of attaining titles which forced them into the more sombre and less interesting atmosphere of the Upper House. Then there have been such disabilities for instance as when Salisbury, though Premier, had to have a leader in the Commons as his mouthpiece when from every possible standpoint he should have been able to be on the ground himself. Old established customs, however, die hard in Great Britain and the outcome is more likely to be one of compromise than of abolition.

Whiskey Distillers In a Great Swindle

London, Feb. 16.—A gigantic scheme on the part of a firm of whiskey distillers to defraud the revenue is reported to have been unearthed by inland revenue officers. The latter, it is asserted, discovered a system of underground pipes through which whiskey was conveyed from the distillery to the duty-paid warehouse whence it was distributed to the trade, thus escaping the tax of $2.75 per gallon. The revenue authorities are said to have demanded the payment of a fine of $300,000 on the smuggled liquor. The matter probably will be brought up in parliament.

Bird Imitates a Flower.

A remarkable bird found in Mexico is the bee martin, which has a trick of ruffling up the feathers on the top of its head into the exact semblance of a beautiful flower, and when a bee comes along to sip honey from the supposed flower it is snapped up by the bird.

Boo and Bah.

Boo, the exclamation used to frighten children, is a corruption of Bab, the name of a famous Gothic general. It has been used for a terror word for centuries.

Warts.

Seed warts have been removed by first cutting the warts down to the skin with a clean sharp knife and then applying a poultice of lemon juice and fine salt. In the morning the warts will feel sore, but with two or three more applications of the lemon juice and salt will disappear.

Codfish In Norway.

Codfish are sold in Norway by count regardless of size, which varies greatly. Salt is considered the only desirable preservative, but many are air dried and are known as "stock fish."

Weeds.

To give some idea of how weeds multiply it may be stated a single plant of pepper grass will produce 18,000 seeds; dandelion, 12,000; shepherd's purse, 37,000; wheat thief, 7,000; common thistles, 65,000; camomile, 16,000; ragweed, 5,000; purslane, 375,000; plantain, 47,000, and burdock, 43,000.

Paint.

If a tin of paint has to be left open, stir it thoroughly, so as to dissolve all of the oil, then fill up with water. When it becomes necessary to use the paint pour off the water, and you will find it as fresh as when first opened.

British Birds.

It is said that only two kinds of birds are absolutely peculiar to Britain. These are the red grouse and the coal tit.

Old Apprentice Law.

In 1686 an ordinance was passed in Albany that no person or persons should be permitted to work at any trade or work until he had served as an apprentice to some burgher of the city for the term of four years unless they should be in other ways qualified.

Parsees.

Parsees are much better educated than any other Indians. In every 10,000 Parsee men 4,075 know English. Among the Hindoos only 64 in 10,000 speak English.

To Remove Marking Ink.

To remove marking ink paint the mark with solution of cyanide of potassium applied with a camel's hair brush. As soon as the ink disappears the linen should be rinsed in cold water and then washed in the usual way.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

They are Liver Pills

Ayer's Pills are liver pills. They act directly on the liver, make more bile secreted. This is why they cure constipation, biliousness, dyspepsia, sick-headache. Ask your doctor if he knows a better laxative pill. We certainly do not. If he does, then use his kind.

We have no secrets! We publish the formulas of all our preparations.

J. C. Ayer Co., Lowell, Mass.

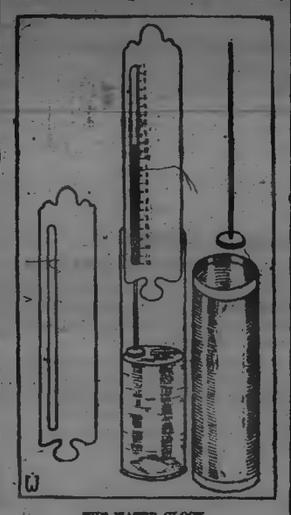
A WATER CLOCK.

Good Homemade Toy That Is Not Difficult to Make.

Very little difficulty will be encountered in making the water clock illustrated here, and any boy can manage it. All that is needed are a piece of cardboard, a piece of wire, two pieces of cork, some needles and a tin can.

A hole is made in the bottom of the can which shall suffice to let all the water run out in twenty-four hours. The piece of cardboard must be about twenty-six inches long and six inches wide and is cut out as shown in the diagram. This is set up on the tin can by means of wires.

A stiff wire twenty inches long has a small piece of cork fastened to one end and a shaving of cork at the other,



THE WATER CLOCK.

this last piece of cork to float in the water of the can, which is to be open at the top. The bit of cork at the top, which is to act as a pointer, can also help to steady the wire by having two needles inserted so that they will move up and down in the groove, being fixed crosswise.

One of the needles will thus serve as a pointer, and to mark out the hours on the cardboard one simply lets the water run out for an hour from the opening at the bottom and, going to the cardboard, makes a mark. The other hours are determined in the same way.—St. Louis Republic.

THE WHIRLING DERVISH.

A Singular Being Who Comes From Faraway Persia.

Nearly every circus or wild west show that comes to town has a "whirling dervish" for one of the attractions, and they are certainly wonderful creatures. I wonder if all of you know where they come from?

They are Mohammedans from Persia, a set of men who devote or are supposed to devote their entire time to religion and are perhaps as nearly like monks as anything else. Fasting for days at a time, with continual prayer, at last affects their minds, and they see wonderful visions which they disclose to their superstitious brothers, over whom they have great influence. They are always miserably poor, living on charity and earn what little they have by being hired to mourn at funerals or to conduct religious ceremonies.

Some of these men perform most wonderful tricks, such as fire eating, juggling and walking on broken glass. How they do them will never be known, but they are supposed to be invested with supernatural power, which is of course untrue. We are all familiar with the "whirling dervish." This takes years of practice, but finally they become so expert and are so used to it that they can "whirl" for hours without becoming dizzy.

Monkey With Glasses.

In the zoological gardens of Breslau, Germany, there is a spider monkey which was operated on for cataract and now wears glasses. For more than a year after it was received at the zoo it was very healthy and lively. Then it became very quiet, ceased to play and crouched in a corner. It was examined and found to be suffering from cataract, so it was immediately taken to the eye hospital and operated on. In less than a month it was fitted with a pair of spectacles, which it wears with becoming gravity.

Conundrums.

Why should a man always wear a watch when he travels in a desert? Because every watch has a spring in it.

What question is that to which you must always answer yes? What does y-e-s spell?

How many sides are there to a tree? Two, the inside and the outside.

If.

If c-a-t spelled dog and cow
And horse and mouse and heaven,
If two plus two made six and nine
And twelve and eighty-seven,
If "see the man" was all there was
To learn inside my reader,
No boy would be as bright as I;
In school I'd be the leader.

If school took up at nine and then
Let out in an hour or less,
If half of this was singing songs
And the other half recess,
If all the days were holidays
'Cept Christmas and Thanksgiving,
I'd know what people mean who talk
About the joy of living.

—Ellis O. Jones in St. Nicholas.

Monday, Feb. 25th
ORIENTAL HOTEL, PETERBORO

TO IMPROVE YOUR APPEARANCE

Retain your youthful freshness so that no one can remark, "she is past her prime." To appear younger and more attractive than the average woman, you must be particular that your Hair shows no sign of being thin, short or scrawny. A DORENWEND TRANSFORMATION, POMPADOUR, WAVE, CURL or SWITCH will substitute nature's defects. Even if you have plenty of your own hair, these light and airy artifices may be worn over it, saving you the worry of arranging your hair in the prevailing style. Your hair can be perfectly matched in color and texture, so that detection is out of the question.

Now, if you have in your mind any prejudice regarding artificial hair, it will forever be dispelled after seeing how natural and becoming our productions will prove in your case.

CONSULT PROFESSOR DORENWEND
DURING THIS VISIT

Advice regarding your hair and how you can make the most of it, also a personal demonstration of the newest styles in transformations, will be given the same as at our establishment in Toronto. Bear in mind that our styles are originated and designed by Professor Dorenwend, and they cannot be procured from any other makers. Their equal have yet to be produced.

MAN TO MAN—ABOUT BALDNESS

If you are bald, or partially so, you must realize that it makes you look old. Notwithstanding the desire to have back your one time bushy head of hair, you hesitate before wearing a natural hair covering simply because you imagine it is going to be noticed by others. Now you never made a greater mistake. Thousands of men, who thought the same as you do, are to-day wearing a

DORENWEND PATENT TOUPEE

and instead of carrying the handicap, that baldness proved to them, they are now enjoying the advantage of "looking young"—and that is what counts to-day in business and social life. Our Patent Toupee is a featherweight fac-simile of your own natural hair and may be worn without fear of detection—impossible to remove from the head unless at will—not the least clumsy or uncomfortable. They act as a protection, preventing colds and catarrh, so common to bald men.

Now do not neglect this opportunity—come and see for yourself. A few minutes' demonstration will convince you that a Dorenwend Patent Toupee is not like the clumsy, wiggy affairs that are claimed to be "just as natural."

The Dorenwend Co. of Toronto, Limited, 103 and 105 Yonge Street
REMEMBER PLACE, DAY AND DATE

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

THE TIMES PRINTING CO.
Printers, Bookbinders, Wholesale and Retail Stationers
GEORGE STREET, PETERBOROUGH

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 1 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 500 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 24 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness has long been admitted. Now development work proves the most sanguine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Bryner, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 3, and it certainly shows up fine. This shaft now has 70 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with this south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and zinc in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co., Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

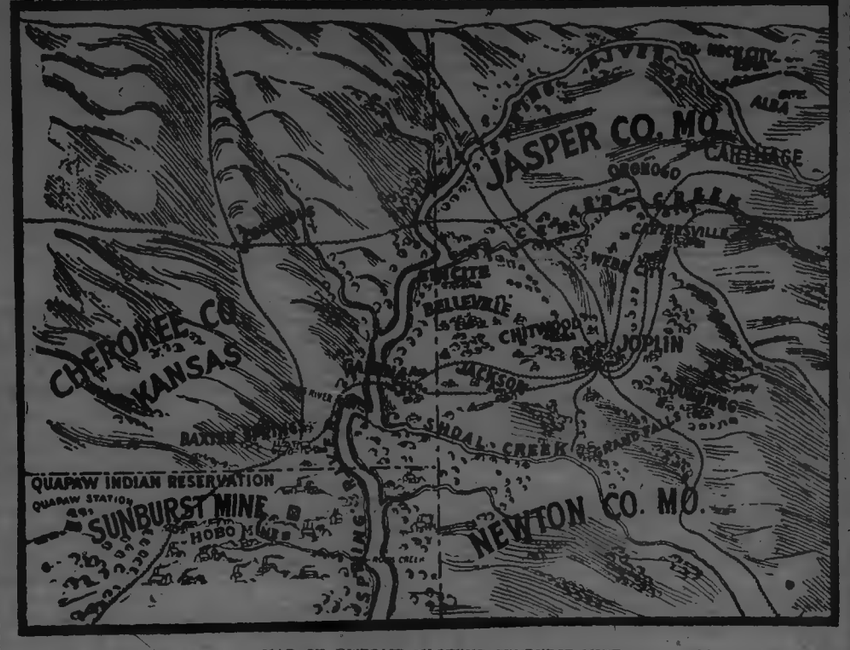
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 75 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magaska, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 195 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.



MAP OF DISTRICT SHOWING SUNBURST MINE.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in a ready demand and at steadily advancing prices. The prices have gone up since 1899 from $51.42 per ton for lead and $36.51 for zinc to $82.00 for lead and $45.00 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 80 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract has taken out nearly $7,800,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value
American Zinc, Lead & Smelting Co.	4000	$ 387,169.00
A. W. Taylor	180	150,758.00
J. W. Aylor	40	576,571.00
The Burgner Mining Co.	80	198,579.00
Center Creek Mining Co. (production to date)	200	6,942,194.00
Mrs. E. J. Chinn	120	221,799.00
Majestic Consolidated Zinc & Lead Co	52	234,190.00
Continental Zinc Co. (production to date)	200	1,575,593.00
Consolidated Troup Mining Co.	40	191,613.00
Daughtery-Davy-McMillan Estate	60	456,006.00
The Empire Zinc Co.	431	120,319.00
Fox Heirs	20	120,324.00
Granby Mining & Smelting Co., 1905		1,261,551.00
Granby Mining & Smelting Co., 1904		1,025,650.00
John G. Gulnn	640	82,857.00
Pittsburg-Joplin Lead & Zinc Co.	10	98,950.00
Pittsburg-Missouri Zinc & Lead Co.	130	413,704.00
United Zinc Co.	128	390,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent., the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00.

You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, not by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 50 feet in diameter. The shaft of the Hobo Mine was sunk within 3 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 57 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 85 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No. 1, shaft, 5 1-2 by 8 feet, is down 58 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 5 1-2 by 80 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 25-foot face of ore.

Shaft No. 3, 5 1-2 by 5 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 12 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines.

Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscoola Mining Co.	24 per cent.	Katydid Mining Co.	60 per cent.
Cottonwood Mining Co.	25 per cent.	Mocking Bird Mining Co.	64 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	36 per cent.	Zinger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 3, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 3 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 25 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Bluejacket land to the north of the tract and its purchase by a syndicate of Minnesota iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

MEN AND WOMEN.

Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles, $2.75. Circular sent on request.

WHITENING CLOTHES.

A Harmless Solution That Will Lighten Laundry Labor.

It is never necessary for harmful washing solutions to be used in order to facilitate the laundering of clothes, for there are several things that can be added to the water which will quickly eradicate dirt, besides making the washing easier, and will not injure the fabric.

Kerosene is one of the best clothes whiteners and is perfectly safe to use. It is especially good for clothes that have been hanging for some time and become yellow.

For ordinary purposes use but a tablespoonful of kerosene to a gallon of water.

In the event of garments becoming very much soiled an emulsion made from equal parts of kerosene, clear limewater and turpentine shaken until creamy is invaluable.

Only one cup of the mixture should be added to a boilerful of clothes. They should be kept over the fire for half an hour.

In the case of men's jumpers, overalls, working shirts or children's stockings or trousers this emulsion is invaluable.

Make a very hot soapsuds and add a small portion of the emulsion to the water. Allow the clothes to remain for about five minutes in the water and rinse with hot water thoroughly, for in the latter case when the emulsion is used so strong it is quite necessary that every particle should be removed.

Borax soaps which are free from alkali are good for laundry purposes.

CHICKEN A LA KING.

Recipe From One of New York's Big Popular Hotels.

A favorite dish served in one of the big popular hotels of New York is chicken a la king. The recipe, as given by the chef of the fashionable establishment, is as follows: Cut into small pieces the white meat of a cold roast chicken. Make a sauce with two tablespoonfuls of butter in a saucepan over the fire. When the butter melts stir in two heaping tablespoonfuls of flour which has been well sifted. When the flour and butter are mixed to a cream pour in slowly a pint of hot milk, stirring constantly to keep from lumping. Allow the sauce to boil up once, then add a teaspoonful of grated onion, a saltspoonful of salt and the yolks of two eggs. Stir them briskly through the sauce, add two truffles and two mushrooms cut in small pieces and fried lightly in butter, one sweet green pepper cut in shreds after seeds have been removed and a generous tablespoonful of capers chopped and just a suggestion of grated nutmeg. Last of all, add the chicken, stir all together and allow it to cook a minute. Chicken a la king is usually served in a chafing dish.—New York Post.

THE HOME DOCTOR.

Milk taken before and after a bitter medicine will absorb the taste very quickly.

For a sore mouth try a wash of one teaspoonful of peroxide in a half glass of water.

After cutting a corn peroxide should always be applied to prevent any possibility of blood poisoning.

Gouty persons should avoid eating sweet food, but the practice of eating a dozen walnuts a day is recommended by physicians.

A cup of hot water will relieve a sick stomach, and for those who cannot take it plain try a little lemon juice, a lump of sugar or a pinch of salt.

When you suffer from heartburn take half a teaspoonful of bicarbonate of soda stirred in half a tumblerful of cold water. One doctor advises that a few bleached sweet almonds be eaten. They should be thoroughly masticated.

The Plain Girl.

The plain, quiet, apparently unattractive girl should be taught to make the most of herself, and who can teach her this so well as her mother? If your daughter is growing up too quiet and seems never to have anything to say, exert yourself to draw her out. Lead her into general conversation at every opportunity. Let her feel that her thought and opinion about different matters are of some weight and importance. Do not let her sink into that state of mind which is content to let other people take the burden of conversation while she sits by in apparently stupid silence, says Home Chat. It is a habit which will grow upon her and which will only become the more deeply fixed if referred to in any way. Some day her chances of a happy and useful life may be ruined by it.

Hydrogen Peroxide.

Hydrogen peroxide is usually associated with golden hair of a suspicious hue, but it really is a most useful household drug. As it is best known, it is an excellent and harmless bleach, but besides this it is an excellent disinfectant. One would hardly look for it in a mouth wash, but it is even so. A solution of one-fourth or one-fifth hydrogen peroxide makes an effective antiseptic. It is often used undiluted in open fresh wounds and, used with a styptic to stop the flow of blood, has proved very healing.

To Clean Glass.

Place pulverized pumice stone between the layers of a folded piece of soft muslin and stitch around the edge to prevent the powder from spilling. Wipe lamp globes or window panes with this dry cloth, and they will be clean and sparkle almost instantly. Enough powder will remain on the cloth to be used many times.

Corrected.

Teacher—What are parallel lines? Micky Mulberry, what are you grinning at? Micky Mulberry—Scuse me, Miss Sharpe, but any loidy might make de same mistake. Yer means parallel bars, don't yer?—Puck.

The secret of being tiresome is in telling everything.—Talleyrand.

AVOID A LIFE OF MISERY.

Don't Wed a Poor Man Who Has Neither Ambition Nor Energy.

Don't marry a poor man with no ambitions or energy. There are some men who never get on because they spend their time in complaining of how harshly the world has treated them instead of trying to surmount the obstacles and difficulties in their path.

The woman who is married to such a man is to be pitied, and every girl who is engaged to a man whose position does not compare favorably with that of other members of his sex should see that the fault does not lie with him. If it does, then she should seriously consider the advisability of remaining unwed, at any rate so far as he was concerned.

Any girl with a grain of sense in her head knows that the man who has never properly supported himself or contributed his share of expenses when living with his parents is not going to be able to support her. Matrimony with him will be the kind of grinding poverty that would kill the most robust sentiment that ever lived.

That is the poverty that has no hope to gild its horizon and no respect to make its present endurable, and the mother should use just as much effort to keep her daughter from marrying that type of man as she would to prevent her committing suicide in any other way.—San Francisco Examiner.

EFFECT OF WATER ON COAL.

How It Assists Combustion—Does Not Make the Coal Last.

It is often asserted that water on bituminous coal both aids combustion and "makes the coal last." Housewives who live where this coal is used and who are compelled to maintain stove or furnace fires are firm believers, as a rule, in this paradox. That water on coal cannot do both these people would know if they but thoughtfully considered it a minute.

The facts are these (and any one may easily verify them): In a light fire—that is to say, a stove or house furnace—water sprinkled on large lump coal really causes it to burn more rapidly. It soaks into the strata, into the porous surface, and, being there converted into steam, the lump is split into parts or the surface becomes corrugated and cavernous, thus offering a larger area of carbon to the active oxygen of the air. If the water is in excess of the amount which will do this it then no longer aids combustion, but retards it. Again, if the coal is fine a small dampness, nothing approaching wetness, however, may increase combustion by holding the particles apart, thus permitting the air to be admitted.

In short, says the Scientific American, water on coal favors combustion when it does favor it, only by assisting the oxygen of the air to find more ready access to the surfaces of the carbon.

SELECTING A GOWN.

Keep in the same scheme of color in which the individual is made. In general wear few colors.

If a brilliant color is worn at all let it be near the face. Red is most atrocious when worn wrong.

If a person has a great deal of red or yellow in hair or face it calls for an extremely subdued color scheme.

In planning for different types of coloring where there is a warm scheme of color there should be no strong tints in the costume.

For a gown to be worn in the daytime consult the skin and hair coloring; in the evening the eyes, the reason being that artificial light throws into hair and skin the warmth not naturally there.

Two reds, one of which is vermilion and one crimson or cerise, with blue in them, are absolutely impossible. Cerises and crimsons must not be used anywhere in combination with scarlet types. A good plan to follow is to select things in slight contrast.

Aid to Mending Basket.

The mending basket is sometimes a terrible thing. Many a busy mother never finds the bottom. But there is a way to keep it a respectable size at least. In the laundry or wherever the ironing is done reserve the corner of some shelf for a small pincushion supplied with two or three needles of different sizes, a thimble, a pair of small scissors, two or three spools of cotton and a little box of buttons. As the clothes are picked out of the basket to iron and you find a rent here, a rip there and a button off somewhere else stop and fix it. It takes but a minute, and the task of mending is so distributed that the mending basket is no longer the source of so many weary sighs.

Pantry Laundry Bag.

A useful pantry article is a laundry bag for table linen. A capacious one may be quickly and easily made of two circular or square pieces of cretonne, fancy ticking or other strong material. In the center of one piece cut an X, turning down and binding the points thus formed. This gives a square opening. Attach a fancy cord to each corner of the opening by which to handle the bag. Sew the two pieces together in a seam and turn through the opening. Hang it on the back of the kitchen door and drop in soiled towels when passing.

Listless Children.

Normally healthy children should not be listless, and any lassitude not caused by illness should be corrected by parents, immediately, though not by punishment, for if allowed to develop as the child grows it will prove a drag to ambition and in time create a spirit of laziness that is difficult to overcome. At least this is the opinion of the house physician in a babies' hospital.

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tully.

This is the Safest and Greatest Buy.

This Company owns FIVE MINING CLAIMS containing 160 ACRES, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
4 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
3 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 3-foot level, show 193 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 600 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 20 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and/a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 20 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first ore, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch nicolite, 18 inch smaltite together with cobaltite. Assays gave 672-1231-492-1151 oz. silver, or an average of over 900 oz. silver, which at the present price of 70c. is equal to $630.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 60 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00) The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

If you never invest you never make

The millionaires of today are the investors of yesterday.

In choosing your investment these things should be considered: the ability, responsibility and integrity of those in charge of the company; that the property is in a proven district, and is owned by the company, and that gold has been found upon the property; that the money is being used for the interests of the company; that the company has no debts or obligations.

We have all these essentials, and own four claims, located in the heart of the Wonderful Manhattan District, from all of which we have taken rich ore, OUR AVERAGE ASSAY BEING OVER $400.00 TO THE TON.

We have so thoroughly tested our claims that WE KNOW WHAT WE HAVE. THE TIME TO BUY IS NOW! Stock selling at 10 cents a share, par value One Dollar, fully paid and non-assessable.

REPORT OF OFFICERS

"To the Directors of the Manhattan Independent Mining Co.:

"We have been in Manhattan, Nevada, and thoroughly tested our four claims, namely, 'American Flag,' 'Anglo Celtic,' 'Peerless' and 'Independent,' and personally took 100 or more samples of ore from different places along the 5200 feet of main ledge crossing our claims, and across the width of same, together with numerous samples from the cross-ledges, and had the same assayed, and the result of the assay was an average of $400.00 to the ton. We also had some of the samples panned, and the pannings bore out the assays. These samples were in no way selected, but were taken from all the ledges with no regard to value. Our property is all we could ask and is easy of access. Throughout our entire 80 acres we have an unlimited rich deposit of free milling gold, as good as the best in this wonderful camp.

"Respectfully submitted,
"WM. R. PAYNE, President,
"J. ROGER BROWN, Secretary."

Stock Advances to 20 Cents a Share March 1st

TELEPHONE No 58

Boils.

A person suffering with boils should eschew pastry, gravies and every kind of meat excepting lean mutton. The boils may be brought to a head by using a warm poultice of camomile flowers or boiled white lily root, by fermentation with hot water or by stimulating plasters.

Odd Books.

In the British museum are books written on oyster shells, bricks, tiles, bones, ivory, lead, iron, copper, sheepskin, wood and palm leaves.

Tenpins.

The regulation tenpin is fifteen inches high and fifteen inches in circumference at the largest part and two and one-fourth inches in diameter at the base. Pins are sometimes made shorter and sometimes longer and bigger for family alleys, so that they may be knocked down more easily, but fifteen inches is the regulation height.

"Chamois" Skin.

What is known in the market as chamois skin is really oil tanned sheepskin linings. The supply of real chamois skin is very limited, and all there is in the world would not supply the United States for a single day.

Australian Rabbits.

The feet of some Australian rabbits show a gradual adaptation to a new mode of locomotion. The rabbits are becoming climbers and often ascend trees in search of food. Their feet in consequence are said to be growing slighter, and the claws longer and sharper.

THE REFUGEES

By A. CONAN DOYLE,
Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

felt that in an instant Fortune had wiped out all the good turns which she had done him during his past life and that now, far from being in her debt, he held a heavy score against her. The king arched his eyebrows and drummed his fingers impatiently as he glanced at the downcast face and dejected bearing.

"Why all this thought?" he cried. "You are a man whom I have raised and whom I will raise. He who has a major's epaulets at thirty may carry a marshal's baton at fifty. Your past is mine, and your future shall be no less so. What other hopes have you?"

"I have none, sire, outside your service."

"Why this silence, then? Why do you not give the assurance which I demand?"

"I cannot do it, sire. It is impossible. I should have no more peace in my mind or respect for myself if I knew that for the sake of position or wealth I had given up the faith of my fathers."

"Man, you are surely mad! There is all that a man could covet upon one side and what is there upon the other?"

"There is my honor."

"And is it, then, a dishonor to embrace my religion?"

"It would be a dishonor to me to embrace it for the sake of gain without believing in it."

"Then believe it."

"Alas, sire, a man cannot force himself to believe. Belief is a thing which must come to him, not he to it."

"On my word, father," said Louis, glancing, with a bitter smile, at his Jesuit confessor, "I shall have to pick the cadets of the household from your seminary, since my officers have turned casuists and theologians. So, for the last time, you refuse to obey my request?"

"Oh, sire"— De Catinat took a step forward, without outstretched hands and tears in his eyes.

But the king checked him with a gesture. "I desire no protestations," said he. "I judge a man by his acts. Do you abjure or not?"

"I cannot, sire."

"You see," said Louis, turning again to the Jesuit, "it will not be as easy as you think."

"This man is obstinate, it is true, but many others will be more yielding."

The king shook his head. "I would that I knew what to do," said he. "Madame, I know that you at least will ever give me the best advice. You have heard all that has been said. What do you recommend?"

She kept her eyes still fixed upon her tapestry, but her voice was firm and clear as she answered:

"You have yourself said that you are the eldest son of the church. If the eldest son desert her, then who will do her bidding?"

Louis took up the pen from the table and drew the paper toward him.

"I have the same counsel, then, from all of you," said he; "from you, bishop; from you, madame; from you, abbe, and from you, Louvois. Well, if ill come from it, may it not be visited upon me. But what is this?"

De Catinat had taken a step forward with his hand outstretched. His ar-

"Do not sign it, sire," he cried.

dent, impetuous nature had suddenly broken down all the barriers of caution, and he seemed for the instant to see that countless throng of men, women and children of his own faith, all unable to say a word for themselves and all looking to him as their champion and spokesman.

"Do not sign it, sire," he cried. "You will live to wish that your hand had withered ere it grasped that pen. I know it, sire; I am sure of it. Consider all these helpless folk—the little children, the young girls, the old and the feeble. Their creed is themselves.

As well ask the leaves to change the twigs on which they grow. They could not change. At most you could but hope to turn them from honest folk into hypocrites. And why should you do it? They honor you. They love you. They harm none. They are proud to serve in your armies, to fight for you, to work for you, to build up the greatness of your kingdom. I implore you, sire, to think again before you sign an order which will bring misery and desolation to so many."

For a moment the king had hesitated as he listened to the short, abrupt sentences in which the soldier pleaded for his fellows, but his face hardened again as he remembered how even his own personal entreaty had been unable to prevail with this young dandy of the court.

"France's religion should be that of France's king," said he, "and if my own guardsmen thwart me in such a matter I must find others who will be more faithful. That major's commission in the mousquetaires must go to Captain de Belmont, Louvois."

"Very good, sire."

"And De Catinat's commission may be transferred to Lieutenant Labadoyere."

"Very good, sire."

"And I am to serve you no longer?"

"You are too dainty for my service."

De Catinat's arms fell listlessly to his side, and his head sank forward upon his breast. Then, as he realized the ruin of all the hopes of his life and the cruel injustice with which he had been treated, he broke into a cry of despair and rushed from the room with the hot tears of impotent anger running down his face. So, sobbing, gesticulating, with coat unbuttoned and hat awry, he burst into the stable where placid Amos Green was smoking his pipe and watching with critical eyes the grooming of the horses.

"To Paris! To Paris!" shouted the guardsman frantically. If I am ruined I may yet be in time to save them. The horses, quick!

It was clear to the American that some sudden calamity had befallen, so he aided his comrade and the grooms to saddle and bridle. Five minutes later they were flying upon their way, and in little more than an hour their steeds, all reeking and foam flecked, were pulled up outside the high house in the Rue St. Martin. De Catinat sprang from his saddle and rushed upstairs, while Amos followed in his own leisurely fashion.

The old Huguenot and his beautiful daughter were seated at one side of the great fireplace, her hand in his, and they sprang up together, she to throw herself with a glad cry into the arms of her lover and he to grasp the hand which his nephew held out to him.

At the other side of the fireplace, with a very long pipe in his mouth and a cup of wine upon a settle beside him, sat a strange looking man, with grizzled hair and beard, a fleshy, red, projecting nose and two little gray eyes, which twinkled out from under huge brindled brows. His long, thin face was laced and seamed with wrinkles, crossing and recrossing everywhere, but fanning out in hundreds from the corners of his eyes. It was set in an unchanging expression, and as it was of the same color all over, as dark as the darkest walnut, it might have been some quaint figurehead cut out of a coarse grained wood. He was clad in a blue serge jacket, a pair of red breeches smeared at the knees with tar, clean gray worsted stockings, large steel buckles over his coarse, square toed shoes, and beside him, balanced upon the top of a thick oaken cudgel, was a weather stained silver laced hat. His gray shot hair was gathered up behind into a short, stiff tail, and a seaman's hanger, with a brass handle, was girded to his waist by a tarnished leather belt.

De Catinat had been too occupied to take notice of this singular individual, but Amos Green gave a shout of delight at the sight of him, and ran forward to greet him.

"Why, Captain Ephraim," cried Amos in English, "who ever would have thought of finding you here? De Catinat, this is my old friend Ephraim Savage, under whose charge I came here."

"Anchor's aspeak, lad, and the hatches down," said the stranger in the peculiar drawling voice which the New Englanders had retained from the English Puritans.

"And when do you sail?"

"As soon as your foot is on her deck, if Providence serve us with wind and tide. And how has all gone with thee, Amos?"

"Right well. I have much to tell you of."

De Catinat and his relatives were far too engrossed with their own affairs to give a thought to the others. De Cati-

[To be continued]

Hot Soda Baths.

Hot soda baths are recommended by some persons for rheumatism, and the way they are taken is this: Fill the tub half full of water as hot as can be borne, add half a pound of common baking soda and immerse the body for at least twenty minutes, keeping up the temperature by the addition of hot water from time to time. Vaseline or cold cream should be rubbed into the skin after the latter has been dried in order to replace the natural oil.

Birds Lost at Sea.

In the far north and particularly along the ocean coasts birds are frequently storm driven and lose their bearings, so that many of them are lost at sea. They keep floating in the air, aimlessly striving to live, until exhaustion compels them to drop into the waves, which engulf them.

You cannot possibly have a better Cocoa than

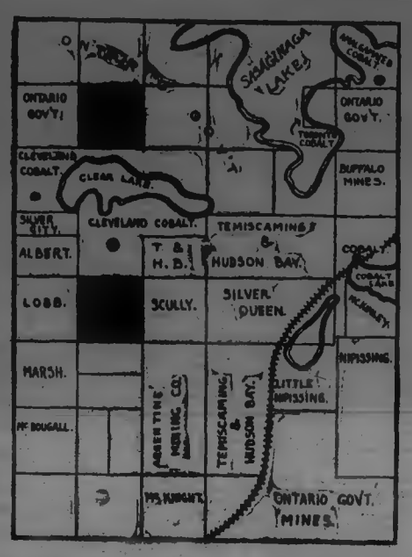
LAKE GEORGE COBALT SILVER MINING COMPANY, LIMITED

affords conservative mining men and others an inveatment of greatest merit by reason of the immense profits that will most surely be forthcoming.



Authorized Capital Only $600,000

Divided into 600,000 Shares

Par value $1.00 each—fully paid and non-assessable. Only 300,000 shares for sale at par.

PROPERTIES
MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland-Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east, on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over-subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

WALT WHITMAN.

Ways of the Poet Who Was Loved by All Who Knew Him.

This is the Walt Whitman who was known and loved by those who met him daily:

"After some conversation Whitman proposed a walk across to Philadelphia. Putting on his gray slouch hat, he sallied forth with evident leisure and, taking my arm as a support, walked slowly the best part of a mile to the ferry. Crossing the ferry was always a great pleasure to him. The life of the street and of the people was so near, so dear. The men on the ferry steamer were evidently old friends, and when we landed on the Philadelphia side we were before long quite besieged—the man or woman selling fish at the corner of the street, the tramway conductor, the loafers on the pavement—a word of recognition from Walt or as often from the other first; presently a cheery shout from the top of a dray, and before we had gone many yards farther the driver was down and standing in front of us, his horses given to the care of some bystander. He was an old Broadway 'stager,' had not seen Walt for three or four years, and tears were in his eyes as he held his hand. We were now brought to a standstill, and others gathered round. George was ill, and Walt must go and see him. There was a message for the children, and in his pocket the poet discovered one or two packets for absent little ones. But for the most part his words were few. It was the others who spoke and apparently without reserve."—"Whitman as Carpenter Saw Him" in Craftaman.

High Priced Bumblebees.

Many years ago the farmers of Australia imported bumblebees from England and set them free in their clover fields. Before the arrival of the bees clover did not flourish in Australia, but after their coming the farmers had no more difficulty on that score. Mr. Darwin had shown that bumblebees were the only insects fond of clover nectar which possessed a proboscis sufficiently long to reach the bottom of the long, tube-like flowers and at the same time a body heavy enough to bend down the clover head so that the pollen would fall on the insect's back and thus be carried off to fertilize other flowers of the same species. The bumblebees sent to Australia cost the farmers there about half a dollar apiece, but they proved to be worth the price.

His Weapon.

In some parts of Ireland it is a custom among bank clerks to speak of one another as "officers" to the bank, but little Jim Bender, the recently imported Cockney waiter in a County Mayo hotel, was not aware of this custom.

"Have you seen any of our officers here this morning?" asked a lordly knight of the quill of Jim a few days ago.

Jim glanced keenly at his interrogator.

"Yussir," he answered promptly; "'is isn't three minutes ago since one of 'em went out with his sword be'ind 'is ear."—London Answers.

Power In Ancient Arrows.

At 200 feet only the best Spanish armor could resist the English arrow. Many museums have steel corselets pierced through by an arrow.

SPECIAL NOTICE!

ADVERTISE IN THE TIMES.

No Self Control. Start at "Trifles."

No Control of Your Nerves

The nerves are the great controlling force of the body.

They govern every action, every function. Upon their vitality hinge your energy, your power to think and act.

But alas, your nerves are weak!

You have burnt up your nerve force, used up the reserve you so badly need today.

Just one way to win it back.

Build up with Ferrozone.

It restores worn-out nerves, because it supplies them with nutriment and building material.

Ferrozone gives you "grip" and courage—makes the blood tingle through your veins—fills you with the feeling that a powerful and strengthening medicine is winning you back to health.

Mr. C. R. Zink, a prominent citizen of Lunenburg, N.S., proved Ferrozone was a marvelous tonic and says: 'Nothing I ever used gave such prompt, strengthening effect as Ferrozone. I was run down, quite nervous, no appetite and in a generally used-up condition. Ferrozone gave me a wonderful amount of new strength, quite restored my nerves and made me well. I can recommend Ferrozone to every man who works hard and needs a tonic."

By supplying nourishment and vital force to the nerves, by enriching the blood, strengthening the heart—Ferrozone is sure to hold any man, woman or child in ill-health; try it—50c. per box at all druggists.

LOCAL INCIDENTS

By The Times Man on the Street

—The committee of the whole council will meet tonight as usual.

—Rev. A. Graham, of Parkhill, spoke at the Y.M.C.A. yesterday afternoon.

—Last week still another pavement bicyclist was fined $2 for this breach of the by-law.

—Rev. James G. Potter preached at both services in St. Andrew's church yesterday.

—Score and tally cards and all the latest games on sale at Times Bookstore.

—The Grand Orange Lodge of Ontario East, will meet in the Victoria Hall, Brookville, on the 20th of March next.

The Typos annual banquet held in Foresters' Hall, Saturday night, was well attended and most successful in every respect.

—Mr R. Hicks left at noon Saturday to spend Sunday at his number camps where he has a large number of men at work.

—The regular weekly meeting of the Saturday Bible Club was held at the Y.M.C.A. Saturday night under the leadership of Mr. J. C. Shook.

—Ald Wilson has purchased 185 feet of the Dennistoun property on Water street and will erect four good houses on it in the spring.

—In St. Luke's church yesterday morning the rector, Rev. E. A. Langfeldt began a series of special Lenten sermons on the "I have sinned" of the Bible.

—Yesterday evening, Rev. W. Major, rector of All Saints' church, preached the first of a series of Lenten sermons on the "Prodigal Son."

—The 57th Regiment have presented Miss Jessie Spence with a handsome bracelet in recognition of her valued services in connection with the recent production in the grand opera house, entitled Zephra.

Tragic Death of Mr. C. L. Kidd, of Smith

Much sympathy was audible throughout the city on Saturday for the family of Mr. C. L. Kidd, of the 11 concession of Smith, lot 35, over his lamented and tragic death.

The late Mr. Kidd was one of the most widely known and respected farmers of Smith township, who met his death Friday afternoon, while engaged in felling trees.

It seems that on Friday afternoon the deceased and one of his sons went to an island in the river, adjoining his property, for a load of wood. The wood was placed on the sleigh and the son sent home with it. His father remained in the bush with Mr. Harry Newton, to cut some more wood. They were sawing down a large cedar tree. The tree, in falling, swerved from what was its expected course, one of the branches striking Mr. Kidd on the head. The skull was fractured. Mr. Newton after doing what he could for the injured man, went to a neighbor's house and procuring a conveyance took Mr. Kidd home. Dr. Baker of Lakefield, was quickly on the spot, but within a very few hours, Mr. Kidd had passed away.

The deceased whose death was learned with very general regret, leaves a wife and family of seven sons and one daughter. The sons are John, who lives near Barrie, Ont.; Hugh and William, who conduct a blacksmith shop in Warsaw; Robert, Bruce, Elmore and Mark all residing at home. The daughter is Miss Jessie, who lives at home.

In religion, the late Mr. Kidd was a Baptist and in politics a Conservative. Mr. John Lawrence Kidd, councillor of Dummer, is a brother of deceased. Another brother, Donald, lives in the United States. Mrs. John Ferguson of Lakefield; Mrs. Duncan Ferguson of Dummer, and Miss Maggie Kidd of Los Angeles, California, are sisters.

Twice Fail to Hang Him

Richmond, Va., February 18.—There was a harrowing scene at the hanging at Farmville Saturday of Moses Hill and William Ruffin, negroes, convicted of the murder of Postmaster John Grubbe. Hill weighed 275 pounds. The rope broke, he walked calmly back to the scaffold, when it broke a second time and he died in agony on the ground.

DREADED TO EAT

A Quaker Couple's Experience

How many persons dread to eat their meals, although actually hungry nearly all the time!

Nature never intended this should be so, for we are given a thing called appetite that should guide us as to what the system needs at any time and can digest.

But we get in a hurry, swallow our food very much as we shovel coal into the furnace, and our sense of appetite becomes unnatural and perverted. Then we eat the wrong kind of food or eat too much, and there you are—indigestion and its accompanying miseries.

A Phila. lady said, the other day:

"My husband and I have been sick and nervous for 15 or 20 years from drinking coffee—feverish, indigestion, totally unfit, a good part of the time, for work or pleasure. We actually dreaded to eat our meals.

"We tried doctors and patent medicines that counted up into hundreds of dollars, with little if any benefit.

"Accidentally, a small package of Postum came into my hands. I made some according to directions, with surprising results. We both liked it and have not used any coffee since.

"The dull feeling after meals has left us and we feel better every way. We are so well satisfied with Postum that we recommend it to our friends who have been made sick and nervous and miserable by coffee." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

SOCIAL AND PERSONAL

—Mr. Arthur Mitchell of Ottawa, was a guest at the Snowden House on Saturday.

—Messrs. R. M. Fee and Thos. Sadler, Lindsay, were in the city on Saturday.

—Mr. Jack Hicks of the police force, Sudbury, is the guest of his aunt, Mrs. Henry, 217 Bethune street.

—Ex-Alderman Stewart of Toronto, who was a guest at the Queen's Hotel last week, left for home Saturday evening.

—Rev. Archibald Graham, of Parkhill, Ont., is in the city, and preached at both services in Knox church yesterday.

—Mr. and Mrs. H. T. Lang of Peterborough, were visiting at Mr. and Mrs. A. Lang's last week.—Omemee Mirror.

—Miss Jessie Vair, of Galt returned home Saturday after spending a week the guest of her cousin, Miss May Anderson, Water street.

—Mr. Wm. Toole, son of Ex-Mayor Toole, of Peterborough, who has been spending a few weeks in the city renewing old acquaintances, has returned to Winnipeg.

—Mr. H. J. Booth, the director of spectacular play "Zephra," recently produced so successfully in Peterborough, leaves today for Hamilton, to produce "Zephra," so that place with Hamilton talent.

—Lindsay Post: Messrs. R. Kylie and E. H. Howson, Peterborough, who have been appointed assistant inspectors of weights and measures for this district, are in town, receiving instructions in their duties.—Mr. S. Clegg, of Peterborough, engineer of the Trent canal, was in town today, a guest at the Simpson House.

—Millbrook Mirror: The many friends of Postmaster Vance, will regret to learn that he has been laid up with a severe attack of 'la grippe.—Mr. J. T. Lang was in Peterborough yesterday on business.—Mrs. J. B. Sandy and the Misses K. Carveth, M. Duncan and B. Armstrong, attended the "at home" given by the "Otherdom Club" at Peterborough on Thursday night.—Miss Clara Mitchell has returned to Peterborough after a pleasant visit with friends here.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station

We noted in Saturday's issue that Mrs. Louisa Howells and a woman named Jessie Harris, who were arrested on Friday afternoon for respectively maintaining and being an inmate of a disorderly house, had by the work of Mrs. Howell's attorney, Mr. Godon, been released on bail the same evening.

It seems that by some oversight the Harris woman had been allowed to go, although Mrs. Howell's bail bond did not include the former, "Miss Harris" was once more arrested Saturday afternoon as an inmate and spent the Sabbath hours at Castle Nesbitt. The two women will appear for trial Tuesday morning.

The Labor Loathing League and Pavement Pete Club were well represented at Saturday's session of the police court, these gentlemen seeming to always have time to burn, in that delectable dispensary of justice.

The first case called was that of Joseph Rickerby, who at Friday's session had pleaded "Not guilty" to having been d. & d. in a public place. After several witnesses gave testimony. The magistrate decided that Joseph had notually dallied with the wit-warning fluid and fined him $5.70 including costs.

William Duncon was charged with having been D. & D. on the preceding Saturday but the evidence was not suffivient to carry out the charge, so William was allowed to Skiddoo.

An east ward resident was fined $5 and costs, amounting to $7.60 to be paid in five days for using insulting language and abusing Jas. Bushnell in a local hotel yard one evening last week.

The young man Fowler who as noted in Saturday's issue had laid information against Mr. Gus White, was Johnny on the spot, with his little assault case, but Mr. White had laid a similar counter charge against Fowler. The evidence showed that possibly Fowler deserved what he got. In any event both charges were declared off. Fowler has now laid another charge against Mr. White, viz., for selling liquor during prohibited hours. This case will be tried this morning.

Royal Bank Increases Its Capital

The Royal Bank of Canada, which opened a local branch some months ago in this city, has decided to increase the number of directors by four and also to increase the authorized capital of the bank from $4,000,000 to $10,000,000.

Mr. Culverwell buys Power Plant

Referring to a gentleman well known here, the Cobourg Sentinel Star, says:

Mr. J. A. Culverwell, engineer of Cobourg recently purchased part of the winter plant at Campbellford immediately below the Grand Trunk Railway bridge—nearly twenty feet head and half the river flow—including thirty-nine good building lots. The property is practically in the middle of the town of Campbellford and is a most valuable property. The four deeds of the property have been recorded in the Registry office in Mr. Culverwell's name.

A Most Valuable Agent.

The glycerine employed in Dr. Pierce's medicines greatly enhances the medicinal properties which it extracts from native medicinal roots and holds in solution much better than alcohol would. It also possesses medicinal properties of its own, being a valuable demulcent, nutritive, antiseptic and antiferment. It adds greatly to the efficacy of the Black Cherry-bark, Bloodroot, Golden Seal root, Stone root and Queen's root, contained in "Golden Medical Discovery" in subduing chronic, or lingering coughs, bronchial, throat and lung affections, for all of which these agents are recommended by standard medical authorities.

In all cases where there is a wasting away of flesh, loss of appetite, with weak stomach, as in the early stages of consumption, there can be no doubt that glycerine acts as a valuable nutritive and aids the Golden Seal root, Stone root, Queen's root and Black Cherrybark in promoting digestion and building up the flesh and strength, controlling the cough and bringing about a healthy condition of the whole system. Of course, it must not be expected to work miracles. It will not cure consumption except in its earlier stages. It will cure very severe obstinate, hang-on chronic coughs, bronchial and laryngeal troubles and chronic sore throat with hoarseness. In acute coughs it is not so effective. It is in the lingering hang-on coughs, or those of long standing, even when accompanied by bleeding from lungs, that it has performed its most marvelous cures.

Prof. Finley Ellingwood, M. D., of Bennett Med. College, Chicago, says of glycerine:

"In dyspepsia it serves an excellent purpose. Holding a fixed quantity of the peroxide of hydrogen in solution, it is one of the best manufactured products of the present time in its action upon enfeebled, disordered stomachs, especially if there is ulceration or catarrhal gastritis (catarrhal inflammation of stomach), it is a most efficient preparation. Glycerine will relieve many cases of pyrosis (heartburn) and excessive gastric (stomach) acidity."

"Golden Medical Discovery" enriches and purifies the blood curing blotches, pimples, eruptions, scrofulous swellings and old sores, or ulcers.

Send to Dr. R. V. Pierce, of Buffalo, N. Y., for free booklet telling all about the native medicinal roots composing this wonderful medicine. There is no alcohol in it.

Mr. Maplesden Concludes the Series

Mr. Maplesden, of Buffalo, who has for the past five weeks been conducting special revival services at the Gospel Hall and at Auburn, has concluded the series, which was productive of much good. Special services were held yesterday afternoon in the Gospel Hall and in the evening Mr. Maplesden leaves this morning for Toronto.

Lorneville Creamery Has Good Year

The Lorneville creamery has had a most successful year, as shown at their annual meeting, when the secretary's report for the year was read as follows:—

No. lbs. cream, $1,106,081.
No. lbs. butter fat, 816,368
No. lbs. butter, 886,437.
Total amount of money received, $85,847.42 s.
Amount paid patrons, $74,188.74.
Amount paid for manufacturing $11,598.11.
Average price of butter, 22. 20c.
Average price of butter fat, 23c.
Average test of cream, 28.6.

CATARRH

To prove unquestionably, and beyond any doubt, I am furnishing patients through druggists, small free trial Boxes of Dr. Shoop's Catarrh Cure. I do this because I am so certain, that Dr. Shoop's Catarrh Cure will bring actual substantial help. Nothing certainly, is so convincing as a physical test of any article of real, genuine merit. But that article must possess true merit, else the test will condemn, rather than advance it. Dr. Shoop's Catarrh Cure is a snow white, healing antiseptic cream, put up in beautiful nickel capped glass jars at 50c. Such soothing agents as Oil Eucalyptus, Menthol, Menthol, etc., are incorporated into a velvety, cream like Petrolatum, imported by Dr. Shoop from Europe. If Catarrh of the nose and throat has extended to the stomach, then by all means also use internally, Dr. Shoop's Restorative. Stomach distress, a lack of general strength, bloating, belching, biliousness, bad taste, etc. surely call for Dr. Shoop's Restorative.

For uncomplicated catarrh only of the nose and throat nothing else, however, need be used but

Dr. Shoop's Catarrh Cure

Municipal Ownership Injures London, Eng.

Socialistic Experiments Driving Her Into Penury ---Striking Examples of Work of the Progressists.

London, Feb. 18.—The campaign against the municipal Socialist party, which controls the administration of London gains in strength as the election approaches. Last week's meeting of the county council was one of the stormiest in its history, and it developed fresh revelations of inefficiency and extravagance.

There was one interesting little object lesson in municipal ownership connected with municipal brick making. The council decided some time ago, when bricks cost $6 a thousand, to make its own, and did so. The M. O. bricks cost $10 a thousand, and it turns out that only 16 percent. of the bricks were any good. The net loss to London taxpayers by this experiment was $125,000.

One of the defenders of the council made bricks was embarrassed by the specimen brick in his hands while he was defending its quality.

DISCOVER M.O. SPELLS RUIN.

Champions of the municipal tramways have been confounded by the fact, which has just transpired, that the council is in a dispute with the income tax commissioner over the tax claimed on tramway profits. The council argues to the public that the tramways earned a small surplus. They object to pay the income tax thereon, however, on the ground that the reported profit is a myth.

There was a striking example last week of the ultimate effects of the experiments in municipal ownership in the temporary insolvency of the Woolwich Local Council, which was obliged to seek an overdraft at the bank amounting to $275,000. Owing to losses on the municipal electric lighting scheme, the rate of taxation must be raised to 12 per cent. this year in order to meet the deficiency. The indirect effect of county council extravagance was shown at the annual meetings of the principal London banks this year. The London and County Bank, the National, and the Provincial Bank were each obliged to write off a quarter of a million dollars from the year's profits owing to the decline in the value of London bonds on account of damage to the city's credit by the council's extravagance. This necessitated a suspension of the custom of distributing a portion of the profits among the staffs.

DISGUST TAKES STRONG HOLD.

There is some reversion against the professed converts of London even among the prominent sympathizers with the Liberal policy. H. Vivian, who is closely identified with the working classes and a strong Liberal made an emphatic protest in the House of Commons on Tuesday against the Socialism of the county council. Vivian is interested in the co-operative movement and has no faith in national or municipal ownership.

"It means," he said, "a decrease in production and an enormous increase in administrative expenses, and a lower standard in the article itself. In the long run the loss will fall on the poor."

The manifesto of the Municipal Reform party is now in the hands of all voters and is being advocated on scores of public platforms. The reform candidates make no extravagant promises. They declare that if, owing to the enormous commitments of the council under the progressive rule, they are unable to reduce the present rates, they "will, at all events, call a halt to future expenditures of a reckless and extremunerative character, and will avoid Socialistic and municipal trading experiments and give their time and energies to the detailed work of a sober and common-sense administration of the vast powers entrusted to them for the good of the capital of the Empire."

Mr. Jas. Haverson Pleads Both Ways

Yesterday afternoon a Times representative in conversation with Mr. Jas. Haverson, counsel for the Licensed Victuallers Protective Association of Ontario, and who had just successfully defended two cases against local hotelmen for alleged selling of liquor during prohibited hours, asked this skilled expouent of the license laws whether he ever prosecuted a case against hotelmen. "Why certainly," replied Mr. Haverson. "If the hotelmen do not retain my services or pay their association fees, I am at perfect liberty to act pro or con." He then went on to relate how recently a certain hotel firm was in presumed trouble and he was retained for the prosecution. The case resulted in the hotelmen losing their case with consequent expected results. However, as far as this gentleman is concerned the consensus of opinion here is that when Mr. Haverson defends a case that case, if any defence is able to be brought forward, is won hands down.

CATARRH GROWING LESS

Due to the Use of Hyomei Cures Without Stomach Dosing.

Inquiry at the local drug stores shows that the sale of remedies for catarrh has decreased very much in the last year. Some medicines which were formerly bought a gross at a time are now purchased in half dozen lots, and are rarely called for.

There is one notable exception to this decrease in sale, and that is Hyomei. This remedy is, in fact, responsible for the decrease in sale of catarrh medicines, as it has made so many cures of catarrhal troubles that naturally there is much less demand for remedies for that disease.

People who have been trying different medicines for catarrh during many years were induced to begin the use of Hyomei by the guarantee that the remedy would cost nothing unless cured. Much to their surprise, they found that Hyomei did what it claimed (if it did not it could not be sold under this guarantee) and they soon become ardent advocates of the use of Hyomei.

There is no disagreeable stomach dosing with Hyomei; it is used by being breathed through a neat pocket inhaler. The complete outfit costs but one dollar, extra bottles, if needed, fifty cents.

All druggists should be able to supply you with Hyomei, or we will send it by mail on receipt of price, and every package is sold with the distinct understanding that it costs nothing unless it cures. Write us today for a symptom blank, which we will send you free, together with a treatise on Catarrh and how to cure it. When you fill in and return to us the symptom blank, our consulting physician will give your case the best care and attention, and write you a letter of advice without charge. Booth's Hyomei Company, Buffalo, N. Y.

Mrs. Cowan's Body Sent to Kinmount

Yesterday morning the last mortal remains of the late Mary Cowan who passed away Sunday at the residence of Mr. Hatherly, Otonabee, were shipped to Kinmount, for interment.

The deceased was the wife of John Cowan of Haliburton County. About a week ago she went to visit her nephew, Mr. Hatherly and contracted pneumonia which resulted in her dead Sunday. The late Mrs. Cowan was 66 years of age and had lived near Minden for many years.

Funeral of Late Mrs. T. Nicholls Today

This afternoon, the remains of the late Mary Jane Bush, relict of the late Thos. Nicholls, will be held at 2.30 to the Little Lake cemetery, from her residence, 19 Waterford street. The deceased was fifty-three years of age. The late Mrs. Nicholls was born near Cobourg, but for the past twenty years had resided in this city. Her husband predeceased her six years ago. Two sons and two daughters are left to mourn her loss. They are Messrs. Geo. and Wm. Nicholls of this city; Mrs. A. E. Miller, of Edmonton, and Miss Hattie at home.

Former Troubles at Belleville Institute

As is known in this city Dr. Coughlin of Peterborough has recently been appointed superintendent of the Belleville Deaf and Dumb Institute.

The Belleville Intelligencer referring to an incident that occurred to this institution, previous to Dr. Coughlin's appointment, has the following story, viz.:

"The investigation at the Deaf and Dumb Institution was continued yesterday, and when the commission rose in the afternoon the proceedings were adjourned indefinitely. More evidence will, in all probability, be presented, but it will be some days before the commission again sits.

"During yesterday's proceedings a number of teachers and some officers about the institution were examined.

"Mr. R. Mathison, the superintendent, was upon the stand for some time at the re-opening of the sittings. His evidence was principally on the matter of oral teaching in the institution.

"Mr. Wm. Nurse, storekeeper was examined at some length. He stated that his duties were chiefly to see that the articles of food supplied were proper in quantity, rather than in quality. It did admit that some beef of a tough nature had been supplied.

"It also came out in evidence and it was not contradicted that at one time an old cow at the institution, which had out-lived its usefulness, was sold to a contractor, and that the meat was returned to the institution for use.

The teachers who were called upon to give evidence were Prof. Coleman, Messrs. Ingram and Campbell, Mrs. Baylis and Misses Agnes Gibson and Cross. The latter are teachers of oralism.

A great deal of evidence, in fact the bulk of it, was in reference to the teaching of oralism, and there was a diversity of opinion as to the proper mode of teaching the same. Some contended that scholars who are being taught oralism should not have signs connected with it, while others were of the opinion that signs should be used. By some of the witnesses it was contended that to make a success of oral teaching no other method should be imparted to the scholar.

Before leaving the institution yesterday, Mr. Snow, the commissioner made quite a minute inspection of the various workshops, school rooms and buildings generally.

Royal Bank Has Changed Headquarters

Referring to a bank which has recently opened a branch on Hunter street, opposite the post office, a Montreal despatch says: Some important appointments are announced by the Royal Bank of Canada. The headquarters of the bank have been transferred from Halifax to Montreal, and Mr. Herbert S. Holt, of this city, has been appointed vice-president. Two assistant general managers have been appointed. C. E. Neil, at present inspector, whose headquarters will be in Montreal, and E. J. Sherman, inspector of branches in Cuba, who will spend some months of the year in Cuba, and the rest in Montreal. Mr. W. B. Torrance will continue as superintendent of branches and rank next to Mr. Pease, the general manager, as second official of the bank.

Oratorio by Local Anglican Churches

Mr. R. J. Devey the indefatiguable choirmaster, and organist of St. John's church has completed arrangements whereby a combination of the three Anglican church choirs of this city will render Mainer's sacred oratorio "Crucifixion," in each church during the present session of Lent. This should organize a choir of trained voices nearly seventy strong, and should lay the foundation for an Anglican choral union.

The Trent Canal Outlet at Trenton

As the good citizens of Port Hope have made strenuous efforts to get the Trent Valley Canal outlet at their pretty little burg, it might, possibly in commiseration with their disappointment be noted that a despatch from Ottawa says:—

"The long outstanding question as to whether the outlet of the Trent Valley Canal would be at Trenton or Port Hope has at last been decided in favor of Trenton. Careful surveys have been made of both routes by the Department of Railways and Canals, and the result has been to indicate that Trenton on the whole has more in its favor as an outlet for this waterway than has Port Hope. The surveys show that the difference between the two routes, so far as construction is concerned is not very materials. In this respect Port Hope has a somewhat stronger claim. The distance, compared with Trenton is somewhat shorter. The cost of construction therefore, would be, according to the engineers' report, about $40,000 less to Port Hope than to Trenton. But this does not take into account the land damages and water power privileges, in which respect the Trenton route is found to be cheaper. One great factor in favor of Trenton is that barges can be taken from Montreal through the Trent Valley Canal to Montreal with perfect safety, being unchecked all the way. If Port Hope had been selected as an outlet these barges would have to be towed over a considerable distance out in the open lake, a rather risky, if not impossible experiment in severe weather."

St. Luke's Church Notes

Tonight at 8.30 a meeting of the Chancel Chapter of the Guild of St. Luke's church will be held in the vestry. All members and others interested in the work are requested to be present.

The Wednesday evening service will be held at eight o'clock, and Rev. Herbert Bin Oard, of Millbrook, will be the special preacher.

After the Wednesday evening services a meeting of the Brotherhood of St. Andrew's is called.

The Women's Auxiliary meets on Thursday, at 2.30 A meeting of the Executive will be held after the sewing meeting.

At the Friday evening Lenten service Rev. Edwin Daniel, of Port Hope, will be the special preacher.

The Mission Band meets on Friday at 4.15 at Mrs. Scott's residence, Ware street.

Envoy of Japan's Mikado is on the Way to Britain

Ottawa, Feb. 19.—Consul-General Nosse has been advised that his Imperial Highness Gen. Prince Fushimi, special envoy of the Japanese Emperor to his Majesty King Edward VII., is now en route for England, accompanied by a distinguished suite, consisting of the following; Hon. S. Nagasaki, Councilor of the Imperial Court; Hon. S. Baba, Comptroller of the Household; Major C. Higushi, personal aide-de-camp; Dr. T. Iwai, Physician Extraordinary; M. Tsuda, Clerk to the Household; S. Tokioka, Clerk to the Imperial Household Department; S. Kurokawa, Clerk to the Board of Ceremony. Extraordinary members; Admiral Viscount Yamamoto, late Minister of Navy; Gen. Viscount Nishi, late Military Governor of Kwantung Province; Col. Y. Matsuishi, chief staff officer Japanese army; Capt. T. Takarabo, Japanese navy; Commander H. Kato, Japanese navy, A.D.C. to Admiral Yamato. Capt. T. Ifaka, Japanese A. D.C. to Gen. Nishi.

His Highness Prince Fushimi, who with his party will visit Canada in April, is an elder member of the imperial family, being a second cousin to the Emperor. He studied at the L'Ecole Militaire, Paris, and has been serving in the Japanese army for many years. He was twice engaged in actual fighting—once in the Japanese war with China in 1894, when he was a brigadier commander, and another during the late war with Russia. In the latter war he was in command of the first division, under Gen. Oku, and fought the desperate battles at Kinchau and Nanshan, which practically cut Gen. Stoessel at Port Arthur from Gen. Kuroputkin's main army. Among the Prince's suite are two prominent personages. Admiral Viscount Yamamoto, late Minister of the Navy, planned all the naval operations during the late war with Russia. Another, Gen. Nishi, was in command of the second division, and fought the first battle with the Russians across the Yalu River. To the army Gen. Ian Hamilton, of the British army, was attached. Gen. Nishi was later made Military Governor of the Kwantung Province, including Port Arthur.

SPORTING TOPICS

CURLING.

Mr. Dave Hird the Charlotte street barber, The Times was told yesterday afternoon, has entered a rink for this week's bonspiel, to be played at two o'clock this afternoon. The Vice-skip Mr. Pete Long has however, it was said, thrown up the sponge and will not play under existing circumstances. The local players sympathize with Mr. Hall.

• • • •

It now looks like the Liberal curlers will try and redeem the laurels lost by them last season when the Tory players made mincemeat of these doughty wielders of broom and stones. This game will be played sometime towards the end of the present month.

• • • •

The great annual Peterborough bonspiel will commence this afternoon at two o'clock. The draw will be made about an hour previous. From 25 to 30 outside rinks are expected and ten to twelve rinks from the local club will be entered. This will make over 150 curlers at play.

• • • •

The officers of the local club were busy yesterday getting everything in shape for the opening of the big spell. The Brock street rink will be utilized by the curlers for the first two days of the bonspiel.

• • • •

HOCKEY.

A western paper, the Kenora Miner and News, referring to Peterborough's sometime hockey expert, who has gone west says:

"Whitcroft, the new rover, was also watched by the experts and he made good. He is very much of the Kenora-bred type of hockeyist, which is at present the best in the world. Swift, steady, aware and at times dashing, no mistake was apparently made in the selection. He played a splendid game Monday night, and well-earned the approval of the crowd. He may have at times felt strange on western ice, but he exhibited no shyness. In addition to his qualities as a hockey player, he is a gentlemanly fellow, which is a recognized requisite for the champions.

• • • •

Tomorrow night the much-lauded Marlboro team will go up against the locals here in a senior O. H. A. game. The marlboros are bringing down the strongest combination that they can get, and will make a strong bid for victory. It will no doubt be one of the fastest games of the season and a large crowd should be on hand.

The Laziest Man Who Ever Lived

London, Feb. 19.—The Board of Guardians of Lurgan, Ireland, assert that a villager named Thompson is the laziest man on earth.

Thompson went to bed in 1877 and did not leave it until two weeks ago and then only on compulsion. His aged mother, with whom he lived alone, was taken ill and had to be removed to an infirmary, and Thompson was then compelled to get up. The effort rendered him too tired to walk and he was taken to the workhouse in an ambulance, where he remained till his mother returned home.

Thompson followed her immediately, but was compelled to walk this time, the poor guardians refusing to furnish an ambulance. He is now comfortably in bed again. He is supported by his old mother, who receives occasional help from her energetic sons in Australia and eight pence a week from the guardians.

The doctors tried irritating plasters and electric currents on Thompson to make him get up, but they had no effect. He is quite healthy, but suffers from acute, chronic laziness.

Cut Her Throat

Ottawa, Feb. 19.—Mrs. Flosetti, an Italian woman was found at her home 700 Bessex street yesterday morning with her throat cut from ear to ear. The detective department was at first inclined to believe that it was a case of murder. They now think it may be simply suicide. The husband of the dead woman, who is an employe of the Grand Trunk, is out of the city. The couple had two children.

Bible Under His Foot

Ravenna, O., February 19.—Out in the North Benton cemetery is a monument just erected by Chester Bedell to commemorate his skepticism. Bedell is a famous infidel.

He is now 80 years old and well preserved. The monument he has just erected shows him in the act of treading the Bible under foot. On it he has inscribed that he is "the great and only infidel."

Bedell is wealthy. His wife is a devout Presbyterian.

Belleville, Feb. 19.—Rumor here says that Police Magistrate John J. B. Flint has been dismissed. He declines to talk. He has been police magistrate here for more than 20 years.

To stop a Cold with "Preventics" is safer than to let it run and cure it afterwards. Taken at the "sneeze stage" Preventics will head off all colds and Grippe, and perhaps save you from Pneumonia or Bronchitis. Preventics are little toothsome candy cold cure tablets selling in 5 cent and 25 cent boxes. If you are chilly, if you begin to sneeze, try Preventics. They will surely check the cold, and please you. Sold by J. D. Tully.

Score Killed on New York Electric Express

Terrible Accident to Train in American Metropolis Going Over 60 Miles an Hour---Bodies Mashed to Pulp.

New York, Feb. 18.—The White Plains and Brewster Express on the Harlem division of the New York Central jumped the tracks at a curve near Woodlawn road in the Bronx Saturday evening, and was practically smashed to pieces. Twenty are dead, two fatally hurt, and 45 injured, 50 of them seriously. The death list may yet be increased.

The train is a favorite one for suburban theater goers, and was well filled when it pulled out of the Grand Central Station at 5.45 o'clock, the greater proportion of the passengers being women. The train consisted of six heavy coaches, and was drawn by two of the new big electric locomotives.

At Woodlawn road the four tracks turn the curve through a heavy cut. The train, according to survivors, took the curve at great speed, some say at the rate of 60 miles an hour.

It had cleared the cut when the last car left the track, dragging the next car off with it. For a few yards these two coaches bumped on over the ties, then the last car overturned, throwing the entire train from the rails. The car turned over again and again, and was finally smashed to splinters, while the majority of the passengers, most of them women, were mashed to a shapeless pulp.

MARVEL ANY ESCAPED.

Relieved of the weight of the last coach, the rest of the train ground along on its side for a hundred feet or so. The marvel is that anyone in the train escaped alive. Fire broke out in the wreckage of the smashed last car and consumed several bodies before fire engines could reach the scene.

The dead and injured were strewn all the way from 201st street on under the Woodlawn road bridge, to 207th street, where the train finally came to a stop, for a distance of over 1,000 feet. The tracks were strewn with parts of the bodies of the dead. Many of the bodies picked up along this highway of death were so literally ground up and so completely divested of clothing that it was a hard matter to identify them.

The third rail, which had been ripped up for many feet, penetrated the wooden cars in places and the sputtering which followed threatened to burn the wreckage before the dead and injured could be removed. The first firemen to respond to the fire call had quenched the flames.

GIRL STUDENTS KILLED.

A party of young women in the rear car were students at a private girls' school. Nearly all these young women were killed or mortally hurt. In fact, scarcely anyone in the rear car escaped death or fatal injury.

Among the dead is Myron E. Evans, of White Plains, N.Y., president of the Cape Breton Railway. He had been at the offices of the company consulting the directors with regard to a plan for extending the road from St. Peter's, N.S., to Louisburg. He was regarded as the best expert on Canadian railway development in the United States.

RUNNING TOO FAST.

Coroner Scannaloke said he had secured a statement from Motorman Rogers of the wrecked train, in this, according to the coroner, the motorman said that he was running on schedule time when the accident occurred, and he admitted that the speed of his train was seventy miles an hour. Rogers, the coroner said, declared that he did not know anything was wrong until an eighth of a mile beyond the three overturned cars. Then, said the coroner, it was another eighth of a mile before the motorman came to a standstill. Rogers declared the motors did not leave the tracks. The coroner is positive that the motors did leave the tracks, and has a piece of a rail which he says will prove that the rails were out of alignment.

The coroner has obtained statements from some of the passengers that the train was running at a speed which frightened them, that several declare they were so alarmed that "they put an their overcoats in the third car and went to the rear car, believing there was less danger there."

JAPAN PROPOSES END OF PEERAGE

Japanese Nobleman Says Presence of Distinct Class Retards Progess.

TITLES LAPSE WITH DEATH

Cites Example of Old Feudal Barons Who Resigned in 1871.

Chicago, February 18.—A special cablegram from Tokyo says that Count Takuke Itagaki has addressed a circular to the nobility in which he proposes the abolition of the peerage. He says that the presence of a distinct class between the imperial house and the people is injurious to the progress of the nation.

FOLLOW EXAMPLE SET.

The count thinks the existing peers should enjoy their titles for one generation and that then the peerage should cease to exist. He, therefore, advises the peers to return their titles to the Emperor just as the old feudal barons or diamois relinquished their prerogatives at the time of the abolition of feudalism in 1871.

This radical suggestion, coming from a man of Count Itagaki's high standing, causes great excitement and wonder.

COUNT IS A LIBERAL.

Count Itagaki is the founder of the the Liberal party in Japanese politics. He is seventy years of age and since 1900 has not been active in public life. On the inauguration of the imperial government he was made a cabinet officer, resigning in 1872 and founding a new party in 1881. After traveling through Europe and America he was made a count in 1887.

HINDOOS HOOT THE BRITISH

Outbreak in Lahore Over Conviction of Native Journalists.

Lahore, India, February 18.—There has been a violent outbreak of anti-British feeling here, following the conviction of the proprietor and editor of the native newspaper Punjabi, for stirring up hatred against the Government and the English community. The paper printed a story that an English officer shot a Mohammedan policeman for refusing to carry the carcase of a dead boar the officer had speared, adding that the Government had hushed up the affair, and the murderer escaped, "as European murderers of natives usually escape in this country where the much vaunted British justice is a delusion."

The Government prosecutor showed that the story was fictitious, and that the policeman was killed by being thrown from a horse. The prisoners pleaded that they had published an unverified rumor in good faith. The court sentenced the proprietor to two years' imprisonment, and to pay a fine of 1,000 roupees. The editor was condemned to six months' imprisonment and to pay a fine of 700 rupees. After the sentences had been imposed a crowd of Hindoos paraded the streets, angrily shouting denunciations and hooting every European they met. The native population is deeply stirred

Kingston Wins the Championship

Last night the 14th Regiment hockey club of Kingston, won a double-header from Midland, by a score of 8—6. The game was played in the Mutual street rink, Toronto, on last ice and was strenuous at all stages.

by the Limestone City winning the aforesaid game which counts two points to their credit, they have cinched the O.H.A. eastern senior district championship.

Queen of Spain's Nurse

London, Feb. 18.—An English nurse, in the person of Miss Gertrude Bunting of Nottingham, has been engaged by the Queen of Spain. Miss Bunting has been nurse at Mount Stuart since the birth of the Marquis of Bute's daughter, Lady Mary Stuart, last year.

A GOOD BREAKFAST

Some Persons Never Know What It Means.

A good breakfast, a good appetite and good digestion mean everything to the man, woman or child who has anything to do, and wants to get a good start toward doing it.

A Mo. man tells of his wife's "good breakfast" and also supper, made out of Grape-Nuts and cream. He says:

"I should just like to tell you how much good Grape-Nuts has done for my wife. After being in poor health for the last 15 years, during part of the time scarcely anything would stay on her stomach long enough to nourish her, finally at the suggestion of a friend she tried Grape-Nuts.

"Now, after about four weeks on this delicious and nutritious food, she has picked up most wonderfully and seems as well as anyone can be.

"Every morning she makes a good breakfast on Grape-Nuts eaten just as it comes from the package with cream or milk added; and then again the same at supper and the change in her is wonderful.

"We can't speak too highly of Grape-Nuts as a food after our remarkable experience." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

Beware of Mercury

You May be Using this Harmful Drug and Not Know it.

A favorite method of administering this deleterious drug is in cathartic pills. Beware of "quick-result" articles, they may do more harm than good.

Drastic cathartics will weaken the strongest. With old people they are a positive menace to life.

Merely to restore normal bowel action and gently stimulate the liver is all that the wise physician recommends.

To keep the system pure and clean, nothing is so efficacious, as the vegetable pills of Dr. Hamilton, which are composed of such herbs as mandrake, butternut and dandelion; they contain not an atom of any substance that could injure even an infant.

By their certain action on the Liver Dr. Hamilton's Pills cause bile to be secreted which forms the stimulus that moves the bowels; this is nature's own method and the best one.

Mr R. Hambly, of French River, Ont., writes as follows; "I was inclined to bilious attacks and frequently was too ill to work. Most remedies purged and weakened my bowels, but Dr. Hamilton's Pills gently stimulated my liver, and by strengthening the stomach made a perfect cure. My health has been just splendid since I used Dr. Hamilton's Pills."

Get Dr. Hamilton's Pills from your druggist or storekeeper, 15c per box or five boxes for $1. By mail from N. C. Polson & Co. Hartford, Conn., U.S.A., or Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

IF WAR SHOULD COME

What would happen in case of war between Japan and the United States at this time? The pride of America would be humbled into dust.

Such a war would be almost entirely a naval struggle. A comparatively small portion of the United States navy is on the Pacific Ocean. Practically all of Japan's powerful fleet, trained nearly to perfection by the recent war, is in home waters. Japan struck the first blow in its conflict with Russia. It would surely do so in a war with the United States. Three months would be required to get the American warships on the Atlantic Ocean to San Francisco. The marvelous voyage around the Horn made by the battleship Oregon in the war with Spain occupied more than two months.

The American fleet in the Pacific would be faced at once by overwhelming odds. Either the swifter ships would be compelled to make a dash for San Francisco, leaving the slower ones to their fate, or all would have to retire to the harbor of Manila and make the best preparations possible for defense.

Without question, Japan's first move would be against the Philippines. It would have command of the sea and have a short, unobstructed route for the transportation of all the troops it needed. This attack would be made before it was possible for American reinforcements to arrive and all the experience gained in the siege of Port Arthur would be applied. There can be little doubt as to what the result would be. The American soldiers and sailors would be overwhelmed by sheer force of numbers, if nothing else.

The capture of Guam and the Hawaiian Islands would be easy. American commerce on the Pacific would be stopped. The Japanese would soon be in a position to meet the warships coming from the Atlantic with a fleet of superior size. Possibly the Japanese would be content with the advantage thus gained and refrain from attacking the Pacific coast.

The United States would probably announce to the world that it intended to retrieve what it had lost if it took ten years and the expenditure of billions of dollars. If allowed by the other nations to pursue this course it might win in the end on account of its superior resources. But some of them might object to such long drawn-out hostilities. England now has an alliance with Japan.

To defeat the Japanese navy and recover the Philippines would require the greatest fleet of warships, transports and colliers ever gotten together. It would be necessary to build more warships, which requires years, and Japan would be building at the same time.

A reasonable view of the facts shows that this is what would probably happen in case of an immediate war with Japan. And the Japanese know full well the advantage they would have in such a struggle. The spirit which inspires in Americans the idea that the Yankees can "lick all creation" is perhaps priceless, but it is well to put a curb on some of its manifestations.

A CAT'S EYES.

The Chinese Discovered Their Use as a Time Indicator.

The first European to learn of the use of a cat as a time indicator was M. Huc, who in a work on the Chinese empire tells how he was initiated into the mystery.

M. Huc and a party of friends set out to visit a Chinese Christian mission settlement among the peasantry. They met a young Chinaman on the road, and to test his intelligence they asked him if he could tell them the time. The native looked up at the sky, but the clouds hid the sun from view, and he couldn't read any answer there. Suddenly he darted away to a farm and returned in a few moments with a cat in his arms. Pushing up its eyelids with his hand, he told Huc to look at them, at the same time volunteering the information that it was not noon yet. While they were puzzling over the case the boy went about his business.

When the party reached the village, they asked the Christian converts if they could tell the time by a cat's eyes and how it was done. Immediately there was a wild hunt, and all the cats obtainable in the neighborhood were brought before them.

The Chinese pointed out that the pupils of a cat's eyes were gradually narrower up to 12 noon, when they became scarcely perceptible lines drawn perpendicularly across the eye, and after that dilation recommenced. Huc examined the eyes of several cats and verified what the Chinese had told him.—Chicago Chronicle.

AN ODD WAGER.

The Peculiar Bet a Foreign Prince Laid and Won in Paris.

Gambling has always been a favorite occupation for the sons of royal houses, but none of them probably has ever exhibited so much wit and ingenuity in his betting as a foreign prince did at his stay in Paris.

He laid a heavy wager with a member of the Imperial club of the French capital that within two hours he would be arrested by the police without committing any offense or provoking the officers of the law in any fashion. Accordingly, having clothed himself in rags of the most disreputable appearance, he walked into one of the most aristocratic restaurants in the city and ordered a cup of chocolate. The waiter refused to serve him unless he showed evidence that he could pay. The prince at once drew a roll of bank notes from his pocket and offered one of large denomination to the astonished attendant. The latter took the bill and carried it at once to the proprietor, who sent for the police, in the meantime allowing his strange guest to be served.

As soon as the authorities arrived they arrested the incognito son of royalty and took him to the nearest station, where of course he was released after he had disclosed the facts of the affair.—New York Tribune.

Color Blindness.

The term color blindness implies an entire absence of the color sense, and there are a few persons who are in this condition, but it also includes all the forms of partial color blindness in which the perception of one of the fundamental colors—red, green and violet—is wanting, and which are known as red blindness, green blindness and violet blindness. The line between these various kinds of color blindness and a perfect perception of colors is not sharply drawn, so that a large number of persons have what is called a feeble color sense, which falls short of actual color blindness. There is no doubt that color blindness in its various forms is much more common than is generally supposed, and it is more common among the imperfectly than the well educated classes.

Barbers Ages Ago.

The first barbers of whom there is any record plied their trade in Greece in the fifth century B. C. In Rome the first barbers operated in the third century B. C. In olden times in England the barber and the physician were identical. Thus a king's barber was also his chief medical adviser. In the time of Henry VIII. of England laws were made concerning barbers, of which the following is an extract: "No person occupying a shaving or barbery in London shall use any surgery, letting of blood or other matter, except the drawing of teeth."

After It Is All Over.

When yarns are being spun one hears a good deal concerning the curious antics people go through when highly excited, but very little is said about the man who "gets scared after it is all over." And the latter, not being so constituted that he can faint, as a woman often does after a fright, generally keeps his own counsel and often is given the credit of being "cool and "nervy" when the fact is that his knees are ready to bump together for mutual support.—Forest and Stream.

On the Safe Side.

They had been engaged for fully thirty minutes by the cuckoo clock.

"I have a surprise in store for you, Alfred, dear," she said. "I can cook as well as I can play the piano."

"That being the case, darling," he replied, "it will be well for us to board."

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.
Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

You May Need It

Ask your doctor about the wisdom of your keeping Ayer's Cherry Pectoral in the house, ready for colds, coughs, croup, bronchitis. If he says it's all right, then get a bottle of it at once. Why not show a little foresight in such matters? Early treatment, early cure.

We have no secrets! We publish the formulas of all our preparations. J. C. Ayer Co., Lowell, Mass.

THE CHILD'S MIND.

Give It a Chance to Develop by Its Natural Processes.

The littler they are the better, because farther removed from the world that is ours and deeper placed in their own world. A good baby radiates peace. Every one who is rightly constituted smiles at the sight of it.

They are busy, they are cheerful. As a rule, they seem to be kind to one another. They are not bored, and unless the weather is insufferable or they are sick they are not depressed.

What philosophers! What heroes! Is it strange that the attitude of an unperverted child should be the Christian ideal?

The great merit of children as companions lies in the breadth of their tolerations. They are easy to please, agreeable to most propositions and not very critical.

They do not "know better." That is one of their delightfulest traits. Children will trust you, and that is one of the most gratifying compliments possible.

In the company of children you have relief in considering what will pay. The things that they do and prefer to do, do not pay, as a rule, except in the doing of them.

Wise elders who are qualified to train the mind of a child are pretty scarce. The next best thing is the elder who is wise enough to respect the child's mind and give it a chance to develop in a sympathetic atmosphere by its own natural processes.—E. S. Martin in Harper's Magazine.

AN OLD GERMAN LEGEND.

The Skull With the Nail Driven Through Its Temple.

At Freiburg, Baden, in front of an old chapel rich in mediaeval painting depicting the rewards of virtue and the wages of sin, stands a great cross, at its foot a skull with a nail driven into the temple.

A shoemaker of Freiburg, according to tradition, died suddenly in the good old days before coroners and juries were too inquisitive and was buried near where the cross stands. Scarcely had the earth upon his grave been wet by the rains before his wife took a second husband.

Neighbors talked, but that was all. One night the priest of the parish awoke to find standing at the foot of his bed the ghost of the dead shoemaker. The ghastly figure raised a gory lock from its forehead and pointed to a nail driven in the temple.

The body was exhumed, and there was the evidence of the crime just as the specter had indicated. The wife confessed the murder and was executed. But the skull was placed at the foot of the cross as a warning.

"The effect was most wholesome," relates the truthful chronicler, "for since then not a wife of Freiburg has murdered her husband."

A Contrary Flag.

If ever there was anything in the world that went by contraries, it is the Chinese flag. It will be recalled that it is one of the gayest of national standards. The body of the banner is of a pale yellow. In the upper left hand corner is a small red sun, and looking at it is a fierce Chinese dragon. About 1,000 years ago, so the story runs, the Chinese made war upon the Japanese. They prepared for a great invasion. As a prophecy of victory they adopted a standard which is that of the present time. They took the sun of Japan and made it very small. This they put in front of the dragon's mouth to express the idea that the Chinese dragon would devour the Japanese. It happened, however, that the Chinese fleet, conveying an army of 100,000 men, was wrecked on its way to Japan by a great storm, and all but three of the 100,000 perished. The result of recent events has not been any more convincing than the first affair that the Chinese flag has been correctly conceived.

Humor in the Far East.

Abdur Rahman, the late ameer of Afghanistan, had a grim sense of humor which was sometimes exercised without scruple. On one occasion a durbar he was holding was interrupted by a man who, in a state of the greatest excitement, rushed in declaring that the Russians were advancing to invade Afghanistan. Turning aside for a moment from the business in progress, the late ameer in the most unconcerned tones ordered his shahgassi to conduct the man to the summit of a certain watch tower. "Look you out well for the Russians," commanded Abdur Rahman, "for you do not eat until you see them arrive."—Grand Magazine.

Cooks Ruin Their Taste.

"I never season things up to my own taste," said a man who has cooked in a restaurant for many years. "Very few cooks do. They have palates that crave high seasoning. The longer they cook the more salt and pepper and spices they require. If I should send up my dishes as I like them, they would be so hot and peppery that half the patrons in the restaurant would be unable to eat them."—New York Press.

The Accident.

Hisonner—You are charged with breaking a chair over your wife's head. Prisoner—It was an accident, your honor. Hisonner—What! Didn't you intend to hit her? Prisoner—Yes, but I didn't intend to break the chair.

The Lazy Horse.

An Irishman once tapped a poky horse with a whip and said, "Pick up your feet, and they'll fall themselves."—Atchison Globe.

The readiest and surest way to get rid of censure is to correct ourselves.—Demosthenes.

COMING

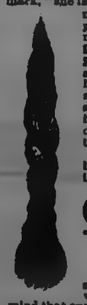
Monday, Feb. 25th

ORIENTAL HOTEL, PETERBORO

TO IMPROVE YOUR APPEARANCE

Retain your youthful freshness so that no one can remark, "she is past her prime." To appear younger and more attractive than the average woman, you must be particular that your Hair shows no sign of being thin, short or scrawny. A DORENWEND TRANSFORMATION, POMPADOUR, WAVE, CURL or SWITCH will substitute nature's defects. Even if you have plenty of your own hair, these light and airy artifices may be worn over it, saving you the worry of arranging your hair in the prevailing style. Your hair can be perfectly matched in color and texture, so that detection is out of the question.

Now, if you have in your mind any prejudice regarding artificial hair, it will forever be dispelled after seeing how natural and becoming our productions will prove in your case.



CONSULT PROFESSOR DORENWEND

DURING THIS VISIT

Advice regarding your hair and how you can make the most of it, also a personal demonstration of the newest styles in transformations, will be given the same as at our establishment in Toronto. Bear in mind that our styles are originated and designed by Professor Dorenwend, and they cannot be procured from any other makers. Their equal have yet to be produced.

MAN TO MAN—ABOUT BALDNESS

If you are bald, or partially so, you must realize that it makes you look old. Notwithstanding the desire to have back your one time bushy head of hair, you hesitate before wearing a natural hair covering simply because you imagine it is going to be noticed by others. Now you never made a greater mistake. Thousands of men, who thought the same as you do, are to-day wearing a

DORENWEND PATENT TOUPEE

and instead of carrying the handicap, that baldness proved to them, they are now enjoying the advantage of "looking young"—and that is what counts to-day in business and social life. Our Patent Toupee is a featherweight facsimile of your own natural hair and may be worn without fear of detection—impossible to remove from the head unless at will—not the least clumsy or uncomfortable. They act as a protection, preventing colds and catarrh, so common to bald men.

Now do not neglect this opportunity—come and see for yourself. A few minutes' demonstration will convince you that a Dorenwend Patent Toupee is not like the clumsy, wiggy affairs that are claimed to be "just as natural."

The Dorenwend Co. of Toronto, Limited, 103 and 105 Yonge Street

REMEMBER PLACE, DAY AND DATE

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

SERIOUS, YET FUNNY

UNCONSCIOUS HUMOR THAT HELPS TO PUT SPICE IN LIFE.

Some Examples of Delightful Incongruities in Speaking, Writing and Painting That Appeal Strongly to the Sense of the Ridiculous.

Nothing has added more to the merriment of the world than the unintentional, unconscious humor of writers, public speakers and, in fact, all classes and conditions of men and women. And there is none so delightful. It far exceeds in mirth provoking quality the cold blooded humor of the professional wits.

We Americans are a fun loving people, and we must and will have our jollity. Some one has said with certain truth: "With all our vanity, energy and unrest, we are not a dull, cheerless people. Sour faced fellows, yellow and dyspeptic, are to be met with in our cars and on our streets, but they are not the type of the American, for he is as ready for a laugh as for a speculation, as fond of a joke as an office."

And the joke is all the more enjoyable when it is spontaneous. The greater the stress and strain of life the greater the need and demand for humor, and no one deprecates the value of humor excepting those who have none of this good gift to their portion.

"Sunset" Cox, one of the wittiest men of his day, says in his book, "Why We Laugh:" "Eliminate from the literature and conduct of any one people the amusing and the amused faculty, and you produce a sterility as dull and uninteresting as the cinders and ashes of the volcanic fields of Iceland. But include the amusing element within the experience and history of mankind, and no description of luxuriance, with grape, olive, nectarine and orange, such as makes the vales of Portugal a perennial smile, is adequate to emphasize the contrast."

One could not well instance a more amusing blunder than that in a painting of the "Blessed Virgin" in an old church in Spain. In this painting the Virgin is represented as sitting on a red velvet sofa fondling a cat with one hand, while with the other she is pouring coffee from a silver coffeepot.

This is as amusing as a painting in a German church representing the sacrifice of Isaac by Abraham. In this painting Abraham is about to discharge a huge pistol at Isaac when an angel descends and pours a pitcher of water on the pan of the pistol, thereby saving Isaac.

The writer once saw a crude painting of King Herod with a pair of spectacles painted on his nose. There is a very old painting of St. Peter denying the Saviour, and several of the Roman soldiers in the background have pipes in their mouths.

Those who are on the lookout for them will find many amusing blunders in the daily papers and in periodicals of all kinds. It was but the other day that the writer saw Miss Fanny Crosby referred to in a religious paper as the "author of so many blind poems." And it was a great metropolitan daily that one morning gave its readers the following information regarding the wrecking of a ship the night before: "The captain swam ashore and succeeded in saving the life of his wife. She was insured in the Northern Marine Insurance company and carried a cargo of cement."

Equally amusing as an instance of unconscious humor was the statement made by another paper regarding the capsizing of a boat at sea. It said that "but one life was lost, and that was found afterward."

He must be sadly deficient in humor who does not find himself amused by a sign like the following seen in the window of a shoemaker: "Any respectable man, woman or child can have a fit in this shop." It was an enterprising furrier who placed a card in his window stating that for the benefit of the ladies he would make "muffs, boas, etc., out of their own skins."

A prolific source of amusement to manuscript readers is the surprising way in which aspirants for literary honor and glory often "put things." We find one young woman saying of her heroine: "The countess fell back in a deadly swoon. When she revived her spirit had fled."

Another young writer places her heroine in a very perilous situation and then says of her, "Her lips quivered; her cheeks grew pale; her breath came in short pants."

A third writer gives this amusing description of the appearance of some one she referred to as "the bell of the ball:" "She was clad in some soft, clinging, fleecy, vapory stuff of purest white that gave the appearance of a bit of detached cloud floating in the sky. She wore no ornament with the exception of several bits of rare bric-a-brac gathered in a foreign clime."

A charming bit of purely unconscious humor was that noticed by some visitors to a great English coal mine. At the mouth of the great central shaft hundreds of feet deep was a placard bearing these words:

"Please do not tumble down the shaft."

Market Rate.

Some of these big magazine editors are humorous at times. In response to this inquiry from an amateur, "What does poetry bring in New York?" one of them replied:

"We have no regular prices, but if you ship it in crates or carloads we believe that you can realise 1¼ cents a pound for it."

He is great who is what he is from nature and who never reminds us of others.—Emerson.

Mexican Burials.

The Mexicans have a queer way of burying the dead. The corpse is tightly wrapped in century plant matting and placed in a coffin hired for about a shilling. One or two natives, as the case may be, place the coffin on their heads and go at a trot to the grave, where the body is interred, and the coffin is then returned.

A WINNER.

My brother Johnny needs some clothes.
He wants some right away,
But father says the boy is wrong.
"Your suit's all right," he'll say.
But Johnny won't need clothing long;
He'll have a new suit soon,
For mother is to play some bridge
Tomorrow afternoon.

And little Mary wants a slate;
She's started in at school,
But pa says, "Make the old one do."
He's stubborn as a mule.
But 'twon't be long till Mary has
Her slate—you wait and see—
For mother is to play some bridge
Tomorrow about three.

There's lots of things we need at home,
But father laughs at us.
He says we're too extravagant;
It does no good to fuss.
But we most always get such things—
You bet your life we do—
For mother plays bridge now and then;
She understands it too.
—Denver Post.

One Effect of Good Works.

"Great heavens, neighbor, what's happened—burglars, fire or what?"

"Nope; m' wife's church is holding a rummage sale to get money to clothe the heathen."

The Modern Way.

A teacher was comparing the marriage customs of the middle ages with those of the present day.

"When a man and woman wish to be married now," he remarked, "they simply go down to the courthouse and obtain a license."

"Which one wears the tag?" eagerly inquired a boy who had recently become the proud possessor of a dog.—Woman's Home Companion.

A Sarcastic Approval.

"No," said the embittered person, "when I want financial assistance I go to strangers. I do not ask friends or relatives."

"Well," answered the logical man, "maybe that's the best way. Friends and relatives are in a position to keep posted on a man's record."—Washington Star.

There Are Others.

"You are not the only one," said his wife.

"Not the only one!" echoed her husband.

"No, indeed!" rejoined the better half of the combine. "According to statistics, about 67 per cent of the people snore."—Detroit Tribune.

Assisting Witnesses.

Lawyer Brief—I see they have invented a folding step which is being used in some courts on the chair used for witnesses when they are under examination.

Lawyer Long—That ought to let them down easily.—Yonkers Statesman.

Her Clever Idea.

"Yes, I promised George I'd send him a message on a picture post card from every city we visit abroad."

"It will be an awful nuisance, won't it?"

"Oh, no; I'll get them all ready to send before I leave home."—Cleveland Plain Dealer.

A Case of Conscience.

"So you are engaged in depressing values?"

"Only temporarily," answered Mr. Dustin Stax. "I want to come as near as possible to reconciling my conscience to what I am going to tell the assessor."—Washington Star.

His Novel.

American Author—How is your new novel progressing?

French Ditto—I have the story all written, and now I must go over it and polish it up.

"Oh, put that time on the next one!"—New York Life.

The Right End.

One day Percy, aged three, was playing with the tail of a big dog.

"Look out," said the careful aunt; "he'll bite you, dear."

"Oh, no, auntie," he said. "I's not at the bitin' end."—Harper's Weekly.

Knew He Wasn't Safe.

"I assure you you have no reason to be jealous of your chum and me, and you know she says she wouldn't marry the best man alive."

"That's why I'm jealous."—Houston Post.

Quite Obvious.

Magistrate—Why did you steal this gentleman's watch?

Pickpocket—I was late for me grand opery engagement, and I wanted to gain time.—Baltimore American.

What It Teaches.

"What does the story of the prodigal son teach us?" asked the Sunday school teacher. "It teaches us how to get rid of the fatted calf," said the bad boy.—Army and Navy Life.

A Great Consideration.

"You consider him the foremost of our arctic explorers?"

"I do," answered the publisher. "I know of no one else whose literary style approaches his."

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tully.

This is the Safest and Greatest Buy.

This Company owns **FIVE MINING CLAIMS** containing 160 ACRES, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 3 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
3 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 3-foot level, show 133 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 600 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 20 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein, following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 20 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 8 inch nickeline, 18 inch smaltite together with cobaltite. Assays gave 672-1293-492-1161 oz. silver, or an average of over 900 oz. silver, which at the present price of 75c. is equal to $650.00 per ton, exclusive of cobalt values. The Edison Mine is right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906.

JACOB M. EGGERT, M. E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00) The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

W. H. JACKSON,

261 KING STREET WEST, - TORONTO, CANADA

DAWSON KENNEDY, Local Agent, 600 WATER ST., PETERBORO

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 3.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 1 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 60 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 21 to 120 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a great property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness [illegible] long been admitted. Now development work proves the [illegible] mine expectations. The Baxter Springs [illegible] of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore the past week. J. C. Baynes, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 3, and it certainly shows up fine. This shaft now has 130 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with the south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in its east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

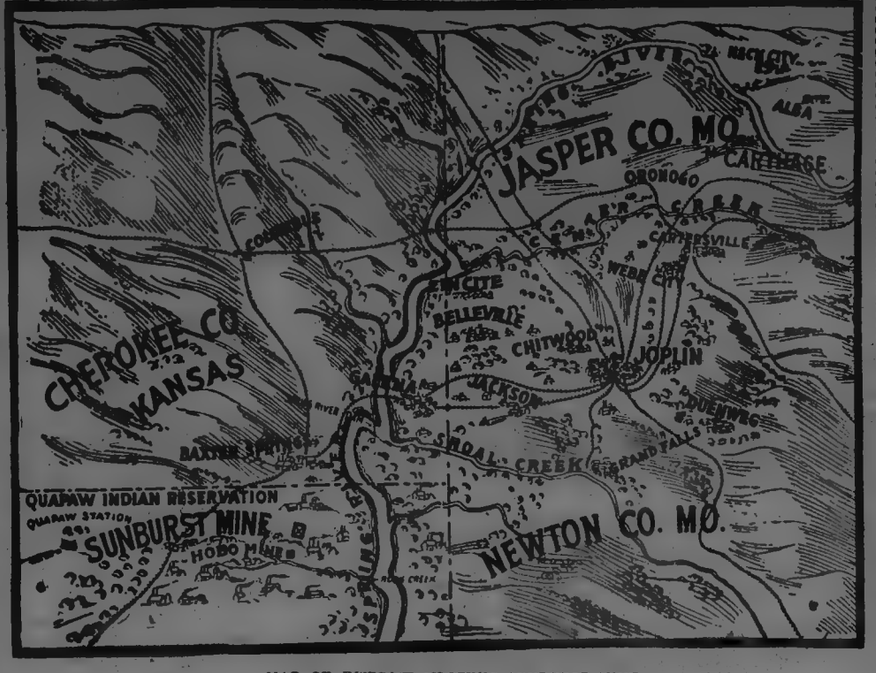
This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whitneys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 30 feet in thickness, lying at a depth of from 57 feet to 74 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined walls of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magaska, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 10 per cent. In three months 500,000 pounds of rich ore was taken out by the Hobo. This mine is 150 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 2 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.



MAP OF DISTRICT SHOWING SUNBURST MINE.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000

The increasing demand for lead and zinc is too obvious to need detailed statement. Both metals are in steady demand and at steadily advancing prices. The prices have gone up since 1899 from $21.42 per ton for lead and $16.51 for zinc to $32.00 for lead and $45.63 for zinc. The lead and zinc industry is now right at the front in the great commercial enterprises of the country. This southwestern district produces 80 per cent. of the zinc produced in the United States.

The earning capacity of the Sunburst's property, handling ore that averages from 8 to 15 per cent. can be estimated from the production of other companies. The Center Creek Mining Company, of Webb City, Mo., from an 80-acre tract, has taken out nearly $7,000,000 and is still producing.

The report for the year 1901 shows the following production during that year from the several properties mentioned:

	Acres.	Value.
American Zinc, Lead & Smelting Co.	4000	$ 967,169.00
A. W. Taylor	120	159,758.00
J. W. Aylor	40	676,571.00
The Burgner Mining Co.	20	158,579.00
Center Creek Mining Co. (production to date)	200	6,062,194.00
Mrs. E. J. Chinn	120	224,709.00
Majestic Consolidated Zinc & Lead Co.	52	234,190.00
Continental Zinc Co. (production to date)	200	1,873,563.00
Consolidated Troup Mining Co.	40	193,613.00
Daughtery-Davy-McMillan Estate	60	456,695.00
The Empire Zinc Co.	491	126,319.00
Fox Heirs	20	120,724.00
Granby Mining & Smelting Co., 1903		1,281,651.00
Granby Mining & Smelting Co., 1904		1,025,650.00
John G. Guinn	640	83,267.00
Pittsburg-Joplin Lead & Zinc Co.	10	98,000.00
Pittsburg-Missouri Zinc & Lead Co.	170	413,804.00
United Zinc Co.	186	290,376.00

From these figures it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent.; the Chapman 120 per cent., the Omega 117 per cent., and many others yield enormous returns.

BIRD'S-EYE VIEW OF PROPERTY.

These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the bins, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world today. Do you want 100 per cent. or more on your money?

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize his opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this plan of payment must be apparent at a glance. By subscribing, for instance, $80.00 now and remitting only $8.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $8.00. You really invest $8.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, lot by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground *floor* of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 60 feet in diameter. The shaft of the Hobo Mine was sunk within 3 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 67 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drillings this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No 1 shaft, 5 1-2 by 8 feet, is down 55 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 5 1-2 by 90 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 20 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 20-foot face of ore.

Shaft No. 3, 5 1-2 by 5 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway, Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $25,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S. PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Osceola Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	25 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	60 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	25 per cent.	Linger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	120 per cent.
		Underwriters' Land Co.	60 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$72.00 buys 900 shares of stock; $7.20 down, $7.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.00 buys 3000 shares of stock; $24.00 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Press Reports Rich Strike by Sunburst Mining Company

From the Baxter Springs News, of November 8, 1906.

One of the richest strikes made in the Baxter Springs mining camp, south of this city, for some time past, was that made by the Sunburst Mining Co., operating on one of their properties just east of the Sunnyside and north of the Hobo. The Sunburst Co. have three shafts in ore, with a large amount of drifting done, and this strike was made in No. 1 shaft, and apparently in the Hobo run of ore, which has always been considered one of the very best in the Quapaw reservation. The farther this run of ore is developed the richer it is showing.

The Sunburst Mining Co. also has made a very important deal the past week by purchasing from the Great Northern Mining Company 280 acres of leases one mile east of the Johanna, less than one mile southeast of the new rich strike made by the Irish Maid, and about two miles west of Monkey Hill, where the most famous lead strike was made ever encountered anywhere in the southwest. The Monkey Hill strike showed as much as 28 inches of solid lead of the very highest grade. The Great Northern, which is one of the largest holders of the best leases in this camp, made this sale the past week.

The purchase of this large tract of land by the Sunburst crowd means important developments in that section in addition to those already made, and, following on the heels of the rich lead strike made on the Charley Blackjacket land to the north of the tract and the purchase by a syndicate of Minneapolis iron men, will cause an unusual amount of activity in that part of the camp.

The Sunburst Mining Co. will also start drifting their No. 1 shaft on the tract east of the Sunnyside to encounter the rich strike made to the north of it in the Isley mine. The Isley has encountered ore which will undoubtedly yield all the way from 25 per cent. to 30 per cent. The strike was made near the north line of the Sunburst tract.

LET US SEND YOU FREE ORE SAMPLES.

We will send to anyone interested, absolutely without charge, all expenses prepaid, a box of the crude ore as taken from the Sunburst Mines. This sample will be of interest to the student or investor alike, and would be of value in any curio collection.

Send today for these free samples and our profusely illustrated prospectus, with photographic reproductions of the property, a large half-tone map of the lead and zinc field, and list of bank and business references.

PRESENT PRICE OF SHARES NOW 8 CENTS - - - - - PAR VALUE $1.00

Manhattan Gold Field

If you never invest you never make

The millionaires of today are the investors of yesterday.

In choosing your investment these things should be considered: the ability, responsibility and integrity of those in charge of the company; that the property is in a proven district, and is owned by the company, and that gold has been found upon the property; that the money is being used for the interests of the company, that the company has no debts or obligations.

We have all these essentials, and own four claims, located in the heart of the Wonderful Manhattan District, from all of which we have taken rich ore, OUR AVERAGE ASSAY BEING OVER $400.00 TO THE TON.

We have so thoroughly tested our claims that WE KNOW WHAT WE HAVE. THE TIME TO BUY IS NOW! Stock selling at 10 cents a share, par value One Dollar, fully paid and non-assessable.

REPORT OF OFFICERS

To the Directors of the Manhattan Independent Mining Co.:

"We have been in Manhattan, Nevada, and thoroughly tested our four claims, namely, 'American Flag,' 'Anglo Critic,' 'Peerless' and 'Independent,' and personally took 100 or more samples of ore from different places along the 5200 feet of main ledge crossing our claims, and across the width of same, together with numerous samples from the cross-ledges, and had the same assayed, and the result of the assay was an average of $400.00 to the ton. We also had some of the samples panned, and the panning bore out the assays. These samples were in no way selected, but were taken from all the ledges with no regard to value. Our property is all we could ask and is easy of access. Throughout our entire 80 acres we have an unlimited rich deposit of free milling gold, as good as the best in this wonderful camp.

"Respectfully submitted,
"WM. R. PAYNE, President.
"J. ROGER BROWN, Secretary."

A TREE OF ILL REPUTE.

The Fresh Juice of the Upas Acts as a Deadly Poison.

An evil reputation has long been borne by the upas tree, Antiaris toxicaria, which grows in Borneo and other East Indian islands. It is still a common belief that birds flying within the influence of its poisonous vapors instantly perish and that it is fatal for animals or men to rest beneath its shade. It resembles certain rhus plants (like the poison ivy) in emitting a volatile substance which affects the skins of certain susceptible persons, though others are unaffected. The sap is very poisonous and is the chief substance used by the Dyaks of Borneo for poisoning the tips of their darts.

In this process an incision is made in the bark of the tree and the milky exudation collected on a palm leaf and dried first in the sun and then over a fire until a thick brown mass is left. In this state it can be kept without deteriorating, and when required for use it is made into a thin paste with the juice of "tuba" root, which is used to stupefy fish, or with tobacco or lemon juice, and the ends of the darts dipped into the mixture and dried. These darts are made from the middle stem of the palm leaf and are about six or eight inches in length and of about the thickness of a knitting needle.

They are used with a wooden sumpitan, or blowpipe, which is about seven or eight feet in length and has an internal diameter of about one-quarter inch. A bird struck by one of these little darts is instantly killed, and a pig dies in about twenty minutes. The fresh juice of the upas tree, whether swallowed or injected into the blood, acts as a violent poison, causing convulsions and death.

THE REFUGEES

By A. CONAN DOYLE,
Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

nat told his tale in a few short, bitter sentences, the injustice that had been done him, his dismissal from the king's service and the ruin which had come upon the Huguenots of France. Adele, as is the angel instinct of woman, thought only of her lover and his misfortunes as she listened to his story, but the old merchant tottered to his feet when he heard of the revocation of the edict.

"What am I to do?" he cried. "What am I to do? I am too old to begin my life again."

"Never fear, uncle," said De Catinat heartily. "There are other lands beyond France."

"But not for me. No, no; I am too old. Lord, but thy hand is heavy upon thy servants. What shall I do and whither shall I turn?" He wrung his hands in his perplexity.

"What is amiss with him, then, most?" asked the seaman.

"He and his must leave the country, captain."

"And why?"

"Because they are Protestants and a king will not abide their creed."

Ephraim Savage was across the room in an instant and had inclosed the old merchant's skin hand in his own great knotted fist. There was a brotherly sympathy in his strong grip and rugged, weather stained face.

"Tell this man that we shall see him through, Amos. Tell him that we've got a country where he'll just fit in like a bung in a barrel. Tell him that religion is free to all there. Tell him that if he wants to come the Golden Rod is waiting with her anchor apeak and her cargo aboard."

"Then we must come at once," said De Catinat as he listened to the cordial message which was conveyed to his ears. "Tonight the orders will be out, and tomorrow it may be too late."

"But my business!" cried the merchant.

"Take what valuables you can and leave the rest. Better that than lose all, and liberty into the bargain."

And so at last it was arranged. That very night, within five minutes of the closing of the gates, there passed out of Paris a small party of five, three upon horseback and two in a closed carriage which bore several weighty boxes upon the top. They were the first leaves flying before the hurricane, the earliest of that great multitude who were within the next few months to stream along every road which led from France.

Thanks to the early tidings which the guardsman had brought with him, his little party were now ahead of the news. At Rouen all was quiet, and Captain Ephraim Savage before evening had brought both them and such property as they had saved aboard his brigantine, the Golden Rod. It was but a little craft, some seventy tons burden, but at a time when so many were putting out to sea in open boats, preferring the wrath of nature to that of the king, it was a refuge indeed. The same night the seaman drew up his anchor and began to slowly make his way down the winding river.

With the early dawn the river broadened out and each bank trended away, leaving a long, funnel shaped estuary between. Ephraim Savage snuffed the air and paced the deck briskly, with a twinkle in his keen gray eyes. The wind had fallen away, but there was still enough to drive them slowly upon their course.

"Where's the gal?" he asked.

"She's in my cabin," said Amos Green. "I thought that maybe she could manage there until we got across."

"Where will you sleep yourself, then?"

"Tut! A litter of spruce boughs and a sheet of birch bark over me have been enough all these years. What would I ask better than this deck of soft white pine and my blanket?"

"Very good. The old man and his nephew him with the blue coat—can have the two empty bunks. But you must speak to that man, Amos. I'll have no philandering aboard my ship, lad; no whispering or cuddling or any such foolishness."

"It's a pity that we left so quick, or they might have been married before we started. She's a good girl, Ephraim, and he a fine man, for all that their ways are not the same as ours."

"But what is the matter with the old man? He doesn't seem easy in his mind," said Captain Savage.

The old merchant had been leaning over the bulwarks, looking back with a drawn face and weary eyes at the red curving track behind them which marked the path to Paris. Adele had come up now with not a thought to spare upon the dangers and troubles which lay in front of her as she chafed the old man's thin cold hands and whispered words of love and comfort into his ears.

"We are always in the hollow of God's hand," he whispered, "but, oh, Adele, it is a dreadful thing to feel his fingers moving under us!"

"Come with us, uncle," said De Catinat, passing his arm under that of the old man. "It is long since you have rested. And you, Adele, I pray that you will go and sleep, my poor darling, for it has been a weary journey. Go now to please me, and when you wake both France and your troubles will lie behind you."

When father and daughter had left the deck De Catinat made his way aft again to where Amos Green and the captain were standing.

"I am glad to get them below, Amos," said he, "for I fear that we may have trouble yet."

"And how?"

"You see the white road which runs by the southern bank of the river. Twice within the last half hour I have seen horsemen spurring for dear life along it. Where the spire and smoke are yonder is Honfleur, and thither it was that these men went. I know not who would ride so madly at such an hour unless they were the messengers of the king. Ah, see, there is a third one!"

On the white band which wound among the green meadows a black dot could be seen, which moved along with great rapidity, vanished behind a clump of trees and then reappeared again, making for the distant city. Captain Savage drew out his glass and gazed at the rider.

"Aye, aye," said he as he snapped it up again. "It is a soldier, sure enough, I can see the glint of the scabbard which he carries on his larboard side. I think that we shall have more wind soon. With a breeze we can show our heels to anything in French waters, but a galley or an armed boat would overhaul us now."

De Catinat, who, though he could speak little English, had learned in America to understand it pretty well, looked anxiously at Amos Green. "I fear that we shall bring trouble on this good captain," said he, "and that the loss of his cargo and ship may be his reward for having befriended us. Ask him whether he would not prefer to land us on the north bank. With our money we might make our way into the lowlands."

Ephraim Savage looked at his passenger with eyes which had lost something of their sternness. "Young man," said he, "I see that you can understand somethin' of my talk."

De Catinat nodded.

"I tell you, then, that I am a bad man to beat. Any man that was ever shipmate with me would tell you as much. I just jam my helm and keep my course as long as God will let me. D'ye see?"

De Catinat again nodded, though, in truth, the seaman's metaphors left him with but a very general sense of his meaning.

While the Puritan seaman had been talking his eyes had kept wandering from the clouds to the flopping sails and back. Such wind as there was came in little short puffs, and the canvas either drew full or was absolutely slack. The fleecy shreds of cloud above, however, traveled swiftly across the blue sky. It was on these that the captain fixed his gaze, and he watched them like a man who is working out a problem in his mind. They were abreast of Honfleur now and about half a mile out from it. All was quiet on the curving quay and on the half moon fort, over which floated the white flag with the golden fleur de lis. The port lay on their quarter now, and they were drawing away more quickly as the breeze freshened. De Catinat, glancing back, had almost made up his mind that their fears were quite groundless when they were brought back in an instant.

Round the corner of the mole a great dark boat dashed into view ringed round with foam from her flying prow and from the ten pairs of oars which swung from either side of her. A dainty white ensign drooped over her stern, and in her bows the sun's light was caught by a heavy brass carronade. The captain brought his glass to bear upon them and whistled; then he glanced up at the clouds once more.

"Thirty men," said he, "and they go three paces to our two. You, sir, take your blue coat off this deck or you'll bring trouble upon us. The Lord will look after his own if they'll only keep from foolishness. Get these hatches off, Tomlinson. So! Where's Jim Sturt and Hiram Jefferson? Let them stand by to clap them on again when I whistle. Starboard; starboard! Keep her as full as she'll draw. Now, Amos, and you, Tomlinson, come here until I have a word with you."

The three stood in consultation upon the poop, glancing back at their pursuer. There could be no doubt that the wind was freshening. It blew briskly in their faces as they looked back, but it was not steady yet, and the boat was rapidly overhauling them. Already they could see the faces of the marines who sat in the stern and the gleam of the lighted linstock which the gunner held in his hand.

Have No Teachers

Kingston, Feb. 17.—The intimation comes from Derry Lake that three schools in the region of Frontenac are without teachers. It is suggested that if this long continues the next generation will have to resort to open voting, for the electors, then will be unable to read the names of the candidates printed on the ballots. The School Act has few admirers in North Addington. Nearly seventy-five per cent. of the children of school age have now an opportunity to attend any school owing to the absence of teachers.

Par value $1.00 each—fully paid and non-assessable. Only 300,000 shares for sale at par.

PROPERTIES

MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

EDMUND KEAN.

To See Him Act Was Like Reading Shakespeare by Lightning.

Before the third century after the birth of Shakespeare had reached its first quarter there was born in England to a stage carpenter and a strolling actress a child destined to grapple with the poet's highest thought and interpret it with a vividness that to this day stands unrivaled. Coleridge's terse comment, that to see him act was reading Shakespeare by lightning, reveals him with the fullness of a volume. Edmund Kean, along with most people early trained to an art, had little if any education of the schools. He was when a boy provided with instruction by some benevolent people whom his smartness and beauty attracted, but he rebelled against the tasks of study and went to sea. But life there was too rough for his fine nature. He returned to England and at the age of seven began the study of Shakespeare's characters with his Uncle Moses. This he continued with an actress named Tidswell, who taught him, besides, as well as she knew, the principles of her art.

At an early age he had the credit of originality so surprising as even then to challenge the supremacy of Philip Kemble. At fourteen he played Hamlet. King George had him recite at Windsor castle, and it is said this incident led some gentlemen to send him to Eton, but there is no record of it. At twenty he was in a provincial troop, a member of which he married, and for six years thereafter, until his glorious night at Drury Lane, his life was one of hardship, struggle, obscurity, but, thanks to the faith in himself, not hopeless. His London debut was made at twenty-eight. He had fought for it hard and long and would then have missed it but for the failing reputation of the theater. London debuts in first roles are not easy for provincial actors, and none knew better how hard they are to get than Henry Irving. Kean seems to have been at his full splendor and made a hit. After that his habits were altogether prejudicial to the refinement of taste or the acquisition of knowledge.

Hot Soda Baths.

Hot soda baths are recommended by some persons for rheumatism, and the way they are taken is this: Fill the tub half full of water as hot as can be borne, add half a pound of common baking soda and immerse the body for at least twenty minutes, keeping up the temperature by the addition of hot water from time to time. Vaseline or cold cream should be rubbed into the skin after the latter has been dried in order to replace the natural oil.

Larvae Nests.

By breaking open rotton logs one can find in midwinter the grubs or larvæ of many of the wood boring beetles, and beneath logs and stones near the margins of ponds and brooks hordes of the maggots or larvæ of certain kinds of flies may often be found huddled together in great masses. The larvæ of a few butterflies also live over winter beneath chips or bunches of leaves near the roots of their food plant or in webs of their own construction, which are woven on the stems close to the buds whose expanding leaves will furnish them their first meal in spring.

SPECIAL NOTICE!

Prospectors are leaving Cobalt every day in dozens mainly for the gold fields at Larder Lake. Veterans from Colorado and British Columbia shoulder their picks side by side with 'greenies' from all over the world.

—*The Globe*, Feb. 9, 1907.

If you wish to get in on a ground floor proposition that the pioneer Company of Larder Lake is offering. Write at once for particulars, the offer is limited so act quickly.

Address the Secretary: G. M. PETRIE, 57 Avenue Road Toronto

Larder Lake Gold Mining Company, Ltd.

SEALED TENDERS marked "For Mounted Police Clothing Supplies," and addressed to the undersigned, will be received up to noon on Tuesday 19 March, 1907.

Printed forms of tender containing full information as to the articles and quantities required, may be had on application to the undersigned.

No tender will be received unless made on such printed forms. Patterns of articles may be seen at the office of the undersigned.

Each tender must be accompanied by an accepted Canadian bank cheque for an amount equal to five per cent. of the total value of the articles tendered for, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to supply the articles contracted for. If the tender be not accepted the cheque will be returned.

No payment will be made to newspapers inserting this advertisement without authority having been first obtained.

Manhattan Gold Field

If you never invest you never make

The millionaires of today are the investors of yesterday.

In choosing your investment these things should be considered: the ability, responsibility and integrity of those in charge of the company; that the property is in a proven district, and is owned by the company, and that gold has been found upon the property; that the money is being used for the interests of the company; that the company has no debts or obligations.

We have all these essentials, and own four claims, located in the heart of the Wonderful Manhattan District, from all of which we have taken rich ore, OUR AVERAGE ASSAY BEING OVER $100.00 TO THE TON.

We have so thoroughly tested our claims that WE KNOW WHAT WE HAVE. THE TIME TO BUY IS NOW! Stock selling at 10 cents a share, par value One Dollar, fully paid and non-assessable.

REPORT OF OFFICERS

"To the Directors of the Manhattan Independent Mining Co.:

"We have been in Manhattan, Nevada, and thoroughly tested our four claims, namely, 'American Flag,' 'Anglo Celtic,' 'Peerless' and 'Independent,' and personally took 100 or more samples of ore from different places along the 5200 feet of main ledge crossing our claims, and across the width of same, together with numerous samples from the cross-ledges, and had the same assayed, and the result of the assay was an average of $400.00 to the ton. We also had some of the samples panned, and the pannings bore out the assays. These samples were in no way selected, but were taken from all the ledges with no regard to value. Our property is all we could ask and is easy of access. Throughout our entire 30 acres we have an unlimited rich deposit of free milling gold, as good as the best in this wonderful camp.

"Respectfully submitted,
"WM. R. PAYNE, President,
"J. ROGER BROWN, Secretary."

A TREE OF ILL REPUTE.

The Fresh Juice of the Upas Acts as a Deadly Poison.

An evil reputation has long been borne by the upas tree, Antiaris toxicaria, which grows in Borneo and other East Indian islands. It is still a common belief that birds flying within the influence of its poisonous vapors instantly perish and that it is fatal for animals or men to rest beneath its shade. It resembles certain rhus plants (like the poison ivy) in emitting a volatile substance which affects the skins of certain susceptible persons, though others are unaffected. The sap is very poisonous and is the chief substance used by the Dyaks of Borneo for poisoning the tips of their darts.

In this process an incision is made in the bark of the tree and the milky exudation collected on a palm leaf and dried first in the sun and then over a fire until a thick brown mass is left. In this state it can be kept without deteriorating, and when required for use it is made into a thin paste with the juice of "tuba" root, which is used to stupefy fish, or with tobacco or lemon juice, and the ends of the darts dipped into the mixture and dried. These darts are made from the middle stem of the palm leaf and are about six or eight inches in length and of about the thickness of a knitting needle.

They are used with a wooden sumpitan, or blowpipe, which is about seven or eight feet in length and has an internal diameter of about one-quarter inch. The bird struck by one of these little darts is instantly killed, and a pig dies in about twenty minutes. The fresh juice of the upas tree, whether swallowed or injected into the blood, acts as a violent poison, causing convulsions and death.

THE REFUGEES

By A. CONAN DOYLE,
Author of "The Return of Sherlock Holmes"

COPYRIGHT, 1893, BY HARPER & BROTHERS

nat told his tale in a few short, bitter sentences, the injustice that had been done him, his dismissal from the king's service, and the ruin which had come upon the Huguenots of France. Adele, as is the angel instinct of woman, thought only of her lover and his misfortunes as she listened to his story, but the old merchant tottered to his feet when he heard of the revocation of the edict.

"What am I to do?" he cried. "What am I to do? I am too old to begin my life again."

"Never fear, uncle," said De Catinat heartily. "There are other lands beyond France."

"But not for me. No, no; I am too old. Lord, but thy hand is heavy upon thy servants. What shall I do and whither shall I turn?" He wrung his hands in his perplexity.

"What is amiss with him, then, mon?" asked the seaman.

"He and his must leave the country, Ephraim."

"And why?"

"Because they are Protestants and the King will not abide their creed."

Ephraim Savage was across the room in an instant and had inclosed the old merchant's thin hand in his own great knotted fist. There was a brotherly sympathy in his strong grip and rugged, weather stained face.

"Tell this man that we shall see him through, Amos. Tell him that we've got a country where he'll just fit in like a plug in a barrel. Tell him that religion is free to all there. Tell him that if he wants to come the Golden Hind is waiting with her anchor apeak and her cargo aboard."

"Then we must come at once," said De Catinat as he listened to the cordial message which was conveyed to his uncle. "Tonight the orders will be out, and tomorrow it may be too late."

"But my business!" cried the merchant.

"Take what valuables you can and leave the rest. Better that than lose all, and liberty into the bargain."

And so at last it was arranged. That very night, within five minutes of the closing of the gates, there passed out of Paris a small party of five, three upon horseback and two in a closed carriage which bore several weighty boxes upon the top. They were the first leaves flying before the hurricane, the earliest of that great multitude who were within the next few months to stream along every road which led from France.

Thanks to the early tidings which the guardsman had brought with him, his little party were now ahead of the news. At Rouen all was quiet, and Captain Ephraim Savage before evening had brought both them and such property as they had saved aboard his brigantine, the Golden Rod. It was but a little craft, some seventy tons burden, but at a time when so many were putting out to sea in open boats, preferring the wrath of nature to that of the king, it was a refuge indeed. The same night the seaman drew up his anchor and began to slowly make his way down the winding river.

With the early dawn the river broadened out and each bank trended away, leaving a long, funnel shaped estuary between. Ephraim Savage snuffed the air and paced the deck briskly, with a twinkle in his keen gray eyes. The wind had fallen away, but there was still enough to drive them slowly upon their course.

"Where's the gal?" he asked.

"She's in my cabin," said Amos Green. "I thought that maybe she could manage there until we got across."

"Where will you sleep yourself, then?"

"Tut! A litter of spruce boughs and a sheet of birch bark over me have been enough all these years. What would I ask better than this deck of soft white pine and my blanket?"

"Very good. The old man and his nephew—him with the blue coat—can have the two empty bunks. But you must speak to that man, Amos. I'll have no philandering aboard my ship, lad; no whispering or cuddling or any such foolishness."

"It's a pity that we left so quick, or they might have been married before we started. She's a good girl, Ephraim, and he a fine man, for all that their ways are not the same as ours."

"But what is the matter with the old man? He doesn't seem easy in his mind," said Captain Savage.

The old merchant had been leaning over the bulwarks, looking back with a drawn face and weary eyes at the red curving track behind them which marked the path to Paris. Adele had come up now with not a thought to spare upon the dangers and troubles which lay in front of her as she chafed the old man's thin cold hands and whispered words of love and comfort into his ears.

"We are always in the hollow of God's hand," he whispered, "but, oh, Adele, it is a dreadful thing to feel his fingers moving under us!"

"Come with us, uncle," said De Catinat, passing his arm under that of the old man. "It is long since you have rested. And you, Adele, I pray that you will go and sleep, my poor darling, for it has been a weary journey. Go now to please me, and when you wake both France and your troubles will lie behind you."

When father and daughter had left the deck De Catinat made his way aft again to where Amos Green and the captain were standing.

"I am glad to get them below, Amos," said he, "for I fear that we may have trouble yet."

"And how?"

"You see the white road which runs by the southern bank of the river. Twice within the last half hour I have seen horsemen spurring for dear life along it. Where the spire and smoke are yonder is Honfleur, and thither it was that these men went. I know not who would ride so madly at such an hour unless they were the messengers of the king. Ah, see, there is a third one!"

On the white band which wound among the green meadows a black dot could be seen, which moved along with great rapidity, vanished behind a clump of trees and then reappeared again, making for the distant city. Captain Savage drew out his glass and gazed at the rider.

"Aye, aye," said he as he snapped it up again. "It is a soldier, sure enough. I can see the glint of the scabbard which he carries on his larboard side. I think that we shall have more wind soon. With a breeze we can show our heels to anything in French waters, but a galley or an armed boat, would overhaul us now."

De Catinat, who, though he could speak little English, had learned in America to understand it pretty well, looked anxiously at Amos Green. "I fear that we shall bring trouble on this good captain," said he, "and that the loss of his cargo and ship may be his reward for having befriended us. Ask him whether he would not prefer to land us on the north bank. With our money we might make our way into the lowlands."

Ephraim Savage looked at his passenger with eyes which had lost something of their sternness. "Young man," said he, "I see that you can understand somethin' of my talk."

De Catinat nodded.

"I tell you, then, that I am a bad man to beat. Any man that was ever shipmate with me would tell you as much. I just jam my helm and keep my course as long as God will let me. D'ye see?"

De Catinat again nodded, though, in truth, the seaman's metaphors left him with but a very general sense of his meaning.

While the Puritan seaman had been talking his eyes had kept wandering from the clouds to the flopping sails and back. Such wind as there was came in little short puffs, and the canvas either drew full or was absolutely slack. The fleecy shreds of cloud above, however, traveled swiftly across the blue sky. It was on these that the captain fixed his gaze, and he watched them like a man who is working out a problem in his mind. They were abreast of Honfleur now and about half a mile out from it. All was quiet on the curving quay and on the half moon fort, over which floated the white flag with the golden fleur de lis. The port lay on their quarter now, and they were drawing away more quickly as the breeze freshened. De Catinat, glancing back, had almost made up his mind that their fears were quite groundless when they were brought back in an instant.

Round the corner of the mole a great dark boat dashed into view ringed round with foam from her flying prow and from the ten pairs of oars which swung from either side of her. A dainty white ensign drooped over her stern, and in her bows the sun's light was caught by a heavy brass carronade. The captain brought his glass to bear upon them and whistled; then he glanced up at the clouds once more.

"Thirty men," said he, "and they go three paces to our two. You, sir, take your blue coat off this deck or you'll bring trouble upon us. The Lord will look after his own if they'll only keep from foolishness. Get these hatches off, Tomlinson. So! Where's Jim Sturt and Hiram Jefferson? Let them stand by to clap them on again when I whistle. Starboard; starboard! Keep her as full as she'll draw. Now, Amos, and you, Tomlinson, come here until I have a word with you."

The three stood in consultation upon the poop, glancing back at their pursuer. There could be no doubt that the wind was freshening. It blew briskly in their faces as they looked back, but it was not steady yet, and the boat was rapidly overhauling them. Already they could see the faces of the marines who sat in the stern and the gleam of the lighted linstock which the gunner held in his hand.

Have No Teachers

Kingston, Feb. 17.—The intimation comes from Desert Lake that three schools in the section of Frontenac are without teachers. It is suggested that if this long continues the next generation will have to do its voting, for the electors, then will be unable to read the names of the candidates printed on the ballots. The School Act has few admirers in North Addington. Nearly seventy-five per cent. of the children of school age have now no opportunity to attend any school, owing to the absence of teachers.

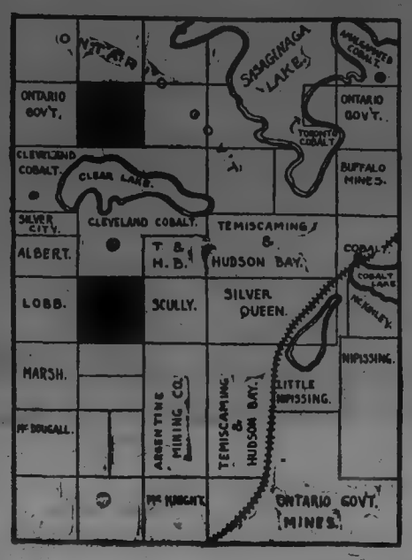
LAKE GEORGE COBALT SILVER MINING COMPANY, LIMITED

affords conservative mining men and others an investment of greatest merit by reason of the immense profits that will most surely be forthcoming.



Authorized Capital Only $600,000

Divided into 600,000 Shares

Par value $1.00 each—fully paid and non-assessable. Only 300,000 shares for sale at par.

PROPERTIES

MINING CLAIMS NOT PROSPECTS

Lake George Cobalt Silver Mining Co., Limited, is the absolute owner of TWO full mining claims of 40 acres each, located in the

HEART OF THE GREAT COBALT SILVER BEARING DISTRICT

of Coleman Township. Mining men will at once realize the value of these properties by the fact that the south lot adjoins on the north the promising Cleveland Cobalt property, and also has the Hudson's Bay property on the east, and the

BIG VEINS OF SILVER QUEEN MINE

running west into this lot. The north lot lies in the midst of

EQUALLY VALUABLE PROPERTIES

EXPERT'S REPORT

Mr. S. Lawrence, M.E., who submitted a report after examination of both properties, says that on the South property there is a "strong vein eighteen inches wide." The value of the North claim he submits is "enhanced by the fact that on the claim next east on sinking is found native silver." The two properties are well located, being only one mile from the railway, and also in the heart of the mineral belt.

Since that report a 40-foot shaft has been sunk, and four exceedingly promising veins uncovered and stripped, showing NATIVE SILVER AND COBALT.

SUBSCRIPTIONS

to the 300,000 shares of stock at par value of $1 each will be received up to 12 o'clock noon on February 25th, 1907.

Applications will be filed in the order of receipt, and over subscriptions will be returned by earliest mail.

All applications for stock should be accompanied by marked check, or bank draft, or postal or money order, at par at Toronto, payable to

EDMUND KEAN.

To See Him Act Was Like Reading Shakespeare by Lightning.

Before the third century after the birth of Shakespeare had reached its first quarter there was born in England to a stage carpenter and a strolling actress a child destined to grapple with the poet's highest thought and interpret it with a vividness that to this day stands unrivaled. Coleridge's terse comment, that to see him act was reading Shakespeare by lightning, reveals him with the fullness of a volume. Edmund Kean, along with most people early trained to an art, had little if any education of the schools. He was when a boy provided with instruction by some benevolent people whom his smartness and beauty attracted, but he rebelled against the tasks of study and went to sea. But life there was too rough for his fine nature. He returned to England and at the age of seven began the study of Shakespeare's characters with his Uncle Moses. This he continued with an actress named Tidswell, who taught him, besides, as well as she knew, the principles of her art.

At an early age he had the credit of originality so surprising as even then to challenge the supremacy of Philip Kemble. At fourteen he played Hamlet. King George had him recite at Windsor castle, and it is said this incident led some gentlemen to send him to Eton, but there is no record of it. At twenty he was in a provincial troop, a member of which he married, and for six years thereafter, until his glorious night at Drury Lane, his life was one of hardship, struggle, obscurity. But, thanks to the faith in himself, not hopeless. His London debut was made at twenty-eight. He had fought for it hard and long and would then have missed it but for the failing reputation of the theater. London debuts in first roles are not easy for provincial actors, and none knew better how hard they are to get than Henry Irving. Kean seems to have been at his full splendor and made a hit. After that his habits were altogether prejudicial to the refinement of taste or the acquisition of knowledge.

Hot Soda Baths.

Hot soda baths are recommended by some persons for rheumatism, and the way they are taken is this: Fill the tub half full of water as hot as can be borne, add half a pound of common baking soda and immerse the body for at least twenty minutes, keeping up the temperature by the addition of hot water from time to time. Vaseline or cold cream should be rubbed into the skin after the latter has been dried in order to replace the natural oil.

Larvae Nests.

By breaking open rotten logs one can find in midwinter the grubs or larvæ of many of the wood boring beetles, and beneath logs and stones near the margins of ponds and brooks hordes of the maggots or larvæ of certain kinds of flies may often be found huddled together in great masses. The larvæ of a few butterflies also live over winter beneath chips or bunches of leaves near the roots of their food plant or in webs of their own construction, which are woven on the stems close to the buds whose expanding leaves will furnish them their first meal in spring.

SPECIAL NOTICE!

Prospectors are leaving Cobalt every day in dozens mainly for the gold fields at Larder Lake. Veterans from Colorado and British Columbia shoulder their picks side by side with 'greenies' from all over the world.

—*The Globe*, Feb. 9, 1907.

If you wish to get in on a ground floor proposition that the pioneer Company of Larder Lake is offering. Write at once for particulars, the offer is limited so act quickly.

Address the Secretary: G. M. PETRIE, 57 Avenue Road Toronto

Larder Lake Gold Mining Company, Ltd.

SEALED TENDERS marked "For Mounted Police Clothing Supplies," and addressed to the undersigned, will be received up to noon on Tuesday, 19 March, 1907.

Printed forms of tender containing full information as to the articles and quantities required, may be had on application to the undersigned.

No tender will be received unless made on such printed forms. Patterns of articles may be seen at the office of the undersigned.

Each tender must be accompanied by an accepted Canadian bank cheque for an amount equal to five per cent. of the total value of the articles tendered for, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to supply the articles contracted for. If the tender be not accepted the cheque will be returned.

No payment will be made to newspapers inserting this advertisement without authority having been first obtained.

LIFE DEPENDS ON HEALTHY BLOOD.

IS YOURS RICH AND PURE?

Blood is the soul of life.

Check its formation, reduce its quality, lessen its red cells—you at once sap strength and vitality—you peril life itself.

When you strengthen the blood, make it richer in red cells, increase its solid constituents, you supply the materials that rebuild—you furnish that disease-resisting element we call strength.

When you are weak and ailing—when appetite is poor—when mental effort seems impossible, sleep hard to get, be sure your blood has grown poor and your nervous system in consequence is impaired.

Nothing so quickly stimulates the formation of rich, red blood as Ferrozone.

Ferrozone's action upon the digestive power is immediate—everything you eat is converted into nourishment and building material.

Ferrozone fortifies the action of the kidneys, liver and stomach, increases circulation, and by these means throws into the blood a vast store of material to build up and to strengthen.

Ferrozone by making blood and stimulating vital action, transmits to the debilitated brain cells, exhausted by toil, by anxiety, or by sickness, the strength they need.

The beneficient action of Ferrozone on the brain is transmitted through the nervous system, and all powers of the body are enormously increased.

Ferrozone enables the body to perform all its functions in a normal and natural way, and with an absolute freedom from reaction, which is the most positive assurance that the body is strengthened—not stimulated.

Whether the weakness you suffer is profound or of long standing; whatever the conditions are—if the blood is impaired, if its redness is reduced, if its activity is lessened—Ferrozone is an absolute and rapid remedy.

For any condition of weakness, debility or ill-health in men, women and children, you can't find so nourishing and strengthening a tonic as Ferrozone; try it, sold everywhere, in 50c. boxes.

ADVERTISE IN THE TIMES.

LOCAL INCIDENTS

By The Times Man on the Street

—Last night a meeting of the Girls' Auxiliary was held in St. Luke's church.

—The annual banquet of the members of Elko Camp Club was celebrated yesterday evening.

—Mr. C. R. Bank's new sporting goods store in the market building, is now fully equipped and ready for business.

—The regular monthly meeting of St. Andrew's W.F.M.S. will be held in the school hall this afternoon at three o'clock.

—Rev. E. A. Langfeldt delivered an entirely new lecture of much interest last night at the meeting of St. John's A.Y.P.A.

—The Finance Committee will meet this evening, presumably in connection with the estimates for 1907. As yet the committee has not definitely decided upon the rate.

—No meeting was held last night of the committee of the Whole Council. There are several matters before the committee, but none of them were yet ready to be dealt with.

—The Reading Circle of the Woman's Art Association met last night at the Art Association rooms, Simcoe street, at 7.30. Mrs. (Dr.) F. C. Neal read an interesting paper.

—Messrs. Storey and Leary, the new flour, feed and grain merchants, on Water street, have purchased a handsome team for their delivery delivery department. The animals are six years old purchased from Mr. Thos. Coulter of Colborne.

Piles get quick relief from Dr. Shoop's Magic Ointment. Remember it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding, or blind piles disappear like magic by its use. Try it and see. J. D. Tully.

—The Board of Works will meet tomorrow night. So far very little information has been given out by this department as to what the policy for the year is. It is understood however, that the creek in the east ward will be diverted as soon as the weather permits.

G.T.R. Engine Breaks Down

The G.T.R. noon train from Lindsay was an hour late yesterday owing to the engine breaking down at Omemee. It took considerable time to make the repairs necessary before the train could proceed.

Good Debate in Conservative Club

The regular fortnightly smoker will be held in the Young Conservative Club rooms on Thursday evening, when Dr. Morrison, E. A. Peck and Peter Gardiner, will defend the argument that the ward system of electing aldermen is preferable to the general system, whilst F. H. Dobbin, Arthur Stevenson and C. S. McClelland will argue in opposition. Everybody is cordially invited to be present on Thursday evening.

Bruce Lee Loses Valuable Horse

Mr. Bruce Lee, the well-known liveryman, between Simcoe and Charlotte streets, between the Lock Works and the Snowden House, is out one thoroughbred mare, which was killed on Sunday night. It seems that the mare ran away from his livery, and was only stopped near the locks. When the horse was about half way across the locks bridge, one of its feet went down through the timbers, and the animal broke its leg.

Mr. Preen Denies Rumors

Owing to rumors prevalent through out the city, it might be noted that Mr. G. P. Preen, manager of the Brinton Carpet Co., of Peterborough, denies that his company intended to establish a large woolen works in the city. Mr. Preen says the first he heard of this rumor was an article published in a local contemporary some weeks ago this rumor. That article was reprinted in the Journal of Fabrics and then reprinted on Saturday night in the local contemporary which originated the story. As far as Mr. Preen knows, his company has never thought of going into the woollen business.

—Mr. A. T. Kerr, of Ottawa, was in the city yesterday.

—Mr. H. Rastall, of Lindsay, was in the city yesterday.

—Mr. R. W. Smart, manager of the Port Hope Brewing and Malting Co., is in the city.

—Mr. Walter Phelan of Pittsburg, Pa., is spending a few days in the city renewing old acquaintances.

—Hon. J. R. Stratton has presented an organ to the primary department of the Charlotte street Sunday school.

—Mr. H. W. Nelson, of Philadelphia, formerly of the C.G.E. works, Peterborough, is in the city on business.

—Mrs. George Davison, 216 London street, will not receive this afternoon, but will be "at home," on the fourth Tuesday.

—Mr. Percy Lancaster, editor of the Havelock Standard, was in town over Sunday, to attend the funeral of his uncle, Alex. Kidd, at Young's Point.

—Port Hope Guide: Mrs. John Gobeen of Peterborough, is spending the day in town with friends—Mrs. Wm. Roberts, and daughter, Thelma, of Peterborough, are spending a few days among their many old friends in town.

THE POLICE NEWS

GATHERED BY OUR SPECIAL REPORTER.

Local Happenings Around the Police Court and Station.

Watson Marsh was thrice called at yesterday's session of the Police Court, but did not appear until 12 o'clock. He was charged with being drunk. He pleaded being only partly so, and was allowed to go with a warning.

Augustus White was charged with having, on January 26th, sold liquor on his premises, being a licensed place, without warrant or authority from a medical man. Mr. Jas. Haverson, K.C., legal adviser of the Licensed Victuallers' Protective Association, appeared for the defendant.

William Fowler, the first witness called, said he went to board at the White House on the 26th of December last and stopped there for seven weeks. Here Mr. Haverson, in reply to Mr. R. E. Wood, admitted that the house in question was a licensed house.

Fowler further said that two boarders named Stein and Hosler roomed together in room 2. On the 26th January, Saturday, he, Stein, West and another went into that room. Two strangers brought in a 40 cent flask of whisky. The strangers left about nine o'clock. The whiskey being consumed, and the crowd being "dry," West went down stairs for more, but returned without any. Later on West went down again and brought up a quart bottle of whisky. The bottle was sampled, all present having a drink.

To Mr. Haverson, said he left the White House on Wednesday, February 13th. He waited for the 13 days intervening between the alleged sale of liquor and the time of laying the information because Mr. White had made him live up to the rules of the house. He made up his mind to lay the information the night he left the house. No doubt his reason for laying the information was on account of trouble he had had with Mr. White. At 6.30 he went into the bar but did not buy any liquor until 7.15, or any way between 6.30 and 7.45. Mr. Stein was in the bar when he bought the liquor. Hosler sent one of the strangers to his room to see if a bottle of whisky that Hosler had bought earlier had been sent up. It was not there. West volunteered to go after the bottle. He got it and said he bought it from Mr. White, but witness could not swear the liquor was procured except by hearsay.

To Mr. Wood, witness left the bar about 7.05, and people were coming in as he went out.

Mr. Gordon West, the next witness, boards at the White House. Was in the hotel on January 26th, Saturday. Stein, West and Hosler were in his room that Saturday evening. Could not remember two strangers having a flask. Did not know their names. Hosler did not have any whisky but told him to go to his room for a bottle. Did not get it. Afterwards went down stairs to the sitting room and asked Mr. White for the bottle Hosler had ordered that afternoon. White went with him up stairs and got a bottle up stairs. He did not pay for it or say, as alleged by Fowler, that it was his of that he (West) paid for it.

To Mr. Haverson, said it was Hosler told him he had a bottle of whisky and Hosler sent him after it. Did not go back to his room, as noted by Fowler, to report non-finding the bottle. Did not say he paid for the whisky nor that he owned it.

John Hosler boards at the White House. Was in West's room January 26th. West, Stein, Fowler, some one named Eddie and himself were there. Bradshaw came in later. Did not know who produced the flask. West brought up a bottle of whisky supposed to be his. Bradshaw went to his room for the bottle. He then sent West for the bottle.

To Mr. Haverson, said he ordered the whisky at 6.30 from the bartender, who refused him. White, then in the hallway, said it would be sent up.

Edward Stein was in West's room that evening, as told by last witness.

The Magistrate at this point, asked Mr. Wood. "Do you think there is any evidence in this case?"

Mr. Haverson offered to put Mr. White into the witness box to show how the sale had been made and the bottle put aside out of stock for the purchaser in legal hours. He then went on to quote certain well known authorities to endorse his contention.

To Mr. White, Mr. Haverson said, "At what time did Hosler order the liquor that Saturday night, and to whom was the order given?" "Mr. White replied, "At 6.30 from the bartender. The bartender possibly joking said, "I can't give it to you." Hosler then asked, "Can't I get some liquor for Sunday use if I pay for it." I said why, of course."

He then explained how he had taken it up to deliver it, but his telephone ringing he went down to answer it and placed the bottle behind a curtain and, forgetting to deliver it, handed it to West when asked for the same.

Mr. Wood submitted that a breach of the law had been committed. He thought that such a case as tried here would enable guests to order by the wholesale and have the goods delivered when desired. He noted that Mr. White was known to keep an orderly house but had done wrong in this case. He then differed from Mr. Haverson in the latter's contention that guests could drink liquor in a licensed house.

Mr. Haverson quickly showed how the fallacy of this contention quoting a section of the act enabling guests legally as well as the proprietor and his family using liquor in prohibited hours. Mr. Wood then acknowledged he was wrong.

The magistrate noted that there is no penalty for selling one minute before seven. If the liquor had been drawn (from a barrel) after seven o'clock although paid for before, the vendor would be liable, but here the goods had been removed from the bar. He then said he could not make a decision against Mr. White, and dismissed the case.

In the special case held yesterday afternoon at three o'clock against Mr. T. Cavanagh, proprietor of the Cavanagh House, License Inspector Joseph Stewart said that on Saturday evening, Feb. 16th, he went into the sitting room of the Cavanagh House, where several strangers, seemingly farmers, were seated. In the office was Mr. Jas. Cavanagh evidently looking for a parcel. He walked back to the room behind the office. He saw Cavanagh and another man in the office. Mr. Cavanagh reached into the bar and brought out an earthenware jar, presumably a half gallon jar, which he handed to Mr. Lentick of Ennismore. The witness grabbed hold of the jug. Lentick asked, "What is the matter?" adding that "it is vinegar." The witness pulled the cork out and pouring some out into his hand and tasting it, found it to be whiskey. Jas. Cavanagh said to the man, "Tell him the truth." Lentick then said, "I bought this at Alex. Elliott's, and had it kept here till I was going home."

Mr. Haverson here said, "Well Stewart, according to what you say there is prima facie evidence of sale, but ——"

This ended the case for the prosecution.

Mr. Haverson then called Mr. J. D. Breeman, in the employ of Mr. Alex. Elliott, who went into the box, but he was not yet sworn, going out to procure another witness.

Pat. Morrison next sworn said his brother-in-law, John Lentick was the man Inspector Stewart referred to. Was with him at Elliott's store on Saturday afternoon, when Lentick brought half a gallon of white whiskey, in a jar as described by Stewart. After buying it he put it under his coat and went straight to Cavanagh's hotel. Did not see him afterwards.

Mr. Haverson then explained that Lentick lives 13 miles away so did not think it necessary to bring him here.

George Downer said that he was helping in Cavanagh's yard Saturday. Between 5.30 and six on Saturday, saw a man bring in an earthenware jar, lay it down at the end of the bar and say something to Roy Cavanagh. Roy said something about seven o'clock but does not know what.

Roy Cavanagh, a bar tender in the Cavanah House, knows Lentick by sight. In the afternoon Lentick brought in a half gallon jar and asked him to take care of it. He told Lentick he would have to get it out before seven o'clock or there would be ——— to pay.

Walter Head recognized Morrison by sight, saw him with Lentick. Saw Morrison and Lentick in Elliott's store where he works. Lentick got half a gallon of malt whiskey.

Mr. Jas. Cavanagh saw Inspector Stewart Saturday evening. Lentick came in and asked for his parcels. Lentick said his jug was in the bar and wanted it. He handed it out.

Here the magistrate asked Inspector Stewart if he had anything more to say. The former remarked that the hotelkeeper was lax in not keeping the whiskey out of the bar. The case was then discharged.

Mr. G. Weir's Collar Bone Broken

Mr. Graham Weir of Otonabee, whilst attending to a wounded colt on Saturday, in company with Mr. John Gillespie sustained injuries in the shape of a broken collar bone, the fracture being accompanied by much pain. It seems that the colt had been kicked badly and in fixing the injuries the animal fell upon him with the result as noted.

Bad Symptoms.

The woman who has periodical headaches, backache, sees imaginary dark spots or specks floating or dancing before her eyes, has gnawing distress or heavy full feeling in stomach, faint spells, dragging-down feeling in lower abdominal or pelvic region, easily startled or excited, irregular or painful periods, with or without pelvic catarrh, is suffering from weaknesses and derangements that should have early attention. Not all of above symptoms are likely to be present in any case at one time.

Neglected or badly treated and such cases often run into maladies which demand the surgeon's knife if they do not result fatally.

No medicine extant has such a long and numerous record of cures in such cases as Dr. Pierce's Favorite Prescription. No medicine has such a strong professional indorsement of each of its several ingredients—worth more than any number of ordinary non-professional testimonials. The very best ingredients known to medical science for the cure of woman's peculiar ailments enter into its composition. No alcohol, harmful, or habit-forming drug is to be found in the list of its ingredients printed on each bottle-wrapper and attested under oath.

In any condition of the female system, Dr. Pierce's Favorite Prescription can do only good—never harm. Its whole effect is to strengthen, invigorate and regulate the whole female system and especially the pelvic organs. When these are deranged in function or affected by disease, the stomach and other organs of digestion become sympathetically deranged, the nerves are weakened, and a long list of bad, unpleasant symptoms follow. Too much must not be expected of this "Favorite Prescription." It will not perform miracles; will not cure tumors—no medicine will. It *will* often *prevent* them, if taken in time, and thus the operating table and the surgeon's knife may be avoided.

Women suffering from diseases of long standing, are invited to consult Doctor Pierce by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Medical Adviser (1000 pages) is sent *free* on receipt of 21 one-cent stamps for paper-covered, or 50 stamps for cloth-bound copy. Address as above.

THE TIMES BOOKSTORE

SPECIAL---A CHOICE LINE OF

Books Cloth Bound, 18c.

Delightful Stories by Well-Known Writers. Come early—they will not last long.

Blank Books and Office Supplies

A large number of Blank Books of every description. Anything from a Counter Blotter to a 1000 page Ledger.

Special Ruling or Binding to order.

All Office Supplies, such as Stephens' and Underwood's Inks, Binding Fyles and Cases, Stick Fyles, Letter and Receipt Books, in fact, everything in this line.

Home and Society Stationery

We defy competition as to prices and good assortment to choose from. Handsome boxes of Stationery containing 25 sheets of paper with envelopes to match, for only 25 cents.

Evelyn Thaw Concludes Her Direct Testimony

Jerome Reserved Right as to the Cross Examination.

KNEW THE WRITING

Of 48 Letters Which She Said Were Stanford White's.

New York, Feb. 20.—The usual crowd, largely composed of lawyers, filled the court room when the Thaw case opened yesterday morning. Dr. Britton D. Evans, the defence alienist, was the first of the prominent persons in the case to appear.

When Mr. Jerome arrived he passed close to the expert, but did not speak.

Thaw entered the court room, when called, with his usual quick step, and at once began an animated conversation with Dr. Evans.

MRS. THAW RECALLED.

A decided surprise was sprung by the defence in recalling Mrs. Evelyn Nesbit Thaw to the stand immediately after court convened.

Mrs. Thaw looked pale and serious as she took her place on the stand. She appeared in the same simple girlish costume that she has worn every day since the trial began.

Mrs. Thaw smiled slightly as she caught her husband's eye. Thaw returned the smile and then turned to Attorney O'Reilly with whom he talked for a minute excitedly. Then he returned to his conversation with Dr. Evans, but for the most part kept his eyes on his wife, only turning occasionally to whisper in the doctor's ear.

WILTE'S HANDWRITING.

After Mrs. Thaw had sat silently in the chair for nearly five minutes, Mr. Delmas began his examination.

"You have already testified, Mrs. Thaw, that you are familiar with the handwriting of Stanford White," he said; "I now hand you a paper and ask, from beginning to end, is it in the handwriting of Mr. White?"

Mrs. Thaw glared at the paper, evidently a letter, and said, "It is his handwriting."

IDENTIFIED 48 LETTERS.

Mr. Delmas handed the witness six other letters, and they also were identified as having come from Stanford White. The letters were marked as defendant's exhibits Q, R, S, T, U, V, and W.

After a moment's delay still other letters were identified.

In all, Mrs. Thaw identified 48 letters. She was nearly half an hour at the task.

GLEASON AND PEABODY ABSENT

Messrs. Gleason and Peabody, of counsel for the defence, were absent. It was said that Mr. Gleason was suffering from toothache. Mr. Peabody, it was said, was examining witnesses.

As the examination of the letters was concluded, Mr. Delmas turned to the witness.

"How long have you known May Mackenzie?"

"Since 1901."

"How long has Thaw known her?"

"Since 1904."

JEROME OBJECTED.

"Did you, in May, 1906, relate to Mr. Thaw a conversation you had with May Mackenzie, and especially make reference to what she said to you regarding Stanford White?"

Mr. Jerome objected, but was overruled.

"I WILL GET HER BACK."

Mrs. Thaw answered: "May Mackenzie told me Stanford White had been to see her, and that she had told him that Harry and I were getting along nicely together. She said she thought it was so nice the way we loved each other. She said Stanford White had remarked: 'Pooh, it won't last; I will get her back.'"

EXCITED AND NERVOUS.

"Did Mr. Thaw say anything when you told him this?"

"He said he had already heard it from Miss MacKenzie."

"What was his condition when you told him?"

"The way he always was when on the subject of Stanford White."

"How was that?"

"Very excited and nervous."

In answer to questions Mrs. Thaw stated that Thaw had paid a medical bill of $3,000 for her.

MRS. CAINE CALLED TO STAND.

The direct examination of Mrs. Thaw was concluded at 11.47, and her cross-examination was up begin.

Mr. Jerome reserved the right to cross-examine until he decides if cross-examination is necessary on issues raised in this case.

Mrs. J. J. Caine, of Boston, was called to the stand.

From Pedlar's Pack to a Cobalt Millionaire

Ottawa, February 19.—The Commercial hotel, York street, was recently bought by one Peter Farrah.

Around the sale entwines a romance of Cobalt.

The purchaser, Mr. Farrah, is a Cobalt-made capitalist. Up to a couple of years ago Mr. Farrah, who is an Assyrian, carried a pack of the goods common to Syrian pedlars. Farrah went into the Temiscaming country about six years ago. He had no money. His only assets were youth, physical strength and shrewdness.

Farrah was, and is, an Ottawa man in the sense that Ottawa was the first place he stayed when he came to Canada.

From pack carrier to millionaire is a long jump, but Mr. Farrah made it in short order.

When the Cobalt mining boom broke out Farrah was in the district. He was shrewd, as stated, and at once started prospecting. He struck luck at once. Not only did he locate some of the richest claims in the whole of the Cobalt district, but he started the first hotel in New Liskeard and that proved a regular gold mine to him. Mr. Farrah's luckiest strike was in locating the "Big Pete" (named after himself), which he afterwards sold for $300,000. "Big Pete" is now capitalized at five millions of dollars. Farrah is still interested in three or four claims, and those who know him say that he is worth fully a million dollars.

Some months ago, Farrah, as stated, purchased the Commercial Hotel in this city from Mr. Elliott, the former proprietor, and is still the owner of that hostelry. He is personally managing his hotel in New Liskeard.

Last week Mr. Farrah was in the city for the ice races, but has left again for the north.

He is a big man, still comparatively young, and thoroughly Canadianized. In the list of those fortunate individuals who have made their fortune in the Cobalt mining fields, he occupies a prominent place.

Mr. Geo. Bouchor Relates the Story

Graphic Account of the Death of the Late Dr. Flood.

Mr. George Boucher, son of Dr. R. P. Boucher, Brock street, writes concerning the death of Dr. Flood of the Northwest Mounted Police, and being in charge of Fort Churchill, in the H. B. Company's service. Is well qualified to know the whole story of the lamentable incident noted. His letter reads in part as follows:

About four days ago, Major Moodie, Mr. Thibeaudeau and the doctor, all of the Mounted Police, made up their minds to leave on a timber hunt, by themselves. We warned the doctor that it was not safe as they might lose themselves. But he said there was no danger, as they did not intend to go far. They left on a Wednesday, which was a beautiful day; Thursday also a beautiful day up to three p.m., when it began snowing, and there was quite a squall. Friday it was cold, being 10 degrees below zero, also drifting and blowing a regular blizzard. Saturday, Sunday and Monday were clear and cold. Well, to follow the movements of the major and his party:

On Wednesday they attended going only as far as Goosey Island, about ten miles from here. They lost themselves twice that day, and were put right by some of my men, who were out cutting wood. On Thursday morning they left this camp and went to what they called North River, but which was Middle Point, 12 miles this side of North River. On leaving the camp that morning, the major and the doctor went ahead with the dogs. Thibeaudeau says he had only walked two miles when he came to the flour bag, which he picked up and carried. A little further on he came upon the grub box, which had also fallen off. He took a small piece of bacon from the box and carried it also. He came up with the major and doctor at Middle Point, who wanted to know what he was carrying. When he told them the major said: "Why not have left the flour with the box, as we have to go back for it; can't lo without grub!" Thibeaudeau told them the box was about six miles back on the track. The doctor volunteered and the major offered to go with him, but the doctor did not see the use of it, as it was only six miles. However, that night the doctor did not show up, and it began to grow colder. The next day was terrible and the major and Mr. Thibeaudeau could not leave the camp, for if they had they would never have found it again. On Saturday morning it was bitterly cold, but clear, and they started in to let me know, with the hope that the doctor might have struck the Fort. Alas! such was not the case.

The major arrived here at 3 p.m., and his greeting to me was: "Is the doctor here?" I said: "No." He said "Good God; then he is lost. We lost him two nights ago at North River." Twenty minutes later I had Mr. Learmouth and my two best hunters off with orders to get to North River that night and start the search. Of course they took brandy, blankets, etc. Sunday morning at daybreak I got off five teams of dogs and twelve good men with orders to search the woods and buy between here and North River and to make connections as soon as possible with Learmouth's party. In addition to this three policemen with the Rev. Mr. Stever's dogs joined my forces. I went along also and got home late Sunday night. When I left the Indians had found his tracks and were following them like blood hounds. Shortly afterwards they found his body. The following day they brought him into the Fort. It was very sad, he was only twenty-nine years old and was well liked for his kindheartedness and willingness. He was found by two of our men midway only three or four miles from the camp. He had gone too far to the north, in fact he passed the camp. Those who know him best say without a doubt he died from exhaustion or collapse. From the appearance of the body and the expression of the face, he certainly did not suffer. I realized how much I have to be thankful for, many a storm have I been caught out in and yet was pulled through. Poor Flood, no one was to blame, it was an accident, it was "Kismet," Dec. 9th. The doctor was buried today at two p. m., and we are now trying to recover ourselves."

Opera House Was Packed Last Night

"Beauty and the Beast" Drew Peterboro's Elite in Full Numbers.

Messrs. Turner & Sons, have every reason for congratulation over the splendid audience that last night entirely filled the opera house from orchestra to the gallery.

The play of last night was one of the best staged scenic productions that Peterborough has ever witnessed, viz., the great Drury Lane production of Wood & Collins' Sleeping Beauty and the Beast. The music was sparkling and catchy throughout and the specific scenery was admirably adapted to the artistic and loudly applauded transformation scenes.

The cast being so large it would perhaps be invidious to particularize as to individual merit of the large cast. Mr. Harry DeVine as King Bardout, was a thorough and natural comedian, playing four encores in the first act, whilst his regal consort as portrayed by Mr. Chas. Saunders, was well played by that adipose actor.

Princess Beauty as presented by Miss Bell Williams taught the audience and evolved rounds of encores.

Taken as a whole, Beauty and the Beast, was one of the best plays this city has seen for many a month, and proves conclusively that the new opera house management has decided to give Peterborough people good clean shows, as good as the best, at fair prices.

A Riverdale Concert Incorrectly Reported

The Times has received a communication from Mr. J. M. Anderson, taking exception to an report alleged to have been contained in these columns regarding a report of an entertainment at Riverdale S.S. Hall.

The writer says, in part:

"Your informant must have been very ignorant of the facts. The entertainment was not given in aid of Mr. Huntingford, nor does he either need or desire such aid.

"It was a purely business arrangement between him and the officers of our school who having enjoyed hearing his splendid graphophone, asked him to give a concert in our hall and share the proceeds. Mr. Huntingford has been a regular attendant at our school, and we deeply regret that he has received this insult in connection with our concert. Signed on behalf of the officers of the S.S., J. M. Anderson, superintendent."

Whilst we do not remember anything concerning the incident mentioned, we might note that The Times is frequently in receipt of notices by mail of country entertainments which notices arrive only in time for print and too late for corroboration, if this notice did appear in these columns, The Times accepted the news in good faith, and as such printed it.

The Great Bonspiel Is Now In Progress

Large Number of Rinks Have Entered the Contest.

The draws made at one o'clock yesterday for this week's great local Bonspiel resulted as follows:

PRELIMINARY ROUND.

Charlotte street, at 2 o'clock.

"There's a Reason"

The Kaiser Appeals to the New Reichstag

Asks Members to Strengthen Germany's Position Among the Nations---Elated Over the Results of the Elections.

Berlin, Feb. 20.—Emperor William opened the new Reichstag yesterday. His Majesty read the speech from the throne in a clear, loud voice, with considerable elocutionary effect. Referring to the foreign relations of Germany, and to international peace he said:

"The general political situation entitles us to the assurance that peace will continue to be preserved. My Government maintains with our allies of old heart-felt relations, and with the other powers good and correct relations.

"The treaty with Denmark, signed January 2, which was designed to remove disturbing differences by regulating the status of children in choosing their nationality, will, I am sure, strengthen the friendly relations with our northern neighbor."

In regard to the approaching conference at the Hague, the Emperor remarked:

"Following the suggestion of the United States, and the proposals of Russia, I have accepted an invitation to the second peace conference at The Hague, which in view of the results of the first Hague conference, will be qualified to develop further the laws among nations for the good of humanity and of peace."

HAPPY OVER ELECTIONS.

Alluding to the results of the recent elections to the Reichstag, the Emperor said: "The German people were called upon to decide a difference of opinion between the Federated Governments and the former Reichstag, and demonstrated their resolve to safeguard the honor and property of the nation by putting aside all narrow party spirit. The strong national feeling that united our citizens, peasants, and laborers will effectively protect the Fatherland in the future. Just as I am willing to observe conscientiously all my constitutional rights and privileges, so am I confident that the new Reichstag, composed of men of great men, ready to act, will acknowledge that its highest duty is to preserve and strengthen our position among civilized nations."

A COLONIAL MINISTRY.

Continuing, the speech announced the approaching introduction of various Government measures in Parliament, among them being the supplementary budget for the expenses in German South-West Africa, upon which the Reichstag was resolved, and measures providing for the construction of the projected railroad from Hutmanskow to Kutub; the establishment or other steps of communication with and in the country, the establishment of a colonial Ministry, and the administration of the and the administration of the rebellion in that colony. The Emperor said he hoped a considerable reduction of the number of troops in German South-West Africa would soon be possible, as there were only a few rebels in the field.

CHECK FOR SOCIALISM.

Referring again to the elections, his Majesty stated that the healthy spirit in town and country had counteracted and checked the Socialistic movement subversive of the State and society. It was the purpose of the Federated Governments to continue the peaceful work in the spirit that animated his Majesty's illustrious grandfather.

"And now, gentlemen," said the Emperor in conclusion, "may the national sentiment and readiness to act which created this Reichstag rule its labors to the welfare of Germany."

As the Emperor ceased speaking and stepped down from the throne the oldest member of the Reichstag following the custom proposed three cheers for his Majesty, which were still sounding as the Emperor left the hall. The brilliant assemblage then quickly dissolved, the members of the Reichstag going to the Reichstag Building for the preliminary business of the session.

Raided University

St. Petersburg, Feb. 19.—The Social Revolutionists have been holding meetings here lately under the cover of university autonomy. The police however, determined to put an end to these gatherings, and yesterday surrounded the University, arrested 71 revolutionists, and seized 1,500 pounds weight of incendiary proclamations. The prefect of police has ordered the arrest of all persons distributing election literature in behalf of the Radical party, and yesterday closed two printing establishments where radical bulletins were being prepared and seized 10,000 of them.

Hockeyist Acquitted

Montreal, Feb. 19.—Harry Smith of the Ottawa hockey team appeared in the police court yesterday to answer to a charge of having feloniously assaulted E. Johnston, a member of the Wanderer hockey team of this city, in the celebrated game of January 12th. After hearing evidence the accused was acquitted. Johnston and Blatchford of the Wanderer team and a number of other witnesses were examined, but none of them were prepared to swear that Smith deliberately struck Johnston.

SPORTING TOPICS

CURLING.

And now the knights of noise and Soon her up Sandy, own the city, the great Peterborough Bonspiel having begun yesterday.

* * * *

HOCKEY.

Mr. Chris. Graham, secretary of the Peterborough Hockey Club, has received a letter from Frank D. Woodworth, of New York, formerly sporting editor of the Toronto Mail and Empire, in which much interesting information is given concerning the Crescent Athletic Club hockey team of New York City, who will meet the locals here on Friday night.

* * * *

Kingston, Feb. 20.—Rev. Dr. Ryckman, of Almonte, after 51 years of active work in the Methodist ministry, will retire to a superannuated relation and live in Kingston. He is the father of E. B. Ryckman, of Toronto.

Childrens' Shelter Electric Lighted

A long felt want is now being filled at the Childrens Shelter on the corner of Charlotte and Stewart streets. As is well known Mr. Henry the efficient Superintendent, has for some years had much anxiety on account of the old-of-date system of lighting a house devoted to the Shelter of small children. Yesterday Messrs. Alexander & Miller, the Brock street electricians were busy wiring the shelter and installing a complete and modern system of electric lighting. This will not only be safer for the juvenile inmates, but save those in charge much anxiety. It might be added incidentally, without this appearing as an advertisement, that the Children's Aid Society is one of the most deserving and well doing charities in this city. Any one having superfluous coin could not do better than help it along. Even in the "Jack-pots," those engaged in sport might lay aside a little.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO, Toledo, O.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

Mossrs. Marks Bros. Are Coming to the City

Messrs. Marks Bros., the old-time Peterborough favorites of the stage, played in the Academy at Lindsay last night. Mr. Alex. Marks, advance agent for this strong dramatic combination was in the city yesterday in the interests of his company and took in the play "Beauty and the Beast." In conversation with Mr. Marks, The Times learned that Marks Bros. play in the opera house all next week. This popular combination of artists is assured of full houses.

—Mr. Richards, the very efficient box office manager at the Grand Opera House, had his hands full last night but succeeded, during all the rush to satisfy the crowds pressing for seats.

—Last night the opera house during the play of "Beauty and the Beast," was crowded with diners from abroad, they being noticeable by their red badges.

—Score and tally cards and all the latest games on sale at Times Bookstore.

VALUABLE FORMULA

A noted authority on diseases of the throat and lungs, who established a camp for consumptives in the pine woods of Maine, and whose remarkable cures there have attracted great attention from the medical world, says that his entire treatment consisted of fresh air, nourishing food, and the Pure Virgin Oil of the White Pine Trees mixed with Whisky and Glycerine, in the following proportions:

Virgin Oil of Pine (Pure). 1-2 oz.
Glycerine..... 2 "
Good Whisky..... 8 "

Used in teaspoonful doses every four hours.

It is claimed that the above mixture will heal and strengthen the lungs, break up a cold in twenty-four hours, and cure any cough that is curable.

The ingredients can be secured from any good prescription druggist at small cost and can be easily mixed in your own home.

Inquiry at the prescription department of a leading local pharmacy elicited the information that Virgin Oil of Pine (Pure) is put up only in half-ounce vials for dispensing. Each vial is securely sealed in a round wooden case, with engraved wrapper, with the name—Virgin Oil of Pine (Pure), prepared only by Leach Chemical Co., Windsor, Ontario—plainly printed thereon. Only the cheaper Oils are sold in bulk, but these produce nausea, and never effect the desired results.

MILLION DOLLAR SMELTING PLANT

Large Shippers of Cobalt Ore Will Erect Huge Smelter.

FAIR FREIGHT RATED ASKED

Deputation Waited on the Canadian Pacific Railway.

Montreal, February 20.—A deputation waited upon Vice-President Bosworth, of the C. P. R. yesterday, and informed the C. P. R. officials that the larger shippers of Cobalt ore were about to erect a million dollar plant would be erected either in some place convenient to Niagara power, or to Cornwall, if they could get the freight rates and power at a fair figure.

The C. P. R. expressed the desire to do anything they could to secure the business, and Mr. George Foster, K.C., president of the St. Lawrence Power Company, told the same delegation that while all the available power of the St. Lawrence Company as now developed was sold, that his company would, in the spring, increase its capacity, and that before a smelter could be erected they would be in a position to furnish any amount of power at a rate that would compete with the Niagara Power Companies, or for that matter any other companies.

The president of the proposed smelting company is Mr. John McMartin, a Cornwall boy, who has become a millionaire through the mines of the Western States and in Cobalt. The directors of the smelting company are John McMartin, G. A. Dunlop, F. Leonard, T. H. Trethewey, L. Streinweiner and Milton Hersey.

Interesting Lecture Before St. Paul's Y.M.C.

The regular meeting of St. Paul's church Young Men's Guild was held last night with a good attendance.

The president, Mr. E. S. Curry very acceptably filled the chair. After routine business was finished, a very interesting program was presented. Mr. Carl Halpenny rendered several violin selections. Messrs. Nelson and Lillie next entertained those present, and Mr. J. S. Brown was the next artist heard. Mr. Geo. Schneider acted as accompanist.

The feature of the evening was however a most interesting address given by Mr. T. D. Kerr, who took for his subject, his recent trip to the old country. Mr. Kerr's address was listened to with great appreciation.

About Female Ailments

Not Hard to Cure if Properly and Promptly Treated.

Ask any intelligent physician what causes nine-tenths of all female disease, even including anaemia, nervousness and consumption.

Back comes the drawer quick and sharp "Constipated Bowels."

There is scarcely a single female ailment that had not in its earlier stages symptoms of constipation.

How much better off the system is without the poisonous accummulations caused by constipation. How much clearer the complexion, how much fresher one feels when the system is pure and clean.

Think it over yourself.

Isn't it apparent that a bowel regulator and liver stimulant like Dr. Hamilton's Pills is sure to do good?

Gay spirits, good looks and happy health have returned to many a sick woman through Dr. Hamilton's Pills.

Better get a few boxes today; purely vegetable, free from injurious ingredients, healthful and antiseptic. Dr. Hamilton's Pills will assist you in a thousand ways.

As delay is always dangerous, your plain duty is to follow the example of Mrs. F. Rowe, who sends the following letter from Gravels, Port Au Port, Newfoundland; "Four years ago I got kidney and bladder trouble. I thought it was 'female trouble' and treated it accordingly. Even my doctor in St. John said it was so.

"In reading about Dr. Hamilton's Pills I noticed mine was like mine and I bought six boxes. These pills went right to work on my sick condition and helped me from the first. My supposed female trouble, which was bladder disease, was cured. My weight increased eight pounds and never before was I as well as today. Dr. Hamilton's Pills did it all."

All dealers sell. Dr. Hamilton's Pills, 25c. per box or five boxes for $1.00. By mail from N. C. Polson & Co., Hartford, Conn., U. S. A., or Kingston, Ont.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa, and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the office of the Morning and Weekly Times, where they will be furnished with writing material, if needed.

The Times is a member of the Associated Press, and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25 cents per month, and to outside points at $5 per year, strictly in advance.

THE STAR MIRA.

A Sun of Great Size That Is Struggling For Existence.

For the greater part of the time the variable Mira, which has been known to astronomers for 300 years, is altogether unnoticeable and indeed invisible, except with telescopes. It once disappeared entirely for a period of four years, but afterward attained extraordinary splendor, only to fade again to invisibility. It is a sun of great size, brighter than our sun when it shines at its brightest, but some trouble, some solar disease, seems to be sapping its vitality, and it resembles a patient almost at the last gasp. Once in about 331 days—but the period is irregular—it has a sudden accession of energy and flares up for a little while with several hundredfold brilliancy only to sink back into a dull red point that nearly escapes the ken of the telescope. One interesting explanation that has been suggested is that the surface of Mira periodically bursts into a vast flame of burning hydrogen, so great and powerful that it is visible across millions of millions of miles of space. It is a star for the imagination of a Dante, yet there is reason to believe that the time is coming when every star in the sky, not excepting the sun, will have to confront a similar struggle for existence, just as every mortal being must some time see death.—Garrett P. Serviss in New York American.

What He Wanted.

"How will you have your hair cut, sir?" said the talkative barber to the victim in the chair.

"Minus conversational prolixity," replied the patient.

"How's that, sir?"

"With abbreviated or totally eliminated narrations."

"What?"

"Without effervescent verbosity. Let even diminutive colloquy be conspicuous by its absence."

The barber scratched his head thoughtfully a second and then went over to the proprietor of the shop and whispered, "I don't know whether that man in my chair is mad or a foreigner, but I can't find out what he wants."

The victim had to explain that he wanted the job done in silence.

To do the wise thing at all times and under all circumstances is difficult—yes, impossible; but to make a fool of one's self is as easy as rolling off a log.—Springfield Republican.

Light Restored.

"There are many more women living than I used to think."

"Is that so?"

"Yes. Before I married I used to think my wife was the only woman in the world."

Illuminated.

Benedick—That luminous paint is a splendid thing. Singleton—What do you use it for? Benedick—We paint the baby's face, so we can give him a drink in the night without lighting the gas.

FOOLISH GIRLS.

These Who Deliberately Walk Into Matrimonial Failure.

It is enough to make one's heart ache the way foolish girls will pass by splendid, hardworking men and choose insignificant little nobodies for their life's partners, and all because they won't take the trouble to look below the veneer of fine dress.

The man who has an aim in life can't spend all his time in running after girls and going to dances.

He has something better to do. He has to make a name and place for himself in the world.

The young men who are lounging around street corners and saloons will never be anything better than they are now. The chances are they will be much worse.

Look around at the married women of your acquaintance. Some of them married honest, hardworking men. Others married loafers. Some of them are happy wives, others miserable wrecks.

Look forward a few years and imagine yourself in the place of either and then marry a good for nothing loafer if you dare.

Marry the worker and help him build up a successful career. Let him come home at night and find a cheerful home and a happy, smiling wife who is proud of his successes and sympathetic in his reverses.

But don't deliberately walk into a life where failure is bound to come. Don't tie yourself to a man for whom as time goes on you will be able to feel neither love nor respect.—St. Louis Republic.

TO MAKE A LEVEL BED.

The Secret Lies In Having a Tight Undersheet.

The secret of a level made bed lies largely in a tight undersheet. This is not merely a smooth one, but a sheet stretched so tightly that it lies taut across the bed and springs a little up from the mattress. To effect this the undersheet should be much wider than it is ordinarily made. Indeed, when tucked under the sides it should meet and overlap for two inches beneath the mattress and hang down at least ten inches over the head and foot.

With the sheet laid evenly on the bed and tucked in, the process of tightening it begins at the head. The bedmaker stands with her right side to the bed. This rule holds good with all her work. All of the bedding is laid on from this side, and, with the exception of the bottom sheet, that side should be nicely laid and tucked in before she moves to the other side in order to save steps. Standing then at the right side, the bedmaker reaches under the mattress and with the right hand grasps the opposite side of the sheet and with the left hand the near side. She then pulls the sheet so as to bring her two hands together beneath the middle of the mattress. So she progresses to the foot, drawing the sheet together every six inches down its length. It will take all her strength to do this properly, and unless she exerts this she will realize no result.

CULINARY CONCEITS.

Try dipping lamb chops in lemon juice just before broiling them. They are delicious.

Carrots and onions will be better if soaked in cold water for twelve hours before using to draw out the strong flavor.

When boiling fish add an onion to the water and sweet herbs tied in a piece of muslin. This is a French cook's suggestion and very tasty.

Slices of fried bread or ordinary toast spread with anchovy paste are delicious if covered with scrambled eggs. This is a very nice supper dish.

When making cake beat your eggs thoroughly and mix in the last thing before baking. One well beaten egg will go as far as two badly beaten ones.

Persons who have been brought up on dried figs feel disappointed that fresh figs are not sweeter and resemble melons more than figs. Fresh figs have to be peeled and are usually eaten with cream.

The Shape of the Wrist.

To improve the shape of the wrist when it is too slender and the bones are too prominent begin treating with daily massage. As a cream to use for the purpose the following is good: Two ounces sweet oil of almonds, two ounces orange flower water, two drams white wax, one dram oil of sweet orange, two drams spermaceti. Melt the wax and spermaceti in a jar set in boiling water. Heat the almond oil and add it to the wax. Heat the orange flower water; add it, half a teaspoonful at a time, stirring the mixture quickly. Remove the vessel from the water and beat the contents. Heat again and add the oil of sweet orange. Beat until it is cold. Put away in pots and cover with parchment. Cocoa butter and olive oil are also excellent flesh builders. Rub them well into the skin.

PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—coaxes blood pressure away from pain centers. Its effect is charming, pleasingly delightful. Gently, though subtly, it surely equalizes the blood circulation.

If you have a headache, it's blood pressure.

If it's painful periods with women, same cause.

If you are sleepless, restless, nervous, it's blood [illegible]—blood pressure. That surely is a certainty, for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the menstrual blood pressure.

Bruise your finger, and doesn't it get red, and swell, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where pain is—always. It's simply Common Sense.

We sell at 25 cents, and cheerfully recommend

Dr. Shoop's Headache Tablets

Mrs. J. D. TULK

When the Hair Falls

Stop it! And why not? Falling hair is a disease, a regular germ disease; and

LAUNDRY BAG.

Novel and Attractive Receptacle For Soiled Linen.

Even so commonplace and humble a member of the family of household conveniences as the laundry bag may be so wrought as to combine attractiveness with utility, and there is no reason why the receptacle for soiled linen should present an unlovely appearance every time it is disclosed to view.

THE CAT BAG.

It is said that it took the inventor of the cat bag shown in the illustration a whole year to perfect her idea. The bag is one result, and the same feline is noted in furry round pincushions and other useful and ornamental articles. The cat in this case is of flat but very heavy pasteboard or cut from thin wood and covered with white canton flannel, the black portion being of black velvet pasted on top. The eyes and whiskers are drawn or painted in, and the nose is a piece of red flannel cut the proper shape. The bag is reached through the mouth, the interior being lined (preferably with red silk), while the bag itself is of fancy Japanese silk.—Exchange.

Rugs From Scraps.

Probably everybody knows that very pretty rugs can be made from bits of colored silks and ribbon, but in case some one has a lot of pieces and does not know what to do with them we make this suggestion: Select only bits of harmonizing shades—pink and brown, red and dull green and black, yellow and dark green, purple, black and cream color—and cut the pieces into strips of even width, sewing the ends together firmly. Roll into balls and send them to a weaver of carpets, with instructions not to use any discordant color for binding them together. You will be surprised at the soft, artistic effect of old scraps. A really charming portiere or couch cover will be the reward of a little patience and very little expenditure.

Loose Chairs.

Loose rounds on chairs are annoying besides giving the pieces of furniture the appearance of cheapness and general disability. They may be easily made tight by filling the grooves into which they are fitted with a good glue. As soon as this dries and the rounds are made secure the glue that has run down on the outside may be chipped off with a knife. A loose arm to a rocker or the runners on a rocker may be tightened in the same way.

Bad Society.

What you learn from bad habits by bad society you will never forget, and it will be a lasting pang to you. I tell you in all sincerity, not as in the excitement of speech, but as I would confess and have confessed before God, I would give my right hand if could forget that which I have learned in bad society.

COMING

Monday, Feb. 25th

ORIENTAL HOTEL, PETERBORO

TO IMPROVE YOUR APPEARANCE

Retain your youthful freshness so that no one can remark, "she is past her prime." To appear younger and more attractive than the average woman, you must be particular that your Hair shows no sign of being thin, short or scrawny. A DORENWEND TRANSFORMATION, POMPADOUR, WAVE, CURL or SWITCH will substitute nature's defects. Even if you have plenty of your own hair, these light and airy artifices may be worn over it, saving you the worry of arranging your hair in the prevailing style. Your hair can be perfectly matched in color and texture, so that detection is out of the question.

Now, if you have in your mind any prejudice regarding artificial hair, it will forever be dispelled after seeing how natural and becoming our productions will prove in your case.

CONSULT PROFESSOR DORENWEND

DURING THIS VISIT

Advice regarding your hair and how you can make the most of it, also a personal demonstration of the newest styles in transformations, will be given the same as at our establishment in Toronto. Bear in mind that our styles are originated and designed by Professor Dorenwend, and they cannot be procured from any other makers. Their equal have yet to be produced.

MAN TO MAN—ABOUT BALDNESS

If you are bald, or partially so, you must realize that it makes you look old. Notwithstanding the desire to have back your one time bushy head of hair, you hesitate before wearing a natural hair covering simply because you imagine it is going to be noticed by others. Now you never made a greater mistake. Thousands of men, who thought the same as you do, are to-day wearing a

DORENWEND PATENT TOUPEE

and instead of carrying the handicap that baldness proved to them, they are now enjoying the advantage of "looking young"—and that is what counts to-day in business and social life. Our Patent Toupee is a featherweight fac-simile of your own natural hair and may be worn without fear of detection—impossible to remove from the head unless at will—not the least clumsy or uncomfortable. They act as a protection, preventing colds and catarrh, so common to bald men.

Now do not neglect this opportunity—come and see for yourself. A few minutes' demonstration will convince you that a Dorenwend Patent Toupee is not like the clumsy, wiggy affairs that are claimed to be "just as natural."

The Dorenwend Co. of Toronto, Limited, 103 and 105 Yonge Street

REMEMBER PLACE, DAY AND DATE

SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans:—

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY,
Deputy of the Minister of the Interior.

WEDDING STATIONERY

WEDDING ANNOUNCEMENTS are always in order. The season for the final result of being a disciple of Cupid finds expression in the Hymeneal ceremony at the altar—that occasion when "two hearts that beat as one" are joined together—pronounced one.

For this auspicious occasion the, printing must be chastely dignified—must be appropriate in appearance to this one time of life when everything "best" is donned—when happiness reigns supremely.

Marriage Announcements
Marriage Invitations
Marriage Reception Cards
Post Nuptial Reception Cards

All of these we are able to supply in a proper form and printed artistically. Our work is conducted under the supervision of skilled typographical mechanics and may be unhesitatingly presented to the most fastidious critic.

Our charges for such work are moderate—yet good printing is ever valuable. However, we give quality for our figures, and an order entrusted to our care will be speedily, carefully and satisfactorily executed.

No work can be well done which has to be done hurriedly. Time is necessary for the accomplishment of faultless printing. We will fulfil all expectations if given ample time for completion.

The Greatest Mining Boom

of the world will commence early this spring in the country NORTH OF COBALT. No mineral taken from the earth excites the attention of the general public like that of Gold. It is the money metal of the world and millions are struggling for it in all climes.

The King of the North Gold Mines Company,

(Incorporated) owns

The Greatest Gold Mine in the World

Since its discovery the entire country surrounding the mine has been located by prospectors, and active operations will commence early in the spring.

50,000 Tons of Ore

are certified by the engineer, Mr. T. Simard, to be in sight, and he further certifies that it will Average $30.00 per ton. The ore is free milling and the gold is plainly visible in the quartz, and only requires the completion of the mill now under construction by the Jenckes Machinery Company of Sherbrooke, Que., to be made into gold bullion. Don't wait until the boom has reached its climax, but buy now when the price of the shares is within the reach of everyone. 15% per month undoubtedly can be paid in dividends, if the reports of those who have examined the property can be relied upon, and from our personal investigations through independent sources, we believe they Should be Paid. We earnestly advise you to buy now, at once and without further delay, as we have only 50,000 shares to sell at

$1.00 per Share

and we reserve the right to advance the price without notice. Remit by Registered Letter, Draft on Montreal, or Certified Cheque to

OLD TIME PUNISHMENTS.

Cold Water Baths Helped to Cure Swearing and Scolding.

To punish a child in such a way that it will see the direct connection between the correction and the fault is one of the precepts of modern education. The judge of the eighteenth century was not worried by such psychological theories, but his decisions often had the grim humor of fitness.

What could be better for the scold than a cooling plunge or for the wife beater than a few lashes on his own back?

A number of tender handed English gallants joined a pioneer expedition to Virginia. The weather was cold and the work hard. When these soft muscled young men were set at chopping trees their hands were sorely blistered by the ax helves. With the cries of pain many oaths were heard.

The president of the company soon put a stop to this swearing by ordering a can of cold water to be poured down the sleeve of the guilty one at every oath he uttered.

In colonial days hog stealing was considered one of the most serious of crimes. At the first offense the thief's ears were slit, at the second his ears were nailed to a pillory, and at the third he suffered death "without benefit of clergy."

Deceitful bakers and careless fish dealers had to "lose their ears," while he who spoke detracting words had his tongue bored by a bodkin.

A Frenchman, traveling in America in 1700, describes the ducking stool as a "pleasant mode" of punishing a scolding woman.

In 1635 Thomas Hartley of Virginia wrote of his witnessing the execution of a ducking stool sentence:

"Day before yesterday at 2 of ye Clock, I saw this punishment given to one Betsey Walker, who by ye violence of her tongue made her house and her neighborhood uncomfortable. They had a machine for ye purpose, yt belongs to ye Parish. It has already been used three times this summer.

"Ye Woman was allowed to go under ye water for ye space of ½ minute. Betsey had a stout stomache and would not yield until she had been under five times. Then she cried piteously. Then they drew back ye Machine, untied ye Ropes and let her walk home a hopefully penitent woman."

BUSINESS PROVERBS.

Not the big earner, but the wise investor, is the future capitalist.

The wise man knows that wealth is not worth getting save for the purpose of using and so gets after it early.

Investment is putting money into chicken farming; speculation is counting the chickens before they are hatched.

The chap who does his work indifferently because he thinks he is above his job thereby proves his unfitness for the job that is above him.

The man who yields to honest persuasion slowly and imperceptibly, as rock to water, may make a loyal investor when won. But he who is quick to lay hold of a good investment makes the most money.

Multitudes of people sleep soundly nights, believing their savings to be protected in the banks, not dreaming that the banks have invested them in business enterprises that the depositors themselves declined to buy shares in because they thought their earnings were too large to be safe.

Willing to Chance It.

It is reported of the Earl of Mansfield that he once dismissed a servant, but wrote for him a "character," as follows: "The bearer, John ——, has served me for three years in the capacity of coachman. He is an able driver and a very sober man. I discharged him because he cheated me." A day or two later the man returned to thank his old master for the help he had afforded him in getting him a new birth. How had the testimonial helped him? The man explained that his new master had observed that ability to drive and sobriety were the qualities he required in a coachman. As for the cheating, his employer had said, "I'm a Yorkshireman, and I'll be hanged if you cheat me."

The English of It.

An English actor of some prominence was dining with some friends in this country. One of them asked him if he had found any American plays that he thought he could use in England. "Oh, yes," he replied, "I have seen one or two that I fawncy will be on the other side. In fact, I have entered into negotiations for several. One that appeals to me strongly is a play called 'Ten Evenings in a Public House,' where I shall play John Morgan, and another is named 'Uncle Thomas Asbidence,' which has a fine part for me in Marks, the barrister."

Papa's Fault.

Father—I have just heard that that incorrigible son of mine has just married a well known actress. Daughter—Well, you have yourself to blame, father. Father—How do you make that out? Daughter—Haven't you often told him to hitch his wagon to a star?

Business.

The elephant trumpeted loudly.

"What's the trouble?" asked the chimpanzee.

"Somebody's worked the shell game on me," replied the pachyderm as he threw away the bag of empty peanut shells which had just been handed to him.

The Criminal Season.

Taking all crimes, more are committed in the autumn than during any other of the four seasons of the year.

Distant Stars.

There are stars so distant that a flying machine moving at the rate of 500 miles an hour would require 50,000,000 years to reach them.

BEES IN WARFARE.

Two Instances In Which the Insects Were Used as Weapons.

History records two instances in which bees have been used in warfare as weapons against besieging forces. The first is related by Appian of the siege of Themiscyra, in Pontus, by Lucullus in his war against Mithridates. Turrets were brought up, mounds were built, and huge mines were made by the Romans. The people of Themiscyra dug open these mines from above and through the holes cast down upon the workmen bears and other wild animals and hives or swarms of bees.

The second instance is recorded in an Irish manuscript in the Bibliotheque Royale at Brussels and tells how the Danes and Norwegians attacked Chester, which was defended by the Saxons and some Gallic auxiliaries. The Danes were worsted by a stratagem, but the Norwegians, sheltered by hurdles, tried to pierce the walls of the town when "what the Saxons and the Gaeldhil who were among them did was to throw down large rocks, by which they broke down the hurdles over their heads." What the others did to check this was to place large posts under the hurdles.

What the Saxons did next was to put all the beer and water of the town into the caldrons of the town and boil them and spill them down upon those who were under the hurdles, so that their skins were peeled off. The remedy which the Lochlans applied to this was to place hides outside on the hurdles. What the Saxons did next was to throw down all the beehives in the town upon the besiegers, which prevented them from moving their hands or legs from the number of bees which stung them. They afterward desisted and left the city.

DORMOUSE DELICACIES.

Titbits That Were Relished in Ancient Roman Times.

Brawn was originally a Roman dish and was eaten with garum, and cow's and calf's foot jellies were likewise dainties with Rome's upper ten in the time of the Caesars. One would hardly suppose that black puddings were so old as the reign of Tiberius, but this is the fact. They were made of pig's blood, with little cubes of fat interspersed in the compound, and were the invention of a gentleman who rejoiced in the name of Bambonselvergius. It was he who invented all kinds of sausages—that is, meat stuffed into skins, which, we take it, is the ground plan, so to speak, of a sausage.

This gentleman also wrote a learned treatise on the fattening of dormice for the table, for at one period dormice were a craze. There were dormouse soup, dormouse sausage, dormouse brawn, dormouse cooked in every conceivable way, and the demand for this delicacy in prize sizes was so great that there was room for a book on the subject, though unfortunately this book is lost to posterity, and the only knowledge which we have of the fattening of dormice in Rome is from Petronius Arbiter, who tells us that they became fat by sleeping.

He also tells us that the best sauce to eat with dormouse is a mixture of poppy seed and honey, a mixture which probably had the merit of inducing sleep after a meal.

Cheering Tommy Up.

The obstacles which beset the pathway of a photographer when he endeavors to secure "a pleasant expression" are many, particularly when his sitters are of a tender age.

"I do not believe whipping does children a particle of good," said Mrs. Green, returning flushed and discouraged from a visit to the photographer with her Tommy. "Here I've spent over an hour in that hot room trying to make this child look pleasant. I've slapped his hands twice, and he looked crosser each time than he did before."—Youth's Companion.

The Corpse Plant.

The corpse plant is a remarkable carnivorous specimen that grows in the colony of Natal. Its principal feature is a bell shaped mouth, with a throat opening into a hollow stem. It is almost black and covered with a thick, glutinous secretion, while its odor is very offensive. This attracts carrion feeding birds to it, and once they alight on it they are lost. Their claws become entangled in the secretion, the bell shaped mouth folds up, and they are literally swallowed.

Costliest of All Fish.

The fish was no bigger than a silver dollar. Its color was bright gold, and it had a beautiful bushy golden tail.

"That," said the pet stock dealer, "is the finest aquarium fish in the world, a Chinese brush tailed goldfish. It is handsome, healthy and long lived. A good brush tailed goldfish," he concluded, "costs $250 or $300, and some fine specimens have sold for as much as $700 apiece."

Good Seize Other Time.

"Just as Jack was about to kiss me last night father walked into the room."

"What did you do?"

"I gave Jack a rain check."—Milwaukee Sentinel.

Imperative.

First Doctor—Is this operation absolutely necessary? Second Doctor—It is. The only possible chance we have of collecting our bill is from his life insurance!—Life.

A Poor Wrapper.

"Yes; poor Mrs. Elderly is all wrapped up in that son of hers."

"And he isn't much of a wrapper, eh?"

Employment and hardship prevent melancholy.—Johnson.

Croup can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all. Sold by J. D. Tuffy.

This is the Safest and Greatest Buy.

TRUSTEES—Trusts & Guarantee Co., Limited, 14 King St. W., Toronto

This Company owns FIVE MINING CLAIMS containing 160 ACRES, all of which are under active development and heavily mineralized, as follows:

1 claim, 40 acres, Bucke Township, showing 4 veins, shaft 20 feet.
1 claim, 20 acres, Coleman Township, showing 2 veins, shaft 50 feet.
1 claim, 20 acres, Portage Bay District, showing 6 veins, shaft and 500 feet of vein uncovered.
2 claims, 80 acres, Anima-Nipissing district, showing 5 veins, shaft and vein uncovered across entire eighty acres.

A recent assay on Anima-Nipissing claims, taken from 3-foot level, show 132 oz. of silver to a ton.

The company own TOWNSITE OF NORTH COBALT, containing 800 ACRES, divided into 4,000 lots beautifully situated on shore of Lake Temiskaming. Building operations are active. SILVER DEPOSITS LOCATED and being developed.

A syndicate has been formed to build a $100,000 HOTEL ON THIS TOWNSITE.

We anticipate that within 2 years a city of 25,000 people will be located on this property and neighboring shores.

"Cobalt has the richest and most easily mined ore in the world. The average value of all the millions of ore mined in Coleman Township is over $700 per ton. The Government system of inspection throws a safeguard around the companies operating in the camp. It gives the investor greater protection than he ever had in any other mining camp.

"Cobalt is a long way past the experimental stage. It is recognized everywhere as the camp without a loss. It has positively made good and is today making greater profits for the investor than any other mining camp in existence."

We offer a limited number of Shares at the special price of **20 cents per share,** Fully Paid

Subscription List at above price will close positively on FEBRUARY 21ST.
Write, wire or 'phone for Maps, Prospectus, Copy of Assay and other particulars.

The best in Cobalt is not too good for you to buy. Try it.

KENNEDY COBALT, Ltd.

is recommended

Mr. Eggert, M.E., in his report on this property, says:

J. B. 32. This claim is situated on Trout Creek, not 15 chains from water's edge, in Temagami Forest Reserve, on the first bend of the Montreal River, directly at the head of Bay Lake and opposite V. and VI. concession of Coleman. Lease has been granted.

The claim is a 20 acre one and about 60 feet high with the exception of the most westerly part through which the creek runs and a small swamp to the south. Through it from one boundary line to the other runs the celebrated Nadeau vein following the contact between the middle Huronic quartzites and the diabase.

This vein, which comes up from the water on the Kay Foster claim is stripped all the way across the 20 acres of J. B. 32 at which southern end it dips down in a swamp to come up at the Nadeau.

It has a width of 5 feet, carrying a large amount of cobalt bloom, and in it runs a calcite vein 12 inches wide. Parallel with it runs an 18 inch vein of quartz richly mineralized with copper and iron sulphides.

This last vein has been traced for 4 chains while the first one, as already said, is uncovered for all of 20 chains making it plainly seen that the vein crosses the whole lot.

At the Nadeau, for which $100,000.00 was refused, has been sunk a shaft to a depth of 50 feet, and in it shows 5 inch niccolite, 18 inch smaltite together with cobaltite. Assays gave 673-1231-498-1161 oz. silver, or an average of over 800 oz. silver, which at the present price of 70c. is equal to $560.00 per ton, exclusive of cobalt values. The Edison Mine in right above on higher land.

The property is well situated right at water, has enough timber for all purposes and is one which needs only a shaft of 50 feet depth to be ready as a producer.

New Liskeard, 17th November, 1906

JACOB M. EGGERT, M.E.

We offer a few more shares at Fifty Cents (50c); par value One Dollar ($1.00). The property is being developed as fast as possible, and we cannot promise that stock will be sold at less than par for very long. Don't wait until it is $3.00 to invest, giving others big profits for what you should have bought sooner. We want you to get in on the ground floor and share in the big profits. For a limited time only we will accept subscriptions at 50 cents—the stock is slated for a sharp advance very soon. Send marked cheque or money order.

W. H. JACKSON,

261 KING STREET WEST, - TORONTO, CANADA

DAWSON KENNEDY, Local Agent, 600 WATER ST., PETERBORO

THE MORNING TIMES PETERBOROUGH

Developments in the last few days are reported by the press and verified by the company's officers, again attract public attention to the famous Sunburst Mines—having added 280 acres of rich lead and zinc land in the heart of the world's richest producing district to original holdings, the Sunburst Company has ordered the permanent equipment of shaft No. 1.

WORK BEGINS ON THE SUNBURST MINES

Machinery being installed and work on No. 1 shaft immediately resumed. Drifting being pushed to connect the No. 2 and No. 3 shafts, which, according to the drilling, will open up immense bodies of ore for the full distance, which is about 600 feet. The Eastman Development Co.'s White Eagle Mill, which was started within the last 90 days, is now producing some eight to ten tons of zinc ore per shift—being the record breaker of the district so far. This property is immediately to the northwest of the Sunburst property. The Clarissa, to the southwest, has made a phenomenal strike in the last week. The opportunity to share in this wonderful fortune making is now presented by the development of the Sunburst property. Millions will be taken out of this district in 1907, and shrewd investors are now seizing their opportunity to reap a golden harvest from the vast mineral wealth the Baxter Springs Camp. Many properties are now returning from 21 to 128 per cent. dividends on the investment.

IMMENSE ORE BODIES PROVEN UP

The Sunburst Mining Company now owns a vast property in Quapaw Reservation, Indian Territory, generally known as the Baxter Springs District. The history of the company is well known to the public. The great richness was long been admitted. Now development work proves [illegible] genuine expectations. The Baxter Springs News of December 6, 1906, says:

"The Sunburst is showing up some mighty big ore this past week. J. C. Dinger, who is doing the development work, brought in samples of his latest ore taken out of shaft No. 2, and it certainly shows up fine. This shaft now has 90 feet of drifting to the south, showing rich ore all the way, and the deposit encountered the past week is the same as the Hobo mine is cutting in its north drifts, which are only eighty feet to the south, and which are being driven north to connect with the south drift of the Sunburst. The Indiana, just to the west, is showing up remarkably rich lead and jack in the east drift. Gatlin is encountering the same to the east and north, thus demonstrating that immense ore deposit covers the Ayers-Sloan, White Eagle, Western Mining Co.'s Omaha, Winner, Good Luck, Hobo, Gatlin, Indiana and Sunburst leases, all of which are within a radius of a few hundred feet of each other. This is the richest deposit yet opened up, and while this is a fact, it is owing to the intense development in this particular section of the camp, which is proving up the drillings which have been made since the camp started."

This immense rich property lies four miles from Baxter Springs, Kansas, and in just across the state line in the Quapaw Reservation, Indian Territory. All around and immediately adjoining this property are good producing mines with fine mills, which are making their owners rich. Just southwest is the mill owned by the Whiteys of New York. On every side we are surrounded by producing mines, operating in ore bodies that run into and through our section, and from the reports of experts and engineers are actually richer and nearer the surface here than in any other place in the district. The formation consists of a blanket deposit of mineral of the richest quality, from 15 to 50 feet in thickness, lying at a depth of from 5 feet to 75 feet, thus making it very easy and inexpensive to mine.

Thousands of dollars were expended in drilling holes and sinking shafts to prove not only the existence in paying quantities of lead and zinc, but also the unusual richness of the ore. The drilling and shaft sinking have demonstrated a uniform bed of ore over the entire acreage of 15 to 30 feet in thickness, and found only 57 feet under the surface. The water is only sufficient to wash the ore while milling. This is an important point, as in many lead and zinc mines the superabundance of water is a very dangerous factor. The ore is found between well-defined flat beds of limestone, which allows of the ore being taken out without the use of any timbers whatever, pillars of ore being allowed to support the roof, which is thus permanently safe.

The Same Ore Body That Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Isley, Tipton, Magazka, all well-known properties. To the west are the Sunnyside (the oldest mill in camp), White Eagle, Indiana, Ayers and Sloan. To the south, the famous Hobo (the richest mine ever opened in the district, which has drifted to the south line of the Sunburst in extremely high-grade ore). The ore milled last week by the Hobo ran 18 per cent. In three months 525,000 pounds of rich ore was taken out by the Hobo. This mine is 135 feet from our property and is in the same ore bed. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. The drilling shows this bed to run across the entire Sunburst property. Shaft No. 3 is 400 feet from the northeast drift of the Hobo and is into the same ore bed.

To the south are also the Omaha Mines and Mill and the Good Luck Mine, where the lead has proven to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

SHAFT NO. THREE.

ADVANCE IN PRICE

On account of the additional holdings, which are of great intrinsic value, as well as the remarkable proof of richness afforded by the development work already begun, the price of Sunburst stock will not remain long at the present figure.

Every step forward in the workings of the company is attracting wide attention, and is justifying the most liberal expectations.

As this work goes on Sunburst stock is bound to increase in value, as it is bound to be a mighty source of profit. The public demand because of the public confidence in this great property has already absorbed thousands of shares and has steadily advanced the price, but this advance will be small in comparison to what is coming.

The shrewd investor will realize this opportunity now, and will buy before the next big advance.

Buy now and share pro rata in the demonstrated profits of this enterprise. Make your reservation for as many shares as you may desire at the present price, remit 10 per cent. of the full price for the block and send us the balance in nine monthly payments. Upon the completion of your payments your certificate will be sent you for the desired number of shares, fully paid and non-assessable, no matter how much the price of stock may have advanced during that time.

You will thus become a stockholder in this company on equal terms with all the other stockholders, and by payments so small as to be hardly noticed.

The tremendous advantage to the small investor through this play of payment must be apparent at a glance. By subscribing, for instance, $2.00 now and remitting only $4.00, you will obtain the whole block subscribed for at the present low price, and receive the full advantage of every advance on the whole $80.00 worth, although your first payment is but $6.00. You really invest $4.00 and get all the benefit of an investment of $80.00. Could anything be fairer?

In order to secure the benefit of this offer it will be necessary for you to make your reservation at once, with the understanding that you will be entirely free to withdraw it if further investigation fails to convince you of the merits of the stock.

The officers of this company, who have the handling of your money, the conduct of the mine, and paying of dividends, are stockholders like any other.

What is more, they are well-known and successful business men. Look them up. Investigate their standing, their acumen, their integrity.

This is a business proposition. Here are business men conducting it. They invite your investigation.

MAP OF DISTRICT SHOWING SUNBURST MINE.

Why Stock is Now Offered at 8c a Share

This issue of fully paid and non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery, and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is resulting everywhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard on the contrary of the fortunes taken out right in this district, now by one, but practically by all mining plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this: Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to the mine—we refer you to any of the reports on this property—to banks—to engineers—to the evidence of surrounding properties; we lay the proposition before your business judgment, with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT.

In compliance with the request of the officers and stockholders of the Sunburst Mining Co., a detailed examination of the property was made October 1, 1906, by M. S. Parker, the well-known mining engineer and member American Society C. E. Excerpts from Mr. Parker's report follow:

The Sunburst Mine is located in the southeast corner of Section 29, Township 29, Range 24, east of the Indian Meridian, in the Quapaw Reserve, Indian Territory. It is joined on the south by half its width by the famous Hobo Mine, which produces the richest lead and zinc ore of any mine in the district thus far developed, and prospect drill holes and shafts north of the Hobo, on the Sunburst, show the same grade of ore, and at the same depth and of the same thickness.

The Omaha Mine, which is now successfully operating a new 150-ton mill, also adjoins the Sunburst on the south, and have drilled along their north boundary, striking the same body of ore as developed by prospecting over the line on the Sunburst.

The Hobo and Omaha Mines on the south have been prospected along the line of the Sunburst by drill holes and the present working shafts and drifts, which verifies the results of the prospecting done on the Sunburst Mine, north of the south boundary of the Sunburst.

FORMATION.

This mine comes under the blanket-formation class. Out of the last eleven holes drilled, only two holes were barren of lead or zinc ore, most of them showing lead and zinc ore in paying quantities, while some of the holes drilled showed very rich deposits of lead and zinc.

One of the drill holes on the Hobo Mine showed very rich cuttings; within a foot of this hole was a blank spot 80 feet in diameter. The shaft of the Hobo Mine was sunk within 8 feet of a drill hole showing a very rich zinc ore, and went down through such a spot—no zinc ore being encountered—within a foot of the shaft walls very rich zinc and lead ore was found.

The thickness of the ore body, as shown by the drill holes, is from 15 to 30 feet. Ore is struck in shaft No. 3 at 61 feet depth, and the shaft is still in the ore at 75 feet. The drill cuttings at this shaft showed ore down to 91 feet depth. From all the drill holes this depth, viz., 91 feet appears to be the floor or bottom of the ore body, and is very uniform. The roof, however, varies in depth from the surface, 57 feet being the nearest it comes to the surface, while at places it is shown to drop down to 80 feet in depth, but the average depth to roof is very close to 65 feet. This would indicate an average thickness of the ore body of about 25 feet.

Three shafts have been sunk. No 1 shaft, 5 1-2 by 8 feet, is down 85 feet, well timbered, and has good shafthouse and derrick. From this shaft prospect drifts have been driven, in all about 200 linear feet, mostly in lead-bearing ground. A small office building is near this shaft.

Shaft No. 2, 5 1-2 by 8 1-2 by 80 feet, well timbered, with shafthouse, derrick and boilerhouse in good repair. From this shaft a drift is driven north 70 feet, then west 50 feet. Head of west drift is in good ore. The face of this drift is in zinc ore, while the bottom is in rich lead ore. This shaft should go down to 90 feet depth. This will give a 70-foot face of ore.

Shaft No. 3, 5 1-2 by 8 1-2 by 75 feet, well timbered—a first-class shaft. No buildings on it. A short drift is running south in good zinc ore. The bottom of this shaft is in good lead ore. These three shafts, with 18 drill holes, constitute the present development of the mine.

The Sunburst is located within four miles of the Frisco Railway. Baxter and Quapaw stations being about equally distant from the mine. A road is projected from Baxter to Miami that will run within a quarter of a mile of the mine. This road is to be a freight and passenger electric road for the accommodation of the mines. Baxter Springs business men have subscribed $75,000 toward the building of this line, and every assurance is given that the road will soon be constructed. This will make transportation of fuel and mine products materially cheaper than at present, although the cost under present conditions is not heavy.

It is needless to say that work at the Sunburst can be carried on the year round, the climate in this section being so mild in winter that very little trouble is experienced in mining operations in the Quapaw Reserve.

Summing up the points in this report, I will say that you have a first-class lead and zinc property. Rarely will one find a tract of ground so universally mineralized as the Sunburst Mine. If you follow the recommendations I have made regarding development, I feel assured you will reap your reward in good dividends. Trusting that this report will meet with the approval of the President and Stockholders of the Sunburst Mining Co., I subscribe myself,

Very respectfully yours,
M. S PARKER.

As an investment proposition we believe that the Sunburst Mine will certainly pay no less than 25 per cent. We quote from other reliable sources the following figures showing the enormous annual dividends earned by lead and zinc mines in the Southwest field:

Oscoela Mining Co.	24 per cent.	Katydid Mining Co.	50 per cent.
Cottonwood Mining Co.	75 per cent.	Mocking Bird Mining Co.	54 per cent.
Waddell Zinc Co.	47 per cent.	John Jackson Mining Co.	90 per cent.
Conqueror Lead and Zinc Co.	30 per cent.	Omega Mining Co.	117 per cent.
Hudson Mining Co.	36 per cent.	Dinger Mining Co.	120 per cent.
B. & H. Mining Co.	40 per cent.	Chapman Mining Co.	140 per cent.
		Underwriters' Land Co.	90 per cent.

Buy Stock on Easy Payment Plan

A rise in the price of these shares to par means over 1200 per cent. for every $1 invested—besides the dividends.

Subscriptions will be accepted for 200 shares and upward, either by cash in full, with reservation, or by 10 per cent. down and 10 per cent. monthly for 9 months.

The cost is the same either way, but by the installment plan you can reserve a much larger block of stock, and when the price advances, as it will immediately on disposal of this block of stock, you can reap the immediate profit.

Your whole reservation will receive the benefit of every advance in price, even while you are paying for it.

Upon completion of your payments, certificate will be issued for stock purchased. If unable to finish payments, you will receive, upon request, certificate for the amount paid for. Stock now 8 cents per share, par value, $1.00.

A few dollars will start you. Read the following table, then act promptly:

$16.00 buys 200 shares of stock; $1.60 down, $1.60 a month for 9 months.
$32.00 buys 400 shares of stock; $3.20 down, $3.20 a month for 9 months.
$80.00 buys 1000 shares of stock; $8.00 down, $8.00 a month for 9 months.
$160.00 buys 2000 shares of stock; $16.00 down, $16.00 a month for 9 months.
$240.50 buys 3000 shares of stock; $24.05 down, $24.00 a month for 9 months.
$400.00 buys 5000 shares of stock; $40.00 down, $40.00 a month for 9 months.
$800.00 buys 10,000 shares of stock; $80.00 down, $80.00 a month for 9 months.
$1600.00 buys 20,000 shares of stock; $160.00 down, $160.00 a month for 9 months.

Stock fully paid and non-assessable. All stock shares alike. No preferred stock, no bonds.

Property of Fabulous Wealth

HEMMED IN BY PRODUCING MINES

Thousands of dollars expended on shafts and development work show ore runs from 8 to 12 per cent—while a yield of 4 per cent. in Center Creek Mine has produced nearly $7,000,000.
